BRAINS AND PERSONALITY

(Candian National Railways Magazine)

NOT LONG ago I read a report of a speech delivered by an executive of one of our great corporations of which the subject was "brains and personality". It was evidently a good speech, as well it might be with a theme so vital and practical. The great business of life is getting on. We are ever obeying the urge of ambition, ever seeking to do some bigger thing; to attain some higher place; to exercise some greater influence in the realm in which we move, whether that be commerce, finance, science or art, or any other legitimate sphere. This seems a natural, elemental urge, and the question emerges, how to achieve this greater thing? Undoubtedly, these two elements of brains and personality are among if they do not constitute, the requisites for success.

We need not place the one over against the other, because both are needed; rather, the inquiry is how should they be blended and what are their relative values? It is quite evident that the highest success is not always achieved by those who posses the greatest intelligence. I believe it was the Duke of Wellington who, when speaking of the education of boys at one of the public schools of England, said that if sharpening of wits and imparting of knowledge constituted education we might only succeed in making clever devils. Some of the shrewdest and brainiest of men belong to the ranks of the criminal classes, and many a clever man has fallen from his high pinnacle because he lacked this element of personality though equipped in other respects.

What is personality? If one were asked for a definition of it, one would be hard pressed for a specific answer; yet we recognize the thing even when we cannot put into exact words what it is. We know some of the elements, or expressions, of it; but the thing itself defies definition. It includes attractiveness of manner, amiability, courtesy, and many other like qualities but these are only surface indications and may be misleading. The suave man is often detestable, "a man may smile and smile and be a villain.", Uriah Heep was one of Dickens' most contemptible characters because he only simulated humility.

Beneath all characteristics is character—the man, himself—and character is as near as we can get to an understanding of personality. So, we ask what is the relative value of brains and character, and which will carry a man further in the long run, inspire the greatest confidence and insure him the foremost place in the regard of his fellows.

The human element is fundamental to all real or valuable relationships. It must be remembered we are human beings living in association with other human beings, who also have their feelings and susceptibilities, their aims and ambitions. The things that bind men together are these cords, silken but strong, of kindness and good will, which in turn proceed from the inner man. If one were asked what is the greatest element in character, the unhesitating answer, in 90 per cent of cases, would be sincerity or honesty. The sincere man, the man who is genuine through and through, who lives without ulterior motives, upright as a ship's mast, has something that would gain for him that regard without which no permanent success is possible however brainy he may be. Few of us if we were entering into partnership with another, or joining our fortunes with his, in some undertaking would accept Duns, Bradstreets, or brains, or all three as sufficient guarantee of an ideal relationship. We should require something more and that something is character. It frequently happens that one may be lacking in many elements of a genuine personality and yet succeed in impressing himself on his fellows. Napoleon was such a man but Napoleon was the man for a crisis and, apart from his martial exploits, he is not remembered with admiration, because lasting fame cannot be detached from this quality which we have mentioned. Moreover, we are not thinking of the exceptional but of the average man and of life in the average.

The greatest asset, the most potent element in success is personality springing from a genuine character. The man with 75 per cent brain and 25 per cent personality would fail beside the man with 75 per cent personality and 25 per cent brain, and the latter will be a happier man, and happiness, which depends upon the respect and admiration of our fellows is not to be despised.

COMMUNICATION

Editor Tofield Mercury
Dear Sir:—

Quite recently there have been several poultry yards in town and adjacent country raided by night prowlers. I understand several dogs have been mortally wounded [illegible] the crime laid at their door. Still this raiding continues. I have come to the conclusion that those dogs died an innocent death. Probably these dogs were near or in the vicinity of a raided yard the owner of which, naturally thinking he had got the culprit took a shot at it.

We have had the misfortune to have had three of these raids on two occasions killing prize winning poultry. You can overlook the first offence but when it becomes a regular thing 'tis time to take notice. Easter week my neighbor noticed two police dogs worrying our turkeys, my wife was fortunate enough in rescuing one, but one was completely worried. Yesterday morning was the third visit. Hearing a fluttering in the bush at 6 a.m. I got up to find two police dogs among the turkeys having one down and worrying it. I was able to rescue it and it survived towards evening—a sorry looking specimen. Either the owners of these dogs are not aware of the damage they are doing or are indifferent to it. We have the law as a remedy but it is not much help in this case as the difficulty arises in proving the ownership of these dogs. I think it has come to a fine time when you can't leave your premises without you fasten all your stock indoors in case you are paid a visit by these maurading wolves. I have gone to considerable expense in erecting a hog wire fence with three strands of barbed wire on top but evidently it is of no avail against this menace.

The dog originally descended from the wolf and if a dog is allowed to roam the country at large from puppyhood it quickly degenerates back to the wolf stage and natural instinct teaches it to hunt for its existence hence our present trouble. My neighbors each keep dogs, they never molest us in the least, why? Simply because they are trained and kept under control. There is not a greater lover of dogs than I am and have always kept a dog since I can remember but I know where he is night and day. I have yet to shoot my first dog but in future any night prowling chicken stealing apology for a dog on or near my property I shoot on sight and collect the damages later so I hope the owners of these night prowling mongrels will govern themselves accordingly.

Trusting I am not trespassing too much on your valuable space, I beg to remain

Yours faithfully,
J. W. Robinson

RYLEY DEFEATS TOFIELD IN FIRST BALL GAME OF THE SEASON

The first ball game of the season took place at the local diamond when the Ryley team motored up on Tuesday last to play the local intermediate team.

It was a fair exhibition of the summer pastime and the number of fans present were well pleased with the boys showing. Of course it lacked the long hitting of senior baseball, but the hits off the bats of Joe Kallal Ed Hill, Art Francis and Paul Thompson were not so short either. With a few practices under their belts the boys will be capable of playing real good ball.

The game started with Tofield taking the field and Bud Cory doing the mound duty owing to the non arrival of Ed Hill, the regular pitcher.

In their half of the first inning Ryley collected one run and Tofield evened it up in their turn to bat.

In the second inning Ryley with some hitting and Tofield with some loose fielding were able to send three runs across the plate, while the best Tofield could do was collect a goose egg.

From here on it was a ding dong contest, with Ed Hill replacing Bud Cory in the pitcher's box.

In the fifth inning Tofield with a batting rally got three runs in the counting house and things began to look more rosy, but Ryley pulled ahead again in the first of the seventh when they collected two runs while the best Tofield could do was to get one. The game ended with the score standing 6-5 for Tofield.

The fielding features of the game were a one handed shoe string catch by Paul Thompson in right field, also a one handed catch by the Ryley second baseman. This was a good catch the ball going well over second when he made a jump for it and got it.

Laurie Scott umpired the game to the satisfaction of all.

On Thursday night at 6.30 p.m. sharp, the senior ball team will play the intermediate ball team. This game should be well worth going to see as both teams are capable of playing a good brand of ball. It will do us all good to see the old timers in action again. Calvert is getting the old timers in shape and manager Glen Wood is keeping his eye on the intermediates. A collection will be taken.

Progress Of Canada As Seen Through Eyes Of Writer In New York Times

Arthur Eliot Sproule, writing in the New York Times says: "True though it be that we are all undoubtedly getting more and more 'internationally minded,' yet the job is so enormous that, for most of us, only the very biggest foreign events seem able to catch our attention great things like the naval conference in London and the Soviet attitude toward religion, for example.

So true is this that — possibly because our mental eyes get a trifle out of focus by looking at distant objects we are often startled to find how little we are seeing of events that lie under our very noses, as it were.

Take Canada, for example. What do most of us know of this great and growing nation that stretches at our very doors. Its progress fully merits the word "astounding," and yet few Americans know anything about it. For instance:

The port of Halifax has increased its tonnage by 40 per cent. in twelve months. The port of St. John, ranking after Montreal and Vancouver in the amount of traffic handled, but first among Canada's winter ports, has the largest dry dock in the world. Moving west, Quebec produces 85 per cent. of the world's supply of asbestos. Water-power projects are being successfully brought into operation, and other great and far-reaching changes have taken place.

Suppose you were asked to name the greatest port on the Atlantic Coast, after New York—would you immediately answer "Montreal"? Yet it is a fact that the harbor of Montreal, 1,000 miles from the sea, is the second port on the North American Continent, New York only being greater. At Sault Ste. Marie the canals carry more traffic than the Suez Panama and Manchester Ship canals combined.

Winnipeg the centre of the wheat country, has taken on added importance as the headquarters of a new mineral area, and it may well be that in the future the mineral products of the Province of Manitoba will vie for supremacy with the Province's enormous grain resources.

Further west again, Turner Valley, Alberta, has drawn the attention of the world to its potentialities as an oil producer.

On the Pacific Coast, Canada possesses vast wealth, notably in her lumber resources, and there are vast gold mines in the mountains.

Passing to world trade, observe that Canada leads all other nations in the production of newsprint, nickel, asbestos and cobalt. She takes second place in the production of wheat and automobiles, and third place in the output of lead and gold. As an exporter she stands sixth among the nations of the world.

According to recently issued trade statistics for the year 1929, Canada holds fifth place in aggregate import and export trade, second place in export and total trade per capita, third place in favorable trade balance, and second place in favorable trade balance per capita.

There is no need to be wearisome, but it is surely well to face even a few salient facts such as the foregoing. We have quite a neighbor up north!"

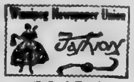
Huge Bridge Nearing Completion

The bridge over the harbor at Sydney, Australia, is nearing completion. The structure, costing $20,000,000, has a span of 1,650 feet, and accommodates a roadway 57 feet wide, four electric tracks and two ten-foot footways. It is estimated that changes in temperature will cause a maximum expansion of 14 inches. The bridge is the world's largest of its type.

Wonder will this reformed calendar they're talking about, be so fixed that a fellow won't get his tax bill just when he's saved up enough money to have the house painted?

"Is your dog of pure breed?"
Wine Merchant: "Of course. Do you think I have poured water into him?"—Pages Gaies, Yverdon.

W. N. U. 1838



(By Eva A. Tingey)

PRETTY HOUSEWEAR

All Tingey models are created in Paris and sketched by her there. The patterns are made and adapted for American women in New York by American patternmakers.

Fashion seldom wavers in her affection for spots. They have so fresh and trim an effect. They are chic, too, and add an air of charm to the simplest of models.

White spots on a blue ground were chosen for this attractive housefrock. The trims were white. The neck line merging into two front pieces on the bodice has a very slimming effect, which is helped still further by the point on the skirt. Slight shaping of the lower skirt section gives grace and free movement.

Other schemes besides spots could, of course, be used for this model. Plaids, checks, stripes and flowered patterns with contrasting trims would all be good. Almost all standard washing cottons are suitable. Washing silks and rayons can also be used.

This pattern may be obtained in sizes 16 to 20 and 34 to 42. It is ready for immediate delivery. It is hand cut.

Pattern price 20 cents. Be sure to fill in size of pattern. Address Pattern Department.

When Motorist Should Rest

No Man Has Right To Drive When He Becomes Drowsy

Although the busy motoring season has just started, the first accident caused by a driver falling asleep at the wheel has been reported. Three New York motorists were injured when a car driven by a man so exhausted that he fell asleep at the wheel went into a ditch.

This is the kind of accident that should never happen. No man has any right to drive a car when he is in such a condition that he is apt to become drowsy. Commonsense should tell any car driver when he is nearing the limit of endurance, and he should then be prepared to sacrifice time for safety by pulling off the highway and sleeping for a sufficient length of time to rest his faculties. It might mean the difference of a few hours in reaching his destination, but on the other hand it might mean the difference between reaching his destination and not reaching it at all.

Many airports are being opened in Chile, which had none a year ago.

Louth, Ireland, has ruled that its municipal dentists must speak Irish.

Large Flock Of Swans Seen

Regina Man Reports Seeing About Eighty At Saskatchewan Beach

An unusually fine sight was witnessed recently by a Regina man, J. G. McKechnie, when from a boat off Saskatchewan Beach he [illegible] a flock of 70 or 80 swans swoop down from the sky and alight on the water near him like a great flotilla of yachts. Mr. McKechnie, though he has lived in the west 28 years, says that never before had he seen any swans at close quarters during the annual migration to or from their Arctic breeding grounds. Yet the swan is by no means uncommon during those periods.

When he noticed the flock first he took the birds for geese, then for pelicans, but as they circled rapidly around in the form of a crescent and alighted practically as one, his doubts were removed as to their being swans. They were about the size of pelicans. None of the birds showed any uneasiness at the presence of the boat, and swam about on the smooth surface of the lake quite unconcernedly.

Mr. McKechnie described the call as "most peculiar, calling and answering each other almost like a dog barking, but hoarser." This raised the question among some of those interested in bird lore as to what species of swans did these migrants belong?

Unless there is indisputable evidence to the contrary, the only swan likely to be seen in these parts, or anywhere else in Canada for that matter, is the whistler. Its larger relative, the magnificent trumpeting swan, is now on the verge of extinction, and few have ever seen it in life. Yet the call heard by Mr. McKechnie did not appear to fit the whistling swan so closely as that ascribed to the trumpeter.

Ornithologists who have been queried on the matter were, however, frankly skeptical, doubting if so many as 70 trumpeting swans existed in all Canada.

Canadian Steamer Was First

Crossed Atlantic In 1833 Without Using Sails

Although some records state the first steamship crossing of the Atlantic was made in 1819, it is believed that a Canadian built ship, sailing from a Canadian port, first made the entire voyage under steam, some years later.

Though occasionally steamers, such ships in the time of 1819, relied almost entirely on sails, [illegible] the ocean, the engine, at a low rate of speed, being used only when [illegible] winds prevailed. This manner of navigating the long distances was a practice for a number of years.

In 1833, the "Royal William," of 150 horse-power, and 1,000 burden, was built at Three Rivers, Que., on the Lower St. Lawrence, for the purpose of plying between Nova Scotia and Cowes, Isle of Wight. She is believed to be the first ship to make the entire voyage across the Atlantic by steam. The occasion marked a new era in trans-oceanic communication, introducing a more powerful and faster class of boat, relying on the use of steam for motive power.

Or Fairly Good

Top windshield is cracked on left side; windshield is scratched where wiper has been, right headlight glass broken; left fender is split; right front wheel is sprung and wobbles, stolen night of February 12. Reward if returned in good condition.

Colorado Grain Growers Coming To Exhibition

Will Be Well Represented When 1932 Show Opens

The growers of San Luis Valley, Colorado, U.S.A., will be well represented at the World's Grain Exhibition, at Regina, 1932, according to reported activities of the Farm Bureau Federation. Among other plans for the improvement of crops the bureau will give special attention to weed control, the securing of pure seed and the "preparation of a valley-wide exhibit at the World's Seed Show, Regina, Canada, in 1932."

The States of Montana will also be represented according to a letter received at exhibition headquarters from A. H. Stafford, commissioner, Department of Agriculture. Mr. Stafford says, "It is the plan of this department to prepare and exhibit grain at your conference in 1932. Will you kindly forward to us at this time detailed instructions as to the requirements for establishing such relations with you.

Filling Large Order

Vancouver Lumber Mills Working Overtime To Produce Shingles

Lumber mills in Vancouver are working night and day on the production of 400,000 giant red cedar shingles to cover the 151,000 square feet of roof on the Log Lodge Hotel at Lucerne-in-Quebec. The order, placed by the Lucerne-in-Quebec Community Association, Limited, with Alexander Murray Limited of Montreal, is said to be the largest single purchase of hand split shingles in the history of the lumber industry.

"There, now," said the suburbanite to his wife, "you've ordered flower seeds that take two years to bloom."

"Well, that's where you're all wrong," she said. "This is last year's catalogue."

It is estimated that in Chicago one marriage out of every five ends in divorce. We may be wrong, of course, but we have a feeling that the other four end in early widowhood.

At least one in every five persons in Germany now has a savings bank account.

Canadian Forest Growth Could Be Stimulated By Scientific Management

An estimate of the total forest production of Canada for 1928 has just been completed by the forest products branch of the Dominion Bureau of Statistics. The estimate includes all the products of operations in the woods, the unmanufactured materials cut in Canadian forests during the year.

An estimate has also been made of the extent to which the forests are being depleted annually in the process of exploiting these materials. For this purpose converting factors based on actual measurements have been used. Each of these factors represents in cubic feet the quantity of standing timber that must be cut in the forest in order to produce one unit of the material in question, based on the total cubic contents of the tree. By the use of these factors it has been estimated that the total forest production of 1928 involved the cutting of 2,988,026,430 cubic feet of standing timber. This constitutes only the annual depletion for use and to it must be added the volume of material annually destroyed by fire which exceeds 900,000,000 cubic feet of merchantable timber and young growth on 1,200,000 acres. Insects and fungi destroy annually at least 800,000,000 cubic feet to the annual drain on the forest resources of considerably more than 4,788,000,000 cubic feet.

A total depletion of 4,788,000,000 cubic feet per annum does not necessarily imply that the total resources are reduced by that amount every year and the supply will therefore be exhausted in forty-seven years. Estimating the probable duration of supply of forest products is not a matter of simple arithmetic. The rate of utilization is far from constant. It tends to increase with the discovery of new uses for wood, the increase in population and the increase in the demand for forest products from other countries whose supplies have been reduced to a greater extent than Canada's.

On the other hand, there is a steady increase in volume taking place in all healthy stands of timber due to annual growth. By the application of scientific forest management this annual growth can be stimulated and could be made to take place over the entire area of potential forest land, it is believed.

Convenience in the Poultry House

Work Should Be Made As Easy As Possible

When building a poultry house it is a matter of importance to see to it that it is not only located at a point easy to reach, but also that it shall be so arranged that the work of attending to the birds be made as easy as possible. The more convenient it is to do the work about the poultry house the surer it is that it will be done.

As the women of the farm usually look after the poultry, the work should be made as easy as possible. If the distance to be covered in going back and forth to the poultry house is twice as far as it need be the amount of extra walking thus involved may have the effect of adding drudgery to the task. The new bulletin No. 122, of the Department of Agriculture, at Ottawa, "Poultry House Construction," goes fully into the question of planning, and makes the observation that not only should the house be accessible but the internal arrangement ought to be such that the work may be done with the least amount of labor. Among other suggested conveniences is the gate that swings both ways. The feeder may be carrying two pails of water or feed, a gate that swings either way may be opened without stopping to set down the pails. A barrow load of gravel, or the laying of a plank will enable one to pass over a wet place dry-shod.

Another recommendation is the providing of a feed box in which supplies may be kept close to where they are needed. In poultry keeping, as in other farm work, labor is an important item, and in the building and equipping of a poultry house every consideration should be given to means that may be taken to reduce labor.

Land In Good Shape

Irrigated Area In Southern Alberta In Fine Condition

Irrigation carried out during 1929 was the biggest in the history of Southern Alberta, and as a consequence the land is in fine condition now, according to P. J. Jennings, supervisor of irrigation in the Calgary district office of the Dominion Water Power and Reclamation Branch. "Without exception, all the large irrigation projects in Southern Alberta used large quantities of water last fall," he said, "and in consequence their irrigated lands were in good condition this spring."

Feed As They Go

Many of the birds that migrate by day travel slowly and feed as they go along. The cliff swallow is said to average twenty-five miles a day for the first twenty days of its two thousand, five hundred mile flight from winter to summer home and increases this to sixty miles a day at the end of the journey, doubtless feeding to a greater extent during the early stages of the trip.

"The spelling books of fifty years ago wur the best," writes an old-timer to the Toronto Globe. "The yung folks of today don't know how to spel."

Preparing To Ship Fish By Airplane

Commercial Air Lines Around Great Lakes Will Speed Up Transportation

Other than flying fish will soon take to the air in changing their habitat from the Great Lakes to American cities.

Commercial air lines around the Great Lakes, both in Canada and the United States, are preparing to transport whitefish, pickerel and other edible varieties of fish, from the shores of the Great Lakes to the railhead for quick shipment.

It is said that the movement of fish from inland lakes to railway contact by air has been successfully and economically accomplished in other localities and since the greatest industry of the great northwest is fishing, this outcome is anticipated.

Seeking Information

"John," said Mrs. Dumbbell, "it says here the Russians and Chinese exchanged shots."

"Well," he grumbled, "what of it?"

"Well," she replied, "if they are friendly enough to exchange things with each other the war over there can't be very serious, can it?"

Foreman—"Well, everything all right?"

Night Watchman—"Yes. I have not done so bad for the first night. I've checked everything off, and there's only one thing missing — the steam roller."

"The doctor told me that people either die of my complaint or become idiots."

"Doctors don't always know. You have not died."—Pages Gaies, Yverdon.

PRESS DELEGATES FROM "DOWN UNDER"

Members of the New Zealand delegation to the Fourth Imperial Press Conference, to be held in London, England, in June, are shown photographed in Victoria, B.C., with members of the City Council, who tendered an official welcome to them. In the centre of the front row is Mayor Anscombe, who officiated at the civic luncheon in honor of the visitors, who were also entertained to dinner by the Government of British Columbia, with Premier Tolmie presiding. The New Zealanders are crossing Canada by Canadian Pacific lines and will sail from Montreal on the "Duchess of Bedford," on May 16.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? They indicate a torpid liver. Headache, Dizziness and Biliousness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills.

They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains; unpleasant after effect following; on the contrary a good tonic. All Druggists 25c and 75c red pkgs.

WORLD HAPPENINGS BRIEFLY TOLD

Sale of the Crown jewels of the Ottoman empire valued at $300,000,000 was forecast to raise money to [illegible].

A movement is under way to make the Watertown, N.Y., airport an official port of entry for Canada. At present pilots must fly to Malone to obtain clearance papers.

A protocol putting into effect the Young Plan has been signed at the French foreign office by Premier Briand, and the foreign ministers of Great Britain, Italy and Belgium.

Captain C. D. Barnard, pilot of the 'plane in which the Duchess of Bedford flew to Capetown, South Africa, and return, is planning to fly around the world in 30 days.

All school uniforms throughout [illegible] native cloth in order to encourage home industry, according to a circular order of the Ministry of Education.

The Montreal Star says on good authority that a representative British, Canadian and United States group is negotiating to purchase Labrador for $100,000,000. The proposal will be submitted shortly.

An order-in-council issued by the Department of Agriculture, under the authority of the animal contagious diseases act, prohibits the importation into Canada of parrots, parrakeets, cockatoos, macaws, lories, and love birds.

It is learned in Tokio that at London, England, a contract has been concluded with British and United States bankers for a bond issue of approximately 250,000,000 yen (nearly $125,000,000) to convert a loan falling due in 1931. United States and Britain were said to be about equal.

Installation of radio-beacons to facilitate night flying is expected at Forest, Manitoba, Regina, Saskatchewan, Morse and Bassano, Alberta, according to an announcement made by Inspector D. McLean, of the Civil Aviation branch. With the installation of these beacons night flying under all weather conditions will be possible.

Business Is Growing

Deep-sea arrivals at the Port of New Westminster during March numbered 23 vessels compared with 17 in March 1929. During the first three months of the year 60 deep-sea vessels with a gross tonnage of 343,463 registered inwards at New Westminster compared with 48 vessels of a gross tonnage of 266,017 during the similar quarter of 1929.

[illegible]

The Mohammedan Law

Egyptian Judge Rules Women Do Not Have To Be Educated

Girls having equal opportunity with their brothers for a public school and even a college education, should be thankful they live in a country of religious liberty, says a newspaper writer.

A mother in Cairo, Egypt, petitioned the court for an order compelling her husband to make financial provision for their daughter's education. The judge declined to issue the order on the grounds that Mohammedan law does not require a Moslem to educate the women of his family, and adds as his personal opinion that women should not be educated.

The Cairo judge, who places mental subjection, the most abject form of slavery, on a sex basis, would find himself sitting on a keg of dynamite instead of a bench in lands of growing sex equality.

The ideal state is the one in which opportunity for public service would be limited only by the ability of the individual to perform such service.

Miss Constance A. Harvey of Buffalo, newly appointed foreign service officer is assigned to Ottawa as American vice-consul. Miss Harvey received her appointment as the result of an examination which inquired into the matter of mental fitness, not of physical conformation.

FRILLS AND FURBELOWS

All Tingey models are created in Paris and sketched by her there. The patterns are made and adapted for American women in New York by American patternmakers.

Even though we won't go back (it is to be hoped) to trailing them in the mud, we have returned to a certain swishiness about the ends of our skirts. And it's really rather lovely to be able to flounce about, don't you think?

Here's a lovely little frock with a heap of jauntiness to finish it. It can be belted where you please, too, natural line or lower.

Midnight blue moire was chosen for this model, with dainty collar and cuffs of cream lace. The frills were picot-edged.

Marocain, satin, crepe de chine, georgette, besides numerous printed effects could be chosen for this model. If the model is preferred without collar and cuffs, the V-neck can be finished with a bow of self material.

This pattern may be obtained in sizes 16 to 20 and 34 to 42. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Five Powers Sign Reparations Plan

Commission Disappears and World Bank Will Soon Be In Action

The Young plan for payment of reparations, reducing Germany's obligations for damages caused during the world war from something like $25,000,000,000 to about $9,000,000,000, has gone into effect.

A protocol registering the decision of The Hague conference, which adopted the plan January 2, was signed by the ambassadors of Great Britain, France, Belgium, Italy and the French Minister of Foreign Affairs, after a tea served by the French Foreign Minister, Aristide Briand.

The first consequence of this act, which modifies for a second time the reparations machinery provided by the Versailles treaty, will be the disappearance of the reparations commission which, in co-operation with other bodies, has taken charge of payments under the Dawes plan.

The second will be the beginning of functioning by the bank for international settlement at Basel, Switzerland.

The third will be the issuance of $300,000,000 in reparations bonds, two-thirds of that going to creditor nations and the other third to Germany for internal requirements.

Two Tested Recipes For Salad Dressings

Now that salads are the order of the day, really good recipes for salad dressings will be welcomed. A salad is often made or marred by the [illegible] of the dressing used, so these tested recipes are very desirable. Since some prefer an uncooked dressing and others a cooked dressing, we give two recipes, both of which we know will please.

SALAD DRESSING (Uncooked)

Two eggs beaten until light; ½ teaspoon salt; ½ teaspoon mustard; ½ can Eagle Brand Condensed Milk; ½ cup vinegar. Beat the first four ingredients vigorously for a few minutes, add the vinegar, stir well and set aside for a few hours to thicken. Excellent for fruit or vegetable salad. Will keep for weeks. For Russian dressing add Chili sauce to taste.

SALAD DRESSING (Cooked)

Half a tablespoon salt; 1 teaspoon mustard, 1 tablespoon flour; 1 tablespoon butter, ½ cup Eagle Brand Condensed Milk; ½ cup water; ½ cup vinegar, 1 egg. Mix dry ingredients, add slightly beaten egg, butter, milk, water and vinegar. Cook until thickened. Strain and cool. Whipped Borden's St. Charles Evaporated Milk, or cream, may be added before serving if desired. Yield, 1 cupful.

"If, as you admit, you were three miles away digging potatoes when this man was arrested for speeding, how can you testify that the car was going at the most only 20 miles an hour?"

"Judge, Ah used to own that car!"

Children of London recently attended a lecture on the home life of ancient Egypt and were shown balls and rattles which amused Egyptian babies of 2000 B.C.

Colombia exported 2,868,171 bags of coffee last year.

Coffee is made under heavy steam pressure in a French inventor's pot.

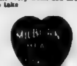
To go forward is important; to go straight is more important.

PALPITATION

Throbbing of Heart After the "Flu"

Mrs. J. Cunningham, Sault Ste. Marie, Ont., writes:—"Last February I had a severe attack of influenza which left me with palpitation and throbbing of the heart.

"I felt very weak and tired so began to take



and used about six boxes and have found them help me a great deal, and am very thankful for having found such a good medicine."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Rewarded By Admiralty

Englishwoman Gave Valuable Information Regarding Movements Of Enemy Ships

A woman who sat for four hours by her telephone transmitting to Admiral Sturdee information which [illegible] proved of great importance, in the Battle of the Falkland Islands, arrived in London, England, recently, with her husband.

She is Mrs. Creamer, formerly Mrs. R. B. Felton, the daughter of an English producer, who settled in the islands, which are about two hundred and fifty miles from the Mainland of South America.

Mr. Creamer told a press representative the story of his wife's presence of mind and initiative which resulted in the sinking of three German ships, and earned for her a silver salver, which was presented by the Admiralty, and the Order of the British Empire.

"On December 8, 1914," Mr. Creamer said, "my wife was at home, in her farmstead, at Fitzroy, with her three children, two maids, and a boy servant. Her maids reported to her that they had seen from a hill nearby three German ships making for Fitzroy.

"Two of these were the Baden and Santa Isabel. The third vessel is believed to have been the Seidlitz — either a hospital ship or a transport.

"She immediately ordered the maids to saddle two horses, and to ride in relays to the top of the hill, and report to her every few minutes the ships' movements. Meanwhile, she telephoned to the authorities, at Stanley, and her reports were [illegible] to Admiral Sturdee.

"She sat there for four hours, with her baby boy in her arms, while her messages directed the movements of 'Bristol' and of the armed liner 'Macedonia,' which set out in pursuit of the Germans.

"The enemy tried to steam at full speed, for safety, but the information which reached Admiral Sturdee, minute by minute, enabled the British to follow them. In a few hours, the 'Bristol' and the 'Macedonia' had caught and sunk the ships."

Rivalry In Building

Plans Are Frequently Changed After Construction Has Started

The race to see which country shall build the largest ocean liner suggests the competition in New York to erect the highest skyscraper. It is known that plans for some of the tall structures that are now changing the Manhattan skyline, were successively altered, even after construction had begun, in the light of news of competitors' intentions.

According to word from London, the White Star Line has adopted an entirely new set of designs for its giant "Oceanic," which is to be of 65,000 instead of 60,000 tons, as originally planned. It will be the world's first 1,000-foot vessel. The "Majestic," now the longest, is 915 feet. The "Leviathan" is 907, but the "Leviathans II. and III.," to be built by the United States Lines, will be 945.

Proved Her Greatness

Late Emmeline Pankhurst Was Martyr To Good Cause

What remains unforgettable is that in her own person Emmeline Pankhurst bore the burden of a martyrdom that would be incredible to us today if we failed to realize that it happened in another world because she helped to make it so. Whether she addressed thousands from the platform or led twelve women into the horrors of Parliament Square, whether she marched at the head of a procession five miles long, or fought single-handed in the dark solitude of her prison cell, she gave always that impression of greatness which is inseparable from possession of unshakable conviction and invincible courage, and which makes the martyr of all the ages.

She—"Now that we're engaged, dear, you'll give me a ring, won't you?"

He—"Yes, certainly, darling. Er—what's your number?"

At a rough estimate the animals in the London Zoo represent a total value of about $175,000, the Indian rhinoceros being one of the most valuable, costing more than $5,000.

Silver fox farming is being introduced into Norway.

Hawaii has practically no unemployment.

The automobile speed record in 1900 was about 60 miles an hour.

Nearly 2,000,000 tons of rice were produced in Manchuria last year.

Crickets hear with their elbows.

SUNDAY SCHOOL LESSON

MAY 25

JESUS DESCRIBES THE FUTURE OF THE KINGDOM

Golden Text: "Take ye heed, watch and pray, for ye know not when the time is." Mark 13.33.

Lesson: Matthew 24.1 to 25.13.

Devotional Reading: Isaiah 55.1-3, 6-8.

Explanations and Comments

The Parable Of the Wise and Foolish Virgins, 25.7-13.—The Kingdom of Heaven Jesus likened to ten virgins who went forth with [illegible] to meet the bridegroom. Five of [illegible] were wise (prudent), and carried oil in their oil vessels, but five were foolish (imprudent), and took no extra supply of oil.

While the bridegroom tarried they all slept. There is no hint of reproach in this statement: the bridegroom might tarry a long time. Midnight came, and the approach of the bridegroom was announced. All the virgins arose and trimmed their lamps [illegible] to going forth to meet [illegible]. The foolish ones then found their lamps were going out, and begged the wise ones to share with them their oil. But the wise virgins refused lest there might not be enough for them all, and counseled them to go out and buy oil.

While the foolish virgins went forth to buy their oil the bridegroom came; those that were ready went in with him to the marriage feast, and the door was shut.

A little later the foolish virgins arrived and [illegible] to have the door opened. "Verily I say unto you, I know you not," was the only answer they received.

Watch, therefore, for ye know not the day nor the hour. Be not found unprepared. "It is not enough to have a lively zeal for a while: we must have, in addition, a perseverance that never [illegible]."—Calvin.

A Growing Industry

Production From Inland Fisheries In Manitoba Shows Great Gain

While agriculture, the basic industry of Manitoba, together with manufacturing, mining, and other industries has advanced substantially in the province in recent years, the production from the inland fisheries has probably shown the greatest gain. In the past five years the fisheries production has increased more than 100 per cent. In 1924 the market value of the fish caught in Lake Winnipeg, Manitoba, Winnipegosis and other lakes was $1,232,000, while last year it was $2,634,000. In 1929 the commercial fishermen of the province caught 33,000,000 pounds of fish, a record for Manitoba, with a marketed value of $2,634,000.

Vancouver Port Busy

Commercial shipping entering the Port of Vancouver during March showed marked activity, the net tonnage being about a million. The movement showed 1,940 arrivals with a tonnage of 966,366. Deep sea arrivals totalled 108, with a net tonnage of 608,036.

Summer COLDS

Almost everybody knows how Aspirin tablets break up a cold—but why not prevent it? Take a tablet or two when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions in every package for headaches, pain, etc.

A Lucky Catch

Sentry Receives $20,000 For Saving Life Of Prince At Belgrade

One of King Alexander's gigantic guardsmen recently was given an indefinite leave of absence after [illegible] a reward of 100,000 dinars (nearly $20,000), for having quite inadvertently saved the life of the 3-year-old Prince Tomislav, the second son of the King.

The Prince was playing in the apartments of his mother, Queen Marie, on the [illegible] of the palace, at Belgrade, when [illegible] he fell from a window. The sentry, who was passing at the moment, received the full weight of the child on his shoulders. The Prince clutched the sentry around the neck and slid to the ground unhurt, but the burly guardsman was knocked unconscious and crumpled to the ground.

Poultry Going To England

A trio of Brandon birds, having high egg production records, have been shipped to Ottawa to be trained and fitted for upholding Manitoba's reputation for high production poultry at the Crystal Palace, Sydenham, England, when the fourth world's poultry congress assembles poultry leaders from all parts of the world next July.

One-sixth of the world's supply of coal is lying almost dormant in Alberta, Canada.

The World's Hottest Mines

The Mines Of Malayan Peninsula Lie Close To Equator

St. John Wright, in an article in the London Daily Mail, says:—Stretched up and down Malaya, from Siam to within a few miles of the Equator are the hottest mines in the world: they are the tin mines of Malayan Peninsula, and they represent a large part of the Empire's mineral wealth in the Far East.

The mines and the ore is found in a variety of ways even within the same square mile—are the most fascinating in the world. So interesting and so picturesque are some of the methods of tin-winning and so beautiful are the environments that one tourist agency in Singapore now offers to whisk its clients round one or two tin mines while they are in Malaya. But visitors, on the whole, are few, the heat even on these winter days effectively protects the secrets of the mines.

The quickest and most efficient means of tin mining today is dredging. There is something hypnotic about watching the buckets ceaselessly rise from the warm yellowish water. Often they bring up things other than clay — trunks of trees, relics from another jungle long buried, and often a snake.

It is mostly at night, when the dredge whirrs and sighs in a blaze of searchlights, that the snakes come aboard. Grey-black cobras, pythons, bright green snakes, and snakes that glisten like the moon — the last horrible but harmless. Only the night before a sleepy python had suddenly found himself suspended over two buckets and being carried swiftly upwards. Chinese coolies had half killed and skinned him before he realized what had happened.

Hot though it is under the corrugated iron roof of the dredge, this is as a breath of Everest compared with the interior depths of a lode mine. Even the Chinese coolie, the hardest worker in the world and the strongest, can only bear the incredible heat of these deep mines—there are not many in Malaya—for a few months.

Oh, they are beautiful to look upon, these tin mines of Malaya. There is no smoke, no dust, nor dirt.

Tropical wild flowers and flowering trees blaze round the top of this particular mine. Round it all the jungle pressed, waiting perhaps for man to cease his endeavor here, so that it might once more people the little clearing with its greatest extravagances. The last thing I remember seeing before the cage descended was a tendril of orchids and one great yellow flower, slashed with scarlet like a painted face.

There are pleasanter ways of tin-winning than deep mining. The coolie gathers the ore by playing a monitor—really a majestic kind of garden hose — on to a cliff of tin-bearing ground. A jet of water, at a pressure of 200 pounds or more, smashes the ground away like artillery.

Artillery indeed it is, for not many nights ago one coolie playing the monitor against the cliff saw two the right. Only one inhabitant of the greenish eyes regarding him from jungle had eyes like that, the coolie knew, and more in terror than in judgment he turned the "hose" on to the eyes. There was a roar, and silence. In the morning they found the lacerated body of a tiger, so broken that even his skin was valueless.

READ OF A CASE LIKE HER OWN

Decided to take Lydia E. Pinkham's Vegetable Compound

Moncton, New Brunswick—"Before my last baby was born I was very weak, nervous and discouraged. I saw an advertisement in the paper about a woman who had been like me so I bought a bottle of Lydia E. Pinkham's Vegetable Compound. I took three bottles and it carried me safely through that critical time. I have three children to care for and I feel well and strong. I have told two other women about your medicine."—Mrs. [illegible], 82 Albert Street, Moncton, New Brunswick.

Carry Blind Persons Free

British Railways Continue Concession Made a Year Ago

The National Institute for the Blind has been notified that the British Railway companies intend to continue the concession made a year ago to blind persons travelling over any part of their combined system. It was agreed then that any blind person travelling on business and accompanied by a guide might obtain two tickets for the price of one.

Comment has been made on the honest manner in which the concession has been treated. During the whole period in which it has been in operation no case has occurred of anyone attempting to make improper use of the privilege.

American household electrical refrigerators are becoming popular in Paris.

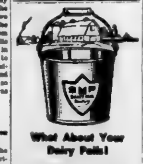
No More a Novelty

New York Skyscrapers So Numerous They Have Lost Their Grandeur

The Chrysler Building is an architectural paradox if ever there was one. Although it's the loftiest pinnacle in the city, it's pretty hard to see it now that it's up. We've been so close to it, we could almost reach out and kick it, without being able actually to see it. From the Bronx it stands out plain enough, but from mid town it often just isn't to be found. Skyscrapers (it comes down to this) are gradually nullifying each other's grandeur. It's just like getting a lot of giraffes together in a room. Of course, a few of New York's buildings stand out by reason of their unique location—it's certainly no trick to see the New York Central Building, but who wants to? Then there's that squeaky old temple, the Flatiron Building, with its twenty stories it is still one of the most obvious structures in town and still the pride and joy of out-of-towners who do the city from a bus-top.—The New Yorker.

A Family Affair

One family has been giving medical service to South Ryegate, Vermont, for 82 years. Dr. John Brock Darling started practice in South Ryegate, in 1848. His son, Dr. George W. Darling, succeeded him in 1882, and still serves.



What About Your Dairy Pails!

SMP DAIRY PAILS

An Unusual Coincidence

Sailor Sends Story Cast Into Sea After Reaching Home Port

A story of hatred, sudden fighting and death on the high seas on board a freighter bound from New Orleans to Brazil, was carried in a bottle from the Carribean Sea to Provincetown, Mass., where it was picked up by Douglas H. Shepherd, keeper of the Wood End Lighthouse there and forwarded to the Seamen's Church Institute in New York.

Here, 16 months later, the man who threw the bottle into the sea, when he feared he would never reach port again, found his message waiting for him in a letter from the keeper, who found it.

Seaman Larry Kimmons, 28, shipped as oiler on the freighter when it left New Orleans in September, 1928. The crew was a mixture of Filipinos, Rumanians and Japanese, which got on none too well together. When the ship was 1,400 miles off the coast of Brazil a Rumanian fireman attacked the chief engineer with a red hot burner and the chief defended himself with a monkey wrench. He killed the fireman, but died from burns. Feeling ran high, the food was confiscated and Kimmons felt he might not see port again.

He wrote a message, giving his name, the name of the ship and his address at the Seamen's Church Institute, saying the ship was in trouble, put it in a bottle and dropped it overboard. A week or so ago, when he called at the Institute he found the message.

New Book Contains Some Startling Ideas

Lord Birkenhead Sees Many Revolutions In Hundred Years' Time

Fantastic predictions of 600 horsepower in a fountain pen reservoir, beef steak grown by the ton; one weeks' work to three weeks leisure for all, and of the complete abolishment of marriage and of other equally startling revolutions to come about in a hundred years' time, are made by the Earl of Birkenhead, in a book "The World Of 2030."

Other predictions relate to technical improvements in television and radio. Lord Birkenhead thinks that parliamentary debates will be heard by everybody and will end in a "national vote" by all the electors within 20 minutes, like a parliamentary "division." Agriculture will be superseded by food made by chemists. Every town and village will be feeding itself for beef steak will be grown by the ton in local laboratories, synthetic bread, sugar and vegetables will be cheaper than water.

CRYING BABIES ARE SICKLY BABIES

The well child does not cry — it is only the sickly baby who cries. The well child is laughing and happy. Baby's cry of distress is his way of telling his mother or nurse that he is ill. Therefore, if your baby cries do not delay in looking for the trouble.

Baby's Own Tablets are a safe and efficient remedy for childhood ailments. They are a mild but thorough laxative which through their action on the stomach and bowels banish constipation and indigestion, break up colds and simple fevers and promote healthful sleep. They will make baby happy and keep him happy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Prince Knows Empire Well

Completed Ninth Tour When He Returned From South Africa

On descending from the sky into Windsor Great Park, the Prince of Wales had completed the ninth of his foreign and Empire tours. In 1919, just after the war, he came to Canada and the United States. In 1920, he went to Australia; in 1921-22 to India and Japan; in 1923 to Canada again; in 1924 to the United States; in 1925 to Africa and South America; in 1927 to Canada; and in 1928-29 to Africa, the last trip being cut short by the King's illness and completed this year. In this last trip he has traversed Africa from Cape Town to Cairo. He is the most travelled of Princes, the most travelled of world citizens. He has seen more of the earth-girdling Empire, over which he will one day rule, than any of his future subjects. Which is as it should be, for under the British constitution the King and Emperor who is well informed regarding his wide-spread domains is often able to offer wise advice to his ministers.

A composer has written a song for pedestrians. But it will be a long time before composers nowadays can hope to excel Chopin's famous funeral piece.

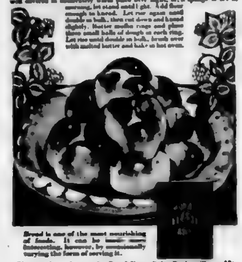
Minard's Checks Falling Hair.

Clover Leaf Rolls made with ROYAL YEAST CAKES are a Delightful Change

Try this recipe:

1 Royal Yeast Cake dissolved in one-half cup lukewarm water.
1 teaspoon salt
1 tablespoon sugar
1½ cups flour
1½ cups scalded milk
½ cup butter

Pour the scalded milk over the sugar, salt and butter. When cooled to lukewarm add the dissolved yeast and one and one-half cups flour. Allow to stand well covered in moderately warm place over night, or, if sponge is set in morning, let stand until light. Add flour enough to knead. Let rise again until double in bulk, then cut down and knead slightly. Butter muffin rings and place three small balls of dough in each ring. Let rise until double in bulk, brush over with melted butter and bake in hot oven.



Bread is one of the most nourishing of foods. It can be made more interesting, however, by occasionally varying the form of serving it.

If you bake at home, the Royal Yeast Bake Book will provide you with many practical tested recipes for all kinds of home-made breads. It will be mailed—free—on request.

Little Helps For This Week

"Behold I stand at the door and knock."—Revelations iii. 20.

Open the door with shame if you have sinned

If you be sorry, open it with sighs;
Albeit the place be bare for poverty,
And comfortless for lack of plenishing,
Be not abashed for that, but open it,
And take Him in that comes to sup with thee.

No power—not even that of God Himself—can open that door from the outside. Only the soul itself can open itself. But if, with perfect simplicity and unaffectedness, any one of us is able to just put aside the bolt of his own wilfulness and open his door and say, "Almighty God, come in to me. Spirit of Christ, be Thou my Guest. Father, I have sinned, forgive me," then it is as if the sharper days of winter were melting into the approaching spring, and as if one of us came down some morning in his heated house, and should throw his door open to the gentle air, and there should flow in upon him the milder freshness and the purer fragrance of a renewing and reviving world. — Francis G. Peabody.

United States laws may have teeth in them, but as a contemporary sees it the impression grows that they are false teeth-plates that can be taken out whenever wealthy folk are due to be bitten.

Ever since the first United States census was taken, there have been more men than women in the United States.

A Brave Little Traveller

Little Jean Baxter recently appeared on the White Star liner "Albertic," bound for Halifax, with the following label attached to her coat: "My age is 3 years. My mother is dead, and I am going out to my daddy in Saskatoon. I am travelling alone, so please be good to me."

"So Skinny Shamed In Bathing Suit. Gained 15 Lbs."

"Gained 15 lbs. taking Ironized Yeast. Was always ashamed to wear bathing suit but now I can and not feel too skinny." — Eulah Lanningham.

Thousands write of 5 to 15 lbs. gained in 3 weeks with Ironized Yeast. Bony limbs round out. Ugly hollows fill in. Blemished skin gets clear and rosy like magic. Nervousness, indigestion, constipation disappear overnight. Sound sleep. New health and pep from very first day.

Two great tonics in one — special weight-building Malt Yeast and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in ½ time.

So quit being ashamed of skinniness, sallow skin. Get Ironized Yeast from druggist today. Feel great tomorrow. Money back from manufacturer if not delighted with quick results.

The younger generation quickly loses all interest, and gets rid of the capital as well.

An American-financed line in Brazil is adding more planes to its fleet.

The upsets of Children

All children are subject to little upsets. They come at unexpected times. They seem twice as serious in the dead of night. But there's one form of comfort on which a mother can always rely; good old Castoria. This pure vegetable preparation can't harm the tiniest infant. Yet mild as it is, it soothes a restless, fretful baby like nothing else. Its quick relief soon sees the youngster comfortable once more, back to sleep. Even an attack of colic, or diarrhea, yields to the soothing influence of Castoria.

Keep Castoria in mind, and keep a bottle in the house—always. Give a few drops to any child whose tongue is coated, or whose breath is bad. Continue with Castoria until the child is grown! Every drugstore has Castoria; the genuine has Chas. H. Fletcher's signature on the wrapper.

Ketchamoot Items

The wheat fields are all showing green, some oats having been sown. The high winds the last few days have been playing havoc with the fires. A good rain is very badly needed.

Master Simmons Mitchell was the lucky winner from our district to get one of the Eastman cameras donated to the children twelve years old by the Eastman company.

Mrs. Youens of Edmonton visited over Friday and Saturday with her brother Mr. W. A. Mitchell and family last week.

Mr. and Mrs. O. Barrows and son Ralph and Miss Bessie Barrows motored to Edmonton Saturday of last week returning home in the evening.

Mr. and Mrs. L. Carlisle were city visitors on Thursday.

Miss Sophie Brown and Mr. Fortment, of Bawlf were guests of Miss Brown's grandmother Mrs. E. McMullen on Sunday.

Mr. and Mrs. Roy Flemings and family of near Kingman visited Mr. and Mrs. Herman Lawes and family after services on Sunday.

Mr. Joe Sutton is visiting at the Welch home at Rabbit Hill.

Mother's Day Services were held on Sunday at eleven o'clock. The congregation was so large there was not enough seats to accommodate the people. Artificial and cut flowers were used for the occasion. Mrs. Carlisle as superintendant of the Sunday School was leader. Besides the special Mothers' Day program, Rev. Gordon delivered the Mothers' Day Message. Miss Fawcett read an interesting story on "The Perfect Picture." Mrs. H. Lawes, Mrs. J. Brown, Rev. Gordon and Mr. George Cookson rendered a quartette.

We are sorry to hear that Mrs. Whitaker of Woodlawn was taken to an Edmonton hospital last week.

Mrs. Sears entertained the M. A. S. at her home Wednesday afternoon of last week. A very good attendance was present considering the time of the year, twelve members and seven visitors being present. These were Mr. and Mrs. Geo. Cookson, Mrs. Davison, Mrs. Barnes, Mrs. Coombes, Mrs. Roy Lee and Miss Fawcett.

Bardo

Mr. and Mrs. P. Bjornson, of Camrose, visited with Mr. and Mrs. Bjornson's parents, a few days last week.

A mother's day program was held under the auspices of the Y. P. S. in the afternoon of Sunday last. The program consisted of appropriate songs and recitations. Professor Ronning of Camrose gave a very interesting talk.

Quite a number of people of Bardo attended the Mother's Day program at Amisk Creek in the evening.

The Bardo U. F. A. held a meeting last Friday to elect delegates to attend the convention at Vegreville on Saturday. Messrs. M. B. Ness, I. Fjeang and I. Moen were elected. Messrs. A. Steen, B. Anderson, G. Hendrickson and B. Finseth also attended the convention.

Messrs. G. Hendrickson, P. H. Anderson and M. B. Ness were business visitors to Czar last week.

We were very shocked to hear of the death of Mrs. Yoder on Friday morning. Our deepest sympathy is extended.

Sunday school commenced on Sunday morning.

Mr. and Mrs. C. M. Finseth and family and Mrs. Jevning and son were visitors at Ryley last Saturday.

Lindbrook

The dry weather still continues. Its true that we have had a sprinkle or two but nothing to amount to anything. Water for the stock is quite a problem here most sloughs being dry and those that have water in are treacherous and there's few around here that haven't had something bogged. Mr. Emil Gosbault had the misfortune to lose one of his best horses this way.

Walter Lindgren has been operated on in an Edmonton hospital for appendicitis and as we hear progressing favorably. It seems it was quite a sudden attack in fact came on whilst he was at school, on being questioned by his teacher, Miss Spondo, as to symptoms, the teacher having been a victim of that complaint recognized the symptoms and dispatched his sister Viola to inform his father, Mr. Otto Lindgren who immediately rushed him in to Dr. Law who took him to Edmonton where he was operated on the next day. We hope he will be out as soon as possible.

Mrs. A. E. Silversides returned home last week after a visit to Edmonton.

Mr. S. Lamb is moving this week to Wasetenam, 60 miles north of Tofield but still has his country and town houses here; so if it rains and things pick up around we may see him back yet.

Mrs. E. Hooper, Mrs. Ross Richards and daughter and Messrs D. and R. Hooper visited relatives here this week.

Visitors to the city this week include Mr. and Mrs. A. K. Hicks, Mr. Silversides, Mr. and Mrs. Hooper and Mr. P. Holland.

We hear that Mrs. J. Leahy has been very ill lately, but is a little improved now. We hope to hear soon that she is in the best of health again and would propose a visit from her to her Lindbrook friends and relatives for we need rain, and she was the sure rainmaker for this district whilst she lived here.

Kingman News

Mrs. T. Horte, Mrs. E. Skaalen, Mrs. A. Johnson and Mrs. E. Erickson visited with Mrs. W. McIntosh on Thursday afternoon.

Mr. and Mrs. W. Hartschen and family and Mrs. L. Grace were dinner guests of Mr. and Mrs. W. McIntosh on Sunday.

Mr. A. Asp visited in Daysland on Sunday.

Mr. and Mrs. Thor Horte and family were dinner guests of Mr. and Mrs. C. Ronning of Camrose on Friday evening.

A number of people attended the Camrose Normalite play.

Mr. and Mrs. Thor Horte and family and Mr. and Mrs. C. R. Blychert were the guests of Mr. and Mrs. Munson of Camrose, on Sunday.

Mr. and Mrs. W. Jardie and Mr. and Mrs. W. McIntosh motored to Camrose on Saturday.

Mr. P. Rodnunsky has purchased a 1927 Pontiac sedan.

Peter Rindahl had the misfortune of breaking his arm and is now a patient at the St. Mary's hospital.

Mrs. E. Erickson motored to Edmonton on Saturday.

Mr. J. Myri visited with Mrs. T. Horte on Monday.

Amisk Creek

Mr. and Mrs. R. O. Berg and Gunvald Flaaten motored to Edmonton via Camrose and Wetaskiwin last Saturday. Miss Ruby Berg and Miss Pfau joined them in Camrose. They returned the same day.

Mr. and Mrs. J. Jacobson and children were guests at the E. A. Moen home last Sunday evening.

On Mothers' Day, May 11th, the Young People's Association presented a splendid program in the church. The Bardo choir rendered two numbers and Mrs. Sagerquist, former Chinese missionary gave an interesting address. Each mother was presented with flowers. Lunch was served in the basement by the ladies and a large number attended.

Miss Ruby Berg paid a short visit at her home on Sunday evening, accompanied by Irma Blow and another friend.

Mrs. T. H. Olson and Mrs. and Mrs. I. C. Olson motored to Edmonton last Monday, returning the same day.

Mr. Sam. Olson who has been pump man on the C. N. R. at Shonts for the past two years has been transferred to Saskatchewan. Mr. and Mrs. Olson have been great helpers in this community and we greatly regret their departure. We wish them every success in their new location. A man from Cooking Lake will come to Shonts twice weekly to attend to the pump here.

Mr. and Mrs. I. C. Olson and E. Moen and A. Patterson attended the U. F. A. convention at Vegreville on Saturday. Mrs. I. C. Olson as delegate for the U. F. W. A. for Tofield and E. A. Moen as delegate from Ryley.

SYNOPSIS OF "THE GIRL FROM HAVANA"

A fashionably dressed couple, "William Dane" (Kenneth Thomson) and "Lona Martin" (Natalie Moorhead) enter a Los Angeles Jewelry Store and ask to be shown some diamond necklaces.

"Allan Grant", (Paul Page) a young clerk in the establishment, shows them the jewels just as a snarling dog, apparently mad, dashes into the shop.

Page grapples with the dog. Finally driving him out. It is then discovered that four of the necklaces are missing and Page is discharged for leaving his trays.

Later Page removes the jewels from the dog's collar and immediately ships as a steward on a ship bound for Havana.

In a stateroom aboard ship Page meets the aristocratic couple who had been in the store and their chauffeur "Spike Howard", (Warren Hymer) and they divide the loot—four ways.

When the ship reaches Balboa "Joan Anders" (Lola Lane), a clever girl detective in the employ of the Jewelers Protective Association, boards the ship with definite instructions concerning the robbers. She is seemingly a member of a troupe of chorus girls on their way to Havana. Lola and Page become interested in each other.

During a concert on shipboard the gang searches her stateroom and discover evidence that she is a 'dick'.

However, Lona and Dane are captured but Spike escapes, taking Lola with him. Allan pursues and the end comes in Havana where Page finds out that Spike is the murderer of his father—and it is revealed that the son has joined the gang solely to find out the murderer. The mists of misunderstanding clear and Joan and Allan are united.

UNIVERSITY WEEK FOR FARM YOUNG PEOPLE

The University week for the farm young people will be held in the University of Alberta June 6th to June 10th. This great opportunity to see a little of University life is open to any boy or girl resident in Alberta between the ages of 16 and 25 years. The delegates attending will live in the resident buildings of the University of Alberta and the board will be provided in the University dining hall.

Courses of study for the boys will be on farm topics, also a special course will be given on public speaking and another on grain judging.

For the girls, four courses are open (1) The well dressed girl and the well dressed home. (2) Serving the family meals as well as two alternate courses in history and literature.

The courses are free. A charge of $12.50 is made to cover the cost of board and room for the week.

Every year hundreds of young people coming from all parts of Alberta spend this week in the University. But so far as known no one has ever attended from Tofield.

It is a fine chance to see the University, the experimental work being done in seed plots, the best in purebred live stock etc., and to learn something really useful in farming. It provides an opportunity of meeting young people from other parts of the province and gives a short well earned holiday following the busy period of spring's work.

The first boy or girl attending from Tofield will probably receive free transportation.

For further particulars apply to Mrs. A. N. Booth, W. W. Hill or T. E. Seale.

FOR SALE.—Day Fan Radio $60.00; McClary gas stove $40.00; three gas radiants $5.00 each for the three; one Lawson gas radiant $17.00; fumed oak piano, Gerhard Heintzman $200.00.—Apply to Mrs. Hobson, 'phone 72, Tofield. 17c

FOR SALE: FORDSON TRACTOR in good running order. Fenders and a new type manifold. Complete with Oliver Gang. Will trade for cows. Apply Lindbrook store. 15

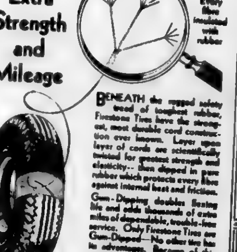
Gum-Dipped

for Extra Strength and Mileage



BENEATH the rugged safety tread of toughest rubber, Firestone Tires have the strongest, most durable cord construction ever known. Layer upon layer of cords are scientifically twisted for greatest strength and elasticity—then dipped in pure rubber which protects every fibre against internal heat and friction.

Gum-Dipping doubles flexing life and adds thousands of extra miles of dependable, trouble-free service. Only Firestone Tires are Gum-Dipped—No other tire has its advantages. Because of this extra process, Firestone tires hold all world records for mileage and endurance.

Local and Personal

Ruth McLaughlin and four girl friends of Edmonton visited at her home over the week end. They returned to the city on Monday.

A number of Tofielders were at the dance in the Ryley hall on Friday.

Stan Yakibuski who has been painting elevators in the Peace River District for the past few weeks visited his parents over the week end.

A number from Tofield spent the holiday at Lakeview. Though not yet completed they report a real summer resort is in the making. We understand that a movement is on foot among Tofield citizens to procure a frontage on a nearby lake for recreation and picnicing purposes.

Gordon Jobb of the Bank of Montreal staff in Rumsey was visiting at his parents home over the week end here.

Bertha Lee of Edmonton was home over the week end.

Annie Hobson of Coronation was home over the week end.

F. O. Ball was in town for a few days last week.

Mr. Martz of Duhamel is visiting his daughter, Mrs. Snell this week.

On Tuesday June 12th, an all talking picture show will be shown in the Variety Theatre. By arrangement with Mr. Frank Wood, Mr. Dumthy, of Lacombe is bringing his machine here and will show an all talking feature. Further particulars will be given later.

Mr. S. Stauffer was a business visitor to the city one day last week.

Born—To Mr. and Mrs. Georzen, May 26th, a daughter.

Geo. Bissett made a business trip to Red Deer last week.

The Holy Trinity W. A. will meet at the home of Mrs. J. W. Robinson on Wednesday, June 4th, at 2:30 p. m.

The Ladie's Aid of the United Church, will hold a tea and sale of home cooking in the Institute Rooms on Saturday, May 31st. advt.

On Saturday, May 31st, Mr. Lowden of the Tip-Top Tailors will be at Geo. Bruce's store with a full line of up-to-date and this season's samples of suit and top-coat material. Mr. Lowden will be pleased to measure all and sundry for a suit or top coat, and the quality and value are excellent.

TOFIELD CREAMERY INSTALLS NEW CHURN

Manager Hetaler of the Tofield Creamery has recently installed a new churn to take care of the increasing business.

The new churn which replaces a smaller one previously in use is of one thousand pounds capacity at one churning and the more often it gives forth this amount the happier the Creamery staff will be. Other improvements including painting the creamery inside and out are now under way.

MANY FROM TOFIELD ATTEND MUSICAL FESTIVAL AT CAMROSE

On Friday of last week quite a number of Tofield children, in some cases accompanied by their parents, journeyed to Camrose to participate in a school musical festival held there. Among the children attending were the following: Lola Wilson, Cleo Wilson, Donald Edwards, Mary Rymple, Minnie McAllister, Clifford Pincott, Beryl Brink, Zelda Dodds, Mary Rowe, Betty Pincott, D'Arcy Letourneau, Jessie Munroe, Goldie Jacobs, Irma Shupe, Lucille Snell, Eileen Scott. All the above took part either by rendering solos, recitations or becoming characters in a play.

Honors were won by Lola Wilson in finals in recitation contest; Beryl Brink, medal for solo; Cleo Wilson tied for first place in solo, but in a re-trial lost out. The play presented by the Tofield children was awarded third prize.

Six cars made the trip and the thanks of the teachers, Miss Clement and Miss Cooper are extended for the courtesy shown.

This is the first occasion that Tofield has been represented at an organized school festival and the teachers and children are to be complemented on the excellent showing made.

Vote Unanimous

It is quite evident that the Calgary Power Company's hydro power is going to be welcome in Tofield.

At the election held Thursday last to decide the town granting the Company a ten year franchise, there was not one dissenting vote cast.

While the actual number of votes cast was small, namely 32, it is significant that there is or was absolutely no opposition.

The line will now be constructed and electric power and light will be available to town users some time during the summer.

The Company has guaranteed to have it here by November, but unless unforseen circumstances turn up it will most likely be here before that time.

SYNOPSIS OF "WHAT A NIGHT"

For five years editor Madison of The Chronicle has been trying to expose the grafting connection between Political Boss Patterson and Gang Leader Mike Corney. At last Madison obtains possession of a cancelled check which gives him sufficient proof to publish a story. Corney steals the check, however, and Madison's son, Joe, a reporter, goes after it.

In his chase for the check, Joe is thwarted by being forced to rescue a girl whom he describes as "beautiful but dumb", on two critical occasions. He goes back to his office and admits defeat and his father greets him with the news that the newspaper's biggest advertiser wishes his daughter to have a reporting position on the paper. Joe offers to "break her in" but he discovers that his protegee is to be the "beautiful but dumb" girl of the accidents. She is Dorothy Winston.

One of Corney's gunmen lands in jail and Dorothy partially redeems herself with Joe by getting him to talk where other reporters have failed. She learns where the check is hidden, but when she tells Joe, Corney overhears the conversation. Joe goes to Corney's house to steal the check. He finds it and telephones his father to print the story. As he hangs up the receiver, he finds himself covered by Corney's gun and Corney recovers the check.

Joe's father lacking the check to prove his printed charges true, faces a damaging libel suit which Corney threatens to push to the limit. Dorothy hears that the two schemers, Patterson and Corney, have a rendezvous in a warehouse and she hurries there. After a series of narrow escapes, she gets the story the paper needs and photographic proof of conspiracy and graft. The paper is saved and Dorothy wins Joe.

STEAM SHOVEL TIPS OVER AT MINE

On Friday after noon a bad accident occurred at the Tofield Mine, when one of the steam shovels tipped over.

It seems that a jack that is required to hold a brace on the shovel broke and caused it to tip over.

There were three men on the shovel at the time, Mr. Al Innes, Mr. A. Hosler and Mr. C. Robinson. As the shovel started to fall Al Innes jumped and fell on the track below and received three cracked ribs and a bruised knee. The other two outside of a bad shaking up, were not hurt.

It was a wonder that they were not all killed especially A. Hosler who was found between the boom and the body of the shovel.

Work recommenced Tuesday morning with the same crew in charge.

U. F. W. A.

Owing to the blizzard last Wednesday our meeting had to be cancelled and we missed the opportunity of meeting Mrs. Warr, president of the U. F. W. A. and Mrs. MacNaughton, district director. These ladies spent the day as guests of Mr. and Mrs. A. N. Booth.

Mrs. E. V. Gray has invited us to her home for the next meeting, June 12th, and she will give a demonstration on cake making. Roll call to be answered by "current events". Mrs. Jas Francis is to give a paper on "The Sunny Side of Life". Let us all plan to be present.

Ketchamoot Items

The regular meeting of the M. A. S. will be held next Wdnesday afternoon June 4th, at the home of Mrs. Leslie McGinitie. All will be welcome.

Communion services were held Sunday of last week. Seven uniting with the church. A large congregation was present.

Mr. and Mrs. Barnes, Mrs. Peter Lee and C. A. Ingram attended the U. F. A. convention held at Vegreville on Saturday of last week.

The worst storm we have ever experienced for this time of the year, came Wednesday, every thing was held up, school was called off, no mail delivery and even on Thursday more than one got stuck in snow drifts going to town. It did not do much good in way of moisture as most of the snow was piled up in drifts off the fields.

Mr. and Mrs. D. McCowan and little son Jimmie, motored to Edmonton Sunday. Jimmie not feeling well they consulted a doctor, but he is not much better.

Rumors are that the McDevitt coal mine has been sold to the Penn Coal Co. of Clover Bar.

The Wm Lee, Barnes, and McGinitie motored to Cooking Lake Saturday for the opening of the summer resort.

Miss Pearle Gray assisted Mrs. W. A. Mitchell a few days with her spring sewing.

Mr. and Mrs. Nomeland and family and Mr. and Mrs. C. Coombes and family were the guests of Mr. and Mrs. Campbell Friday evening.

Miss Edna Campbell came down from Edmonton Friday evening for a short visit with her parents returning on Saturday.

Mr. Sam Sterritt was a passenger to Edmonton Saturday.

Miss Betty Henderson and Mr. Perry Owens of Holden called on relatives in our district on Sunday. They were on their way to visit Miss Henderson's sister, Mrs. Silversides, of Lindbrook.

Mr. Howard Lee is playing ball at Crossfield for the summer.

We regret very much the trouble caused by fire, had to be taken to court between Marsh Mitchell and John Brown.

Miss Mabel Lawson is to be congratulated on her room the junior school in Camrose winning the silver cup donated by the Tofield district at the festival in Camrose on Friday, for the best play in her class "The Frog Prince".

SCHOOL FAIR MEETING SATURDAY at 8.30

A business meeting of the Tofield School Fair Association will be held at the Tofield town hall on Saturday next, May 31st, at 8.30 p. m. This is an important meeting and all officers and those interested are requested to attend.

HOLY TRINITY CHURCH
(Anglican)

Sunday, June 1st, 1930
11:00 a. m. Holy Communion and Morning Service.
Preacher, Archdeacon Howcroft, of Camrose.

TENDERS WANTED FOR BREAKING

Tenders will be received up to June 1st, for the breaking of fifty acres, located six miles north of Tofield. For further particulars apply to —

L. H. GRAHAM, Tofield.

Kingman News

Carl and Albert Hanson, of Highland Park were visitors at the E. Erickson home on Tuesday.

Mr. and Mrs. P. Fjoseth visited with Mr. and Mrs. W. Jardie on Thursday.

Mr. and Mrs. O. Thompson and Josie were Edmonton visitors for a few days last week.

Mrs. Thor Horte and Mrs. W. McIntosh visited with Mrs. Geo. Welch on Thursday afternoon.

Mrs. Roy Melvik and children visited with Mr. and Mrs. P. Sevenstad of Camrose for a couple of days.

Mr. A. Asp visited in Metiskow over the week end.

Mr. and Mrs. C. O. Pederson were Camrose visitors on Saturday.

Mr. and Mrs. P. Rodnunsky and family motored to Edmonton on Sunday.

A number of Kingmanites motored to Cooking Lake on Saturday.

Miss Mildred Olson of Vancouver is visiting at the home of Mr. and Mrs. E. Erickson for a couple of weeks.

Miss Lily Erickson of Edmonton is enjoying a two weeks holiday at her home here.

A number of Kingmanites attended the Sports Day in Camrose on Saturday.

Mr. and Mrs. E. Erickson and family and Miss Mildred Olson of Vancouver were the guests of Mr. and Mrs. K. O. Larson of Daysland on Sunday.

Mr. and Mrs. W. Hartschen and Mrs. E. Grace were the guests of Mr. and Mrs. D. M. Thompson on Sunday.

Mr. and Mrs. Gustafson, of Waterglen visited with Mr. and Mrs. C. R. Blychert on Saturday.

Mr. and Mrs. C. R. Blychert visited with Mr. and Mrs. Joe Munson on Sunday and Monday.

Sam Cinnamon motored to Camrose on Sunday.

DID YOU EVER STOP TO THINK

R. V. Lucas, editor of the Oelwein (Iowa) register, says.

That the easiest way to belittle yourself in the eyes of a stranger is to make disparaging remarks about your home town. If you tell a stranger "this is a hick town and a hundred years behind the times" that stranger is apt to glance out of his eye and make a mental, if not audible comment that "judging from the sample before him, it sure is."

For a town is just what you are. There is no use trying to highbrow your way through and regard yourself as superior in your community, for you are not, if you have lived there long enough to claim citizenship.

Your town is made up of a lot of "yous" and you are just a fair sample of it. If you don't like your town, move out of it and make room for some one who does like it. But as long as you are a citizen of it and a part of it, defend it if you care for the good opinion of others. Don't defame it and don't bring down the comment of others on yourself by such an attitude toward the town where you reside. The stranger may have a lurking suspicion that sometime he might want to move to a town like yours, but when he hears this sort of comment coming from you he is apt to change his mind, for he does not want to associate with a town filled with people like you.

A town, like a stream of water, can rise no higher than its source, and you are the "source" for your town and many other "yous" just like you.

A Hobby Essential To Life

Every person, old or young, should have a hobby ... because a hobby means an interest beyond the mere task of making a living and because an interest is necessary to the enjoyment of life.

Life without interest would be a dull prosaic affair. Yet there are some people who keep their noses to the grindstone day after day, year in and year out ... to provide the wherewithal to feed, clothe and ... dependents without a let-up from daylight to dark ... for some interest which will serve to heighten their ... and bring joy into their lives.

There are of course some men who are fortunate enough to have found in their vocation that keen zest which an outside interest gives to others. But it has been found by age-long experience that even such happily circumstanced individuals can and do pursue their work with better results and with greater contentment and less wear and tear when, to their work, they add a hobby.

"All work and no play makes Jack a dull boy" has been quoted so often that it has become platitudinous. Yet it is just as true today as when it was first uttered.

... the child ... away and closes his school desk for the ... with games and recreation in some form ... in this manner revivifies himself for another day at school ... have discovered that the child who plays in ... which enables him in the long ... He has a balanced and therefore a ... upon his studies.

... of flying kites or indulging in ... enthusiasm into the field of some ... It matters little whether it be ... plying saw and hammer or ... so long as it is something which ... and whets his appetite for more, and ... the daily task.

... as a stimulus to the mind or a ... being. It is at the same time restful and ... with a second string to his bow ... is more likely to make a ... He is able to turn again to the serious ... with the hope and joy which comes with a buoyant ... refreshed mentality.

... a hobby without securing these results ... for recreation broadens interest ... Interest with existence is life. Life without interest ...

... It is too late to wait until the ... are taking their toll and forcing re... The individual who waits until he is obliged to ... pulling heavily for decades before ... he faces an old age of misery, for he has ... nothing to which he can turn to make his declining years ...

Plants do no harm in sleeping rooms at night, says a plant expert ... Department of Agriculture ...

Graded Beef In Demand

Officially graded beef is now being served in the dining rooms of the British House of Commons and in ... London Clubs, Hotel and restaurant proprietors are also serving ... and the London housewife is beginning to ask for it.

Prevention Better Than Cure

Annual Examination By Doctor Would Ensure Good Health

The annual conference of the Canadian Social Hygiene Council, at ... dation to the public. That was to have an annual examination by a doctor.

It is a trite saying that prevention is better than cure. When a person feels well, or rather if a person does not feel ill, or is not bothered by a pain of any kind, the assumption is that the organs of the body are functioning normally, but the fact that so many people are taken ill suddenly, proves the fallacy of that belief.

Health should not be taken for granted simply because one is apparently well. It should be proved by test, and if there is a condition that betokens a break-down of the inner machinery of the body in the near future, the doctor can repair the damage or stave off the evil day, before it has gone too far.

Many a man or woman has got a nasty jar on visiting a doctor about some minor trouble and being told that something serious is developing, or has developed. The average being does not like visiting his doctor, and usually leaves it until circumstances compel examination, but an enormous amount of sickness, an enormous number of operations, would be avoided if the habit of having an annual examination were universal.

Lots of people are more careful about the interior works of their automobiles than they are about the ... of their own bodies.

THE ANAEMIC GIRL

Who Has Lost Her Charm and Beauty

"She seems to be losing her looks." This remark is often heard about girls who were once noted for ... sparkling eyes, their rosy ... and their vitality. The cause is not far to seek—they have become anaemic—that accounts for the pallor and the loss of charm. The anaemic girl, if she neglects her health, may be a sufferer all her life.

Take heed, you pale, anaemic girls. Plenty of fresh air, nourishing food and rest will help you ...

SCIATICA?
Here is a never-failing form of relief from sciatic pain:
Take Aspirin tablets and you'll avoid needless suffering from sciatica—lumbago—and similar excruciating pains. They do relieve, they don't do any harm. Just make sure it is genuine.

When Grain Kings Meet

Valuable Information Will Be Exchanged At World's Exhibition

In midsummer of 1932, the city of Regina will become the clearing-house for world thought and knowledge on every important branch of field-crop production and marketing. Agrarian experts from all around the globe will gather at the World's Grain Exhibition and Conference to be held at the Saskatchewan capital in late July and early August.

While some $200,000 has been offered in more than 1,800 prize awards for cereal, grass, clover and vegetable-seed exhibits, separate sessions of the grain conference in conjunction with the exhibition are expected to be a most important portion of the program. Papers are to be read on agronomy, economics, including marketing, milling and baking, agricultural machinery, insect pests and friends, and other subjects.

English and French, it has been decided, will be official languages. Provision will be made for interpreters. It is contemplated that brief resumes of all papers—whose average length is limited to 2,000 words—will be printed in the two official languages and circulated to delegates before commencement of sessions. The meetings will be held ...

An Accidental Discovery

Scientists Find Fish Scales Can Be Used As Fabric Coating

For hundreds of years Eve has taken her clothes from the wool of sheep and the skins of animals, but now she has gone one better—she is to wear the scales of fish.

Soon the smartest Eves will shimmer like mermaids. A firm at Berlin has at last patented a process by which fish scales can be used as a coating for various fabrics. Among many advantages is that the new material has a remarkable power of keeping out heat.

It is intended, also, to use a coating of artificial pearl on thin oilskin coats. These latest rain-proof garments will be light and completely waterproof, and when wet they will have a beautiful pearly glitter.

The discovery that fish scales could be used for this novel purpose was more or less accidental. Scientists were endeavoring to improve the process by which artificial pearls are made when they stumbled across the new idea.

After several attempts they found a method of washing, drying and grinding fish scales which produced a fine crystalline powder. This is mixed with a solution of artificial silk in collodion, and can be painted thinly over the oil skin.

Persian Balm is irresistible. Fragrant as summer flowers. Cool as a mountain spring. Wonderfully invigorating. Softens and whitens the hands. Makes skin soft-textured and youthful. Used by women as a powder base and as a precious aid to lovely complexions. Used by men as an effective hair fixative or shaving lotion. And for children, nothing soothes and protects their tender skin like the delicately cool Persian Balm.

Reindeer Trek Halted

Will Not Resume Journey Until Fawns Can Travel

Three thousand reindeer, being driven across "the top of the world," into Canada, on the order of the Dominion Government, have halted their long march in the Hunt and Colville River sections, until the end of the fawning season ...

Western Province Benefits

Will Collect Succession Duties On Estate Of English Baronet

Revenues of the province of Saskatchewan will benefit to the extent of $14,321 by way of succession duties on the estate of Sir John Lawrence Langham, Bart., who died recently in London, England, and whose will is now being probated. Sir John left $1,003,928, of which $277,963 is in Canada, $193,682 in Alberta, and $84,300 in Saskatoon real estate. The Saskatoon property under the Succession Duty Act of the province, will be taxed at the rate of 17 per cent.

Canadians Have Much To Learn About Vast Empire Being Developed In North

So vast is the Canadian heritage and so numerous are the points offering promise of great and continuous development, that it is difficult for the most assiduous of newspaper readers to keep in touch even with his own province. For more distant information he is dependent on remoter sources and therefore has all the more reason to appreciate editorial and other articles outlining what is being done in districts that are only in process of being opened to the light of day. Recently the Lethbridge Herald ... the development of the Alberta Northland and remarked that as this is proceeding so British Columbia's great block of land east of the Rockies is coming in for a lot of attention. Speaking recently about the potentialities of this region it quoted Hon. F. P. Burden, Minister of Lands of that province, as saying that the section had one of the best bodies of coal on the continent, and according to coal authorities it was the only coal on the continent that would smelt without coking.

In close proximity, Mr. Burden said, was a great body of iron ore. In years to come, he believed, a great steel and iron industry would be developed and would create a big demand for the agricultural products of the district.

There were also other minerals, the minister said, and possible hydro-development at low cost.

The Herald repeats its view previously expressed that in the vicinity of the head waters of the Peace River, and where they cut through the backbone of the continent on their way to the Arctic, there is a veritable empire of wealth such as few Canadians even dream of. Here are to be found valuable commercial timber and pulpwood. The Groundhog coalfields in which the late Lord Rhondda was interested lie in that area. Close by there are said to be mountains of iron, while it is also stated that mines as rich as the Sullivan at Kimberley may be developed ...

Britain Acclaims Canadian Wheat

Sir ... Says Manitoba Product Makes Best Bread

All who are interested in Empire Free Trade should make it their duty to demand an "Empire Loaf"—made of wheat flour produced in the British Empire—and popularize it among their friends, says Sir James ... in a letter to the London Evening Standard.

Sir James, a native of Bathurst, New Brunswick, and ... prominent lawyer and husband of the Marchioness of Queensbury, says that apart from any question of imperial sentiment, the Empire loaf consisting of 85 per cent. Manitoba wheat, is the best bread in the world.

His own researches into the relative nutritive values of Canadian and competitive wheats have shown the Manitoba wheat produces a bigger and lighter loaf, which gives greater nourishment than bread made from any other flour, he says.

Rice Growers To Compete

British Guiana May Have Exhibit At World Grain Show

In all probability rice growers from British Guiana will be represented in the competitive classes at the World's Grain Show, according to a letter received at the exhibition office, Regina, from J. Sydney Dash, director of the Department of Agriculture, Georgetown, British Guiana.

The compilers of the prize list for the 1932 World's Grain Exhibition designed to ... attractive as possible to the growers of all countries. For this reason, apart from the fact that the cash awards offered are higher than have been offered ever before, the classification embraces practically all of the grain and seed crops cultivated the world over.

The rice growers of British Guiana, one of the smaller parts of the British Empire located in the tropical regions of northern South America, are showing a keen interest, and according to word received at the World Grain Show office from Mr. Dash, exhibits of rice may be expected from that country. In concluding his letter Mr. Dash says that he hopes "this colony will be able to take part in your exhibition and conference to be held in 1932. I shall advertise it so that rice growers may have the opportunity to participate."

For Healthy Poultry

Clean Soil In Run Necessary For Growing Chicks

Clean soil in the run is the one sure cure and preventative for the most destructive poultry disease, intestinal parasitism, asserts the Poultry Husbandman of the Dominion Department of Agriculture. And practicing what he preaches, the poultry runs at the Central Experimental Farm have been ... ploughed and the rotation system of soil cleaning is under way on the runs used last year. A succession of hoed, grain and green crops is used to remove all possible infection from intestinal parasites. Poultry should always be kept on clean soil, especially growing chicks, and crop rotation on the poultry run is the one most effective way of ...

Department of Agriculture Is Studying Problems of The Ranching Industry

The following article was prepared at the direction of Dr. J. H. Grisdale, Deputy Minister of Agriculture, by Mr. E. S. Archibald, director Dominion Experimental Farms, Ottawa.

Previous to 1912, when the beef cattle industry in Canada was in a thriving condition, a very small investment, outside of that in cattle, was necessary to carry on the business. With the coming of the settler and the consequent splitting up of the open range, the rancher was confined to a definite area. This change necessitated a more economical use of the range and the construction of fences, the development of watering places, and the production of winter feed. With these increased costs more attention was paid to the class of cattle raised, the percentage calf crop, and the death losses. Although the best known grazing practices were followed there was a decline in the carrying capacity of the ranges, and many areas became badly overgrazed. The result was depleted pastures, less thrifty cattle entering the winter, and sub-normal gains in weight by marketable and breeding cattle.

It was not until 1925 that a demand arose for experimental work on the range, and following a survey in 1926 by the Dominion Experimental Farms, Department of Agriculture, it was decided to conduct experiments on the short grass plains to study methods of range management, with the object of improving the carrying capacity. As the outright purchase and equipping of an experimental ranch appeared to be unwise because of the large cost involved, it was decided that it would be more economical and more useful to co-operate with some rancher who had a long experience in ranching. Gilchrist Brothers, of Medicine Hat, Alberta, offered their co-operation, which was accepted and the experiments ...

... all phases of the cattle industry will be available.

Might Increase Apple Sales

Vending Machine Opens New Market For Canadian Product

One of the most interesting and important developments in connection with the marketing of apples in recent years is the automatic vending machine. Officials of the Fruit Branch of the Dominion Department of Agriculture are watching this development with special interest at the present time and Commissioner G. E. McIntosh states: "I think it will provide a new means of marketing apples which will prove at once popular and effective."

The new machines, of which there are two types on the market at the present time, have been tried out with surprisingly satisfactory results on a number of occasions. At the Royal Winter Fair, Toronto, last year, several of these machines were in operation and the sales for each machine ranged from 3,000 to 7,000 apples per day.

The automatic apple vendor is a "nickel-in-the-slot" contrivance by which the customer may select the apple he prefers from a range of size, variety and color. Both the wall and cylinder type machine carry the apples in trays with glass tops so that they are enticingly visible. The apples are kept in perfect condition through the use of dry ice, and the automatic vendor provides the individual an opportunity to get "an apple a day" or, what is more important, an apple when it is wanted.

An idea of the potential sales value of these machines in operation is afforded by the experience at the Royal Winter Fair. The machines there in the week they were in operation averaged sales of 2,560 boxes of fancy fruit of an average size of 125 apples to the box ...

New Use For Wheat

Light Crop Can Be Made Profitable By Feeding To Poultry

With the present uncertainty which prevails in the wheat market the Dominion Department of Agriculture finds that farmers are paying more attention to the marketing of grain crops through live stock. Some important and interesting [illegible] have come to light, and not the least interesting is the experience of an Alberta farmer who had a light crop which he could not sell at the elevator. He had a flock of poultry and started feeding the wheat to them and marketing it in the form of eggs through the local egg pool. When the winter was over he figured up his costs and found that he had sold the wheat thus fed at an average price of $5 per bushel. Another western farmer with a modest flock of 150 birds kept his family throughout the winter on the income from the eggs, and he states that his gross income for the winter from the flock averaged $200 per month.

Good Revenue From Map Sale

One hundred and fifty-one maps of Canada have been made by the topographical survey since 1917, accord[illegible] House of Commons recently, and the cost of compiling these maps was $960,000. The largest area surveyed was in Manitoba, where 96,247 square miles have been surveyed. The revenue derived from the sale of these maps since 1924 amounts to $16,500.

Preference From Bermuda

A preference to Canada on agricultural produce and on fish has been granted by Bermuda, according to a telegram received by the prime minister from the Hon. R. Black, Speaker of the Legislative Assembly of Bermuda.

Plan To Encourage Community Progress

Canadian National Railway Will Give Prizes For Competition

Plans which seek to provide a substantial contribution to the encouragement of community progress and development, and the attainment of the fullest possible measure of Canadian citizenship by [illegible] rural communities in Western Canada which are of European origin, have been developed by the Canadian railways according to an announcement just made by Sir Henry Thornton from the head offices of the railway company at Montreal.

These plans initiated and developed by Dr. W. J. [illegible] the Departments of Agriculture and Colonization, of the National System, involve the carrying out of a series of competitions among such communities in the three provinces, Alberta, Saskatchewan and Manitoba, to be held annually for a period of five years, for which one set of three prizes will be awarded in each province each year. These prizes will be substantial, the first being $1,000, the second $500, and the third $250, and they will be awarded on the understanding that the money be utilized in community work of some progressive nature. It is planned to have the competitions commence this year.

The Departments of Agriculture and Colonization, of the National Railways, will assume the responsibility of conducting the competitions, but hearty co-operation and support in the carrying out of the entire scheme has been [illegible] by various departments of the provincial governments which have chiefly to do with matters of rural community progress and welfare. Leading men and women in western life also intimated that the project has their support and approval. For the judging of the competitions in each province, a committee of three outstanding citizens will be selected.

It is proposed to confine the competitions to rural municipalities, or groups of school districts within municipalities in which the population is made up of people of continental European origin, first or second generation. It is recognized that the interest which these people take in co-operating to make effective the policies of such departments of government as have to do with agriculture, education and public health, may be regarded as an index of the people to the advantages of what the Dominion provides towards influencing their status as good citizens. It has, therefore, been decided that emphasis shall be placed upon the things which these departments regard as of greatest importance. Consideration will be given to such matters as percentage of school attendance, efficiency of the school, percentage of young people attending secondary schools, colleges or universities, evidence of interest in matters relating to public health and social welfare, percentage of membership in farmers' organizations, such as the co-operative marketing pools, agricultural societies, womens' institutes, etc., and evidence of [illegible] progress towards improvement of agriculture methods throughout the particular community or area involved. Special consideration also will be given to evidence of community interest in music, arts and handicrafts. In respect to [illegible] this, the competitions will take [illegible] consideration the full calendar [illegible] and awards will be made at the end [illegible] each year. In discussing the project, Dr. Black said: "It is recognized that the people in a great many of the communities of European origin in the prairie provinces of Canada, have been showing an exceedingly fine interest in making full use of the facilities and influences which our Canadian institutions provide in agriculture, education and otherwise. It is the desire of the railway company, in undertaking to direct these competitions for a period of five years, to give encouragement to such communities as are showing a determination to make use of and emphasize to the fullest extent the best that our country provides in the development of citizenship."

London's Privilege

A privilege which belongs to the City of London is that its maces and its swords may be carried upright. This privilege was granted to the city in 1354, and where other corporations slope their maces and their swords, the City maces may be carried upright, and the City swords generally are so borne, in the same way as the State sword is borne before the King, as an emblem of sovereignty.

City Man: "My tailor will be here in half an hour."

Office Boy: "Yes sir. Shall I ask him to wait?"

City Man: "Certainly not! What do you suppose I'm going out for?"

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases, sweeten the sour and acid stomach, relieve the gas and encourage digestion.

The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

Recipes For This Week

(By Betty Barclay)

TOMATO RELISH

3 cups (1½ lbs.) cooked tomatoes and lemon.
6½ cups (2¾ lbs.) sugar.
1 bottle pectin.

Scald, [illegible] and crush tomatoes. Boil 4 [illegible] crushed tomatoes (fresh or canned) 10 minutes, uncovered, stirring occasionally. Add juice and grated rind of 1 lemon. Measure cooked mixture into large kettle. Add sugar, mix, and bring to a full rolling boil over hottest fire. Stir constantly [illegible] and while boiling. Boil hard 2 minutes. Remove from fire and stir in pectin. Skim, pour quickly. Cover hot relish with film of hot paraffin; when relish is cold, cover with ⅛ inch of hot paraffin. Roll glass to spread paraffin on sides. Sets very slowly. Requires about 2½ pounds tomatoes. Makes about 9 [illegible]-ounce glasses.

For plain tomato flavor, omit lemon and [illegible] only 2½ cups boiled-down [illegible]. For use with meats, add ½ [illegible] each of ground allspice, [illegible] and cinnamon.

ROLLED ORANGE WAFERS

½ cup butter.
1 cup sugar.
Grated rind 1 orange.
1 teaspoon soda.
1 tablespoon cold water.
⅓ cup orange juice.
2 cups flour.

Cream butter; gradually add sugar and orange rind, beating until light; dissolve soda in cold water, add to orange juice, then add, alternately with flour, to first mixture. Spread mixture on well-buttered sheet in the thinnest possible layer, and bake in a moderate oven. When baked, cut in squares; quickly roll each square, while hot, over handle of a wooden spoon, and arrange on a doily-covered plate.

"It is my ambition," says an artist, "to paint a vision of beauty that is too wonderful to be realized in this life." He is just the man to design the labels on flower seed packets.

Rains in London were so heavy this winter that some wood pavement streets were impassable for several days.

SUNDAY SCHOOL LESSON

JUNE 1

CONTRAST BETWEEN FAITHFULNESS AND SLOTHFULNESS

Golden Text: "Well done, good and faithful servant: thou hast been faithful over a few things, I will set thee over many things: enter thou into the joy of thy lord." Matthew 25.21.

Lesson: Matthew 25.14-46.

Devotional Reading: Psalm 40.1-8.

Explanations and Comments

The Commission Received, verses 14, 15. The situation as regards the Kingdom of Heaven, said Jesus in His parable of the Talents, is comparable to that of a man who, about to go to another country, calls together his servants and delivers to them his goods. In the interpretation of the parable, the "man" represents Christ, his "goods," all possessions—life, physical and mental powers, etc.—which are represented as God's property, entrusted to men, His servants, as a loan.

The Commission Carried out, verses 16-18.—The one who received five [illegible] lost no time, but straightway went and traded with them, and made other five talents. In like manner he that received two talents doubled them. But he that received the one talent went away and hid it in the earth. It was a common practice in the East to bury money for safe-keeping, but his lord wanted increase as well as safety.

The Faithful Ones Rewarded, verses 19-23. After a long time the lord returned and made a reckoning with his servants. The one who doubled his five talents he recommended in these words: "Well done, good and faithful servant thou hast been faithful over a few things, I will set thee over many things."

The Slothful One Punished, verses 24-30. "Lord, I knew that thou art a hard man" (austere man, Luke [illegible]), said he who had received one talent, "reaping where thou didst not sow, and gathering where thou didst not scatter." He uses proverbial expressions for an unscrupulous, grasping [illegible]. It is "all work and no pay" in his lord's service, his lord [illegible] all the increase and gives the [illegible] no share in the reward," he [illegible] says. "And I was afraid," he [illegible] "and went away and hid thy talent in the earth; lo, [illegible] thine own."

"Thou wicked and slothful servant!" exclaimed his [illegible] "You called me hard. I call you [illegible]. A. B. Bruce. "Out of thine [illegible] will I judge thee, Luke 19.22. If thou knewest this, thou oughtest to have [illegible] my money to the bankers, and at my coming I should have received [illegible] with interest."

The Judgment, verses 31-46.

Planning New Dirigible

British R-102 Will Be Faster and Larger Than the Others

Britain shortly will build a third giant dirigible for regular trans-Atlantic service, it became known.

The ship will be called the R-102, the others being the R-100 and R-101. It is to be larger, faster and more economical than the others.

The plans for the R-102 were said to be in the hands of the designers.

Reclamation of 1,000 square miles of land at The Pas, Manitoba, is planned.

Ships of 24 nationalities carried their goods through the Panama Canal last year.

PILES [illegible]

Fast Train Service

Has Been Inaugurated By Canadian National Between Toronto and Vancouver

A new fast train [illegible] between Toronto, Winnipeg and Vancouver was inaugurated by the Canadian National Railways [illegible]. The Confederation went into service westbound from Winnipeg to Vancouver on May 18.

Westbound between Winnipeg and Vancouver, The Confederation which will operate via Regina, Saskatoon and Edmonton, will be two hours faster than the schedule on which it operated [illegible] and there will be a further saving of one hour in the time between Toronto and Winnipeg, or a total saving of three and one half hours in the complete journey. Eastbound from Vancouver there will be a saving of two hours and forty-five minutes between Vancouver and Winnipeg, and a saving of forty minutes between Winnipeg and Toronto.

In leaving Toronto the westbound Confederation makes a connection with the new fast International Limited from Montreal. This latter train leaves Montreal at 5 p.m. daily, and makes the trip to Toronto in six hours and is the fastest train in the world over the same distance. By using it and The Confederation, a saving of 13 hours can be made in the time between Montreal and Van[illegible], as compared with any exist[illegible] service over the Canadian National Railways, between these two ports.

The schedule of The Confederation [illegible] for the train to leave Toronto at 9.30 p.m. daily, with an arrival at Winnipeg at 8.15 the second morning. It leaves Winnipeg at 8:45 a.m., Regina at 5.30 p.m., Saskatoon at 10.50 p.m., Edmonton at 8.30 a.m., Jasper at 3.10 p.m., and arrives at Vancouver at 11.00 a.m.

Eastbound the time of departure from Vancouver is 1.25 p.m., Jasper 9.50 a.m., Edmonton 5.00 p.m., Saskatoon 2.00 a.m., Regina 6.35 a.m., and the arrival time at Winnipeg 5:20 p.m. daily. It leaves Winnipeg at 6:30 p.m. and arrives at Toronto at 7:30 a.m. the second morning.

Under the new schedule as compared with that of last year a morning arrival is made at Vancouver, and an afternoon departure. Last year the train did not arrive until the afternoon and left east bound in the morning. The new schedule makes this one of the fastest trans-continental [illegible]

French Ministers Interested

That details of the world exhibition and conference to be held in Regina, in 1932, be sent to over 100 prominent residents of France, was requested of officers of the exhibition. A number of those whose names were submitted are deputy ministers of France.

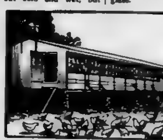
Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE
THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE



USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

DISCUSSION ON INSURANCE FOR THE UNEMPLOYED

Ottawa, Ont.—A scheme of unemployment insurance for Canada must of necessity be supported by government subsidies, said Prof. Gilbert E. Jackson, of the university of Toronto, addressing the Canadian Political Science Association in annual session here.

Even in England, Prof. Jackson said, where labor statistics dating back 60 years were available, it had been found necessary to support the scheme by state assistance. It would be almost impossible to carry on unemployment insurance by workers' contributions alone in Canada, where the expectation of employment in future seasons could not be as well charted as in England, even.

The unemployment situation was more cruel in Canada than in any other country because of wide fluctuations, not only in seasonal employment, but in demand for labor as between the various provinces.

Questions which, he contended, must be carefully considered before putting such insurance into effect were whether there was in Canada a sufficient body of public opinion in favor of it, and whether there was danger that the energy of the Canadian workers would be sapped by the system.

Benefits of the scheme would be largely dependent on an associated scheme of health insurance, and a greatly extended employment placement service.

No Duty On Foreign Wheat

British Government Is Opposed To Tax Says Minister

London, England. The question of preference for the Canadian wheat-grower in the British market over foreign wheat-growers came up in the House of Commons. Rt. Hon. William Graham, president of the Board of Trade, in reply to the suggestion said the government did not intend to impose any duties on foreign wheat, so that the question of granting Canada preference did not arise.

The answer brought a spirited query from the Conservative benches. "Do we understand the government's reply to the Canadian tariff concessions is that we can only treat them the same as we treat foreign governments?" Mr. Graham was asked.

"Not necessarily," the cabinet minister replied. "The questioner spoke of a tax on all imported wheat. The government is opposed to this."

Toronto Man Killed When Parachute Fails

Was Making First Attempt To Jump From Airplane

Toronto, Ont.—Attempting his first parachute jump from an aeroplane, Kenneth Burgess, Toronto, was killed when the parachute failed to open. The aeroplane was at an altitude of 1,500 feet when Burgess jumped. The unopened parachute caught on a tangle of telephone wires, hurling him into the ditch. He was alive when picked up and a doctor was summoned, but he died a few minutes later.

The aeroplane was a Colonial Airways machine, which left the company's field near Dufferin Street in North York Township.

Burgess is survived by his widow and two children.

Special Stamp Issued

Melbourne, Australia.—During a short and intensive campaign to assist the appeal of the prime minister of Australia, Hon. James Henry Scullin, for the growing of more wheat this year, the postal department has issued a special cancellation stamp bearing the words: "Grow More Wheat."

No Press Men On Dirigible

London, England. The only press information that will be given respecting the R-100 flight across the Atlantic will be that kept by Wing Commander R. B. B. Colmore, who will release it on the craft's arrival in Canada. On the return trip Canadian and British newspapermen will be carried.

Dry Ice Test Shipment

Brandon, Man.—Two cars of eggs of the Manitoba Co-operative Poultry Association were shipped to Montreal under the dry ice test. [illegible] means insulated containers are placed in the cars [illegible] that circulating carbon dioxide gas preserves the eggs.

Ask Amendment Of Criminal Code

Christian Scientists Want Clause Introduced For Their Protection

Toronto, Ont.—A despatch from Ottawa to the Toronto Star, says that in a bill introduced by the government to amend the criminal code, a change has been made at the request of Christian Scientists, in three sections, which deal with the obligations of heads of families, people in charge of the sick, and masters and mistresses of servants and apprentices under sixteen. It is explained the purpose of the section is to permit Christian Scientists to practice their beliefs without fear of prosecution.

The new sub-section which is suggested for the criminal code in this regard is as follows:

"Any obligation which may be involved in this or the two preceding sections to supply medical or surgical attendance as 'necessaries,' or 'necessaries of life,' shall not apply to, or affect persons using or depending on prayer or spiritual means for the treatment of human ailments as an enjoyment or exercise of religious freedom."

Suggest Advisory Board

Commission Would Help To Solve Problem Of Immigration

Ottawa, Ont.—Establishment of a permanent advisory commission on immigration, on lines similar to the tariff board, was one of the many suggestions dealing with the immigration problem at the annual meeting of the Canadian Political Science Association here. The suggestion was made in a paper by Prof. W. B. Hurd, of Brandon, Man.

In his opinion the regulation of immigration was a matter for scientific economists and sociologists, rather than politicians. A commission could make a continuous examination of employment and social conditions throughout Canada and could give expert advice to the governments on the number and type of immigrants which could profitably be admitted. Persons interested in securing immigrants for any district would have to make application before the commission adducing evidence of an economic rather than a sentimental character.

Will Arrange Rating

Bay Route To Be Brought Under Crows' Nest Agreement

Ottawa.—Hon. T. A. Crerar, Minister of Railways, stated that it is the policy of the Federal Government to enforce Crow's Nest Pass rates on the Hudson Bay Railway. The railway will be in operation one year hence, and Mr. Crerar said that he proposed to take immediate steps to discover what the legal position is. He will consult with the railway commission and find out exactly if Crow's Nest Pass rates automatically apply to the new route. If not, he will initiate action to bring the Bay route under the Crow's Nest agreement.

Saskatoon Cadets Victors

Win Junior Shield In Dominion Rifle Shoot

Ottawa, Ont.—A youthful team of cadets of Nutana Collegiate Institute, Saskatoon, Sask., won the junior shield in the winter cadet shooting indoor series held throughout Canada under the auspices of the Dominion of Canada Rifle Association. A report issued from headquarters of the association shows the Saskatoon cadets compiled a high average of 97.11 out of a possible 100. The Quebec [illegible] team won the senior cadet shield with a shooting average of 96.90.

Germany Contradicts Report

Berlin, Germany.—A statement was published here from the Chinese north coalition by way of London, England, that the French authorities of Indo-China have intercepted a consignment to the Nanking government of poison gas, which, it was clearly intimated, came from Germany. The German foreign office, declaring it absurd anti-German propaganda.

French Troops Leaving Rhineland

Frankfort-on-the-Main, Germany.—Evacuation of the Rhineland has been officially started in this sector of the third zone of occupation. Heavy artillery, pioneer equipment and columns of troops are moving toward France in the final exodus which will strip the Rhine of French soldiery.

Nansen's Successor

Oslo, Norway.—Prof. H. U. Sverdrup, of Bergen, Norway, has been named to succeed the late Dr. Fridtjof Nansen, explorer, as leader of the proposed Graf Zeppelin Arctic flight.

Naval Agreement Is Attacked By Admirals

Places Their Navy In Inferior Position Say U.S. Officers

Washington, D.C.—Two more admirals told senate committees that the London naval treaty would leave the United States in a position of inferiority.

Rear Admiral J. V. Chase, of the General Board, said the pact did not represent parity with Great Britain, and had many other flaws from the viewpoint of a navy man.

Although he was an adviser at the London conference, Rear Admiral J. R. P. Pringle said, he was consulted but once by the United States delegation. He advised the delegation against the cruiser arrangement they finally accepted.

HOUSE UNITED IN ENDORSING PENSIONS BILL

Ottawa, Ont.—The government and the opposition united in expressing appreciation for the work of the parliamentary committee on pensions, when the bill to amend the pensions act was before the House of Commons in committee. The bill is to give legislative effect to the recommendation of the pensions committee decided upon after a lengthy enquiry into the claims of organizations of returned men for more generous treatment. The bill passed the committee stage quickly, and was then given third reading. It now goes to the senate.

When he [illegible] to explain the bill Hon. Dr. J. H. King, Minister of Pensions and National Health, praised the work of the committee. He felt that not only would the returned men, but all the [illegible] of Canada, be pleased with the work which had been accomplished and highly appreciative of the untiring efforts of the members of the committee. The report of the committee had been unanimous.

The bill revises the machinery for dealing with appeals of soldiers from the pensions board. It provides a veterans' bureau to prepare the cases for soldiers. An important change gives a veteran the advantage when there is a reasonable doubt as to whether his incapacity was due to war service.

Congratulating the committee on the patient consideration and expert knowledge brought to this important question, Hon. R. B. Bennett said its members were entitled to the thanks of the nation. The committee was composed of men with first hand experience of soldiers' problems. He especially praised the chairman, C. G. Power (Liberal, Quebec South).

No difference of opinion existed among Canadian people, the Conservative leader declared, as to the pensions problem. They wanted a measure of generous compensation to all those who had risked their lives for this country. It assured the returned man the country was behind him, said Mr. Bennett.

There was nothing partisan in the bill or in the methods by which the committee had worked.

Jolly Beggars Broadcast Joy

"The most truly poetical of all Burns poems," said Thomas Carlyle, "is one which does not appear in Currie's edition, but has been often printed before and since, under the humble title of 'The Jolly Beggars.'"

With music revised, arranged and orchestrated from the edition of 1818 (harmonized by Bishop), by M. Wood Hill, in collaboration with J. Campbell McInnes, "The Jolly Beggars" was presented as a ballad-opera by the Alfred Heather Light Opera Company, in the Canadian Pacific Railway's programme of music from station WJZ and twelve associated stations of the National Broadcasting Company, from 9.15 to 9.45, Eastern Daylight Saving Time, on Sunday, May 18.

The following artists took part in the programme: J. Campbell McInnes as "the Narrator" (Robert Burns); Finlay Campbell as "A Maimed Soldier"; John Detweiler as "A Tinker"; Mrs. Davies Wynne as "The Widow of a Highland Freebooter Poosie Nansie", Alfred Heather as "A Bard and Ballad Singer"; and Jean Haig as "The Soldier's Lass." The first song of this opera is of special interest as containing a reference to Canada: "When the bloody die on the Heights of Abram," referring to the battle between Wolfe and Montcalm.

NEW POET LAUREATE

John Masefield, some time sailor and vagabond, who has been appointed poet laureate of England. The poems "Dauber" and "The Everlasting Mercy," and novel "Sard Harker" are among his better known works.

Wants Public Represented

People Interested In Veterans' Allowance Act Says Major-General MacDonnell

Ottawa, Ont. Criticism of the plan to appoint the commission to administer the War Veterans' Allowance Act wholly of returned men was made by Major-General A. H. MacDonnell, a member of the Senate committee investigating the bill. Dr. J. A. Amyot, Deputy Minister of the Department of Pensions, informed the committee it was the intention to appoint veterans to the committee.

General MacDonnell did not contend that returned men could not fill the offices, but he believed the general public should be represented as well. County judges could be utilized, he suggested, and they would bring to the committee experience that the majority of returned soldiers lacked.

Change Will Assist Trade

Canadian Tariff Gives Many Advantages To British Manufacturer

London, England. Hon. W. R. Smith, parliamentary secretary to the Board of Trade, said in the House of Commons, the changes in the Canadian tariff would affect business operations in a great many sections of the export trade of Britain. Every effort was being made to assist manufacturers and traders to take advantage of their new opportunities, he said. While the department of overseas trade believed no practical purpose could be served by such a conference it would be glad to adopt the proposals of particular groups if they felt that consultation would be useful, he concluded.

Japanese Immigration

Ottawa, Ont.—Two hundred and thirty-four Japanese immigrants have been admitted to Canada since September 1, 1928, up to the end of the last fiscal year, according to a return tabled in the House of Commons. Of these 120 were males, and the balance females. Fifty-eight were agricultural workers, and 36 were domestics. The remainder were children. Only 50 Japanese are permitted to enter Canada annually.

Considering Reverse "Rhodes Scholarships"

Would Permit English Boys To Attend Canadian Universities

Toronto, Ont. Sir Robert Falconer, president of the University of Toronto, announces the establishment of a reverse "Rhodes Scholarship" is being considered by a committee of educationists to permit English boys to attend Canadian universities.

Dr. Cyril Norwood, chairman of the party of English schoolmasters which recently visited Canada, strongly advocated such an exchange of students, stressing his wish to see English boys specialize in economics and science. In praising the idea, Chancellor H. P. Whidden, of McMaster University, said, "I consider the point by Dr. Norwood, that Canada offers opportunities in the scientific and economic fields is well taken. One would hardly expect English students to study classics here when such excellent facilities are offered at Oxford."

Gen. C. H. Mitchell, dean of the faculty of applied science of the University of Toronto, termed the scheme of "Reverse Scholarships" practical and feasible.

Conciliation Board To Settle Dispute

Workers At Vancouver Wish Alterations In Renewal Agreement

Ottawa, Ont.—A labor dispute involving 1,100 water front workers in Vancouver and district is to be settled by a board of conciliation under the Industrial Disputes Investigation Act, Hon. Peter Heenan, Minister of Labor, announced. The parties involved are the Shipping Federation of British Columbia and some of their employees who are members of the Vancouver and District Waterfront Workers' Association.

The men wish the renewal of the agreement with the employers covering wages and working conditions which expired November 30, 1929 with certain alterations. Two members of the board of conciliation have already been appointed, R. B. Pirie, of Vancouver, on the recommendation of the employees, and J. E. Hall on the recommendation of the employers.

Mr. Heenan is awaiting word from these two board members as to the selection of a third member who will act as chairman.

NEW TARIFF ON FRUITS IS TO BE AMENDED

Ottawa, Ont.—Amendments will be introduced to a number of items in the tariff resolutions affecting fruits and vegetables, Hon. C. A. Dunning, Minister of Finance, announced in the House of Commons. The changes will apply to products which under the new schedule have ad valorem as well as specific duties. The specific will be made to apply only in those seasons of the year in which foreign importations come in competition with Canadian grown fruit and vegetables.

The announcement of the finance minister was greeted with applause by the Conservatives who expressed the opinion that he had become a convert to the seasonal tariffs they had been advocating.

When the uproar had quieted, Mr. Dunning explained that the decision to limit the specific duties to certain seasons instead of the entire year had come as a result of conferences with the fruit and vegetable growers. They had expressed willingness to co-operate in this connection. He could not promise that the seasons would suit all the growers from the Atlantic to the Pacific because of the many differences as to the dates when such products are marketed here, but an attempt had been made to deal as fairly as possible with all.

The House spent the entire day on budget resolutions, and some progress was recorded. The tea item, as amended by the budget, was finally approved. Under this item tea produced in the British Empire enters Canada free under the British preference, and is subject to duty of nine cents, intermediate, and ten cents, general.

Approval was also given to the resolution which declared that excise duties or taxes shall be disregarded in estimating the market value of goods for special duty, when these commodities come in under the British preference, or intermediate tariff. The resolution passed, however, only after protest by certain Conservative members that the Canadian silk industry would suffer through the admission of Japanese silks.

BILL ON LIQUOR CLEARANCES TO STATES PASSED

Ottawa, Ont. Without a recorded vote, the senate gave third reading to the government bill prohibiting the clearance of liquor to the United States. An amendment, moved by Hon. Rufus Pope, to the effect that the bill should not come into effect until proclaimed by the governor-in-council, was voted down by a majority of 20 votes. The vote was registered for 10, against 30.

Although several senators spoke against the bill, there was no registered vote on the main motion. A clerical error, the substitution of the word "exportation," was corrected in amendment and thus the bill will be referred back to the commons before becoming law.

Sir George Foster, for years one of Canada's chief temperance workers, was one of the bill's champions. He believed the people of the United States through the imposition of the 18th amendment, had expressed their will against alcohol. It followed that Canada's only proper attitude was to prohibit the flow of liquor into that country.

In favoring the bill he said the principles upon which it was based were set forth both in the report of the parliamentary committee investigating the customs department in 1926 and in the report of the royal commission which extended the probe. Criticism, he said, should be made against the government for not implementing the contents of the two reports sooner, but this would not debar him from supporting the measure now that it had been prepared.

It would be practically impossible to clear liquor from Cuba to United States because of the convention between those countries he said. Therefore he did not believe in the contention that the bill would divert the flow of liquor to Cuba. It might be possible, he admitted, for distillers to subvert the purpose of the prohibition by diverting the export of liquor to St. Pierre and Miquelon.

Senator Daniels announced he would support both the bill and the [illegible]

Senator Belue reiterated what he said during an earlier debate on the measure, that the passing of the bill would mean a loss of revenue to Canada. However, the country had a duty to perform. It must shoulder the financial loss and perform its international duty of goodwill.

New Minister To Canada

Hanford MacNider Is Chosen For Position At Ottawa

Washington. Lieut. Col. Hanford MacNider of Mason City, Iowa, is the United States minister to Ottawa.

President Hoover has chosen and the Canadian Government has approved a distinguished soldier and financier to fill the post vacated by Hon. William S. Phillips. Colonel MacNider is a Harvard man, former assistant secretary of war and former commander of the American Legion. He is 41 years of age.

He entered the Coolidge administration as assistant secretary of war in October, 1925, serving until May, [illegible]

Colonel MacNider's career as a business man and financier has been eminently successful. He is president of the First National Investment Company of Mason City, vice-president of the First National Bank, treasurer of North Western States Portland Cement Company.

Radio Stations For North

Two Will Be Added To Network Linking Up Arctic With Rest Of Canada

Ottawa, Ont. Involving an expenditure of approximately $67,000 two low power radio stations are to be established by the Dominion Government in the far north, one at Coppermine, Coronation Gulf, and the other at Chesterfield Inlet.

These additions to the network stations linking up the Arctic with the rest of Canada have already been approved by order-in-council and the work of installation is to be carried out immediately by the Department of Marine and Fisheries.

Decision to establish the Coppermine station is timely in view of the influx of prospectors which is anticipated in the district. Both stations are to furnish meteorological reports which will have an important bearing on the successful navigability of the Hudson Bay route.

Small gliders are being offered in England at $200 each.

? Are YOUR Children PROTECTED ?

During The Year 1928

DIPHTHERIA Was Responsible for 50 Deaths

And

TYPHOID FEVER Was Responsible for 28 Deaths

of Alberta Citizens

(94% of the Deaths from DIPHTHERIA occurred among children under 15 years of age)

There Need Not Be a Single Death in the Province, from Diphtheria, Typhoid Fever nor Small Pox

¶Science has placed in our hand the means of wiping these preventable diseases out of existence.

¶The vaccines required for this purpose are furnished FREE OF CHARGE to all physicians and local Boards of Health in the Province by the Provincial Department of Health.

¶It is the duty of local Boards of Health to prevent epidemics starting, and the most effective method of doing this is to

Protect the Children of our Province from These Preventable Death-Dealing diseases

¶What has been done for the protection of the children of Your community?

¶Is your community safe for YOUR children?

¶The Provincial Department of Health issues Bulletins and pamphlets giving information and advice on how to secure a large measure of health and how to safeguard life in your community. Copies of these publications may be obtained on application to the Department.

French River, Home of Wiley "Muskie," Will Soon Echo Cries of Elated Anglers as They Battle Fresh Water Tiger

"Now is the time for all good fishermen to prepare for that summer trip" is an appropriate slogan for disciples of Isaac Walton these balmy spring days. A successful fishing trip depends largely upon the careful selection of location, tackle and even associates, for many a party has been ruined by the last minute introduction of a "wet blanket" to an otherwise congenial collection of sportsmen.

One of the most interesting fishing streams in North America is French River, Ontario, 215 miles north of Toronto on the Canadian Pacific Railway. This lordly river is celebrated as the habitat of the fighting muscalunge, one of the gamest fish known; huge Great Northern pike, pickerel, an abundance of small-mouth and large-mouth black bass and other finny prizes. To accommodate sportsmen and their families, a fine bungalow camp—a collection of individual cabins centering around a main clubhouse—has been erected on a cliff overlooking the river. Here the fisherman and his family can "rough it in comfort," far from the cares and annoyances of a work-a-day world.

That big "muskies" are plentiful at French River is proven by the fact that one recent summer a monster muskie weighing 46 pounds was taken in the North Channel at the mouth of the Wolseley River. Also, not long ago a party of Ohio sportsmen caught, besides their daily limit of bass, pike and pickerel, no less than seventeen "muskies" ranging from 10 to 30½ lbs. In 1926 a "muskie" of 38 pounds weight, 50 inches long and 21 inches in girth was taken in the main channel of the French, one mile from the bungalow camp.

The French River Bungalow Camp will open June 15 and remain open until Sept. 15. Jack Strathdee, its genial manager, is an experienced outdoorsman whose chief delight is coaching the uninitiated in the art of luring the fish. French River also has a fine 9-hole golf course so that devotees of the royal and ancient game who are also fond of fishing need not entirely forego the former sport in favor of the latter.

Please Renew Promptly

THE LAST MONTH OF SCHOOL

(A Red Cross Article)

The following valuable hints for mothers should be made note of as the pressure of examination time draws near. Failure to pass exams is often the result of poor health, a fatigued mind in a depleted body. Do not let the boys and girls burn the candle at both ends or a nervous breakdown will be the result.

How to pass exams. Keep the child's energy up to par by special attention to his diet. Begin each day with a substantial breakfast of fruit, cereal, milk or cocoa, and toast, also the occasional egg.

Rest periods are important and of real value after the noon lunch and before the evening meal. A happy unworried mental attitude is essential when settling down to do homework. Cultivate confidence in the child's mind and courage him to tackle his problems.

A quiet place to study and a peaceful sympathetic atmosphere at home will give the best environment. See that supper is good meal of satisfying and lasting quality. Lastly, sleep long, with the windows open, going early to bed every night for the month of June.

In short, see that your child follows the teachings of the Junior Red Cross Health rules if you would have him up to the mark.

A copy of these rules and literature on food for the family, may be had free on request from the Canadian Red Cross Society, 407 Civic Block, Edmonton.

EDMONTON HAY MART IS DECIDEDLY QUIET

Trading on the Edmonton hay market has been very limited, during the past week. Receipts continue to be fair but the demand is slow so that there is very little stuff being turned over.

Prices are holding at unchanged figures as compared with last week which were as follows:

Timothy	$20.00@$21.00
Upland	$9.00@$10.00
Prairie Wool	$12.00
Blue Joint	$8.00@$9.00
Red Top	$9.00@$10.00

BABY CHICKS

Thousands of pure bred chicks hatching twice each week for immediate delivery. 100 per cent live arrival guaranteed. The weather is warm broody hens are waiting. Rush your order. Pay for the chicks when they arrive. We will ship C. O. D. subject to inspection. We guarantee our chicks.

	25	50	100
White Leghorns	$4.00	$8.00	$15
Barred Rocks	$4.50	$8.50	$16
White Wyandottes	$5.00	$9.50	$18

Immediate shipment from any of our four hatcheries...Write or telephone us.

KEEPING THE FEED AND WATER CLEAN ON THE RANGE

(Experimental farms note)

With the ever increasing danger of parasitic infection due to the intensive methods now in vogue in the rearing of chicks and the handling of the laying and breeding stock it behooves breeders to adopt every sanitary precaution to ensure the health and well being of the growing chicks.

Infection through the drinking water and feed, while on range, should be avoided by using stands for the feed troughs and drinking vessels, so that there will be no chance of infection through the consumption of feed that has become contaminated by coming in contact with the droppings on the ground or through the drinking of water that has formed puddles on the ground around the drinking pails.

For this reason all feed and water consumed should be supplied either from hoppers for the dry mash or from troughs for the scratch grain and from elevated clean vessels for the drinking water. The roosting shelters, hoppers, troughs and water stands should be moved at frequent intervals so as to keep the chicks on fresh ground as much as possible.

For sketches of shelters, hoppers, or water stands write the Poultry Division, Central Experimental Farm.

Lady: "Why don't you go to work if you are hungry?"

Hobo Harry: "I tried that once and it only made me hungrier."

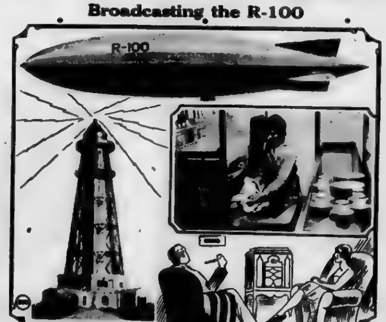
Broadcasting the R-100



When the R-100, Great Britain's huge new dirigible, arrives in the Dominion shortly, there will be no excuse for any Canadian being ignorant of her visit. The news will be broadcast throughout Canada by the Trans-Canada Broadcasting Company from coast to coast over the radio programme transmission system of the Canadian Pacific Railway Company's Telegraphs.

The arrangements will include a twenty-four hour service on the day of arrival and will be put out through stations in Quebec, Montreal, Toronto, London, Winnipeg, Regina, Saskatoon, Edmonton, Red Deer, Calgary, Vancouver, Fleming and Yorkton, Sask. Messages from the airship will be broadcast as she approaches the 75-mile radius and will include a description of the mooring one of the most interesting and exciting moments in the whole programme. This will be broadcast by T. D'Arcy Finn, managing editor of the "Ottawa Citizen" as chief announcer. The broadcast of the arrival will be supplemented during the two succeeding days by bulletin services and descriptions of special events. Lay-out shows the R-100 in flight; the kitchen of the air liner, and the St. Hubert mooring mast.

Famous Explorer Dead

Dr. Fridtjof Nansen Had Distinguished Career Also As Zoologist and Author

Dr Fridtjof Nansen, 68, famous explorer and humanitarian, is dead. The death of Dr. Nansen, who was widely known as an Arctic explorer, zoologist, diplomat, humanitarian and author cut short new plans that he was formulating to make a dash to the North Pole next year in the dirigible Graf Zeppelin.

Dr Nansen had been planning to make his North Pole trip this year, and because of the unfavorable economic situation and the impossibility of concluding insurance arrangements for 1930, the project was cancelled with every expectation of making it in 1931.

The famous explorer, who made several trips to the Arctic, the most noted being the "Fram" expedition in 1893, also gave much of his life to relief work after the great war, being particularly interested in efforts to establish an Armenian national home.

One of the famous citizens of Norway, Dr Fridtjof Nansen had a distinguished career as an explorer, zoologist, diplomat, humanitarian and author and while he achieved notable successes in all those fields, he was perhaps best known for his expeditions into the Arctic regions.

Science was enriched by his explorations and his work as a zoologist, his country profited by his experience during his service as a diplomat, the lives of hundreds were saved, or at least, their conditions ameliorated by his relief work after the world war, and the world generally was enlightened by his writings. The far-reaching effect of all his honors and decorations bestowed upon him by countries in all parts of the world.

Born October 10, 1861, at Froen, near Christiania (now Oslo), Dr. Nansen came of a family of national fighters who in the seventeenth century deprived the nobility of their privileges. He lived in his native town until he was 15, when his family moved to the national capital. There the boy prepared himself in the lower schools for the Royal University of Christiania, which he entered in 1880 and made a special study of zoology. It was while a university student that he got his first taste of Arctic exploration, making a trip on the sailing vessel Viking to the waters of Greenland.

"Do you really enjoy country life, old man?"

"You bet I do."

"What do you do with yourself in the evenings?"

"I come to town."

Spain's 1930 olive oil production is estimated at 600,000 tons.

Pledge May Be Fulfilled

If Prince Of Wales Opens Hudson's Bay Railway

A special despatch to the Toronto Mail and Empire, from Ottawa, says:

"If the government, acting on the suggestion of the Hudson's Bay Company induces the Prince of Wales to come to Canada to officiate at the opening of the Hudson Bay Railway, tribute will be levied personally by royalty for the first time in the history of this continent.

"Officials have discovered in the charter granted by Charles II. to the Company of Gentlemen Adventurers, a clause providing that tribute of two black beaver and two elks be paid as token of sovereignty at any time royalty visited the domains of the bay. Royalty has never visited the bay. In 1931, the first opportunity to fulfil the charter pledge may come.

"Black beaver are now more rare than in the days when beaver represented the wealth of the north. To the king who exacted promise of tribute, a black beaver coverlet for his canopied bed, was presented in the early years of the company's history. To his brother, the Duke of York, and to Churchill, for whom Canada's new Arctic port was named, were given at the same time two pairs of black beaver stockings opera length.

"What the Prince of Wales will do with his black beaver skins now that beaver stockings and beaver coverlets are out of style, Ottawa, immersed in politics, does not care."

Unusual Use For Stainless Steel

Proved Best For Discs To Trace Whale's Movements In Arctic Seas

Of the many new uses to which stainless steel was put in 1929, perhaps the most unusual was the making of identification disks shot into whales in order to trace their movements in the Arctic seas. All sorts of metal plates have been tried for this purpose in the past, but without exception they have induced inflammation that has resulted in the shedding of the disk. Stainless steel is not affected by salt water, and the arrow attached to each marker once it is embedded in the blubber, remains there until the mammal is caught. Hundreds of these disks were required for the purpose.

Blue-Blooded Fish

In a small pool in the Temple, London, England, are twelve fish which are the blue-bloods of their species. The twelve—a solitary roach and eleven tench—are descendants of fish which were placed in the pool in Queen Elizabeth's day. For four centuries their forebears have inhabited the pool, swimming about under the eyes of such celebrities as Shakespeare, Dr Johnson, Oliver Goldsmith and Charles Lamb.

Deadly War Weapon

A new war weapon is being constructed secretly in England. This is a giant airplane torpedo, operating without a crew, its engine and course controlled by clockwork and its hull a mere receptacle for bombs. The control is set and on arriving at the appointed moment, the engine stops and the machine crashes to earth with its deadly load.

Recorder Of Archives Retires

Rev. Albert Lee Served For Many Years At Windsor Castle

Rev Albert Lee, M.V.O., after serving for many years at Windsor Castle, as recorder of the King's archives, has retired on reaching the age limit.

The contents of His Majesty's archives, which are most valuable, are secret. They consist of documents which are the property of the Sovereign, and have been collected for some centuries. They are singularly rich in Stuart papers largely concerning the Pretender.

Other documents deal with the movements of George III., George IV., and various ministers of State. These are interesting because so much being of a secret nature, they are in script.

There is a large collection of Victorian papers from the time of Lord Melbourne, who was Queen Victoria's first prime minister.

From that point there are papers from all parts of the world, including many from sovereigns, presidents and ministers of State.

The King Edward VII. papers are of a similar description.

All these documents are lodged in the great Round Tower at Windsor Castle. They are placed in a strong room—the so-called Muniment Room.

The historic rooms occupied by the archives staff are reached by 139 steps.

New War Book Denounced

Gross Slander Of British and Canadians, Says London Daily Mail

The Canadian troops are slandered and the insinuation of cowardice is brought against British and Dominion generals by a new war book, according to a London Daily Mail editorial published under the caption: "A Slanderous War Book."

The volume is by Charles Hale Harrison, and is entitled: "Generals Die in Bed."

The Daily Mail, in its review, declares the book exploits the "looting" of Arras by Canadian troops, slanders the actions of the Dominion's soldiers in France generally, and imputes base cowardice to the general of the regular and Canadian forces.

"Particularly monstrous," says The Mail, "is the accusation which Hale brings against the Canadian and British authorities when he says the 'Llandovery Castle,' sunk by the Germans, had arms and ammunition aboard."

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms live, and, at the same time, they are tonical in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

Signs Contract With Russia

A. J. Bone, manager for the past two years of Manitoba Basin Mines, Ltd., has signed a two-year contract with the Russian government. He will be stationed at Sverdlovsk as manager of the metallurgical plants of the Non-Ferrous Metal Trust, branch of the Soviet government. Sverdlovsk is centre of a copper and gold area in the Ural mountains.

Do Not Hesitate to Try It

"Your Vegetable Compound is a good medicine. Anyone who is in poor health should not hesitate to try it. When I was taking the Vegetable Compound I tried the sample Liver Pills I found in the package. I have taken them every night since and I can feel myself improving. I am so thankful for the good they do me that I have told several women about it."—Mrs. G. W. Poliff, 263 Huron St., Stratford, Ontario.

May Improve Radio Reception

Magnetic Observations Are To Be Taken In Polar Areas

Better weather forecasts and radio reception may result from a year's international study of magnetic meteorological observations in the polar areas, Captain H. U. Sverdrup, noted Norwegian explorer, said.

Simultaneous observations near both poles in 1932-33 will gather magnetic survey and meteorological observations through a network of stations in the Arctic and Antarctic. The International Committee of Meteorological Directors expects the increased knowledge gained to be of practical application in problems connected with terrestrial magnetism, marine and aerial navigation, wireless telegraphy and weather forecasting.

THE REASON WHY

Thin Weak Children Need Baby's Own Tablets

Malnutrition or inability to derive nourishment from food, is a common trouble with little children and is entirely due to stomach and bowel weakness. Another cause of loss of flesh and sleep is worms.

To correct stomach and bowel troubles and thus banish constipation and indigestion, break up colds and simple fevers, expel worms and allay the pain which accompanies the cutting of teeth is what Baby's Own Tablets were designed for. They never fail to be of aid and can be given with safety to the youngest babe.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr Williams' Medicine Co., Brockville, Ont.

Innovations On Ocean Liner

People Crossing Atlantic Have More Than Home Comforts

Among other innovations upon a new 45,000 ton liner that is being built in Italy we are promised a theatre. Already there are ships with garages, swimming baths, telephones, cabarets and the like, so that very soon passengers who make the Atlantic crossing will hardly realize that they are at sea at all.

If some of the old shellbacks who manned the famous tea clippers a century ago could return their comments upon these floating palaces would be amusing, and probably not very complimentary. There are still a number of people who enjoy the freshness and freedom from land worries that are the delights of a sea voyage, and they will be thankful that there are still many ships that are comfortable without being too reminiscent of life ashore.

Interesting Scientific Exhibit

Huge Caterpillar Will Disclose Many Secrets About Insects

A caterpillar as big as a dinosaur, 60 feet long and 11 feet high, is planned as a scientific exhibit at the Chicago World's Fair, in 1933. Visitors will walk into his mouth and behold from end to end ingenious wonders such as the Arabian story tellers overlooked, but which are so efficient as normal mechanisms that today they serve three-fourths of the animal kingdom. The layman will get a first-hand look-in upon some of the reasons why staid scientists occasionally ask seriously whether man will survive in his "war with the insects."

River Being Moved

Because the Trinity River at Dallas, Texas, was restricting the growth of the city, it is being moved two and one-half miles and placed in a man-made channel. Twenty-five miles of embankment 30 feet high and 154 feet thick at the base, will imprison the stream when the task is finished.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

The Moscow government has approved a change in the calendar and time hereafter will be dated from November 7, 1917, the date of the Bolshevist revolution.

Heal the Sprain with Minard's.

Propose World Trip In Sailing Vessel

Would Take About Eighteen Months and Make Real Holiday

Business men in quest of a thorough holiday, who can enjoy an ocean voyage on an old fashioned sailing ship, have an opportunity of an unique trip if they accept an invitation which was reported to the Montreal Board of Trade at its council meeting recently.

The council was advised of a proposed round-the-world trip in a square rigged sailing vessel of about 2,000 tons ... registry, sailing from New York on or about September 15 next. The trip will take about eighteen months and stops will be made at practically all the principal ocean ports of the world. While the vessel is equipped with auxiliary engines, it is expected that these will be very little used and that as nearly as possible the voyage will conform to the conditions prevailing in the old sailing days. The ship will be manned by a capable captain and a large crew, and excellent passenger accommodation will be provided. As the accommodation is limited, only about fifteen couples will be taken as passengers.

Little Helps For This Week

"Commit thy works unto the Lord, and thy thoughts shall be established."—Proverbs xvi. 3.

When first thy eyes unveil, give thy soul leave
To do the like; our bodies but forerun
The spirit's duty. True hearts spread and heave
Unto their god as flow'rs do to the sun.
Give Him thy first thoughts then; so shalt thou keep
Him company all day, and in Him sleep.

—Henry Vaughan.

Every morning before we cross our threshold, before we make a single plan or appointment for the day, we must give ourselves unto our Father's business. We are not, as we sometimes do, to determine what we will do, and then devote it to God, but we are first to devote ourselves to God, and ask Him what we shall do.—Alexander McKenzie.

Man Without a Country

Sam Holovkit, Russian, who fought for Canada in the Great War, is officially a "man without a country." Though an alien, he is permitted his liberty, for U.S. federal immigrations have tried thrice in vain to find a land to which they could deport him.

Most of the street accidents in England are among people between 15 and 25 years old.

Turkey is conducting a campaign against juvenile gambling.

London's Moving Stairways

Will Be Speeded Up To 180 Feet a Minute

The moving stairways connected with London's famous underground railways are to be speeded up. At present this speed is 90 feet per minute. Experiments are being made with a stairway travelling at 150 feet a minute. Regular passengers who nip on and off the escalators with agility, would be glad to have them go faster, but the many who still regard them as perilous innovations will be more inclined than they are now to use the staircases.

"After Baby Came I Was Weak, Skinny Gained 22 Lbs."

"After baby was born I was very weak, skinny. Since taking Ironized Yeast feel fine. Gained 22 lbs." — Mrs. Laura Benoit.

Thousands write new Ironized Yeast adds 5 to 15 lbs. in 3 weeks. Ugly hollows fill out. Bony limbs get graceful roundness. Muddy skin gets clear and rosy like magic. Nervousness, indigestion, constipation vanish overnight. Sound sleep, new pep from very first day.

Two great tonics in one — special weight-building Malt Yeast and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in ½ time. No yeasty taste, no gas.

So quit being "skinny," tired, unattractive. Get Ironized Yeast from druggist today. Feel great tomorrow. Money back from manufacturer if not delighted with quick results.

Esperanto, the international language, is built up from the roots of 900 words, chiefly of Latin origin.

Greenwich observatory in England dates back to the time of Queen Elizabeth.

Gyproc Makes Summer Homes FIRE-SAFE!

PROTECT your family by making your Summer home draught-proof, dust-proof and fire-safe. The new Ivory coloured Gyproc, that does not burn will render you this service at small cost.

Use it for structurally strong walls, ceilings and partitions. It needs no decoration (when panelled) but you can tint, paper or plaster it if you wish. It is easily and quickly applied, is a permanent asset, and is vastly superior to other building materials.

Your dealer's name is listed below. Ask him today for full information on Gyproc Wallboard or send for interesting free book "Building and Remodelling with Gyproc."

Fireproof Wallboard

THIRD FORTNIGHTLY CROP REPORT

During the first week of the past fortnight the weather was generally clear with slightly higher temperature prevailing. Local rains occurred in Southern and Eastern parts of the province. High winds were of frequent occurrence and some damage resulted due to soil drifting.

On May 20th, a heavy wind swept over the central portion of the province particularly from Olds to Lacombe and eastward doing damage to crops on summerfallow. In the Edmonton district the wind was followed by rain and snow, the greatest snow being reported from the area lying North of [illegible] extending to the Peace River District. A large area to the north and east of this city received [illegible] much needed moisture. At present all parts of the province report sufficient moisture for immediate needs. Frost has done considerable damage to trees, shrubs and early garden seeds but only slight damage to Field Crops.

All wheat [illegible] and 75 per cent above ground [illegible] seeding is complete with the exception of oats for green feed and barley. 75 per cent sown [illegible] the grain is of good color and establishing a good root system. The crop has gone in early and having sufficient moisture for germination is a way to a good start.

All spring rye and 80 per cent of sugar beets is seeded. There is a slight increase in the area devoted to sugar beets.

Weeds are unusually bad in early sown fields. Slight damage is reported due to wire worms and cut worms.

Correspondents generally agree that an increased acreage has been sown to sweet clover, alfalfa and grasses.

Hay and pasture crops are making excellent growth and livestock is progressing favorably.

MOTHER SHIPTON'S PROPHECY

First established in 1488, republished in 1641. It will be noticed that except that last two lines, her prophecy has been fulfilled to the letter and the last remains to be seen.

Carriages without horses shall go,
And accidents fill the world with woe
Around the world thoughts shall fly
In the twinkling of an eye
Later yet shall wonders do,
Now strange yet shall be true.
The world upside down shall be
And gold be found at root of tree.
Through hills men shall ride.
And no horse or ass be at his side
Under water men shall walk
Shall ride, shall sleep, shall talk.
In white, in black, in green
In the air men shall be seen
Iron in water shall float
As easy as a wooden boat.
Gold shall be found
In land that's not now known.
Fire and water shall wonders do.
England shall at last admit a Jew
The world shall get rich and dirty
And come to the end in Nineteen Thirty.

—Free Press Prairie Farmer

Gum-Dipped
for Extra Strength and Mileage
Every fibre insulated with rubber
BENEATH the rugged safety tread of toughest rubber, Firestone Tires have the strongest, most durable cord construction ever known. Layer upon layer of cords are scientifically twisted for greatest strength and elasticity—then dipped in pure rubber which protects every fibre against internal heat and friction.
Gum-Dipping doubles flexing life and adds thousands of extra miles of dependable, trouble-free service. Only Firestone Tires are Gum-Dipped. No other tire has its advantages. Because of this extra process, Firestone tires hold all world records for mileage and endurance.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

IT'S MY STOMACH

Food plays an important part in the securing and maintaining of health. We are told that we should eat to live not live to eat, which is one way of saying that we should not eat to excess. In addition to avoiding excess, it should betaken into consideration that the body demands a well balanced diet which will include milk products, fresh, green vegetables and fruits.

Proper food and proper digestion are of an importance that cannot be overemphasized. The stomach does its work day after day and does not very often fail to do so. It stands a fair amount of abuse without protest, and, as long as it does its work without attracting attention, we do not give much though to this important organ.

Pain or discomfort in any part of the abdomen is apt to be blamed on the stomach, which is then said to be upset. Very often, the last thing eaten is thought to have disagreed with the stomach.

When there is discomfort or pain in the region of the stomach, there is something wrong, but it certainly does not mean that the stomach is necessarily responsible. Abnormal and diseased conditions of the stomach do occur but most of the distress blamed on that organ is not caused primarily by the stomach.

Worry, nervous strain and anxiety are real causes of pain occurring in the upper part of the abdomen. The business man who works under tension, who hurries through his lunch, and who does not take time to relax may expect to have an upset stomach.

The onset of many of the diseases is accompanied by loss of appetite nausea and sometimes vomiting. In such cases, the stomach, as one organ of the body, is affected by a general disease of the whole body.

Heart disease may mean that the supply of blood to the stomach is not sufficient to allow the stomach to do its work properly. As a result it is difficult for the organ to digest foods which require a considerable time for the process. Under such circumstances, the use of foods which are difficult to digest may be followed by distress, but the heart, and not the stomach, is really to blame.

When the stomach goes on the rampage, we should not think so much of the last thing eaten as being the cause, but rather consider this as a symptom of some condition which requires attention.

The stomach should not be abused. It is not to be expected that foods and beverages can be used indiscriminately without causing trouble in the organ which is overburdened as a result of carelessness.

CHINESE JUSTICE

In a village near Pekin four tradesmen clubbed together to buy cotton. To protect it from rats they procured a cat, and agreed that each owned one of the animal's legs. The cat hurt a paw, and the owner of that leg bound it up with a rag soaked in oil. But the cat went too near the fire, the bandage ignited and the terrified animal rushed among the bales of cotton, a number of which flared up and were destroyed. The three owners of the uninjured legs sued their partner for damages. The judge ruled thus: "Since the cat was unable to use the injured leg, the cotton was set on fire by the action of the three uninjured legs on which the cat ran among the bales of cotton. Consequently these three legs are guilty, and their owners must pay damages and costs."

FREE HEALTH LECTURES TO BE GIVEN IN THE UNITED CHURCH

On Thursday and Friday of this week, Dr J. C. Lawson of Vancouver will deliver lectures on the philosophy of health and "Diet and Health". These lectures are free and no doubt contain valuable information to those interested in their well being.

The lectures will commence at 8 p. m. on the days above mentioned.

MILK FOR GROWING PIGS

(Experimental farms note)

Of all farm animals, pigs grow the most rapidly and therefore require a plentiful supply of protein and mineral matter in their food if they are to make satisfactory gains and make the best use of food consumed. Protein is required for body growth, and mineral matter is needed for bone development and other vital purposes. Rations for growing pigs when made up entirely of meals from the cereal grains are unbalanced because of the unsufficient and incomplete supply of protein and mineral matter. Buttermilk and skim-milk are protein and mineral rich foods and when these are added to a cereal grain ration in sufficient amounts, growth is likely to proceed normally. If Buttermilk or skim-milk is not available, tankage, a by-product of the packing plant, consisting mainly of sterilized, powdered meat, and bone scraps, and also rich in protein and mineral matter is recommended as a substitute feed and if used should make up five to eight per cent of the grain ration.

Milk has possibly its greatest value in getting the weanling pigs off to a good start. Care must be taken, however, not to feed it in too large quantities as over-feeding the growing pig on milk tends to make his middle heavy and the best value is not realized from the milk. Up to 80 pounds in weight it is recommended that 4 pounds of milk be fed for each pound of meal eaten. Between 80 and 125 and 200 pounds one and one half to two pounds of milk should be fed for each pound of meal eaten.

A test was conducted at the Experimental Station, Lacombe, Alberta, during the summer of 1928 by self feeding three groups of pigs in dry lot a similar grain ration during the growing period, with eight per cent tankage added to the ration in one lot, and an average of six pounds of buttermilk per head per day in the second lot. The third lot was used as a check and fed the grain ration with water only. In order to obtain further information relative to the value of buttermilk and tankage for growing pigs in dry lots this test was repeated again during the summer of 1929. Based on the two year average results, valuing oats at 81 and a half cents a bushel and barley at 67 and a half cents a bushel it was shown that on the basis of grain saved buttermilk costing 2 cents a gallon had an actual value of 8 cents a gallon and tankage costing $2.50 per hundred pounds had an actual value of $9.86 per hundred pounds. The pigs fed buttermilk and meal in these trials gained 1.42 pounds a head daily which was 0.20 pound more than those fed tankage and meal, and 0.75 pound more than those fed meal onyl.

Local and Personal

Word has been received that Helen McCauley, who has been taking her Grade twelve in North Battleford, Sask., is ill with Scarlet Fever. Her mother left on Saturday night to visit her.

Keith Bowick was down from Edmonton on Sunday and visited at his parents home.

Some friends from Edmonton of Mr. and Mrs. R. Skitch visited at their home on Saturday evening.

A number of Tofielders motored to Ryley on Friday last to see a recitation recital of the physical and expression students. These classes are under the direction of Mrs. McPherson of Ryley. They all reported a very enjoyable time.

Paul Thompson, junior in the Bank of Montreal here has now returned to his duties after a two weeks vacation.

June 3rd, King George's birthday, was observed as a holiday by the bank here.

Miss Eva Clutterham, of Chipman, was home for the holiday.

It will be noticed by many of the soccer followers that the team chosen to play the touring Glasgow Rangers, that Bill Wallis, formerly of Tofield now of Edmonton has been chosen as goalkeeper.

Robert Hopgood, teller in the Bank of Montreal is now on his vacation.

An organization meeting will be held of the Tofield Chautauqua committee on Wednesday, June 4th, at 8:00 o'clock in the curling rink.

Rev. Gordon attended the conference held in Edmonton, in the McDougal Church last week and part of this week.

Mr. Frith of Ministic district has an exceptionally early garden this year. He had radishes ready to use for the past two weeks and lettice is ready now. These have been grown from seed planted last fall. Planting garden seeds in the fall is a new innovation and one that in this case at least has proved satisfactory.

Mrs. Rowe, and daughters, Mary and Doris are leaving by the C. N. R. Confederation train Thursday morning for Toronto and other points in Eastern Canada. At the end of June Mr. Rowe and sons Coachworth and Douglas will motor to Toronto by way of Shelby and Duluth.

The postponed reception for the Rev. G. W. Wilson will be held on Friday evening in the Women's Institute Rooms at 8:00 p. m. Let us have a good crowd out and give him a warm reception.

CHICKEN FOR DINNER — SOMETIME

Elections may come and go—it may rain and it may not—but if fifty baby chicks grow and thrive the editor's family is going to have a chicken dinner, several of them in fact, this fall.

Today, Tuesday, we received fifty baby chicks from the Hambley Electric Hatcheries, at Calgary. They are, sturdy little fellows, barred rocks, and appear to like Tofield as a location. The day old chick business has assumed large proportions in recent years, thousands being shipped to all parts of the Dominion from central hatcheries. If after two elections we have any friends left—and chickens—chickens and friends might meet at the dinner table without the formality of an introduction.

CORRECTION

In the Ketchamoot News of last week, the item referring to the fire running at large case originating in that district made it appear as if John Brown was the Plaintiff. This is not correct. John Brown was in court in the capacity of a witness only. We are very pleased to make this correction.

Tofield Ball Team Wins At Ryley

On Wednesday night of last week the local intermediate ball team motored to Ryley to play Ryley in an exhibition game.

Ryley took the field first and in their first time at bat Tofield collected two runs. But Ryley soon wiped this out when they went on a batting spree and sent four runs into the counting house. From here on it was a see saw battle with neither team having any advantage.

In the fifth inning Tofield suddenly took a liking to Anderson's offerings and walloped the ball to the four corners of the lot and when the smoke had cleared away Tofield had collected six runs and were leading by a score of 8-4. In their turn at bat Ryley got one run bringing their total up to five. In the sixth inning Tofield chased two more runs across the platter while all Ryely could get was a goose egg.

The seventh inning was scoreless and the game was called on account of darkness.

Both pitchers hurled good ball until the fifth inning when Tofield hammered Anderson for six runs. Ray Martin made a nice catch of a high fly and made a double play by beating a runner to first with a nice throw.

Tofield line up: C., G. Wood, p., Ed Hill, 1st., F. Meadows, 2nd., B. Hannan, S.S., W. Worton, 3rd., A. Francis, R.F. R. Craig, C. F. R. Martin, L. F S. Worton.

JUNIORS LOSE TO SENIORS

On Thursday evening of last week the annual senior and junior ball game was played. Although it was generally considered the seniors would win, it provided plenty of fun for both players and spectators.

The seniors took the field first with Laurie Scott doing the mound duty and Gene Fontaine on the receiving end. The juniors were put out in one, two, three, order and the seniors in their turn to bat collected one run. Here Ed Hill who had started pitching for the juniors was replaced by Glen Wood, W. Worton coming in from Short Stop to catch and Ed Hill taking Short Stop.

For a few innings the score was fairly close with the seniors getting two or three scores and the juniors one.

In the sixth inning the seniors with some good hitting coupled with some loose fielding by the juniors ran in seven runs. To show the fans that they were not down hearted Joe Kallal the junior's lanky 1st baseman smacks out a home run, but he was in too big a hurry to get around and omitted to touch second base and was called out, but it was a nice wallop!

In the last inning the juniors got one run while the seniors collected 3 more to bring their total to 11. The final score was 11-2 for the seniors. A. B. Clutterham called 'em as he saw 'em.

The line up was as follows.

Juniors: P., G. Wood. C., W. Worton, 1st., Joe Kallal, 2nd., H. Bowick, S.S., Ed Hill, 3rd., R. Martin, L. F.R. Bowick; c f. ——————; r f. S. Worton.

Seniors: P., Laurie Scott, C., G. Fontaine, 1st., Fred Meadows, 2nd., Bud Hannan, S.S., Bert Calvert, 3rd., George Bissett, L. F., Ross Craig, C. F., C. E. Seale, R. F., Joe Wiltzen.

Unfortunately Bud Hannan, while sliding home badly sprained his ankle when his foot struck the home plate. He was forced to retire from the game and for a few days was compelled to use crutches.

AN EXTRA GOOD WESTERN PICTURE FOR SATURDAY

For Saturday, June 7th, Manager Wood of the Variety Theatre, has booked one of the foremost westerns of the screen. Many westerns, while full of action are not particularly strong as regards plot, but "In Old Arizona" which is the picture to be shown on Saturday is full and complete in all departments. It is a filming of the story written by the famous author O'Henry, and as regards plot, the smashing climax is unforeseen until the last few hundred feet of film is shown. Those theatre patrons who like westerns will be immensely pleased with this one.

The showing of the first episode of "Tarzan the Mighty" got away to a good start last week end. This serial is unique and has met with much success, where previously shown.

Tofielders Attend Ryley Programme

Quite a number from town attended the demonstration review of the expression and physical students of Mrs Clara McPherson in the Ryley hall last Friday evening, admittance being by invitation, and those who were thus favored, were given an entertainment seldom seen in so small a town. The hall was full, extra seats having been placed around the sides, leaving the center hall clear for the physical work.

The junior and intermediate girls appeared first to display their physical ability, dressed in long white trousers, trimmed in red, white middies and natty little red caps on the back of the head. The accuracy with which these girls worked, some being very small tots, was marvelous. They went through all kinds of stunts, being directed by Mrs. McPherson and a phonograph supplying the music. The senior girls came next, arrayed in black shorts and black middies. Their work was more intricate and very interesting. Following them came the junior and intermediate boys dressed in Khaki shorts and blouses going through practically the same stunts as the girls, although we couldn't say any better. High jumping came next, in which both girls and boys participated and although we didn't get their names, several girls and boys between the age of nine and eleven years did some great jumping and deserve special mention. The trapeze work of both boys and girls was very thrilling as was the Indian club swinging by the senior girls. This was very well done and showed much practice and lots of patience. The Dutch drill by the junior boys and girls was very amusing and caused much laughter (we would almost imagine we were in Holland. The May Pole drill by intermediate girls ended the first part of the program. They were dressed alternately in rose and green and their May pole streamers were of the same colors. The grace with which they performed added much to the already pleasing affair. The second part consisted of fourteen numbers in expression, and although the writer had a seat in the last row and was unable to hear all of the speakers, (owing to the condition of the ceiling and the length of the hall,) what was heard was worth hearing and some of the numbers were of very high order. Special mention should be made of Annabelle Sykes in her rendition of "The Bells". This was really a work of art and showed great ability. Others worthy of mention were Josephine Brown in "Joan Despres", Elizabeth Findley in "That is Success", Lowa Hay in "The Middle Child" Hazel Haymond in "Practising Time", Junanita Cranston in "Minuet", and Irene Young in "The Cattle Thief". Between the first and second parts Gordon Imerslund was presented with a beautiful silver shield which he won at the school festival recently held at Vegreville. Gordon is a pupil of Mrs. McPherson and is about nine years old. Towards the close of the program Mrs. McPherson was presented with a beautiful large basket of flowers, carried in by two tiny tots, as a token of esteem in which she is held by her pupils. Much praise is due to Mrs. McPherson for her conscientious training of these Ryley girls and boys, and the the latter are to be congratulated on having a person of Mrs. McPherson's stamina in their midst.

COMMUNICATION

Editor:
Tofield Mercury
Dear Sir;

Re Soldiers' Memorial

Regarding the matter of the erection of a soldiers' memorial, which was the subject of a recent editorial in your paper and on which subject you published a letter from Mr J. W. Cookson, I would state that the matter was discussed at length at a recent meeting of the Canadian Legion.

I was asked at the meeting to communicate to you the feeling of the members, which is that they do not consider that the initiative in this matter should be taken by the returned men themselves, as suggested by some. However, the members of the Legion are ready at any time to co-operate with any committee that may be formed to handle this matter. The Legion is willing to contribute, in a substantial manner, both time, labor and money to this worthy cause.

Yours truly.
J. W. CHAPMAN,
President, Tofield Branch, Canadian Legion.

Ketchamoot Items

Miss Viola Lee and brothers entertained the young people's society at their home Sunday evening.

Mr and Mrs. J. Appleby and family were guests of the Schultz family Sunday of last week.

Angus Mitchell, Julius Lorbokma, Willie Ingram, Albert and Stanley Sears motored to Dodds Friday evening to play ball with the Dodds team.

Mrs. Beulah Hamilton of Calgary, came on Friday for a visit with her grandfather Mr. Frank Hull and her aunt Mrs. O. Barnes.

Owing to the extremely windy and dusty day on Thursday only Selma Nomeland and the Sears girls were able to get to Kingman to play basketball.

Mrs. Wm. Lee and daughter, Viola and son Lorne were Edmonton visitors on Thursday.

Mr and Mrs. C. Coombes motored to Edmonton last Sunday. They were accompanied by Mrs. Ross, Mrs. Campbell's mother who had been visiting her for a week.

Mr. and Mrs. John Lee and family were the guests of Mr. and Mrs. W. A. Mitchell on Sunday.

Kingman News

A. Amot, of B. C. is visiting with Mr. and Mrs. Jacob Bonson.

Mrs. H. Hohnsson, of Edmonton visited at the E. Erickson home on Tuesday.

Mrs. P. Rudnunsky was an Edmonton visitor last week.

Mr. and Mrs. W. Jardie, Mrs. W. McIntosh and Mrs. Ray Melvik visited with Mrs. E. Erickson on Wednesday afternoon.

John Raffain, of Grande Prairie is visiting at his home here for some time.

Mrs. Stanley visited at the A. Sware home at Hay Lakes for a few days last week.

The Misses Ethel and Inga Oberg, of Camrose visited with Mr. and Mrs. Ed Tollefson over the week end.

Mrs. Geo. Quailey, of Hughenden is visiting with her sister, Mrs. Thor Horte for a few days.

Mrs. Erickson, Lily and Harry, and Mildred Olson visited in Red Deer for a few days.

MICE USE UNUSUAL WINTER QUARTERS

In Middlebury, Indianna, a motorist who had kept his car in storage during the winter, finding that his motor failed to start the first day he wished to use it, concluded that there was something radically wrong inside the motor.

There was.

Taking off the cylinder head he found that corn was packed solidly around the valves and in the exhaust manifold. Mice had used the motor for a home as well as a storehouse, entering through the muffler and exhaust pipe.

YARD ROTATION IN POULTRY CULTURE

(Experimental farms note)

Mortality figures over a period of five years, taken from the autopsy records of the Poultry Division, Central Experimental Farm show 25 per cent of all mortality to be caused by intestinal parasitism. It must be remembered that the birds which were the subjects of this tabulation came mainly from poultry flocks in the provinces of Ontario and Quebec and from the Canadian and Ontario Egg Laying Contests, 80 per cent of the birds of which were also from the same provinces. Obviously these figures are a fairly accurate barometer of disease conditions in the provinces mentioned and no doubt would apply with slight reservations, to Canadian conditions in general.

In the light of this fact it will be readily recognized that the control of this disease is of great importance to the industry.

Keeping Pace With Progress

Are we keeping pace with progress?

Progress is an illusory thing. It may be seen, but so often is not perceived. Like old age or a thief in the night it creeps upon one unawares and suddenly one awakens to realization that some profound change has taken place, an evolution has occurred. We have not been aware of the fact because of its apparent insidiousness, because its movement towards and past us has been gradual. We have seen it unconsciously but it has been too close to us for observation.

Yet despite this seeming slow approach the thing that we call progress moves with great rapidity, but it moves continually, inexorably, a step at a time, but never halting. It is an onward march that never tires, never falters.

The only way to correctly gauge progress is in retrospect. Look back a few years only, a decade or so, and the remarkable progress which its duration makes in the course of a brief span suddenly becomes apparent with startling clarity. Yet we do not see these extraordinary and far reaching changes in the making although they are going on all the time.

Turn over the leaves of the family album and immediately the truth of the assertion stares one in the face. What an extraordinary change in style of dress, in shape of headgear, in fashion of hair dressing in a few years. It appears incredible that one really looked like that 20, 15 or even ten years ago.

But progress does not mark a changing trend in dress alone. It invades every realm of activity within the ken of human experience. In the whole field of things material and in the entire mental and even spiritual arena, a steady and unrelenting advance is being made.

Hark back but twenty years and compare the means of transportation of that time with the swift cabin monoplane and upholstered limousine of to-day. Contrast the crude telephone of a generation ago with the automatic set and radio of the present time. Appraise the difference between the rutted prairie trail of yesteryear with the broad gravelled highway along which we ride now.

A little reflection shows that everything with which we come in contact, everything we experience, everything we do has been subject to just as remarkable an evolution as those things to which specific reference has been made. Not only has progress made radical changes in what we wear and how we travel in a few short years, but it has wrought a similar transformation in what we eat and drink, in our amusements, in our work, in our social life, in our worship and even in what we think.

In no sphere of activity, however, has this evolution been more marked in recent years as in the field of daily work, in the realm of business, in city and country. In methods of production, in modes of distribution, in processes of marketing, changes have revolutionized and are continuing to revolutionize the daily life of the individual. These changes are so pronounced and so rapid that they are apparent even to the most careless onlooker.

A writer in a popular magazine recently pointed out that such swift [illegible] are being made in the conduct of business and commerce that heads [illegible] business houses are finding it increasingly difficult to secure young men [illegible] commercial life without first being re-trained after [illegible]. The almost daily application of new scientific discoveries in the field of business results in the college student being out of date because the course, though designed for the particular vocation he intends [illegible], has not kept pace with the changes taking place in the practical [illegible].

This evolution [illegible] going on in the whole industrial field, agriculture included, but as was stated at the outset it is not always an easy [illegible] because of its [illegible] and its proximity.

For this reason it is perhaps a wise thing, nay, a necessary thing to sometimes pause and look back a little, make a few comparisons with the [illegible] and in the light of these contrasts a clearer perspective may be gained of what is happening from day to day, and perhaps even an inkling may be secured of what may be expected in future.

Only by doing this can we secure the necessary vision to enable us to keep pace with progress.

Idea Did Not Work

Berlin Courts Fined Man For Fighting Noise With Noise

For trying to conquer the noise produced by his neighbor on the floor above by a still more deafening noise Walter Houser, a lodger in an apartment house of a Berlin suburb, was arraigned in court.

He stretched a violin string across his room immediately beneath the ceiling and he belabored it several hours daily with a bow while standing on a stepladder. He then screwed several hooks into the ceiling, from which he hung his vacuum cleaner in an inverted position.

The court sentenced the ingenious noise producer to a fine of 200 marks and cost of the repair of the damaged apartment.

How He Saw It

Being told to write a brief essay on "The Mule," young Gregory compiled the following: "The mewl is a harder bird than the guse or the turkie. It has two legs to walk with, two more to kick with, and wears its wings on the side of its head. It is stubbornly backward about coming forward."

Let's Go Fishing

But not forget to take Minard's along. It will take care of cuts, bruises or mosquito bites.

MINARD'S KING OF PAIN LINIMENT

Canada's Trade With Bermuda

Large Quantity Of Fruits and Vegetables Imported Last Year

The rise in exports of fruits and vegetables from Bermuda to Canada last year was from zero to 50,000 cases, "one hundred thousand cases is the estimate for this year and three times that amount next year," according to Hon. S. S. Sparling, chairman of the Board of Agriculture of Bermuda, who was a recent visitor. Mr. Sparling conferred with officials of the Canadian National steamships in regard to the Canada-West Indies service.

"The Canadian budget will be of great benefit to Bermuda," he said, "since it permits the free entry of vegetables into Canada during the winter months."

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

The Latest Convenience

Boxes for the mailing of letters are to be installed on busses running through rural districts in Ireland. They first will be tried on four lines terminating at Belfast, where the boxes will be cleared and the mail handled through the Belfast post office.

Manufacturing On Prairies

Prairie Province manufactures in 1929, had a value of $340,000,000 according to C. E. Harvey, of Winnipeg, retiring chairman of the prairie division of the Canadian Manufacturers' Association.

Why Anglo-Egyptian Negotiations Failed

Britain Could Not Meet Demand For Immigration Into Sudan

A white paper published disclosed that the breakdown in Anglo-Egyptian negotiations which terminated in London, May 8, was due to the impossibility of finding any formula which would satisfy the Egyptian demand for unrestricted immigration of Egyptian nationals into the Sudan.

The document shows that little difficulty was experienced in negotiations on most points, although there were long discussions regarding the defence of the Suez Canal.

At first the Egyptians demanded that the British troops should all be concentrated on the east bank of the canal. They subsequently agreed to the British stipulation for troops to the west of the canal but no agreement could be reached on the Sudan question.

WAS RUN DOWN NOW WELL AGAIN

Takes Pleasure In Recommending Dr. Williams' Pink Pills

To the woman in the home illness is almost a calamity. Many a woman keeps on with her household duties when she is feeling ready to drop. Her head aches, she is easily tired, is depressed and nervous and has no appetite. In a word she is anaemic and badly needs help — the health-help that only Dr. Williams' Pink Pills can give her. These pills make rich, red blood which brings new strength and energy to weak, despondent sufferers. Concerning them, Mrs. Paul Rail, Coin du Blanc, Que., says: "I was badly run-down, slept poorly, and awoke as tired as when I went to bed. My appetite was poor and I felt miserable. I took six boxes of Dr. Williams' Pink Pills and they completely renewed my health."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

New Flags For Old

Fifteen Nations Have Made Change Since World War

Fifteen nations, containing more than one-third of the world's population, are living under new flags since the World War. In addition a new flag of red, white and green is now flying in India, with its 300,000,000 people, where Gandhi's revolutionists have proclaimed independence of Great Britain. In fact since the change of colors by Russia, Germany, China and other great political divisions the probability is that not more than four flags of major nations can be universally identified today.

Attacked By Asthma. The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the [illegible] attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Engineer Will Survey Mines

Government Official To Visit All Important Centres During [illegible]

Hon. Charles Stewart, Minister of the Interior, has announced that Supervisory Mining Engineer C. C. Ross was leaving for Fort Smith. Mr. Ross will visit all the important centres of mining activity throughout the season. He will organize the work of the office and the field parties and endeavor to ascertain the needs of the prospectors and companies. Mr. Ross will then be in a position to advise the Minister of the Interior fully on all that appertains to the future of the industry.

Plants Large Forest Area

A forest in the embryo—250 acres of it—has been planted by the Saskatchewan forestry service, in the Prince Albert region. H. P. Eisler, forestry engineer, stated that the transplanting of 2,000,000 nursery seedlings and stock is the largest such programme in the province's history. Most of the seedlings are jack and white pine.

John D. Rockefeller has spent more than $750,000,000 in benefactions during his long life.

London's statue to Marshall Foch is to be unveiled in May.

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, thus:

BAYER

Artistic Booklet Issued By C.P.R.

Great Help To Traveller Planning An Overseas Holiday

A [illegible] series of glimpses of "Those Magic Isles," embracing England, Wales, Scotland and Ireland, is contained in an artistic booklet under that title, just issued by the London offices of the Canadian Pacific Railway.

Replete with a wealth of artistic photographic illustrations, the publication forms one of the most complete guides to the Old Country which has appeared in recent times. All aspects of the life of each country are dealt with, both in picture and story, from the teeming hub of Empire itself along the leafy lanes and hedgerows of England to the rugged shores of Wales and the mighty moors of Scotland. Ireland, both the Free State and the North, is also given considerable space, while rural scenes and graphic descriptions of popular resorts are not wanting.

To the traveller contemplating a holiday overseas it is an alluring foretaste of what is to come; to the returned voyager, it is a pleasing souvenir and an inducement to repeat the journey.

The "St. Lawrence Water Boulevard to Europe" is used yearly by hundreds of thousands of travellers in Canadian Pacific Steamships, well worthy of their "Empress" and "Duchess" nomenclatures.

Breaks Previous Record

Aerial Photographic Expert "Shoots" Mount Rainier 270 Miles Away

Capt. A. W. Stevens, Air Corps photographic expert, has broken his own record for long-distance aerial photography, "shooting" Mt. Rainier from a distance of 270 miles.

This feat adds almost 50 miles to the record established by Captain Stevens last year, when his camera registered objects 227 miles distant. The new photograph was made while in flight 20,000 feet above Crater Lake, in Oregon, and gives a clear picture of various mountain ranges stretching northward to the lofty peak of Mt. Rainier, 14,000 feet above sea level.

When the picture was taken the thermometer on the 'plane, which was piloted by Lieut. John Corkille, stood at 20 below zero. A liquid oxygen supply was carried.

"Shooting at Mt. Rainier from a distance greater than that between New York City and Washington is much like shooting at the moon with the difference that you can see the moon," says Captain Stevens. "The principal task is to aim the camera in the general direction you believe your objective to be, snap the trigger and hope for luck."

Douglas' Egyptian Liniment relieves toothache and neuralgia. Invaluable in cases of croup, sore throat and quinsy. Keep a bottle handy.

The Practical Way

They have a practical way of doing things in the west, says the Toronto Globe. For instance, the Saskatchewan Department of Agriculture has bought a farm "absolutely polluted with weeds," and will proceed to make it blossom as the rose. [illegible] worth a thousand lectures on the best way to get rid of noxious growths on the farm.

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

Increase In Grape Growing

The development in grape growing by J. W. Hughes, of Kelowna, furnishes some interesting data. In 1927, he had 500 baskets, in 1928, 2,500 baskets, in 1929, 20,000, and this year he expects 60,000. A winery is offering $100 a ton for "concords."

France expects much larger crop yields this year than last.

Minard's for Falling Hair.

Investments Along the National Show Increase

Over Seventy-Four Million Involved In Establishing Industrial Plants

New industrial plants established along the lines of the Canadian National Railways, in 1929, involved a total capital investment by the industries of $74,106,10, according to the annual report of William Phillips, manager of the Industrial Department of the system. This was an increase of $896,200 over the previous year, when the expenditure was $73,409,800. Additions to plants already existing represent an investment of $33,861,000, an increase of $6,792,300 over 1928. On the Grand Trunk Western lines of the system, the capital investment by industry for new plants and branches totalled $11,720,000. While this was a decrease of $7,500,400, there was an increase of $2,227,000 in additions to plants, the total being $11,562,000.

Canadian development from Atlantic to Pacific, Mr. Phillips indicates, was in many fields, involving such industries as newsprint, cold storage, warehousing, grain elevators, silk mills, canning plants, foundries, distilleries, automobile plants, lumbering and mining industries. The most outstanding developments in Western Canada were in mining in Manitoba, and in cold storage plants in British Columbia. The Hudson Bay Mining and Smelting Company, and the Sherritt-Gordon Mines, Ltd., at Flin Flon, and Sherridon, expended $10,000,000, while two cold storage plants, costing more than $3,000,000, were established at New Westminster and Victoria, B.C. New elevators in the west represented an investment of $1,343,000 and new oil warehouses, $482,000.

Lesson Never Learned

Reckless Drivers Take Chances In Spite Of Daily Accidents

Does it pay to drive recklessly on the highway? The answer is simple. Nevertheless we need to be impressed now and again with the foolhardiness of throwing caution to the winds and performing menacing tactics such as cutting in on the car ahead, ignoring danger signals and so on.

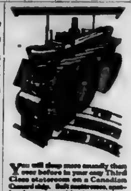
Some time ago a lady motorist driving on the Hamilton-St. Catharines highway, in Ontario, committed one of those rash acts. She cut in on another car and caused a heap of trouble. As a result of her poor judgment or whatever it was, three cars were damaged, four people injured and three lawsuits followed, culminating in a judgment of $4,650 to be paid to seven persons in adjustments.

What a risk and price to pay for gaining a few car lengths! Was her time as precious as all that?

Minard's for Insect Bites.

Maps For Many Purposes

The Topographical Survey, Department of the Interior, is an organization of the Dominion Government which is engaged in making maps for many purposes. So far as practicable standardized sheets are used, the scale varying according to the information available and the purpose for which the map is intended.



You will sleep more soundly than ever before in your cozy Third Class stateroom on a Canadian Cunard ship. Soft mattresses, spotless linen, warm blankets, feather pillows, bedspreads, clean towels, large mirror and washstand, plenty of soap and water, cleanliness everywhere . . . and trained stewards to wait on you.

All this is part of Third Class service on this famous Line. This service means that you eat, sleep and play as you never did before, on the voyage over and back.

Make sure you are going to enjoy the trip by sailing Cunard to the Old Country.

Making Plants Luminous

German Gardener Demonstrates Experiment At Berlin Flower Show

It is stated that a German gardener has discovered a plan for injecting phosphorous into plants, thus making them luminous at night. The experiment was demonstrated at the Berlin Flower Show, when a large number of cacti, of all shapes and sizes were inoculated, and that, as the luminous quality concentrates in the spines, they appeared to be dotted with brilliant points of light that radiate in the darkness like glow-worms.

It isn't usually necessity that is the mother of convention. It's the desire to have a trip and a good time.

Former French Premier Has Great Faith In The Future Of Aeronautics

Giant trans - Atlantic aeroplanes hurtling through dizzy altitudes at terrific speeds, the passengers breathing oxygen supplied from special tanks, will soon make Paris less than 10 hours from New York, M. Paul Painleve, former premier of France, told the United Press.

"Perhaps I shall live to see the day," said the 67-year-old former premier, "when these specially constructed 'planes will roar through the thin air at altitudes above 32,000 feet at speeds surpassing 300 and 400 miles an hour.

"When the technical problems for the construction of these high-altitude speed airboats are solved, then will trans-Atlantic air service become a reality. Lindbergh's solo [illegible] stimulated the solution of difficulties and perhaps before I die, aeroplanes speeding at 300 and 400 miles an hour high above both clouds, rain and tricky air currents will link Paris with North America."

Seated at his desk, littered with mathematical treatises and scientific manuscripts, M. Painleve waved his hands at the bookcases which covered the walls from floor to ceiling of his study.

"In 1902 when I was well along in my study of these books and was beginning to do a little mathematical thinking myself, I convinced myself that heavier-than-air flight was possible. Six years later Orville and Wilbur Wright came to France with their crazy air-machine. I knew it would fly, and it did. My six-year-old dream had come true and since then I have never lost my faith in aviation.

"Three years ago Lindbergh landed at LeBourget. His flight was just as important as the first trial I made with Wilbur Wright in 1908. The one proved the 'plane was feasible, the other demonstrated it was the world's best means of rapid transportation. Lindbergh set the best aviation experts of the world studying means of perfecting aeroplane motors and equipment. The Wright Brothers, Bleriot and Lindbergh are a trio of names upon which aviation history [illegible]."

The famous mathematician-politician declared there are only two certain methods of conquering the Atlantic by air. The first is by developing machines to fly in extreme altitudes, thus lessening resistance, increasing speed, and decreasing danger through atmospheric conditions, and the second is to establish floating islands for use with present-type of aeroplanes.

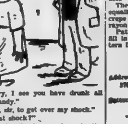
Although Painleve said he believed floating landing fields were feasible, he thought the future of aviation rested in flying high at terrific speeds. The machine would have to be constructed in such a manner to resist the unequal pressure, and both passengers and crew would have to be supplied with oxygen to breathe at such dizzy altitudes.

Six times M. Painleve has been minister of war, and yet he is not convinced that the aeroplane is the most formidable unit for use in the next war, which Painleve hopes will never come for at heart he is an ardent pacificist.

"Aeroplanes have their use in war," he said, "but they will not be so dangerous as many people like to believe. New anti-aircraft guns are being perfected which will make the average airman in the next war feel like a partridge under bombardment from a thousand shot-guns. No, the 'plane is more interesting to me for its commercial value."

"Any insanity in the family?" asked the insurance doctor of Mrs. Suffragist.

"Well, no—only my husband imagines he is the head of the house."



"Mary, I see you have drunk all my brandy."

"Yes, sir, to get over my shock."

"What shock?"

"I broke the large mirror in the drawing room."—Paginas Gaias, Yeardon.

Translation Was Difficult

Austrian Chancellor's Remark Did Not Lend Itself To French Language

Chancellor Schober, of Austria, who has been visiting all the principal European capitals in succession during the past few months, had a curious adventure in Paris just before going to London. This adventure might be considered unimportant except that it illustrates how many European differences are due to different languages and different habits of thought.

Dr. Schober was asked by a Parisian interviewer what his conception of Austro-German relations was. The chancellor replied, "I consider Austria and Germany as one people but two nations."

The interviewer, who understands German perfectly, applauded this definition, which emphasized Austria's determination to remain independent. But unfortunately, in attempting to translate the chancellor's words into French, he could not find the exact equivalents and made the statement read, "One nation but two states."

This precipitated a tremendous howl in the French Nationalist press and led Dr. Schober to issue a succession of statements in which he attempted to correct the false impressions but each statement led him into new pitfalls until he finally was obliged to elaborate his original epigram into the meaningless formula, "One civilization but two nations and two governments."

The Power Of Lightning

Man Cannot Produce Power Contained In Single Flash

When a great thunderstorm is raging we realize something of the stupendous powers of electricity, says an article in Tit-Bits. If a cat's back is rubbed in the dark during hot dry weather, sparks will often fly from it. The sparks are harmless, though they are identical with lightning flashes, and the crackling which accompanies them is thunder on a small scale. In a thunderstorm the earth represents your hand and the clouds are the cat's back. The pressure which causes a flash of lightning may be as much as 1,000,000,000 volts—5,000,000 times greater than that which is used for household lighting. Could we collect and harness the power set free by a single flash of lightning we should have at our disposal a force greater than anything which can be produced by man. In a famous scientist's laboratory there was tried the experiment of producing a million-volt spark. It leapt a ten-foot gap with a noise like the explosion of a bomb, and nearly wrecked the building. Most of the lightning in a thunderstorm does not approach near the earth, but flashes from cloud to cloud. Occasionally a fork tongue leaps from cloud to earth, and then anything in its path is destroyed.

Resents Removal Of Indian Carvings

British Columbia Wants Valuable Work Kept In Canada

There is great indignation at the wholesale removal of Indian carvings from British Columbia to the United States, says a letter received at the national museum, Ottawa, from an official of the British Columbia government. At present there are a great many influential people who do not want any of the objects mentioned in the Indian act, such as totem poles, carved grave monuments, carved rock inscriptions and paintings on cliffs and large boulders, removed from the province, the letter continues.

Commenting on the matter, the archaeologist at the national museum declared that recently a retired United States naval officer collected certain beautifully carved spindle whorls, formerly used by the Indians in spinning mountain goat wool, and took them out of the dominion while a representative of the national museum was searching for just such specimens.

Will Be Well Represented

Fifty-five cities in the United States and Canada will be represented at the fourth World's Poultry Congress which has been organized by the Governments of Great Britain and Northern Ireland, and a large number of the attending poultrymen will sail on the Canadian Pacific liner "Duchess of York" from Montreal on July 12, headed for the Crystal Palace, London, where the Congress will take place, from July 22-30.

A recently invented radiophone makes it possible to talk 200 feet underground and through solid stone.

Workingmen's singing clubs are becoming popular in Germany.

New Vice President

George Stephen who succeeds W. R. MacInnes as Vice-President in charge of Traffic, Canadian Pacific Railway.

Poultry From E.P. Ranch

Prince Of Wales Will Exhibit At [illegible]

Birds from the ranch of H.R.H. the Prince of Wales, at Pekisko, near High River, Alberta, will be among the many interesting exhibits at the World's Poultry Congress, to be held at the Crystal Palace, London, England, July 22 to July 30, 1930. Another exhibit that is likely to attract attention will be the birds from the royal aviary at Windsor Castle. Canada has a particular interest in this aviary for among the birds are some Canadian Barred Rock presented to His Majesty, King George V. by the Canadian Government following the second World's Poultry Congress at Barcelona, Spain, in 1924. This trio was the finest that could be procured in Canada. An exhibit of 1,000 birds is being sent to the World's Poultry Congress from Canada.

One Way To Count Cost

Expenditure In Great War Would Have Built Many Garden Cities

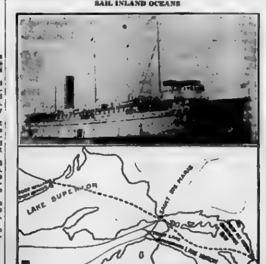
The League of Nations reports the cost of the Great War at $363,000,000,000 and 37,000,000 lives—that is four times the total population of Canada, not merely of lives, but lives of selected men, competent in virtue of admirable qualities to meet the most terrible responsibilities that an imperfect civilization can place upon men. The cost in money would have built 181,500 garden cities, where the evils of congested living, the sordidness, the ugliness and the despair that breeds resentment, anger, broken homes, ill-bred-children, crime and disease would have had no seed bed for growth.

As All Canadian Firm

The Beatty Brothers factory at Fergus, Ontario, has made a record shipment of laundry equipment sets—some 8,000 of them—over Canadian Pacific lines for various destinations. It is pointed out that every item of the equipment was made in Canada and every official and employee of the company is Canadian.

Some specimens of the California fan palm reach an age of 200 years.

SAIL INLAND OCEANS



Passenger service on the Great Lakes is now opened for the summer season, and the three fine vessels of the Canadian Pacific fleet on these waters, S.S. Assiniboia, S.S. Keewatin and S.S. Manitoba, are now at the disposal of the public. Travellers wishing to vary the railway trip between Toronto and Winnipeg, are now able to make a pleasant change by taking ship at Port McNicoll and passing through Lakes Huron and Superior, via Sault Ste. Marie, to Port Arthur and Fort William. At the latter point they tranship to the Canadian Pacific trans-continental train and continue their journey to Winnipeg and the coast. Lay-out shows S.S. Assiniboia, a fine vessel of 3,880 tons, and having accommodation for 280 first-class passengers, and sketchmap of Great Lakes route.

Provinces Need Aid Of Federal Government To Build National Highway

Annual Agricultural Statistics

Every Farmer Asked To Fill In and Return Schedule

It is the custom of the Dominion Bureau of Statistics to co-operate with the nine provinces in taking a Dominion-wide census of important agricultural facts in June of each year.

The census takes the form of a simple cardboard schedule, distributed to individual farmers through the medium of the rural school teachers and pupils in seven provinces, and in Ontario and British Columbia through the rural postal offices. The essential object is to reach every farmer and to encourage as many as possible to fill in and return the schedule.

The two main phases of farm production—the areas of field crops and the numbers of live stock—are covered by the form. The areas of field crops determined from the schedules are combined later in the season with the estimated average yields per acre to determine the total yield for the country. In the case of wheat, particularly, the importance of having correct estimates of acreage is thus made apparent. Although there are many estimates of anticipated production, most of these are based on the one official acreage estimate, which has been issued annually since 1917, by the Dominion Bureau of Statistics.

It is unnecessary to emphasize the value of a wide sample to the attainment of accurate statistics, and it is our hope to obtain a completed schedule from the great majority of Canadian farmers. The more numerous the returns received, the more reliable will be the estimates compiled from them. Much of Canadian economic enterprise depends to some degree on correct estimates of agricultural production in the making of their plans.

If any farmer does not receive the cardboard schedule by the middle of June, he should apply to the school teacher of the nearest rural school, to his provincial Department of Agriculture, or to the Dominion Statistician, at Ottawa. Letters addressed to the Dominion Statistician require no postage.

Is Doing Good Work

Junior Red Cross Teaching Children [illegible]

The number of deaths of children of school age would be "shocking" if we were not so accustomed to their daily and hourly occurrence. There is such a death every ten minutes. It is nothing short of appalling to study the statistics of the mortality and morbidity of our school age boys and girls. Such a tale of woe as the story of death and its causes has been given us by our neighbors across the line. Dr. J. F. Rogers, Chief of School Hygiene Division, and Physical Education, Washington, has issued a sheet of figures that should be in the hand of every parent and school teacher.

Roughly speaking in the registration area of 103,000,000 persons, one child in every five hundred children died in a year. A thoughtful reader will look with interest at the reasons for this slaughter of the innocents. Particularly striking is it, in these days of speed traffic, to observe the figures for accidents and automobile deaths. Seven per cent. died from autos and 21 per cent. from accidents.

The doctor goes on to say that practically all the deaths from the following diseases were preventable. Typhoid, smallpox, diphtheria, dysentry, syphilis, rabies, tetanus. By better protection from infection tuberculosis would take a less heavy toll. With greater sick-care and more knowledge fewer children would die of measles and scarlet fever, whooping cough, etc. It was estimated that there could be a certain saving of 5,000 lives a year, or thinking in terms of cents and dollars $100,000,000.

There will doubtless be better machinery established for public health in the generations to come, and this reproach will be wiped away. Today among the foremost agencies in the field for the furtherance of a healthier citizenry is the Red Cross. Its far reaching Junior Work has enlisted approximately 12,000,000 Juniors in the fight against disease and dirt.

A Navajo squaw would not think of making a perfect rug, for tradition says that blindness would follow such a deed.

Czecho-Slovakia's output of coal last year was one of the greatest in the country's history.

A complete trans-continental highway in Canada may be a somewhat remote goal, but it is worthy of observation that it is now engaging the attention of Members of Parliament from one end of the country to the other. In the recent debate on the subject such parliamentary leaders as Hon. Dr. Manion, Hon. Charles Stewart, Hon. Hugh Guthrie, Hon. Charles Dunning, the Prime Minister, Hon. R. B. Bennett, Mr. Woodsworth and others indicated an increasing concern for the scheme. In connection with the matter, Dr. Manion supplied the interesting information that there remains only some 300 miles of highway yet to be constructed, and he advanced the argument that as this was through unproductive provincial territory, it might well be expected that the Dominion would contribute towards the construction of it. One of the strongest arguments in favor of the project advanced in the House of Commons was that there is no national highway communication above the head of the Great Lakes and that transportation by motor must be through a foreign country. A year ago Mr. King estimated the cost of a national trans-continental highway at 300 million dollars but Dr. Manion suggests that the link above the Lakes might be completed for 5 or 6 millions. His suggestion that the Dominion might very well co-operate with Ontario regarding the cost seems not unreasonable. Dr. Manion put the matter in this way. "There is this to remember regarding the building of national and provincial highways, that the provinces are in perhaps a rather difficult position to undertake alone the building of a national highway. Take, for instance, across the northern section of Ontario extending from Sudbury to the Manitoba boundary, an area nearly as large as Germany and France put together, with a population of only 200,000. This sparse population requires branch roads and a large amount of money is being expended in the construction of branch colonization and settlers roads. Therefore the provincial government should not be expected to build the whole of this national highway across that section of Northern Ontario. That, after all, is the only section remaining to link up these different roads which could be, for the time being at least, turned into a trans-Canada or a Canadian national highway. Therefore, because of the demands of the province, it is particularly necessary, if the road is to be built, that the Dominion Government should take part in the work. The Dominion Government should also take part in this road-building from the national aspect of linking up the east and the west."

People Make Living From Watercress Beds

Plant Grows In Profusion In Picturesque English Village

Motoring between Henley and Nettlebed recently, says a writer in the London Evening News, I came for the first time upon "Watercress Village." It must be unique in England. Its name is Ewelme, pronounced Yewelm. A stream as clear as crystal runs down the middle of the village street, and watercress grows in profusion in it. Rustic bridges cross the stream and lead up to the cottage gardens. Further broad expanses of watercress beds lie beyond the cottages, and the occupants make a living from watercress.

Not What He Meant

To attract the custom of the foreigner, Japanese tradesmen often put up signs in what they consider to be idiomatic English. Such signs contain amusing mistakes. One of the funniest is that exhibited by a Japanese baker in Tokio, it reads:

"A. Kashimuru, Biggest Loafer In Tokio."

"Why didn't I see you in school this morning?"

"Because I wasn't there." — Mon-atique, Charleroi.

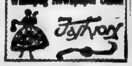
One of life's little ironies is found in the fact that a fifty-dollar telephone pole can so completely demolish a $3,000 motor-car

DISTRACTION.—En Roilg Mail Times, Gothenburg

Ireland Only Country Without War Memorial

Money Subscribed But Political Feeling Has Barred Erection

Of all the countries that took part in the Great War, Ireland is the only one still without a National Memorial to her dead The money, some 150,000 has long since been subscribed, but political rancour has all along thwarted the objects of the subscribers. It is felt by a great body of Irishmen abroad as well as at home that a National tribute to the 60,000 Irish soldiers who fell in the War should occupy one of Dublin's best central positions. Political feeling, however, has rendered this impossible and all the assistance that the Free State Government have given in the matter has been to offer a site beside a little used roadway some miles beyond the city boundary This proposal the Memorial Committee naturally rejected, and it is quite possible that, if as an alternative to a central city site a prominent place in Phoenix Park cannot be obtained. Belfast may be asked to find a position worthy of the Memorial.



(By Annabelle Worthington).

3278

A tiered model in printed silk crepe reflects a new note in modified Princess styling, which makes it so suitable for casual daytime wear

The tiers show a downward curving tendency at back, a clever means of lengthening the silhouette. They are finished at top with novel faille crepe silk applied band that ties in youthful bow at front

The neckline in deep open V-shape employs the same trim for applied band. Long sleeves also gathered into cuffs of the crepe with tab ends.

Design No. 3278 comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust

The trimming bands work out nicely cut from the dull surface in crepe satin, which is so important [illegible]

Black silk crepe, plum shade in wool crepe, tiny self-checked pattern in bottle green feather - weight woolen, tomato red crepe de chine, crepe marocain in dahlia purple and navy blue faille crepe appropriate and chic

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Advice For Farm Boys

The difficulty in securing work in the towns and cities abroad, will have a tendency to make young men more contented on the farm, and give them a desire to make improvements there that might ultimately put them on the road to better things. Flat as farming is at the present moment it is no flatter than the trade in the towns and cities.

New Motor For Airplanes

May Solve Problem Of Ocean Flying Says German Authority

A tiny motor about as big a beer bottle, with characteristics of both a blast furnace and a refrigerator, may solve ocean flying, believes Dr. Paul Heylandt, liquid gas authority, will lead to development of a special type of rocket-propelled 'plane which will shoot up 60,000 feet and travel at 650 miles an hour

The motor an elongated, pistol-shaped drum of hardest steel, is a one - cylinder valveless contraption devoid of pistons or other movable parts, into the front end liquid oxygen is sprayed, while into the further end, near the exhaust, liquid fuel, such as wood alcohol, benzine, gasoline, or even fuel oil is injected.

At the entrance points of both components into the motor there are spraying attachments which diffuse the liquids over the entire hollow inside The liquid fuel is ignited as it comes in contact with the liquid oxygen The result is a continuous, steady combustion which produces a recoil of 220 horse-power with a motor of only 11 pounds. The best German automobile motors produce only about half a horse-power of propulsive energy per pound.

As the two components explode, they shit a steady stream of smokeless, sootless fire about a yard long. The noise is deafening, and easily greater than that of the 2 motors of Dornier's "DO-X" combined. The heat at the exhaust is such that, when a filler during one demonstration did not mix the two components correctly, the exhaust simply melted away Cold produced by the liquid air is such that the conducting pipes accumulate a thick coat of frost.

"Our experiments with the rocket car are only a step toward our real goal, a motor for aeroplanes intended to go up into the stratosphere," Dr. Heylandt observed. "One essential thing is that both components are so separated as to avert all danger of explosion.

"The rocket car will never be a practical proposition except for racing purposes. Naturally, no police authorities could stand for a car making such a noise As soon as possible, therefore, we want to experiment with a rocket 'plane."

A Tribute To Nansen

Explorer Did Splendid Work After Close Of War

Fridtjof Nansen, when the war closed, was already fifty-six years old. Arctic exploration is a young man's game: or should be Nansen's chief assault upon the Pole the voyage of the "Fram," was already a quarter of a century in the past. He had won credit and fame as a scientist, educator, administrator of learned bodies. It could hardly have been supposed that his chief life work still lay before him

Nansen lived in a small country, a country neutral in the war. He was a natural choice, an ideal one as it proved, to head the great work of repatriation of war prisoners and the relief of hunger in civilian populations. He threw himself into the work with all his splendid energy and mitigated to some extent the sufferings of millions of half-starving people. His work in Russia representing forty-eight Red Cross societies and twelve nations served as aid and precursor of Mr. Hoover's great task of relief which Russians remember with so much gratitude

Nansen served Norway more particularly, but still in the pathway of peace, as its representative with the League of Nations. In 1924 while so serving he was instrumental in smoothing the way of Germany into the League. In 1922 the Nobel Peace Prize was awarded to him with universal approval. In 1925 a very unusual honor was paid to him in a foreign land by his election as Rector of St. Andrew's University. His closing years found him still happily engaged in scientific pursuits and in the completion of his admirable body of literary work. His was the singularly useful career of a well equipped man whose talents and ideals exactly fitted the needs of the stirring times through which he lived.

Not Ashamed To Ask

"How is it that you have attained so high a degree of knowledge?" was the question once put to an Eastern sage.

"My son," answered the wise man, "my knowledge has come to me in a way that thou canst easily follow: What I knew not, I was not ashamed to ask about, and by this means have gathered much wisdom."

Many Areas Tested

Since beginning the testing of cattle for tuberculosis in 1915, a total of 1,460,760 animals have been tested, in Canada and 14 areas declared free of the disease.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

Recipes For This Week

(By Betty Barclay)

ASPARAGUS WITH MOCK HOLLANDAISE SAUCE

1 tablespoon butter.
2 tablespoons flour.
¾ cup milk.
¼ teaspoon salt.
⅛ teaspoon pepper.
Few grains cayenne.
Yolks of 2 eggs.
¼ cup butter.
1 tablespoon lemon juice.
Asparagus.

Prepare as for white sauce. Stir in beaten egg yolks after sauce is cooked. Add the ¼ cup butter bit by bit and finally the lemon juice. Pour over strips of cooked asparagus. Garnish with pimento.

The savory flavor of celery tap greens blends well with roast fowl and dressing.

SALMON LOAF

1 tablespoon lemon juice.
Cayenne.
1 teaspoon salt.
1 lb. can salmon.
2 small eggs.
¾ cup chopped celery.
1½ cups bread crumbs.
½ teaspoon baking powder.
½ cup evaporated milk.

Add lemon juice, cayenne and salt to boned, flaked salmon, then beaten eggs, celery bread crumbs, baking powder and milk. Shape into a loaf and place in an oiled baking pan. Bake in a moderate oven (350 degrees Fahrenheit) until brown and firm. Serve with medium white sauce or egg sauce. Yield: 5 servings.

Dairying and Mining

The annual value of Canadian dairy products—$297,635,000—is a few million dollars less than the annual value of the mineral production of the Dominion. A total of 390,000 farmers supplied milk and cream to the 2,832 dairy factories throughout the Dominion last year.

Pedestrians who cross the streets recklessly in Berlin are to be prosecuted. After they come out of the hospital, probably.

SUNDAY SCHOOL LESSON

JUNE 8

JESUS IN THE SHADOW OF THE CROSS

Golden Text. "He went forward a little and fell on His face, and prayed saying, 'My Father, if it be possible, let this cup pass away from Me nevertheless, not as I will, but as Thou wilt.'"—Matthew 26.39.

Lesson: Matthew 26.1-75.

Devotional Reading Psalm 42.1-8.

Explanations and Comments

Peter's Denial Foretold, verses 31-35.—On the way Jesus suddenly said, "All ye shall be offended in Me (caused to stumble by what is to befall Me) this night: for it is written (Zech. 13.7), I will smite the Shepherd and the sheep of the flock shall be scattered abroad."

Then He added the encouraging words: "After I am raised up, I will go before you into Galilee" "The Shepherd will yet again go before His flock, leading them."

"If all shall be offended in Thee," vehemently Peter exclaimed, "I will never be offended." He is not sure of the other disciples, but he is certain in regard to himself! How little he knew his own weakness!

"Forsake the Christ thou sawest transfigured, Him
Who trod the sea and brought the dead to life?
'What should wring this from thee!'
—ye laugh and ask.
What wrung it? Even a torchlight and a noise,
The sudden Roman faces, violent hands,
And fear of what the Jews might do! Just that.
And it is written, 'I forsook and fled';
There was my trial, and it ended thus." Browning.

"Never said Peter, but it will happen "this night," said His Master. "Verily I say unto thee, that this night before the cock crow—before the dawn—thou shalt deny me thrice" Again Peter protested his loyalty and fidelity: "Even if I must die with Thee, yet will I not deny Thee" Likewise also said all the disciples.

In Gethsemane, verses 36-46. — Jesus led His eleven disciples to the garden of Gethsemane, returning for the last time His oft-repeated journeys thither for seasons of prayer and meditation. "Sit ye here," He said to the disciples, "while I go yonder and pray"

And He began to be sorrowful and sore troubled, and even said to His disciples. "My soul is exceeding sorrowful, even unto death" Before this He had talked calmly with His disciples of the cup He was about to drink, but now, in truth He was "clean forespent, forespent"

"When the soul enters its Gethsemane it withdraws a stone's cast from its most trusted friends." Jesus went forward a little, and falling on the ground prayed that if it were possible (if in accord with His Father's will), "this cup" this suffering, might pass away from Him. "Nevertheless," He added, "not as I will, but as Thou wilt."

A Peculiar Accident

When the parachute worn by a mechanic flying in an army 'plane was accidentally opened, the mechanic was pulled into the air, smashed against the tail of the 'plane, and pilot and mechanic were killed when the machine fell into the sea.

Orchids priced at $500 a plant were recently exhibited in London, England.

BOILS

"Many Boils on neck. Doctor said [illegible]"

Changing Styles In Fiction

Each Generation Has Different Idea Of What Is Interesting

There are faint but unmistakable signs of a revulsion against the new style of war books which have been all the rage for a year past. That is as it should be, for they were neither great literature nor true to life as a rule. On the whole they were read less by grizzled veterans than by young ladies who liked being shocked by stories of strong drink and strong language at secondhand.

It was a change from what the trade called Sheik-stuff which was itself a revulsion from the Sentimental Tommy style, which was itself a novelty after strong silent men, gods in the car, and other sternly masculine types that delighted and thrilled the feminine readers of thirty years ago. So the clock of fashionable fiction goes round, and every generation worships the idols of its fathers under the delusion that they have discovered something new.

An Unusual Bequest

Deaf Woman Wills Ears To Science For Research Purposes

In the hope that medical science can aid others by a study of her ears, deaf since childhood, Miss Abby Hosmer, 70, wealthy Chicago woman, has willed them for research purposes after she dies.

The unusual will was announced by Dr. Austin A. Hayden, at a meeting of physicians and ear specialists.

"Until medical science can have opportunity to make microscopic studies of the ears of those deafened during their lifetime, we will remain considerably in the dark as to why one out of ten persons suffers from some form of this malady," Dr. Hayden said.

At any rate the Toronto Telegram points out, there are eight young citizens of Canada who are not puzzled over what they will call the new lady senator.

Get In On The Ground Floor

Invest in a company owning Canadian, United States and British patents on articles being used by Railroads, Steamships, Oil and Mining Companies Hotels, Factories, Warehouses, Homes and Office Buildings. Write at once for full particulars to

S. P. MILLER
904 Dominion Bank Building,
Vancouver, B.C.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE
THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

BRITISH FIRMS PLAN TO MAKE CARS IN CANADA

London, England.—British automobile manufacturers are preparing to invade the Canadian market. They propose the establishment of assembling and manufacturing plants backed by aggressive salesmanship, it was learned at the Chambers of Commerce Congress.

Canadian delegates submitted three principal points

(1) That Britain should imitate the example of the United States by providing, as far as possible, for manufacturing plants in Canada and that the most effective way of meeting foreign competition in Canada was to take their courage in their hands and put up manufacturing plants in Canada.

(2) The necessity of having in Canada centres for assembling where organizations could be developed for the provision of spare parts.

(3) The necessity of more aggressive salesmanship. Reporting to Congress, F J Hannon, the chairman of bilateral discussions, said he had received from British motor manufacturers a letter in which they said they were prepared by co-ordination and co-operation to make a really concentrated attack upon Canada through more highly organized methods of advertisement and publicity.

They were also preparing to furnish service and spare parts for their motors so that the Canadian owner would have no more trouble with his British car, in effecting replacements and repairs, than with the American product

Calling Conference On Employment

Mayors Of Western Cities Will Meet In Vancouver

Vancouver B.C. To organize a western Canadian movement toward solution of the unemployment problem, Mayor W H Malkin is arranging for a conference of mayors of western cities here about June 9.

On that date Mayor R. H. Webb, of Winnipeg, will arrive here with a party of prominent Manitoba men to welcome the French line vessel, "Winnipeg," at this port. Mayor Malkin telegraphed him suggesting that other western mayors might be asked to come to Vancouver then for a conference on unemployment

Will Continue Coal Rates

Extension Granted On Alberta Coal For Another Year

Drumheller, Alberta. — Eastern freight rate on Alberta coal, reduced a few years ago to aid the marketing of western coal in the east, will be continued for another year.

A wire to this effect has been received here from E. J. Garland, U.F.A., M.P. for Bow River, who stated that after making insistent demands for this extension the government agreed to have an order-in-council passed forthwith.

Prince May Unveil Statue

London, England.—The London statue of Marshal Foch is about ready, and the Prince of Wales has consented, should circumstances permit, to unveil it. It is officially stated that the memorial will be erected on the triangular pice of ground near Victoria station, facing the Hotel Belgravia. The French sculptor, Malissard, will carry out the work. The statue will be an exact replica of the statue which stands at Cassel, and which, modelled from life, had the approval of the Marshal

Want Action On Survey

Ottawa, Ont. It is highly advisable that both the Canadian National Railways and the Canadian Pacific Railway undertake a joint survey of an outlet to the Pacific coast. If that is not done within a year then the present administration, if returned to power, will take steps to have such work begun, declared the prime minister, Mackenzie King, in the House of Commons recently.

Extending Air Service

Tokyo.- In order to offset curtailment of Japan's maritime fighting units resulting from the agreement reached at London, England, the navy ministry here is planning to extend the nation's air services on a vast scale.

The largest American-made water wheel, weighing 150 tons, is being built at Newport News.

Over Seven Million Paid In Pensions

Dominion Government Contributed Nearly Four Million To Pensions

Ottawa, Ont.—The Dominion Government has contributed a total of $3,771,349.66 to the province in aid of old age pensions, up to the end of the last fiscal year, according to a return tabled in the House of Commons. The disbursements to the 42,563 pensioners throughout Canada amounted to $7,542,579.12

Following is the distribution by provinces Alberta, 2,017 pensioners, $367,420.04 total paid. British Columbia, 4,376 pensioners, $2,049,674.32 total paid. Manitoba, 5,104 pensioners, $1,649,290.67 total paid, Ontario, 26,270 pensioners, $2,225,688.32 total paid, Saskatchewan, 4,462 pensioners, $1,128,942.82 total paid. North-West Territories, 4 pensioners, $567 total paid.

The apparent disproportion as between pensioners and total payments is due to the shorter period in which the act has been operating in the various provinces. British Columbia was the first to adopt the act, Ontario the last Consequently the disbursements to British Columbia have been in progress for a much longer time than to Ontario.

Fire In Alberta College

Main Building and Boys' Dormitory Were Destroyed

Lacombe, Alberta. Fire, which broke out in the Canadian Junior College here, destroyed the main building and boys' dormitory. The loss is estimated at $100,000.

Five boys, who with some 200 others escaped in their night clothes, received burns and were taken to the Lacombe hospital

The college is the only Adventist institution of the kind in western Canada. There were three buildings on the site, the other being the girls' dormitory, which was saved. Erection of the structure was carried out some 20 years ago.

Canadian Nurse Killed In Italy

Car Left Road After Collision and Plunged Down Ravine

Florence, Italy.—Miss Helen Gee, 22, a United States girl, whose home is in Denver, Colo., and Miss Ruth Henderson, 22, a Canadian nurse, employed in John Hopkins Hospital, Baltimore, Md., were killed in an automobile accident near Renta, 46 miles from here.

The automobile in which the two women were travelling collided with another automobile, left the road and plunged 250 feet down a ravine. The car was loaded with suit cases which showed that they were touring Italy.

Wilkins May Accompany Dominion Expedition

Famous Explorer Has Permission To Go To Arctic

Ottawa.—Sir Hubert Wilkins may accompany the 1930 Arctic expedition, sent out annually by the Dominion Department of Interior, through its northwest territories and Yukon branch. It was reported that the famed Australian explorer and scientist had the permission of the department to join the expedition, which will travel north on the S.S. Beothic, and which leaves North Sidney, Nova Scotia, towards the end of July.

Mounties Leave For England

To Compete In International Horse Show At London

Ottawa A detachment of Royal Mounted Police to compete in the forthcoming International Horse Show at Olympia, London, sailed from Montreal on May 29. Major T. Dann, senior ranking inspector of Canada's celebrated force, is in command. The riders and their mounts have been put through a strenuous period of training in Regina and Ottawa.

Sound "Last Post" For Aviator

Ottawa. -"Last Post" was sounded and musketry rattled with the "present arms" of the firing party as a train pulled out of Union Station bearing the remains of Flight-Sergeant Robert W Pike to Vancouver The body of the young flyer, killed in an aeroplane crash here, May 27, will find a last resting place in his native city in British Columbia.

Plans Westward Atlantic Flight

Dublin, Ireland —The first attempted westward crossing of the Atlantic Ocean by 'plane this season will be made by Capt. Charles E. Kingsford-Smith, pilot of the Southern Cross on its California-to-Australia flight, near the end of June, he said here

Smelter For Far North

To Operate In Copper Mines On Great Slave Lake

Edmonton. Within another 18 months a huge oil-burning smelter will be going full blast on the southeast corner of Great Slave Lake, turning the deposits of rich copper ore of this region into ingots to be transported to the markets of the world through Edmonton, according to plans of the Atlas Exploration Company the Consolidated Smelters and Ventures, Limited, generally recognized as the three most powerful mineral development companies in Canada.

Gift Of Conservative Members

Huge Loving Cup Presented To Hon. R. B. Bennett

Ottawa With members and Senators thronged in the party caucus room of the House of Commons, Conservatives presented their leader — Hon. R B Bennett -with a huge loving cup Taken entirely by surprise and visibly moved as the two oldest of his supporters in point of years, R. S White and W. A. Black, made the presentation. the Opposition chieftain spoke feelingly in expressing his thanks.

AMOUNTS PAID ON SUBSIDIES ARE ANNOUNCED

Ottawa, Ont - Further information of the amount of money paid by the Dominion Government to the provinces was given to the House of Commons by Hon C A Dunning, minister of finance, in reply to questions from F G Sanderson (Liberal, Perth Sound) It sets out the amounts which will be paid to the western provinces by way of subsidies after the agreements with the prairie provinces for the transfer of the natural resources and the agreement with British Columbia for the transfer of the railway belt and the Peace River block shall have come into effect. The payments will vary according as the population of the provinces increase.

The annual subsidy to Saskatchewan on the basis of the present population of 860,000 will be $2,063,293. When the population reaches 1,200,000 the subsidy will have increased to $2,710,375.

The subsidy to Alberta at present will be $1,678,425. When the population reaches 800,000, it will be $2,015,375, and when it reaches 1,200,000, it will be $2,710,375.

On the basis of its present population, Manitoba will receive $1,662,584 16 annually When the population reaches 800,000, this will have increased to $1,991,564 16, and when the population reaches 1,200,000 there will have been a further increase of $2,686,384.16. In the intervening years the total payment will vary according to population.

British Columbia on its present population will receive an annual grant of $738,816.66. This per capita grant will increase as the population increases. The grant for government and legislation will also increase from $190,000 to $220,000 when the population exceeds 800,000, and to $240,000 when the population exceeds 1,500,000.

Saves Babies in China

Vancouver cows have become the foster mothers of children in China and Japan. Fresh certified milk is now being carried from Vancouver to the furthest ends of the earth, since New York, Montreal, Australia, South America and London, England, have already been supplied from the British Columbia port. Scientific refrigeration on the big white liners of the Canadian Pacific fleet plying between Vancouver and the Orient, is half the secret of the success of this long distance delivery of fresh milk; the other half is the quality of the product from the Brookbank Laboratories certified milk farm. Carrying milk, as fresh as when it came from the cow, from Vancouver to Shanghai, a distance of 5,419 miles, is a big job and even the speedy "Empress of Canada" took 14 days to turn the trick, counting in stops at Honolulu, Yokohama and Kobe en route.

W. F Jones, manager and proprietor of the Brookbank Laboratories, has a theory that the cow which feeds the child has a right to the same treatment and attention as the child's mother, and above lay-out will show something of the careful grooming and spotless cleanliness of stables and animals.

SPEAKER OF SENATE

Senator A. C Hardy, Brockville, Ont., who has been selected as Speaker of the Senate The selection will be immediately confirmed by the government.

Veterans Can Renew Pensions

New Pension Act Contains Specific Provision For Commutations

Ottawa - There is a specific provision in the new Pension Act in regard to veterans who were entitled to pensions but who commuted their rights for a cash sum of money

The door to renewed pensions is now opened to these veterans. The act provides for them in this way At the time of commutation they were conceded to be entitled to a certain monthly pension. It will be presumed that instead of making a cash settlement, they had been drawing this pension continuously If the passing years, calculated on a monthly basis, would have equalled the amount of cash they are once more eligible for pension provided they can prove that they are suffering from war disability They will be entitled, once the full cash amount has been taken up by the passage of time, to a pension based upon their present disability

Flight Again Postponed

R-100 Not Coming To Canada For Some Weeks Yet

London, England Projected flight of the British dirigible R-100 to Canada has been postponed until the end of June or the beginning of July

Frederick Montague, under-secretary of state for air, informed the House of Commons of the postponement, stating that repairs were required by the huge ship Repair material will have to be manufactured specially

While on a recent 24-hour test flight over England, the R-100 had a section of covering torn from one of her fins and later it was found that she had suffered other minor damages

It had been expected that the R-100 would make the flight to Canada about the beginning of June.

Some War Books Criticized

Edinburgh Scotland - Some modern war books were described as "filthy" and inexcusable exploitation of those who lost him in the war, by the Rev John Calder, Campbelltown, at the Assembly of the Free Church of Scotland "These books," said Dr Calder, "constitute a libel on the army and a calumny on the heroic dead."

Passes House Of Commons

Contributions From Companies For Campaign Purposes Allowed By Election Act

Ottawa The new Dominion Election Act was finally passed by the House of Commons after an amendment by J S. Woodsworth (Labor Winnipeg North Centre), had been accepted

The amendment repeals a section prohibiting contributions from companies for campaign purposes Mr Woodsworth claimed that this provision worked a hardship on labor unions desirous of making contributions while large corporations had been able to contribute despite the section The effect of the passing of the amendment is interpreted to mean that contributions to campaign funds from unincorporated companies and organizations will be subject to no restriction.

Senate Approves Grain Act

Given Three Readings and Passed Within Few Minutes

Ottawa, Ont — Approval was given by the Senate to the consolidated draft of the Canada Grain Act which was prepared by a special committee of the House of Commons, during the present session Within the space of a few minutes, the bill was introduced by Hon. Raoul Dandurand, government leader, given three readings and passed

Senator A B Gillis protested against the bill being introduced so late in the session, making a careful study of it practically impossible If this practice were followed all the time the Senate would be "nothing but a rubber stamp" for the Commons he said

Operating On New Time

Prairie Air Mail Making Use Of Additional Daylight

Winnipeg The new schedule for the Western Canada Prairie Airmail service went into effect May 27 when the 'plane carrying the mail for western points left Stevenson airport at 7 30

A careful survey had shown the greatest difficulty in operating the service, due to meteorological conditions, to exist on the leg of the route between Winnipeg and Regina, and particularly at the Winnipeg end, Mr Coolican said.

Making use of the additional hour and a half of daylight is expected to better the percentage of effective performance.

GRAIN MOVING STEADILY FROM HEAD OF LAKES

Montreal, Que The Montreal Star publishes the following despatch from Fort William Ont

"Commenting on advices from Montreal that a big movement of export grain is an immediate prospect, E. A Ursell, chief statistician of the Board of Grain Commissioners, said the announcement was not unexpected

"He said European buyers were commencing to take Canadian grain, and he looked for a brisk movement in June and July

"The situation has greatly improved during the last two weeks, he said. He expected shipments from Port Arthur and Fort William to run from 12,000,000 to 20,000,000 a month, which would mean a carry-over considerably less than last year

Fort William, Ont —Increased shipments from the Head of the Lakes during the past few days and a great improvement in export conditions on the Atlantic seaboard are noted by E. A. Ursell, statistician to the Board of Grain Commissioners, commenting on reports from Montreal that a big movement of export grain is an immediate prospect.

Mr. Ursell points out that liner tonnage has been taken up with wheat, and five tramp vessels are now at Montreal to take on wheat for Mediterranean ports, which of itself, he says, is a very satisfactory condition, showing that there is a demand for wheat in large quantities among the continental European buyers.

"It is reported that 5,000,000 bushels of wheat were exported during week of May 19 to 24, and 4,000,000 the week before

"Should the export movement continue for the next two months at the same rate," the statistician adds, "the carry-over of wheat in Canadian channels is not likely to be more than 80,000,000 bushels, as was indicated in a report issued four months ago by the statistician's office of the Board of Grain Commissioners.

CONFERENCE ON UNEMPLOYMENT WILL BE HELD

Ottawa, Ont It is proposed to make the interprovincial conference on unemployment which may be held this year as representative as possible Premier King stated in the House of Commons The government had placed an appropriation of $10 000 in the supplementary estimates to enable the conference to be held. Representatives of labor of the transportation companies and other large employers would be invited

The Premier made his statement in reply to a question from A A Heaps (Labor Winnipeg North) as to whether the proposed conference would be held. In preparing for the conference Mr King stated, the government had taken into consideration the considerable seasonable unemployment which existed in Canada

It was thought the conference could devise arrangements for providing continuous employment throughout the winter months for a larger number of men.

The conference would consider all matters relating to employment and unemployment This was the Premier's reply to a question from Mr Heaps as to whether the matter of uniform legislation respecting the eight-hour day would be taken up

Winnipeg, Man Mayor Ralph H Webb will represent Winnipeg at a special conference on unemployment at Vancouver on June 9. he announced Mayors from other Western cities will also be in attendance he said He had received advices from Saskatoon, Regina Edmonton and Calgary that mayors of these cities will participate in the conference

As far as I can see" Mayor Webb declared, this unemployment situation is getting worse and there doesn't seem to be any immediate source of relief"

Relieved Of Indebtedness

Soldier Settlers To Have Thirty Per Cent. Cancelled

Ottawa, Ont The government bill to relieve all soldier settlers of 30 per cent of their indebtedness to the country was passed by a Senate committee without amendment The bill was drafted by a special committee of the House of Commons during the present session.

Under it the 12,000 soldier settlers in Canada will be relieved of capital indebtedness amounting to about $11,000,000. The total amount owing the government under the scheme was set at $38,000,000 and Hon Charles Stewart under whose department falls the administration of the act, said he was reasonably satisfied payment would be made of the remaining $27,000,000

Young Aviatrix Killed

Motor Stalls and Girl Fell Two Thousand Feet

Colorado Springs, Colo. — One of America's youngest aviatrixes, 17-year-old Margaret Ferguson, fell 2,000 feet and was killed, while attempting desperately to start her stalled motor

Miss Ferguson obtained her government pilot license only a few days ago She was making a solo flight before attending her high school class when apparently motor trouble occurred The motor was heard to restart once during the 2,000 foot plunge, but sputtered and died again.

Forced Natives To Work

Windhoek Southwest Africa — Three young Europeans charged with kidnapping natives and forcing them to work on their plantations under pain of the lash, were found guilty of assault and fined five pounds (about $25) each The sentences were light in view of the youth of the three men

Looking For Settlement Land

Montreal In search of new land for settlement a group of French-Canadians of the eastern provinces and of the United States will leave for the west toward the end of June from Montreal and Quebec by the Canadian National Railway

Administration Is Costly

Ottawa - Expenditures for the administration of the opium and narcotic drug act have increased since 1926 from $27,452.90 to $62,110.83 in 1930, according to a return tabled in the House of Commons here

Chief Scout Re-Elected

Ottawa.--His Excellency the Governor-General was re-elected as chief scout for Canada at the annual meeting of the Canadian General Council of the Boy Scouts Association.

THE TOFIELD MERCURY

A Weekly Newspaper Published At Tofield, Alberta

W. Worton Publisher

THE GAS BAG

WE DESIRE to acknowledge the receipt from the Editor of the Gas Bag, a copy of that publication.

The Gas Bag is a private publication, and first appeared on October 17th, 1925, the present copy dated May 31st, 1930, being the second issue. It is published for the purpose of stimulating and increasing interest in the farmer party or group and urges the voter to vote for the farmer candidate. We are sure the U. F. A. political group appreciate Mr. Pincott's labors on their behalf.

THE SOLDIER MEMORIAL

A LETTER written by J. W. Chapman, president of the Tofield Branch Canadian Legion appears in another part of this issue. Mr. Chapman outlines the feeling of the local branch of the Canadian Legion, which is, that they do not wish to take the initiative in this matter, but promise to help in every way possible. This is more than reasonable and all thoughful persons will appreciate their view point.

The Mercury made a suggestion some little time ago that the town council discuss the matter at a regular meeting and then if they deemed it advisable, they could call a public meeting at which the matter could be further discussed and the necessary committees appointed. It would not be necessary for the council to assume any official responsibility, but being the only official public body in town they could quite appropriately take the initiative in this matter.

There are quite a large number of people who believe that the best forms of war memorial are those of a utility nature, such as a hall, rest establishments, recreational establishments or anything from which some good is derived by the present and following generations. It is claimed that money spent for tablets, statutes etc. is at least partly wasted as no material good to the living can be derived from them. We are not in accord with this opinion. We believe a suitable statue or tower to be the most suitable memorial. Here at least, sentiment, and not practical realism should reign supreme.

LIBERAL CANDIDATE'S MANIFESTO

There appears in this issue the manifesto of the Liberal candidate for this constituency in the provincial election. Mr. White, states in plain language, so all may understand, his beliefs and opinions concerning provincial politics. Whether one is a Liberal, Conservative, U. F. A., or a combination of all three, if a resident in this constituency, it is good policy to read Mr. White's election address.

A SUBURB OF EDMONTON

INFORMATION IS to hand that the road from Tofield to Cooking Lake will be gravelled soon. Tenders are being called for some of the work and other preliminary work being done.

We understand the road is to be widened by one rod (16½ feet) this being taken from the farms on the north side of the road.

The government allowing variable sums for this land taken for road purposes, the amount ranging from $50 an acre down. Where land is in crop they will, we understand, allow $20 for the crop. A certain amount will also be allowed for moving the fence, or if the farmer is too busy, the government will move it for him.

With the construction of a gravel road from Tofield to Edmonton, there will undoubtedly be more traffic by residents of this district to and from the city. Even now a large number make regular visits there and considerable purchasing of household supplies is done there. This is a direct contrast to a few years ago when with the exception of mail order business, all the wearing apparel and household requirements were purchased in town. With the highway and the residents of this district gradually acquiring more powerful cars, Tofield will soon become a suburb of Edmonton. As a matter of fact, it now takes very little more time to make the trip to Edmonton by car, than it did for many of our farmers to make the trip to Tofield by team years ago. Thus something in the nature of a cycle of events have occured. Many years ago, before the arrival of the railway, the old settlers had to go to Edmonton for their supplies. This however, was a long and tiresome journey, often made by ox team, and when made this way, the return journey took a week. With the advent of a well stocked town here, this journey was greatly reduced and for many years Tofield was the centre of commerce for quite a number of miles in all directions. Now it would appear as if changing conditions would make Edmonton the main base again.

Just what effect this road and changing conditions will have on Tofield as a town remains to be seen. The outlook does not appear particularly bright for those business men who have spent the best part of their lives in building up a permanent and worthwhile business.

BANK OF MONTREAL ISSUES STRONG REPORT FOR FIRST HALF-YEAR PERIOD

The Bank of Montreal is now forwarding to shareholders a particularly satisfactory statement for the half year to April 30th.

In the face of unusual conditions, the Bank has been able to keep strong in liquid assets and cash and at the same time to show satisfactory

one of the outstanding features is the increase in current loans in Canada. Both Capital and Rest are at new high levels. The Paid-up Capital now stands at $36,000,000, up from $34,548,700 a year ago, while the Rest has been increased to 38,000,000, from $35,548,700, at which level it is $2,000,000 above the paid-up capital.

It is likely due to the larger capital employed that the bank has been able to report to shareholders slightly increased profits for the six months, as compared with the corresponding period last year. Profits amounted to $3,543,017, up from [illegible]. There were also received in the six months payment of $61,459 as premiums on new stock. These amounts, when added to the balance carried forward, brought the total available for distribution up to $4,330,050. This was appropriated as follows: Dividends and interest on instalment payments on new stock $2,167,596, amount credited to Rest account $51,459; provision for taxes Dominion Government $220,979; reserve for bank premises [illegible]; leaving for the balance of profit and loss to be carried forward at $1,281,033.

Strong Liquid Position

In the general statement of assets and liabilities, total assets are shown at $822,590,649, compared with $815,705,53 a year ago. Of this liquid assets are reported at $371,150,296, equivalent to 51.60 per cent of liabilities to the public. Included in them are cash holdings of $94,121,408, equal to 12.99 per cent of public liabilities.

At the same time there is a somewhat unexpected increase in current loans and discounts in Canada and these now are reported [illegible]194, up from $314,664,127. While a portion of this increase may be attributed to the wheat situation, it is also known that there is an increased tendency on the part of large customers to avail themselves of banking accommodation.

As was to be expected, with the change in the general credit situation throughout the world, the most important variations are in the call loan department. Call loans in Canada are down to $27,[illegible], 384 from $39,350,779, and call loans in Great Britain and the United States have been reduced to $86,088,615 from $130,974,369. At the same time, balances due to banks and banking correspondents elsewhere than in Canada—which to a great extent represented deposits temporarily placed on this side due to higher loan rates—are now down to $[illegible] from $35,107,167.

Total deposits are reported at $[illegible],067,752. Of this amount deposits bearing interest are $[illegible],654,[illegible] and deposits not bearing interest $130,416,937.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

FIRST AID IN THE HOME

It is a good plan for every family to be prepared to deal with emergencies which may arise. In each home there should be available the few articles which may be used with advantage in dealing with such emergencies. It is best to keep these articles properly labelled in a separate medicine cabinet; locked and out of reach of children.

The following is a list of articles for the first aid cabinet:—A first aid outfit containing sterile gauze and bandages, to be used in dressing cuts and wounds.

Aromatic Spirits of Ammonia, two ounces. Give one half teaspoonful in water in case of fainting.

Alcohol, rubbing, for use as a liniment to relieve pain in cases of sprains and strains.

Carbolated Vaseline, one tube. Use in the treatment of burns. Apply freely; cover with a piece of clean cotton and hold in place with bandage.

Oil of Clove. A drop or two on absorbent cotton, placed in the cavity of an aching tooth.

Boracic Acid. Dissolved in water may be used as a mild antiseptic wash or for making a compress.

Syrup of Ipecac. Use one teaspoonful, followed by a drink of warm water, to cause vomiting.

A roll of absorbent cotton, a pair of scissors, a clinical thermometer, safety pins, adhesive tape, and a medicine glass can be conveniently kept in the cabinet, and will be found useful in carrying out the instructions of the physician when there is illness in the home.

The above list may seem to be very short to the person who is used to having the shelves crowded with bottles. It is to be remembered that most minor illnesses do not require treatment with drugs. The most that the lay person should do while awaiting the arrival of the doctor is limited to a few things.

A severe illness is not threatened every time a member of the family complains of not feeling well, but a sick stomach, headache or chill may be the first warning of the onset of a severe illness.

The trained physician requires all his skill to determine the cause of his patient's symptoms and the proper treatment necessary. It is generally expensive and ineffective, if not actually dangerous for the lay person to attempt to prescribe for himself.

CHILDREN FEED FIRE WITH DYNAMITE; IT MADE DANDY BLAZE; NO FIREWORKS.

PORT ARTHUR, Ont., June 2nd.—Forty sticks of Dynamite were the playthings of children attending school number two in the township of Ware near Kaministiquia Friday. Two of the pupils found some dynamite in a gravel pit.

It burned beautifully and teacher and pupils were delighted with the effect.

At recess the children gathered up 40 sticks of dynamite. Another fire was built and 26 of the dynamite sticks were piled in the crackling flames. When fathers and others identified the explosives there was consternation through the township tempered by a wonder that nothing serious had happened.

CRACKSMEN DYNAMITE SAFE IN DAIRY POOL BUILDING; OBTAIN NOTHING OF VALUE

Working with the efficiency of expert cracksmen, yeggs dynamited the door of a small safe in the Northern Alberta Dairy Pool building, 10531 102 st., early Monday morning only to find that it contained nothing of value to them.

The opened safe was discovered shortly after 5:30 a. m. Monday by employees of the dairy pool, who immediately notified the city police. Detectives are now working on the case, but will not disclose whether or not they have found any clues to the identity of the perpetrators of this latest job in the recent epidemic of safe blowings which has hit the Edmonton district.

Chief Shute stated that the yeggs had evidently gained entrance to the dairy pool building by placing a ladder against a one-storey annex, crossing the roof and forcing a window on the second storey. The ladder used was pulled up on to the roof of the annex and so was out of sight of any passerby.

"Soup" probably made from dynamite, was poured around the door and exploded by means of a fuse. The knob and part of the door was broken off by the explosion and thrown across the office, while the wall behind the safe was also damaged by the shot. The safe contained only documents of the company, none of which was taken.

Mundare, May 26th., 1930

To the Electors

Electoral Division of Vegreville

Ladies and Gentlemen:—

Having been nominated to contest the Electoral Division of Vegreville in the Liberal interests in the forthcoming provincial general elections, I feel it my duty to place before you, briefly, my views on some of the issues of the day. Newspaper space is necessarily limited and I cannot, therefore, do more herein than outline the general features on which I base my appeal for your support.

1. The public debt of the province has been unjustifiably increased beyond the bounds of reason in the past nine years—since the Greenfield and Brownlee governments took office. The introduction of sound business methods and no more increases to the public debt save for necessary public works will results in immediate saving and eventually enable the province to repay part of the load now being carried by the taxpayers.

2. The Supplementary Revenue Taxes should be, first decreased, then abolished.

3. More attention should be paid to the development of district and market roads and a fixed policy of main highway construction be adopted for a term of years. Gas taxes and auto license fees to be set apart for road construction.

4. I oppose the proposed new School Act, on the ground that it is unnecessary, unduly expensive and concentrates too much power in the hands of the Minister of Education and his department.

5. Adequate inspection should be provided for our rural public schools and I favor an increase of government grants thereto on the basis set by the former Liberal Governments.

6. I favor an extension of the public health service, particularly in districts where medical assistance is difficult to secure on short notice.

7. Co-Operative companies and other organizations receiving government assistance by way of loans, grants or guarantees should be subject to the strictest inspection and supervision in order to guard against further misuse of public moneys.

8. I strongly deprecate class government, whether such government be comprised of business men, professional men, working men or farmers. Any class government lends itself eventually to the Mussolini tactics pursued by the Brownlee-Hoadley government of this province.

9. The paternal legislation introduced by the present government and added to year by year is a menace to our citizens and should be abolished. It deprives the citizen of his individual initiative, leads to bureaucratic methods of government, prevents the necessary inflow of capital to develop our industries and natural resources and deadens the sense of civic responsibility which should be the heritage of every citizen.

10. The province will be taking over shortly the administration of the Natural Resources under the generous terms granted by the Liberal government at Ottawa. While favoring government ownership of these resources and such government control as may be required to protect the interests of the people, I am not in favor of the government attempting to develop the resources at the public expense.

For the above and other reasons which will be made public during the campaign, I am soliciting the support of the electors of this division. If elected, I will be at the service of every class of citizens within the electoral division, with out distinction as to race or vocation.

Your Obedient Servant,

HARRY A. WHITE

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Lighting London By Wireless

Lord Morris Visualizes Power Carried Over 2,000 Miles

A London receiving its light and power by wireless energy from waterfalls more than 2,000 miles away was visualized by Lord Morris, the war-time Prime Minister of Newfoundland, when he spoke to a Daily Mail reporter on the vast possibilities opened up by the Marchese Marconi's latest invention.

The marchese switched on the lights of an electrical and radio exhibition in Sydney, Australia, by means of apparatus installed in his yacht in Genoa, Italy. Lord Morris said:

The discovery points the way to the future when there will be no electric wires and all current and electric power will be transmitted directly through the air in any direction, and quantity desired. It is, to my mind, almost staggering.

If the Marchese Marconi is sound in his prediction, it is no flight of the imagination to forecast that the undeveloped power of the Grand Falls on the Grand River, Hamilton Inlet, Labrador may, in the near future, light the streets of Chicago and London and run their omnibuses and motor cars.

The distance from the Grand Falls to London would be only one-fifth of the air distance or space, that, by his latest discovery, the Marchese Marconi has annihilated.

The Grand Falls, Labrador, are of greater volume and height than Niagara, and from the meagre information we have of them nobody can forecast the possibilities of their electrical development. The volume of the rushing river as it leaps over the Falls, is constantly fed by the melting snows of the surrounding high plateaus. Thus the Falls lose none of their great volume such as happens in the summer heat to the streams, lakes and rivers which feed Niagara.

Wants Forty Thousand For Finger

Claiming that he cannot adjust trimmings and fix pins as well as when he had 10 digits, a modeliste of Paris, has sued an autoist for the loss of his little finger in an auto accident. It is explained that a modeliste is one who drapes the gowns on mannequins, and therefore it is important that he be perfect in every way.

Changed Name Quickly

Three different names in three hours is the record of Mrs. Amos C. Dyer, Newcastle. As Mrs. Kimick, she obtained divorce from Simon Kimick, and was granted restoration of her maiden name, Haynes. Then she became the bride of Dyer.

USES PINKHAM MEDICINES

Praises Vegetable Compound, Blood Medicine and Liver Pills

Birchtown, Quebec—"I live 13 miles from town on a farm, with all my home duties and churning to attend to. At the Change of Life, I became nervous and rundown. The Vegetable Compound helped my whole system. My nerves are better, my appetite is good and I am able to do my work. I have also taken the Blood Medicine and the Liver Pills and they helped me. I will answer letters from women asking about your medicines."—Mrs. Richard Charlton, Birchtown, Quebec.

W. N. U. 1840

Music and Health

English Hospital Conducting Experiments To Determine Effect On Blood Pressure

For some time past professors of physiology at an English hospital have been conducting experiments to judge the effects of music upon human blood pressure. For this purpose a graphophone and a wide variety of records are used. Tests have been made upon eighty people in good health, many of them being students and others associated with the hospital. In no case however emotional or powerful the music, was any detrimental effect recorded, and in most trials the results were beneficial, especially with vocal and light orchestral works.

To non-musical people heavy, classical opera was not so elevating, and one man, who likes nothing but the lightest dance music, revealed a depression in his blood pressure when jazz music was played because, at the moment, he was not in the mood for music at all.

The best type of subject was the musical amateur of good taste and emotional susceptibility who makes a habit of listening to records without the exercise of too much critical faculty.

The professors discovered that the subject should remain comfortably seated for a few minutes before a record is turned on. The analysis of the cases already experimented upon is leading doctors to try the effect of playing to convalescent patients, in the hope of beneficial results upon progress toward complete recovery.

China Invents New Language

Wishes To Get Rid Of Hundred Or More Dialects

A new Chinese language has been invented and its teaching made compulsory in every public school in China. It is called "Pei-hua."

Its existence is due to the desire of the educational authorities to get rid of the hundred or more dialects which have hampered China since time immemorial.

Although the Chinese written language is the same in all provinces, the spoken word differs in each. In cities like Shanghai and Hankow, where the populations are made up of provincials from all sections, merchants must speak two or three dialects besides their own. Even then many of them employ interpreters.

Similar conditions exist in the courts and are a constant source of trouble and expense.

"Pei-hua" is a mixture of Mandarin and other northern dialects. Its use is expected to abolish the language trouble after a generation or two.

Had To Earn His Fare

One day, when a great violinist was in Paris, he jumped into a cab and ordered the driver to take him quickly to the concert-hall, where an impatient audience was waiting to hear him perform a famous piece of music on one string of his violin.

"What's the fare?" he asked.

"For you, sir," said the driver, "ten francs."

"You jest," laughed the violinist.

"Not so; you charge as much for a single seat at your concert."

The musician was silent for a minute, and then, with a shrewd glance at the over-reaching cabman, said, handing him a reasonable fare, "I'll pay you ten francs when you drive me on one wheel."

Electrically Heated Earth

Lilies, tulips, and hyacinths have been grown up on the north-east coast of Sweden in midwinter by heating the earth with electric radiators. Warming the earth by electricity seems to do more good than dosing plants with electric light. It is thought, in fact, that this new method of heating the soil by electricity may make it possible to grow in any part of the world plants which hitherto have only been grown in particular climates.

Old Firms In England

Trades Are Handed From Father To Son For Centuries

In a little workshop at Staines, Middlesex, England, is an elderly man who stitches away all day making saddles. His name is Edmund John Denyer, a name that has a fine old English ring about it, but he is [illegible] of his family. When he dies the Denyer harness business will have gone out of existence.

Before the Spanish Armada, before the Gunpowder Plot, before the great fire of London, back in the days of Queen Elizabeth and Shakespeare, there were Denyers who plied their trade in the saddlery shop in Staines. Since the year 1557 the family tradition has been unbroken. For kings and queens, lords and ladies, the Denyers have made saddles and harness. From a long succession of fathers there have been sons to learn the trade and carry on the Denyer tradition. But Edmund John Denyer is the last of the race.

Reflections on the long procession of nobles who have ridden Denyer saddles, nobles who may have jousted in the yards of the old castles before the court, conjure up visions of a pageant of British history. The Denyers may not themselves figure much in the annals, but there must be a feeling of regret that the old family of craftsmen is nearing the last of the line. It is an English practice to teach the trade of the father to the son, all down the line, and there are other businesses still carrying on which were established in the Middle Ages.

There is, for instance, a company manufacturing bells which began six hundred years ago, and their workmanship today brings buyers from all parts of the world to London, England. The firm which shipped the tea to Boston is still doing business at the old stand, although that is quite modern by comparison. In the busy Haymarket today there is a tobacconist business—in modern parlance a cigar store—in exactly the same surroundings as it has been for several centuries. The old carved doorway is the same that His Majesty George the Third, used to enter to buy his snuff, and if you care to ask the proprietor, he will show you the firm's books with the King's name in it as a customer.

Old castles and churches have their attractions for some tourists, but it is such personal contacts with living personalities that give the tourist delightful surprises.

The Many-Purpose Oil. — Both in the house and stable there are scores of uses for Dr. Thomas' Eclectric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

Indications Point That Way

I don't think the boss likes me any too well.

He told me last week I made a mistake in leaving college even if I did graduate.

He refused to give me a raise every time I asked.

He advertised for a man to take my place.

He took my stenographer to lunch.

He gave me two week's notice.

He introduced me to my successor.

Invents Travelling Parachute

Henry Hushmeyer, professional parachute jumper, at Roosevelt Field, N.Y., has invented a machine to enable jumpers to travel 20 miles after the 'chute opens. His device is a small motor and four-foot propeller attached to the jumper's back.

The first man who set out to discover the date of the earth's birthday was Halley, the astronomer.

Smothering Spells

Couldn't Walk Far Gasped For Breath

Mrs. T. W. Roth, Kelowna, B.C., writes:—"For over a year I was troubled with smothering spells, and it was impossible for me to walk, even a short distance, on account of having to gasp for breath.

"A friend told me to try

which I did, and in a short time I felt much better.

"I can now recommend them to everyone."

ZAM-BUK

Marvellous For Healing

Ulcers & Bad Legs

Many Openings In West

Business Opportunities In Good Towns Along National Railways

According to the latest "Business Opportunity" list issued by the Colonization Department of the Canadian National Railway, there are many openings in Western Canada, more or less attractive for professional men, store keepers, mechanics and others who are ambitious to get into business. Towns, large and small, along Canadian National lines between Lake Superior and the Pacific Coast, contribute to the listings. Doctors are in the greatest demand, no fewer than 29 places represented believing that they can support one, and in some cases it is suggested the practitioner might do well if he had his own drug store. Twenty-one places would like to have a druggist join their respective communities. Several dentists are also wanted. There are opportunities for a few hotels, restaurants and rooming and boarding houses, and twenty-one communities are asking for a baker and confectioner. Old "Dobbin" is evidently still doing business, for twenty-six openings for blacksmiths and several for veterinary surgeons are listed. In a few cases it is necessary that the blacksmith should be somewhat of a motor mechanic as the two trades are very often combined in small towns. Thirty-three places want a garage, and in some of these cases the motor engineer would have to understand tractor and general repairing. Harness makers and shoe repairers to the number of nineteen could be located, and the people of eight villages want to doll up for they want a tailor, chiefly for cleaning and pressing. Thirty barber shops with pool rooms in connection are required. That the country is progressing is indicated by thirty-one requests for banks and twenty-nine for flour and grist mills. The development of the dairying business in certain localities is shown by the listing of thirty-three creameries, in five cases with cheese factories combined. There are also openings for a number of butchers, general stores, hardware stores, and many other lines from hairdressers to saw mills. Several of the large centres invite correspondence regarding industrial [illegible].

During the past few years many business men have found good locations through the Canadian National Railways' Business Opportunity list, and apparently there are still many promising openings in all the provinces. New towns being placed on the map by railway construction are also offering chances for enterprising men to get in on the ground floor.

Believe It Or Not

Berlin University Professors Claim German Fish Can Read

German fish have been taught to read their German A B C, according to professors in a Berlin university. The swimmers were found to be bright pupils. First they were taught to distinguish colors by placing food in variously colored bags. The fish learned to swim to the bag containing their favourite food and to open it by pulling a string. The savants then attached letters of the alphabet to bags, which were all of the same color. Eventually the fish were able to pick out the correct bag by the letter, and even to distinguish the letter "R" from "B."

Worked It Right

Penitent: "I have stolen a fat goose from a poultry yard!"

Priest: "That is very wrong."

Penitent: "Would you like to accept it, father?"

Priest: "Certainly I will not receive stolen goods—return it to the man from whom you stole it."

Penitent: "But I have offered it to him and he won't have it."

Priest: "In that case you may keep it yourself."

Penitent: "Thank you, father."

The priest arrived home to find one of his own geese stolen.

Imports of motor vehicles into China last year were more than 50 per cent. greater than in the previous 12 months.

The Berlin, Germany, police department has been given an outdoor gymnasium which 100 men can use at a time.

Baby bears are almost invariably born in the winter.

The metal caesium is soft enough to be cut with a knife.

Use Minard's for Rheumatism.

Relic Of Colonial Days

Victoria Will Preserve Iron House Erected Seventy Years Ago

When sappers of the Royal Engineers came to British Columbia in 1858 to build roads in the new British colony they built their houses of iron. The engineers either were not conversant with the durability of the country's lumber or else they desired additional protection [illegible] Indian raiders.

The old iron houses were forgotten years ago and it was thought that the last of them had been removed until workmen engaged in clearing away old buildings to make room for additions to the government buildings at Victoria, discovered the iron structure which had served as a dwelling 70 years ago. Sills under the building were found to be in good condition. They were of timber brought out from England.

Provincial government authorities upon learning the history of the iron house, ordered it placed upon a new foundation and to be preserved as a relic of old colonial days.

STURDY CHILDHOOD

The sturdy child the bright active little chap is the one everybody loves. It is only the sickly, fretful child who is not attractive. It is the birthright of every child to be sturdy and well—to be able to make everyone admire him. Therefore, mothers, if yours is not attractive it's your fault, not his. He must be ailing and it is up to you to see that he gets relief—that he is given a medicine that will quickly make him well and keep him well.

Baby's Own Tablets are especially designed for infants and young children. There is nothing to equal them for correcting the irregularities of the stomach and bowels the cause of most of the ills from which little ones suffer. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Cleaning British Library

Another seasonable observance is the beginning of the great spring-clean at the British Museum Library. The regular dusting brigade on the library staff is reinforced for the occasion by a band of outside specialists, so that in all about eighty men are kept busy. The dusting of books goes on systematically, of course, from January 1 to December 31.

Persian Balm is alluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexions of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Invaluable to all women who care for elegance and distinction.

Teacher: "What is an island?"

Bright Boy: "A place where the bottom of the sea sticks up through the water."

"Skinny! I Gained 11 Lbs. in 8 Weeks and Boy Friend"

"After trying several tonics tried Ironized Yeast. In 8 weeks gained 11 lbs., new complexion, round limbs, best of all a boy friend."—S. M. Salino.

Men and women are amazed at gain of 5 to 15 lbs. in 3 weeks. Ugly hollows vanish. Bony limbs round out. [illegible] blemished skin gets clear and rosy like magic. Nervousness, indigestion, constipation disappear overnight. Sound sleep. New pep from very first day.

Two great tonics in one — special weight-building Malt Yeast and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in ½ time. No yeasty taste, no gas.

Don't go round "skinny," ugly, unattractive. Get Ironized Yeast from druggist today. Feel great tomorrow. Money back from manufacturer if not delighted with results.

Little Helps For This Week

"Though He slay me, yet will I trust in Him."—Job 13, 15.

Within the slender chalice of the [illegible]
Hold fast what I give thee and drop down
The fringes of those tender flowers of blue.
Thy wondering eyes nor question, nor withstand
What I may give. Perchance my love hath planned
Some sweet surprise or test if thou be true.
What if it be a sprig of bitter rue
A strange swift summons to an unknown land
A hurting thorn, a cross—rare gifts I know
For love to bring; but would'st thou trust me still?"
Quick, dear, thine answer: "I should trust until
The hidden meaning in thy gift should show."
Ah, sweet, when God sends just such gifts to thee
Canst thou not answer Him as thou dost me?

We should see not only the hand of God, but the hand of our Heavenly Father, full of mercy and loving-kindness in all that befalls us. We should believe it to be best for us, because it is His will.

—George W. Bethune.

Minard's Drives Away the Headache.

Valuable Insect Destroyer

The value of the Hungarian partridge as a destroyer of insects and weeds appears to have been established in Prince Edward Island, and twelve pairs have just been imported under the auspices of the Provincial Department of Agriculture.

William (reading poster): "Who be this 'ere Hoover, Jarge?"

Jarge: "Whoi, 'e be the feller what built the Vacuum at Rome!"

EDMONTON BUSINESSMEN JOIN RAILWAY OFFICIALS IN CONGRATULATING TOWN

VEGREVILLE, [illegible] Crowning twenty-five years of development and marking the advent of a new era which will likely see the town become a city, the new $50,000 C. N. R. station was opened here on Saturday afternoon.

Regional officers of the Railway, high civic officials from Edmonton and adjoining towns, leading members of chambers of commerce and hundreds of people who had motored in from various parts of the district were present at the ceremonies.

The station was opened shortly after the arrival of the official party from Edmonton [illegible] by N. B. Walton, general superintendent of transportation, C. N. R. western lines. The refreshments were served by members of the Women's Institute after which visitors were taken in for inspection of the fine new building.

A motor drive to points of interest was followed by a big banquet given by the Vegreville board of trade in the Prince Edward Cafe, when 150 guests were present. This was presided over by Major James Holden and was addressed by 20 speakers, while it ended at midnight.

At this function congratulations were showered on Vegreville over its new station described by W. A. Brown, former general superintendent of the Alberta district as probably the finest intermediate station between Montreal and Vancouver. High praise was given the C. N. R. for its demonstration of confidence in the town and district and thanks were expressed in replies by regional officers and other officials.

Some forty members composed the official party from Edmonton, which had entrained at that city at 2:30. This included Major J. M. Douglas, Commissioner D. Mitchell, W. A. Brown, J. F. McMullen, president, and John Blue, secretary of the Edmonton chamber of commerce; Judge H. C. Taylor, N. B. Walton, Osborne Scott, general C. N. R. passenger agent from Winnipeg; W. I. Munro, general superintendent of the C. N. R., Alberta district, John H. Imrie, managing director of the Edmonton Journal.

HER TENTH

(Red Cross Article)

In many parts of rural England tourists may see the quaint old buildings whose very stones provide sermons of bygone days, of such are the ancient Tithing Barns, into which the farmer brought his tithe of corn and produce. Red tiled and weather beaten they have stood the test of time, and though centuries old are mute evidences of an age when when tithing was accepted as the duty of a man towards his maker.

Here and there one still meets the same spirit of unselfish sacrifice in the hearts of some men and women of kindly vision and sympathetic understanding. The following little story taken from the Headquarters of Red Cross in Alberta restores one's faith in humanity in these materialistic times.

The Commissioner says "One day when more than usual the financial clouds were threatening, there came out of the grey sky a silver lining in the shape of a [illegible] from a working woman." She said that she was poor herself, but she had earned a little and she wished to [illegible] tithe her tenth to the Red Cross for the care of the crippled [illegible]. A dollar and some cents fell out of the envelope, but far more than that in reality for with the money there came a spirit of sacrificial service that rededicated our Red Cross workers afresh to their great task of mitigation of suffering, their faith strengthened by this simple story of a country woman's loving gift.

The strength of a bank is determined by its history, its policy, its management and the extent of its resources. For 112 years the Bank of Montreal has been in the forefront of Canadian Finance.

Private Harold Peat to Speak Here at Canadian Chautauqua

Famous Canadian Writer Will Deliver His Great Lecture "The Inexcusable Lie"

"Let us elevate the pursuits of peace, put bundles of fight into its varying elements, make it thrilling, make it heroic," says Private Harold R. Peat who will give his great lecture "The Inexcusable Lie" at the coming Canadian Chautauqua here. "The poets, the historians, the artists and musicians can make their contributions here. Your boy and mine will want peace when we have been able to interpret peace to make it at least as interesting as war, at least as heroic and as dramatic."

PRIVATE HAROLD PEAT

Private Peat is a world famous figure, one of the outstanding personalities that came out of the Great War. He served on the Western Front as a private with the Third Battalion, First Infantry, of his native Canada, was wounded twice and gassed in the first gas attack of the War.

No one could term him a pacifist. He knows war—its horrors, its stupidity, its cruelty. He believes if the children of to-day were given the true picture of war, the world would become peace-minded in the future. Wars will continue as long as war exists in the heart of man, is the creed of Private Peat.

Private Peat has lectured throughout Australia, New Zealand, the United States and Canada. He is, perhaps, more in demand to-day than any other speaker upon the lecture platform. Both in his books which have been exceptionally popular, and upon the platform he presents his ideas with clear-cut directness, and with a vividness that is tremendously convincing.

"His talk was full of sound sense," says the Toronto Star, and the many telling points were interspersed with much humor. He was listened to with much interest and at the conclusion of his lecture was accorded long applause."

"Mr. Peat has that indefinable thing called personality. His talk was heartily applauded by those who heard him," states the Winnipeg Free Press.

Chautauqua Here Soon

Advertising is now out for the Tofield Chautauqua, the premier summer event of the town and district. In less than three weeks the big brown tent will be up and hundreds of people from the territory surrounding Tofield as well as the townspeople will be attending programmes given twice daily for five days and the first evening programme on the 3rd.

This year the programmes promise to be of special merit. The plays, lecturers and musical organizations are of a high order and it is safe to say, of such a high order, that Tofield and district audiences would not have an opportunity of seeing and hearing them were it not for chautauqua organization.

In our next issue will appear a programme review. In the meantime chautauqua is something to look forward to. Guarantors will "talk chautauqua" all they can and when it comes time for the ticket selling campaign they will find a public willing and anxious to buy tickets for the best entertainment event of the year.

Now just a few words to the general public regarding the gaurantors. These men and women—there are one hundred of them—have pledged themselves to bring chautauqua here. In no other way could it be brought here. They consider its entertainment and educational features great enough to risk personal loss, so that you and your children may enjoy chautauqua programmes. It is safe to say all guarantors will purchase tickets. To those who are not guarantors we urge that they will do likewise. The programmes are sound, sane, entertainly bright as well as educational and your money is well spent.

Local and Personal

Mr. and Mrs. P. M. Haugen who have spent the past year at Vancouver and the Pacific coast, visited friends at Tofield during the past week. Mr. and Mrs. Haugen are leaving for the Peace River district country shortly, Mr. Haugen intending to open up a machine shop in a location in that territory.

Mr. and Mrs. Harold Hicks and family left on Monday for Banff and Calgary for a week's vacation. They [illegible] the trip by motor.

Mr. and Mrs. Art Young and son were visitors to Winnipeg last week. They returned on Friday last.

A number of Tofielders visited at Lakeview on Sunday.

Mr. Fred Griswold who has been sick for the past few days is up and around again.

A number of Tofielders attended the dance in the Ryley hall on Friday night last. The music was supplied by Martin's seven piece orchestra.

Mr. A. B. Evenson who has been attending University this year was a visitor at the Jobb home on Saturday.

Mr. Jim Warner an employee of the C. N. R. here, left for the east. Mr. Nickerson is taking his place on the railroad.

Mrs. W. Bowick was a visitor to the city one day last week.

K. Sealy has been busy counting noses over 21, being enumerator for this district for the forthcoming provincial election. Mr. A. J. H. McCauley doing the same for the forthcoming dominion election.

Mr. and Mrs. W. T. Sanborn, Mr. and Mrs. Lockhart of Taft, California who have been visiting at the A. C. Sanborn home left on Sunday for Grande Prairie. They were accompanied by Mr. A. C. Sanborn.

The W. M. S. of the United Church will meet in the church basement Thursday, June 19th at 3 p.m.

The ladies of the C. W. L. held a Silver Tea and sale of home cooking on Saturday last. The ladies report a fair attendance and disposed of all the home cooking. The silver cake plate and pair of pillows on which tickets had been sold in aid of the Church was drawn for at this tea. Mrs. E. Fontaine drew the pillows and Miss Marie Baur drew the cake plate.

Come and have your fortune told at a garden party given by the Eastern Star Chapter at the home of Mrs. L. Abbott on Friday, June 20th, all are cordially invited.

Miss Lola M. Clement, who has taught grades five and six in the Tofield public school for the past five years has resigned her position; and Miss Charlotte Ierster of Big Valley has been engaged to take Miss Clement's place. Miss Clement has been a conscientious and able teacher and her resignation was received with much regret by the board of trustees.

Ketchamoot Items

After two days of extremely hot weather, a dust and wind storm hit our district Saturday evening. No damage was done, and little good. Only a few drops of rain fell, but much more is badly needed.

Next Sunday June 15th will be anniversary Sunday of the United Church. Dr. Miller of Edmonton will take charge of the services, extra seats will be provided, so do not stay at home, thinking that there will not be seats for all. Everybody welcome.

Harold Schultz took in the young people's week at the University in Edmonton last week.

We regret to hear our minister's wife, Mrs. Gordon, is a patient in an Edmonton hospital. We hope she will soon be able to return home.

Bardo and Ketchamoot basketball teams played a game on the Ketchamoot court Friday evening. Baskets 26—8 in favor of Ketchamoot.

Mrs. Beulah Hamilton returned to her home at Calgary Friday.

Mrs. M. Ingram Sen. spent the week end visiting her children in our district.

Friends of the Harrison family are sorry to hear of their son Stewart had been confined to the bed this past month with an attack of rheumatic fever, also Mr. Harrison has been having trouble with an ulcerated tooth. We hope they will both be enjoying good health soon.

Lindbrook

Despite a "few" scattered showers very few and very scattered at that, the drought still holds, still its no use harping on this subject we're all getting the same and are powerless to change it, so when you meet, avoid the weather conversation at present it is not of a tonic nature.

Sheep shearing has commenced here and some pretty good fleece has been shown to date.

The less said about the dairy and cream business the better.

Mrs. A. E. Silverside paid a visit to her former home at Birch Valley, Alberta, but is home again now.

A carload of cattle were shipped from here last week and the prices received for same were very satisfactory.

Quite a few Lindbrook folk attend ed the Lakeview opening ceremonies and the Lindbrook teacher Miss Sperale went up in the air that is she went up in an aeroplane piloted by the well known Northland pilot Punch Dickens.

Messrs. L. Harvey and Chas Scott, Burns of the Std. Typewriter Co., Edmonton called at the farmers home here en route to the city.

Mr. B. Clarke had a nasty fall from his horse last week, laying him up for a few days but is O. K. again now.

W. Lindgren is home from the hospital where he underwent an operation for appendicitis, we hope he is O. K. again now.

Mr. and Mrs. Dyer and Norman and Joy were visitors to the neighborhood last Sunday. Mr. and Mrs. Dyer were former residents here.

Mr. F. Pruden, our water carrier, is in an Edmonton hospital suffering from rheumatism. We hope to see Frank around again soon.

Mrs. T. Gordon was taken to the hospital this week, but reports are encouraging and we hope to see her at home again soon.

Mr. A. Campbell who is living in Tofield spent over Sunday with his daughter, Mrs. Herman Lawson.

A pleasant afternoon was spent on Wednesday when Mrs. Leslie McGinnis entertained the M. A. S. A large crowd of seventeen members and twelve visitors were present besides the children. After the devotional and business session, plans for a picnic was discussed, it was decided to hold a picnic on the 1st of July, but as yet nothing definite where it will be held, but a suitable place will be found. An announcement will be made in due time, so please keep that date for the Ketchamoot big picnic.

The young people of the district enjoyed a picnic supper on the ground near their basketball court Sunday evening.

TALKING PICTURE NOT COMING

Owing to taking over an Edson Theatre Mr. Dumphy of Dumphrey's Talkie Shows will not be showing in Tofield as he is moving to Edson immediately.

Bardo

(Arrived Too Late For Last Week)

The Bardo School entered many competitions at the musical festival at Camrose, Friday May 23rd. Thelma and Margaret Moen were successful in winning first prize in the high school duet class. Agnes and Olive Johansen won second prize in the public duet class, and the lower room won third place with their chorus singing.

Miss Irene Rude is at the Royal Alexandra Hospital, recovering from an appendicitis operation.

Mr. Monrad Finseth is in the same hospital. He had an operation performed on his eyes. We hope that they will be able to return home soon.

Mrs. Monrad Finseth spent the weekend in Edmonton.

Mrs. Borghild Fosheug who has spent the last seven months at Vermilion, returned home Sunday.

The Ladies' Aid met at the home of Mrs. Jensen on Wednesday. Despite the wind a large crowd was present. A cemetery meeting was also held. It was decided to work on the cemetery on June 4th.

Two of Bardo's sons have returned to their homes here within the last week. They are Joe Kidd and Raymond Nordhus, who have spent the last two months in B. C.

IN MEMORIAM

In loving memory of Marjorie Eleanor Craig, who passed away June 11th, 1929, aged 15 years.

In sorrow we watched day by day,
And watched her suffering there.
Slowly, but surely, passing away
From the pain she scarce could bear.
And then God called from His throne above,
Her suffering and pain is passed;
We know she has gone to realms of love,
And to Heaven has passed at last.

TOFIELD GOLF CLUB RUNNING ALONG SMOOTHLY

With the golf links frequently occupied and quite a number of citizens playing the game, the Tofield Golf Club is progressing favorably among the athletic and recreational organizations of the town.

This year the organization headed by Mr. T. L. Malcolm as honary president and Mr. Joseph Rogers as president. Mr. A. E. F. Cary will keep the records and accept the membership fees, while Messrs McLaughlin, Calvert and Hammond will supervise the condition of the grounds. To Messrs. Rowe and Agnew have been entrusted the work of keeping up the membership of the organization. It is interesting to note that the fees have been lowered to $4.00 for actual members and $2.00 for associate members.

J. McKenzie and Clara Johnson who have been attending normal school at Camrose returned to their home last week.

Noted Comedy-Success to Open Canadian Chautauqua

SCENE FROM "BROKEN DISHES"

"Broken Dishes," the popular Broadway comedy by Martin Flavin, which will be presented at the coming Canadian Chautauqua here, seems to strike a responsive chord in the heart of everyone. Pa Bumpstead, the central figure in the play, is one of the most lovable characters to reach the stage in a decade. For twenty years Pa has been as meek as a lamb in his own home, but events transpire which cause him to pluck up his courage and roar like a lion, to the intense surprise of the Bumpstead family.

"Broken Dishes" is a very human comedy filled with laughter, romance and pathos. It will be presented here by the well-known Martin Erwin Players of Canada.

Tea is a minor expense why not drink the finest

The Canadian Pacific Bubble

The following extract from an editorial in "London Truth," published September 1, 1881, 49 years ago, is amusing:

The Canadian Pacific Railroad Company has begun, I see, to launch its bonds. A group of Montreal and New York bankers have undertaken to float ten million dollars worth of the company's land grant bonds, and the Bank of Montreal [illegible] has taken one-fourth of the entire loan. The [illegible] looks as if the Canadians were going to raise the necessary [illegible] the other side of the water, but I have a shrewd suspicion that they have no real intention of doing anything of the kind. The New Yorkers are keen enough gamblers and reckless enough at times [illegible] and [illegible] it is impossible to believe that they are such fools as to put their money into this mad project. I would as soon credit them with a willingness to subscribe hard cash in support of a scheme for the utilization of icebergs. The Canadian Pacific Railway will run, if it is ever finished, through a country frost bound for seven or eight months in the year, and will connect with the western part of the Dominion a province which embraces about as forbidding a country as any on the face of the earth. British Columbia, they say, [illegible] forced on the execution of this part of the contract under which they became incorporated with the Dominion, and [illegible]

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within.

The sane and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkgs.

Pleased With Extension

Edmonton Coal Men Delighted With Decision On Special Rates

Coal men at Edmonton are delighted with the announcement that the Federal Government has granted an extension of the period of special freight rates on coal shipments from Alberta to Ontario. Official word of the extension was given in a telegram received by Howard Stutchbury, Alberta Trade Commissioner, from E. J. Garland, M.P., who has been working on the matter.

Under the three-year period for the special rates, the term would [illegible]

Britain's New Flying Operating Theatre

Machine Just Completed Is Equipped Up-To-Date

For use in the outpost of the British Empire, a [illegible] new flying operating theatre has just been completed. In order that a patient may be lifted gently, the sides of the cabin are hinged, so that they fall completely open. There are racks for surgical appliances of all sorts, and room for two attendant nurses as well as a doctor. The fuselage is specially sprung in order that [illegible] off and landing shall not unduly disturb the patient. An ice chest, fresh-water tanks, and a small electric stove for heating water form part of the equipment. The machine is fitted with two Napier Lion engines, giving a total of nearly 1,000 h.p., and the aerial operating room can be maintained in the air with only one engine working with very little reduction of speed. Operations would be [illegible] out in mid-air only in the most urgent cases, but there have been instances where the lives of [illegible] soldiers, and natives in remote outposts could have been saved if an immediate operation, followed by skilled nursing, could have been assured. The new aeroplane will meet this need.

Prairie Provinces Are Well Equipped With Facilities For Marketing Purposes

Few large surplus-producing agricultural regions are so well equipped with facilities for the distribution and marketing of agricultural products as the Prairie Provinces of Western Canada. Two transcontinental railways with thousands of miles of branch lines tap every part of the producing territory of this region. On the west these railways deliver prairie products to the ports of Vancouver and Prince Rupert. To the east the products are either carried by all rail routes to the Atlantic seaboard or St. Lawrence River ports or, as in the case of grain, delivered at the head of the Great Lakes. An additional outlet for products from this region is being provided by way of the Hudson's Bay. A railway extending northeastward from the heart of the producing territory now finds an outlet through Churchill on the Bay, where facilities are being provided for handling grain and other products by a new short route to the markets of the British Isles and Europe. Radiating from the numerous small towns and cities on these lines of railway, run many thousand of miles of good roads for the delivery of farm products from the adjoining agricultural regions.

Western Canada is a surplus-producing region. The major portion of its products is marketed elsewhere in Canada or in the markets of the world. There are, however, satisfactory local markets in the towns and cities of the prairies for most of the perishable products produced, such as fruits and vegetables. A large quantity of poultry and dairy products is also produced for home consumption. The surplus of these products, however, finds its way to more distant markets. In the larger centres where railway terminate, facilities are provided for the handling of livestock, grain and other products.

Trek Is Satisfactory

March Of Reindeer From Alaska Proceeding According To Plans

News of the progress made by 3,300 reindeer on their long march from Alaska to the Mackenzie district in Canada indicates that the plans of the Dominion authorities for transfer of the herd are proving adequate. A. E. Porsild, of the Interior Department, who accompanied the excursion in its first weeks, has returned to Ottawa with word that all is going satisfactorily.

A detail of the equipment of the expedition is the transport department, which numbers more than 200 steers. They serve as motive power for the fifty sleds on which the camp outfit is carried. Only one steer is hitched to a sled, but an idea of the difficulties of the trip may be obtained from the fact that two steers go ahead of each sled to break the trail.

Mr. Porsild does not report any signs of nostalgia among the emigrants. So long as food is sufficient and climate congenial they do not care under what flag they dwell.

Beating Father Time

Two-Crop-a-Year System Speeds Up Research Work

The success which has attended the efforts of L. H. Newman, Dominion Cerealist, and his staff at the Central Experimental Farm of the Dominion Department of Agriculture in growing two crops of grain a year, one in the field and the other in the cereal greenhouse, is a fine example of putting one over on Father Time. The most important work of the Cereal Division is the development of new varieties of cereal and other plants particularly adapted to Canadian conditions and demands. In the cereal greenhouse grain harvested from field test plots in the fall is planted again within a month or so, and the work of research and development is carried forward another crop year during the one calendar year. This means in practical result that the research work which usually took from eight to ten years to carry out in connection with a specific hybrid development under the old system of field test plots can now be done in from four to five years under the new two-crop-a-year system. The development is one of major significance to Canada's future as a producer of cereal and forage crops.

Poultry Grading a Success

Record Of Performance Has Resulted In Better Birds

Ten years in operation of the Canadian Record of Performance for Poultry under the supervision of the Dominion Live Stock Branch has resulted in 51,948 banded birds having qualified for R.O.P. certificates, having laid at least 150 eggs during the record year, while an additional 17,-[illegible] hens laying 225 eggs or more each during the record year have qualified for R.O.P. Advanced certificates. Record of Performance is a poultry grading medium open to commercial and farm flocks throughout Canada through which the real production qualities of hens is determined and established in tangible form.

How Cologne Was Named

Is But Slightly Changed Form Of Latin Word Colonia

A recent oral questionnaire addressed to 25 persons at random revealed a hazy idea about the City of Cologne. The question was: "How did the German city of Cologne on the Rhine get its name?" Several frankly admitted that they had not the faintest idea. Nearly all were sure that it had something to do with the perfume called eau de Cologne. One was quite sure she had read that the Rhine flowed over some fragrant rocks or something above the city and that eau de Cologne was bottled Rhine river water. They were all wrong. Cologne (Koeln, in German), is nothing but a slightly changed form of the Latin word colonia. Its full name was Colonia Agrippinae. This early city of the Ubii, a people mentioned by Julius Caesar, was changed to a colony, and named after Agrippina, who was in camp with her husband there for several years. This Agrippina was the granddaughter of the famous Agrippa, the admiral of Augustus. One of her brothers was the Emperor Caligula, and her son was [illegible]

C.N.R. WESTERN REGION OFFICALS PROMOTED

A. C. EGAN

T. J. GRACEY

Announcement has been made of the promotion of A. C. Egan, Winnipeg, comptroller, Canadian National Railways, western region, to assistant comptroller of disbursements for the system, with headquarters at Montreal. T. J. Gracey, Winnipeg, assistant comptroller, is promoted to regional auditor. The appointments are effective, June 1.

Mr. Egan, who was born in Winnipeg 1883, entered railway service in 1901. With the exception from 1919 to 1926, when he served the railway, in Toronto, as assistant to comptroller and general auditor, Mr. Egan had made Winnipeg his headquarters, serving in such capacities as accountant, chief travelling auditor, auditor of agencies, and regional comptroller; the latter he now relinquishes to take on more responsible duties at general headquarters in Montreal.

Mr. Gracey, who was born in Kingston, 1889, came to Winnipeg, May, 1909. He entered railway service, in 1906, at North Bay with the T. & N. O. Railway, serving that company in various positions until 1920, when he became assistant auditor of disbursements, at Toronto, for the Canadian Northern Railway. In 1923, Mr. Gracey was transferred to Winnipeg to his present position, and now becomes regional auditor.

Canadians No Longer Have Idea That East and West Are Separate Communities

Working To Music

Senegal Negroes Have Novel Method Of Ensuring Unified Action

A common exercise among teachers who wish their pupils to "think" music is to allow them to sing part of a tune and then break off picking up the tune at a certain point an instant later. Among the negroes of Senegal, however, this exercise has a practical use that is not all musical. When a vessel has got on to a sandbank the way of getting it off again is by a large number of divers plunging into the water together and lifting it on their shoulders. Sometimes as many as five hundred are engaged on such a task. They swim round the vessel all singing together and at any, the eighth bar, they dive, mentally continuing the melody while under the water, then at the 12th bar they all push, or lift as the case may be, and at the 16th all rise to the surface again. By this means they have no need to hear the leader counting or beating and none of their efforts are lost by any individual being before or after the others. To do this, however, they must have a strong sense of time and tune.

Dodging Auto Test

British Scientists Think They Have Worked Out Plan

If you can do all of the things listed below you probably have a 50-50 chance of crossing Piccadilly Circus, in London, England, or St. James Street, Montreal, without getting hit by an automobile.

Scientists of the British Industrial Health Research Board believe the tests which they have designed actually measure the factor of accident proneness. They ask you to:

French People Saving

Accounts In Banks Show Steady Increase Every Year

[illegible] savings banks accounts, for 1929, which have just been published show that 9,214,000 people have accounts in savings banks and that the total deposits, which every year show steady upward progress, last year totalled over $400,000,000. Other statistics which have been published show that France has now the largest gold holdings per capita of any country in the world, beating even the United States. During the last year the amount of savings in these popular banks increased 13 per cent.

A Quick Thinker

Henderson's evening suit was rather old-fashioned. His figure was not one which showed clothes to advantage, either.

One evening, as he stood in the vestibule of a restaurant waiting for his wife, a tall, pompous man came up to him.

"I say, my man, are you the head waiter?" he drawled.

What Henderson lacked in bearing he made up in quick thinking. Without hesitation he turned to the other. "No," he said, "but I heard him tell a young fellow today that he didn't want to see any more applicants for jobs."

A Freak Fig Tree

Parasites may flourish right under the nose of the government, according to a discovery at Visalia, California. A fig tree, about three feet high, was found growing out of the side of a palm tree in the courthouse grounds. Its roots drew sustenance from the mold in the niches of the palm and from the sap of the tree. The parasite recently blossomed with the other fig trees.

No product in the world has as great a turnover as chewing-gum.

Black, brown and cinnamon bears all belong to the same species.

Natural deposits of sand and gravel occur in all the provinces of Canada.

Of recent years a marked change has passed over the general conception of the relationship between the Eastern and Western moieties of the Dominion. Not so long ago the accepted idea was that the clay belt of Ontario marked a gulf between that province and the prairie and Pacific provinces as deep as that which separated the thirst-parched Dives from Lazarus, safe and happy in Abraham's bosom. To the West lay the granary of Canada while eastward lay the predatory industrialized districts which regarded the granary as their own particular happy hunting ground. That idea has vanished never to return.

This century has brought no more remarkable change than the realization that Canada is not divided up and parcelled out into any such two antagonistic and antipathetic communities. The clay belt of Ontario is now regarded as a link not a barrier. The farms of the huge region north of Lake Superior will some day merge imperceptibly into the farm lands of Manitoba, Saskatchewan and Alberta and in the further North hinterland right from the Maritime provinces Westward will be found the same Laurentian plateau that holds the immense mineral wealth of the Dominion. In the future, possibly earlier than expected, mining towns will spring up and with them the rapid development of the industries that are invariably and inseparably associated with urban settlement. Then will arrive the Day of Canada, a day when the Dominion will step forth a complete and fully rounded out natural unity.

That may be anticipating, but mining and lumbering are not the only industries where Manitoba is beginning to trespass on what were so long regarded as preserves of Ontario and the East. And the third unexpected and hitherto unexploited field of enterprise is probably the last [illegible]

[illegible] fish production of the other prairie provinces, though they did not equal the gain disclosed in the new Manitoba total.

Indications are, this article also declared, that the advance will continue in each of the three provinces for additional fishing waters are being opened each year as settlement advances and transportation facilities are extended. It seems reasonable to assume also, that as settlement on Manitoba's Hudson Bay coast develops, sea fishing will be an increasingly important factor. Every indication of the multiplication of activities and lines of production in the west is welcomed by those in the older provinces who realize that true prosperity depends upon the economic soundness, stability and self reliance of each of the various component parts of the whole country.

Prefers a Canadian

A lass in Lancashire, England, with a "weakness" for mounties, has asked Mayor Frank Plant for the name of a suitable man with whom she can correspond. A letter from the girl, received by the Mayor, sets forth that the man must be of good birth, character, physique, good looking and with good prospects. A postscript says the young lady "would like a Canadian mounty, if possible, to correspond with."

"Did you go elephant hunting in Africa?"

"Not much. It is so uncomfortable as the bag is full so quickly."—[illegible]

WORLD HAPPENINGS BRIEFLY TOLD

Lethbridge voted 705 to 47 to spend $20,000 to improve its air harbor and provide hangar accommodation so that the city may be made a port of call on the air mail route.

The Prince of Wales soon will qualify for his air pilot's license. He handled the controls during the 200-mile air trips he took in west England without, however, making the landings.

Frankfurter Zeitung says that Germany has paid into the Bank of International Settlements a deposit of 100,000,000 marks, which she is obliged to do under the terms of the Hague agreement.

For the first time in history Scotland Yard has enrolled eight women detectives. Known as the "mystery eight," the women were chosen for their looks, education and knowledge of police work.

Amy Johnson, attractive British girl flyer who became a national heroine on the recent completion of her flight to Australia, was awarded the honor of Commander of the British Empire in the King's birthday honors list.

The Chrysler building, in New York, tallest structure in the world, was opened formally May 28. Its burnished rustless steel spire scrapes the clouds 1,030 feet above 42nd street and Lexington Avenue, 46 feet higher than the Eiffel Tower.

Treaty for the protection of the salmon fishery, in the *Fraser River* and waters adjoining British Columbia, and the *State of Washington*, was signed at Washington by the Canadian Minister Hon. Vincent Massey and the Secretary of State, Henry L. Stimson.

Taking to his parachute after being thrown from his aeroplane while passing over Kitchener, Ontario, Lieut M F Slaght, a member of an 18-plane squadron from Detroit, travelling to Kingston, Ontario, had a miraculous escape from death. The machine was a total wreck.

Ensures Quality and Length

Canadian Inspectors Keep Careful Check On Binder Twine

One of the perennial difficulties of the grain grower at harvest time comes from binder twine. The Seed Branch of the Dominion Department of Agriculture through its inspectors keeps a careful check not only on the quality of binder twine made in Canadian factories and also brought in from other countries, but they also take particular care to ensure that the full length of the twine is in the ball. Under the Inspection and Sales Act every ball of binder twine sold in Canada must bear a label showing the name of the maker and the number of feet per pound in the ball of twine. The usual lengths are 500, 550, 600 and 650 feet per pound, the two longer lengths being the more popular in Canada. Systematic inspection shows that infractions of the regulations are infrequent and also ensures that quality in the product which gives [illegible] to the farmer using it.

People in Germany ate nearly 2,400,000 American sausages last year.

Railways Aided Fruit Growing

Have Made Commercial Orcharding Possible In Ontario

In Ontario, where the commercial production of all descriptions of fruit capable of cultivation in Canada has reached its highest development, apples have been grown from the middle of the eighteenth century; but commercial orcharding has developed only within the past 50 or 60 years, and was only made possible when the building of the railways permitted trees and fruit to be transported rapidly. The great winter apple districts include the border of lake Ontario extending back 30 miles and more from the lake, the shores of lake Huron and Georgian bay several miles in depth, and the southwestern part of the province.

Producing Better Bacon

Live Hog Grading Policy Has Had Excellent Results

Canada's Live Hog Grading Policy, supervised by the Meat Inspection Service of the Dominion Live Stock Branch, has resulted in the production of increasing quantities of select bacon hogs. Fed on dairy by-products and finished on the small hard grains which make for firm high-quality product, these hogs prepared for market by government inspected packing plants under ideal conditions give the product a mild cure and deliver it to the retailer in the form for which the housewife shows a growing appreciation—better bacon.

Winnipeg Newspaper Union Fashions

(By Annabelle Worthington).

2948

A sports weight linen in lovely soft brown with maize dots adopts bolero treatment that is decidedly one-sided, with each ends joined to underarm seams and tied in bow. The skirt sways so prettily cut circular and joined to diagonal yoke top. Shirring at left front shoulder provides decorative note and fulness. Long sleeves have perforations to be made short, if desired.

Style No. 2948 makes an excellent school frock for the girl who knows smart clothes. It is very inexpensive too. In the 8-year size, 2¼ yards of 40-inch material is sufficient to copy it exactly. It is designed in sizes 6, 8, 10, 12 and 14 years.

Brown and white checked gingham with the one-sided bolero which is merely an over blouse caught in at shoulder and armhole made of plain brown pique is strikingly chic and serviceable.

Nile green cotton pique with bolero and neckline piped in yellow is very attractive.

Orchid chambray, pink shantung, wool challis in yellow-beige and brown tones, French blue dimity with white polka-dots, and red and white printed pique are effective combinations.

It is just about perfect in tomato red crepe de chine with the little bolero jacket of navy blue crepe.

Printed crepe de chine in Royal blue tones with tan is very smart.

Navy blue wool crepe is very fashionable for travel or school days.

HOW CANADIAN LAMBS CAN BE PRODUCED

These lambs, which won the carlot prize at the last Royal Fair, show what can be done by good breeding, feeding and proper preparation for market by docking and castrating. They are excellent for uniform conformation and right weight.

Manitoba's Diamond Jubilee

On July Fifteenth, Province Will Celebrate Sixty Years Of Growth and Progress

The following speech by Premier John Bracken, President of the Provincial Committee, was broadcast on May Thirtieth.

I have been asked by the Diamond Jubilee Committee to make a statement concerning the celebration this year of Manitoba's Diamond Jubilee.

In the 330 years since the first white man set eyes upon the northern part of what is now Manitoba, many milestones have marked the progress of the people of all that part of Canada lying west of Manitoba's eastern boundary line.

For my purpose tonight, let me direct your attention to four milestones that history, still unwritten, will credit to the year 1930. First, the Sixtieth Anniversary of the birth of the Province on July 15th next; second, the transfer of Manitoba's Natural Resources, on July 15th, from Federal to Provincial control, after a controversy extending over 40 years; third, the recognition of Manitoba as a Maritime Province, as a result of the completion of the Hudson Bay Railway line and plans for the construction of a harbor at Port Churchill; and fourth, the opening up on a commercial scale of the rich mining territory in the north, following the completion of railway lines into Flin Flon and Sherridon.

On July 15th, of this year, sixty years will have come and gone since the mile post of 1870. It has been a wonderful sixty years from whatever angle it is viewed—sixty years of growth and progress in agriculture, in education, in colonization, in industry and in transportation, in fact, in all activities.

The transfer of the Natural Resources places the Province in a position of equal status with the other Provinces of Confederation. On July 15th, we shall have reached full stature as a province in one of the units of the Empire. It is fitting, therefore, that this historic occasion should be officially recognized with appropriate ceremony.

The completion of the railway line to Manitoba's inland sea, this year, is also significant. It was through the Hudson Strait, the Hudson Bay and up the fast flowing waters of the Nelson and the Hayes River, that the first white people journeyed into this land of promise, over a hundred years ago. For many years the main artery of trade lay between the Hudson Bay and the Red River. With the opening up of transportation by rail to Fort Churchill, there will be established an artery of trade replacing that early one which was so vital to the very existence of the people of the great north west.

The opening up of the vast mineral wealth in the Pre-Cambrian geologic zone of the north need only be referred to here. Within the last few years the faith and hope of the early prospectors and explorers has been realized, and this year will see for the first time in the oldest of the prairie provinces, two large mining plants turning out thousands of dollars in value per day, of copper, zinc, gold and silver.

It is in view of all these circumstances that it was decided that this historic year should not be let pass without due recognition of its significance.

Accordingly plans have been made for fitting thanksgiving services and jubilee ceremonies and exercises throughout the length and breadth of Manitoba. We have arranged to proclaim July 15th, a public holiday, and we trust, it be suitably observed by every community and every citizen regardless of race or creed throughout.

Among other suggestions in the Organization Bulletin, are two to which attention might well be drawn.

1. That pioneers will be given due recognition in this celebration.

2. That the occasion be utilized to bring together the early history of local communities and of all different peoples throughout the Province.

It is to be desired that we should recognize in our local celebrations the services of those who left far off homes, had courage to meet the adversities of early frontier conditions, and were inspired by their faith in the great open spaces of our land to persist in the building of homes, schools, churches, transportation routes and industries such as we see about us today. I might mention in passing that the government will welcome the placing of suitable bronze tablets of these pioneers, of whatever race or creed, in the halls of the Parliament Buildings. And it is hoped that the Selkirk Association or the Old Timers Association will be the first to honour those who prior to 1830, paved the way for those who came later.

I desire also to direct attention to the urgent need for bringing into organized form the early history of local communities and also the early history of each of the peoples who have come here from other lands. The Government is prepared to encourage such local efforts by assisting in financing the preparation of reliable histories of these communities and these early pioneers.

In agriculture it is a far cry from harvesting with sickles, then scythes, later reapers, and more recently the self-binder to the combine harvester of today, yet the brief period of 90 years compasses the whole time between these two extremes.

Much history has been written since the time when 116,000 square miles of land were sold for 10 shillings, one and a quarter centuries ago, and the surrender of the Hudson Bay land for $1,500,000 sixty years ago, and much has been accomplished since the first export of 857 bushels of wheat, yet that was only 54 years ago.

It has been a long and tedious controversy in our political administration, from the birth as a Province without lands or subsidy, to today, 60 years later, when the unalienated resources are coming into our possession together with an annual subsidy for all time that will soon amount to over a million dollars per year, and a cash adjustment, for inequitable treatment in the past, of four and a half million dollars.

The development of transportation here reads like a fairy tale. Three hundred and twenty years ago Henry Hudson came with a sailing ship via Hudson Bay; 192 years ago La Verendrye came by canoe over the water route from Montreal; 130 years ago Red River carts came into prominence as a means of transportation, 70 years ago stern wheeler steam boats were a modern means of conveyance, 52 years ago railways first made their appearance, while within the memory of the last generation the automobile has come, and now aerial transportation quickly places within our reach even the most remote districts of the province.

And who will say that the history of the next 60 years will not record even greater progress than the last 60 years? Will it not be an interesting fact of economic history that, during the last 5 years we have practically rediscovered four fifths of this Province; that during the same period we have opened up Northern Manitoba by railway development and by aerial transportation, that the same 5 years will be looked upon as a period of the greatest expansion in industry and that the rehabilitation of our agriculture, after two generations of constant cropping, was commenced with renewed vigor during this period.

Steam at high pressure has been successfully used to combat fires in oil wells.

It is human nature to believe that those who disagree with us are in the wrong.

SUNDAY SCHOOL LESSON

JUNE 15

JESUS ON THE CROSS

Golden Text: "Looking unto Jesus the author and perfecter of our faith, who, for the joy that was set before Him, endured the cross, despising shame, and hath sat down at the right hand of the throne of God."—Hebrews 12:2.

Lesson: Matthew 27.1-66.

Devotional Reading: Psalm 22.1-5, 14-19, 27, 31.

Explanations and Comments

The Crucifixion, verses 33-38.—They led Jesus away to be crucified, going outside the city limits, as was the custom (Acts 7.58). The knoll to which He was taken away was called "Golgotha," a word meaning "the place of the skull." We call it "Calvary," from the Latin word "Calvaria, a skull." There they offered Him wine mingled with gall, for it was a merciful practice to give a stupefying drink to one about to be crucified. This charitable office, Alfred Edersheim tells us, was performed at the cost of an association of women in Jerusalem. Jesus tasted but would not drink, for He wished to have a clear mind to the last.

"O Man of Sorrows, with the wounded hands—
For chaplet, thorns; for throne, a pagan cross,
Bound with the woe and agony of time,
Yet loved by children and the feasting guests—
I bring my suffering, joyful heart to thee."
—Frederick Lawrence Knowles.

Over His head was placed this accusation against Him, written in Hebrew, Latin and Greek (John 19.20): "This is Jesus, the King of the Jews." On either side of Jesus a thief was crucified. Crucifixion was terrible and disgraceful in itself, but if Jesus had hung there with nothing near to disturb the impression of His calm serenity and innocence, Phillips Brooks suggests, it might well have happened that the people who stood and watched would have felt the majesty of the sacrifice. "Already, that place of suffering might have seemed as glorious as it has seemed to the world since. But as it was, they went to prison and dragged out two wretched culprits who were waiting for their doom. That there might be no doubt about the disgracefulness of the Saviour's sufferings, they hung Him between the thieves.

"In the cross of Christ I glory,
Tow'ring o'er the wrecks of time;
All the light of sacred story
Gathers round its head sublime."

The Taunts Of the Spectators, verses 39-44. The cross was near the public road leading to Jerusalem, and passers-by mocked Him, shaking their head in the direction of the cross, as if to say, some one suggests, "That is what it has come to!"

"Thou that destroyest the temple and buildest it in three days, save Thyself," they jeered. "If Thou art the Son of God," as Jesus had acknowledged at the trial, Matthew 26.64, "come down from the cross," others cried. And the chief priests and scribes and elders did not scorn to join the rabble in their mockery: "He saved others; Himself He cannot save," they cried.

When this country was first discovered it was a howling wilderness, and since then it has progressed to be a howling civilization.

The Jerusalem artichoke was one of the vegetables grown by the Indians.

PIMPLES

Actually Go Thousands

May Reclaim the Sahara

French Hope To Make Desert Blossom As the Rose

The Sahara desert will be made to blossom as the rose one of these days, J H Richard believes, and then France will be one of the great agricultural nations of the world.

Richard, former French Minister of Agriculture, has arrived in New York to study machinery used in reclaiming American deserts.

He hopes some means will be perfected for using radio to detect underground strata of water. Several geologists, he said, agree that vast layers of water are beneath the Sahara and at El Golea, in South Algeria, underground water has been pumped to the surface and used to grow rose bushes ten feet high.

Proved It For Himself

Visitor Says Legend About London Bridge Is True

For three consecutive weeks, a visitor in London, England, has amused himself by testing the truth of the old saying that no one can cross London Bridge without seeing a white horse. "Morning and evening daily I have crossed the bridge," he said, "and sure enough, each time I have seen at least one white horse — except, to be honest, when I have forgotten to notice." The saying originated, of course, before transport became mechanized, but it is curious that its application should yet survive. Much of London Bridge traffic is still horse-drawn.

Can Control Wireless Station

In An Emergency the League Of Nations Could Broadcast To World

The League of Nations and the Swiss Government have reached an agreement whereby the League, in times of emergency, will have complete control of a wireless station for communication to all parts of the world.

Sir Eric Drummond, in behalf of the League, and Joseph Motta, for Switzerland, signed the convention providing for construction of the station, which in normal times will be under the direction of the Radio Swiss Company.

Surgery In Motion Pictures

Motion pictures are being introduced into the University of Berlin, Germany, to teach surgery. During an operation in the clinic a camera focussed on the operating table makes a film record of every step in the surgeon's work. Later the film is shown in the classroom and the operation explained.

The principal street of a town is now called the Main street.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

51 Wellington St. W. - TORONTO, ONT.

IMMIGRATION TO BE CONTROLLED BY PROVINCES

Regina. Commenting on despatches from Edmonton and Winnipeg, Premier J T M Anderson said that Saskatchewan had secured an understanding with Ottawa that the province would in future have control of the character and number of immigrants. While no agreement has yet been signed, the province has an understanding similar to that now existing in the other prairie administrations.

Edmonton. All immigrants coming into Alberta from now on are to be voluntary, coming on their own responsibility, and prepared to take care of themselves, by agreement with the Dominion Government, says Acting-Premier Hon. George Hoadley. The right to determine the volume and character of future immigration is to be left to the provinces, this arrangement dating from June 1, and no further movements are to be allowed without the knowledge and approval of the provincial governments. The agreements with the transportation companies, under which immigrant parties have heretofore been brought over, expired at the end of May and will not be renewed.

It is expected that the inter-provincial conference between the three prairie provinces, which is to be held in Winnipeg and which is to deal particularly with immigration and unemployment will materialize shortly after the Alberta elections. The entire question of future immigration policy and methods will then be taken up.

Winnipeg, Man.—Manitoba is in control of volume and character of immigrants to the province, Hon. R. A. Hoey, acting premier of Manitoba, stated, but no agreement has been consummated with the Dominion Government. Mr Hoey referred to a statement made at Edmonton by Hon. G. Hoadley acting premier of Alberta, who said that Alberta had completed an agreement on immigrants with Ottawa authorities.

The Dominion Government's proposal for handling immigrants was submitted tentatively to the Manitoba Government. It was decided, however, that the matter be considered at a province-Dominion conference. In the meantime the question was allowed to stand undecided. Mr Hoey thought difficulties would arise until provincial agreements are arrived at to prevent removal of immigrants from one province to another.

Grain Elevator Burned

Cause Of Fire Believed To Be Spontaneous Combustion

Stilton, Sask. The Pool elevator, built in 1912 and containing 11,000 bushels of grain, was a smouldering heap, on Wednesday morning, June 4, as the result of a fire that broke out the night before. The loss is estimated at about $35,000. The fire is believed to have been caused by spontaneous combustion. Seven empty C.P.R. box cars standing on the loading tracks when the fire commenced, were pushed to safety by manhandling them further away.

Prince Substitutes For King

London, England.—The Prince of Wales substituted for King George in the trooping of the colors during the Horse Guards' parade on the monarch's birthday. He wore the uniform of a colonel of the Welsh Guards. King George, who was 65 years old, watched from a balcony of the admiralty building. He seemed fit despite the rheumatic attack which prevented his participation.

A Six-Horse Town

Churchill, Man. Population of Churchill, on Hudson Bay, has been tripled, speaking in equine terms. Two teams of horses were brought to the port from The Pas, to join the lone duo of horses taken to Churchill last season by the Department of Railways and Canals. So Manitoba's most ambitious settlement is now a six-horse town.

Against Channel Tunnel

London, England.—Prime Minister MacDonald informed the House of Commons that the government had decided against the construction of the proposed English Channel tunnel. The Prime Minister said a statement on the subject would be circulated in a white paper. He did not indicate the reasons leading to the cabinet's decision.

W. N. U. 1841

Health Insurance System Advocated

Would Curtail Immense Loss Caused By Sickness In Belief

Toronto, Ont.—A state health insurance system as a means of curtailing a large percentage of the $300,000,000 loss of productive capacity in Canada annually from preventable illness was strongly recommended for support by the Canadian Manufacturers' Association in the report of the industrial relations committee here at the 59th annual meeting of the association.

The report cited findings of a special commission appointed by the British Columbia Government in support of the recommendation and stated experience in England, Germany and the United States shows that sickness causes more lost time than all other causes put together.

The industrial relations committee expressed a willingness to co-operate with the government in the movement for a thirteen month calendar.

Distributing Samples Of Champion Wheat

Toronto Visitors Will Be Reminded Of Alberta's Victory

Toronto, Ont.—Five thousand samples of the consignment of Alberta wheat which won the world's championship at the Chicago Grain Exposition last fall will be distributed among visitors at the Shrine convention here.

Arrangements for the novel method of attracting attention to Alberta's and Canada's achievements in the world of agriculture were concluded by Hon. George Hoadley, Alberta's Minister of Agriculture. As the result of his negotiations, 5,000 phials containing the wheat samples are ready for distribution to interested Shriners or their families.

The champion wheat was grown on the farm of Joseph H. B. Smith, at Wolf Creek, Alta.

Question Can Wait Action

No Hurry On Fixing Bay Route Insurance Rates On Shipping

Ottawa, Ont.—Question of insurance rates on shipping by the Hudson Bay route is relatively unimportant at the present time, stated Hon. T. A. Crerar, Minister of Railways and Canals. His statement referred to the report of the imperial shipping committee to the Canadian Government, saying that it will be impossible to fix rates until navigation is under way and the effect of icebreakers and direction finding wireless equipment is established.

Mr Crerar mentioned that it will be 14 to 18 months before European traffic uses the bay route to any extent.

When asked if the government would take over the insurance of shipping until the new rates are struck, Mr. Crerar said no consideration had been given to that phase of the question.

Grain Broker Sentenced

Winnipeg Man Is Given Two Years In Penitentiary

Winnipeg, Man.—F. H. Bole, prominent Winnipeg grain man, was sentenced to two years in penitentiary on charges of obtaining money from the Bank of Montreal by false statements. Mr Bole, who was head of the Electric Elevator Company, Limited, recently suspended from trading on the Winnipeg exchange, pleaded guilty in provincial police court.

Three charges were laid against the grain official, covering amounts totalling $85,000 alleged to have been obtained from the bank. After entry of a plea of guilty to all three charges, Mr. Bole was sentenced to one year on one charge, and two years on each of the other two charges. All sentences, the court ruled are to run concurrently.

Icelanders Leave For Celebration

Going Home For Big Anniversary Of First Parliament

Winnipeg, Man. Prominent members of western Canadian Icelandic communities numbering 180, left here June 3, bound for the millenial celebration of the Althing, to be held in Reykjavik, Iceland, this month.

At the station, hundreds of friends and representatives of local organizations gathered to farewell the party, which includes Prof. R. Beck, head of the department of Scandinavian languages, University of North Dakota, and H. Westergaard, Norwegian vice-consul at Estevan, Sask.

New Senators Appointed

Five Vacancies In Province Of Quebec Are Filled

Ottawa.—Appointment of five new senators from the province of Quebec, was announced following a lengthy meeting of cabinet.

Those appointed to the senate are Hon. Rodolphe Lemieux, who was speaker of the House of Commons, E. W. Tobin, late Federal member for Richmond-Wolfe; J. E. Prevost, late member for Terrebonne; George Parent, late member for Quebec West and L. A. Wilson, former member for Chaudreuil-Soulanges.

In making the announcement, Prime Minister Mackenzie King explained that the fifth Quebec vacancy in the senate arose through the resignation of Senator Louis Lavergne, of Kenebec. It is understood that ill-health is the cause of the resignation of Senator Lavergne.

Mr. King also stated that it had been the rule in the past not to appoint members of parliament to the senate. There had been some exceptions but the general rule had been followed for some time. This explained why all those appointed at the present time were former members of parliament who had held seats up to the date of dissolution.

FOREST FIRES DESTROY SCORES OF FARM HOUSES

Port Arthur, Ont.—Fourteen-year-old boys, grim-faced, weary from loss of sleep, fought like men and did men's work in Sioux Lookout's valiant defence against forest fire invasion, V. R. "Bill" Hicks, Ontario air force pilot who arrived here, told forestry officials and newspapermen who met him. Sioux Lookout is out of danger now, Hicks said, and the few fires that remain in that district are under control.

More than twenty-five families, approximately 75 persons in all, were temporarily homeless, driven from their homesteads by the relentless onrush of devastating forest fires of timber land in north-western Ontario for the past six weeks.

While a large force of forest rangers and volunteers were heroically battling against the numerous blazes, word was received of the first fire fatality.

The body of Paul Garton, former German war ace, who had been employed as pilot by the Western Canada Airways, was recovered from the waters of Lake Seseganagra, near Allan-water, Ont. It is believed that Garton's machine, enveloped by dense smoke clouds crashed into the lake, June 2. On that day, the airman was on a cruise over the flame-ridden country, scouring for possible refugees and checking on the path of the fire. Garton distinguished himself as a flyer with the famous Richtofen Circus on the Western front during the war.

Larson is a blackened ruin. The little railway hamlet about two miles west of the lakehead on the Canadian National Railway fell prey to flames, and its few residents fled to neighboring towns.

Frame houses at isolated points in the Larson region were destroyed, bringing the total loss in personal property close to $100,000.

When Albert E. Swain's mink farm was totally demolished and the animals lost, damage was estimated at $30,000.

NEW U. S. MINISTER

Lieut.-Col. Hanford MacNider, who has been chosen by President Hoover as United States Minister to Canada.

Canada Will Be Represented

Delegates Have Sailed For World Power Conference At Berlin

Ottawa.—Canada will be well represented at the second world power conference to be held in Berlin, Germany, June 16-25, it was announced by Dr. Charles Camsell, Deputy Minister of Mines and Chairman of the National Committee. Not only have many Canadian delegates sailed, but several papers will be delivered on the water power resources of this country.

Among the Canadian delegation will be Dr. Camsell, John Murphy, electrical engineer, Department of Railways and Canals, Hon. F. P. Burden, Minister of Lands, British Columbia; Dr. T. H. Hogg, chief hydraulic engineer, Hydro-Electric Power Commission of Ontario; G. A. Gaherty, president, Calgary Power Company; J. C. Glassco, general manager, Winnipeg Hydro-Electric System.

A feature of the conference will be a telephone radio hookup on the occasion of the official banquet on June 18, at 3 p.m. E.S.T. Berlin, London, England, San Francisco, Cal., and Thomas Edison's laboratory will be included in the hookup.

Mr. Edison will speak from his laboratory in New Jersey.

Blue Print Makes Air Trip

Carried By Wind From Melita, Manitoba To Saskatchewan Town

Brandon. Carried more than 175 miles through the air by the high winds, a blue print travelled from Melita, Man., to Assiniboia, Sask., where it was picked out of the air by a resident of the latter town. The A. R. McDiarmid, Ltd., received the blue-print back in their office with the notation on it from Assiniboia, "picked this out of the air during big blow. Some record."

The print had been sent to Melita in a bid for some work and was known to have been in the possession of the Melita people, and no other copy was in existence.

Mission Hospital Burned

Fort Simpson, N.W.T.—Inflicting loss over $30,000, flames of unknown origin swept through the Roman Catholic Mission Hospital here on June 4. Heroic work on the part of the sisters in charge of the institution was responsible for the saving of all patients and considerable of the valuable hospital equipment. The old building was erected about 30 years ago.

WHERE R-100 WILL "LAND"

Extensive preparations for handling the huge crowds who are expected to greet the monster dirigible upon its arrival at St. Hubert Air Field, near Montreal, from England, are being made by the Canadian National Railways.

Special trains will be operated from Bonaventure Station to St. Hubert, where trackage is being installed specially for the handling of this service. The photographs show: Left, the huge mooring mast constructed in preparation for the arrival of the R-100. Upper, trackmen at work installing sidings in preparation for the special trains which will be operated during the dirigible's visit.

Needs Canada's Co-Operation

Without Her Help Britain Cannot Develop Atlantic Airways

London, England. The air lines of the British Empire are expanding rapidly and rank second only in mileage, to those of the United States, declared the Rt. Hon. Lord Thomson, secretary of state for air, in the House of Lords, during a broad and inspiring review of the Empire's accomplishments in the world of flying.

Lord Thomson predicted an era of great aerial expansion within the Empire in the next year or so. He stated there were now about 27,350 miles of regular air routes. He hoped the end of 1931 would see an extension of the Indian route towards Australia, but the date for the completion of this plan, he said, rested largely with the government of Australia.

The Cape to Cairo route should be completed as far as the great lakes of Central Africa by the end of this year and be in full operation by the spring of 1931.

Lord Thomson praised the opening up of what was called the Atlantic airways in the western Atlantic. Such a development, although started could only be carried through with the co-operation of the Canadian government and the most sympathetic response was coming from Canada. A great deal of work had been done by the consultative committee established last July, said the secretary of state for air. They had reported favorably on the Atlantic airways scheme and he was fairly confident now that "we should be able to do something along this line."

Strike Natural Gas Well

In Search For Water Near Hudson Bay Junction

Hudson Bay Junction, Sask.—There was a big rush here for natural gas, when prospectors and citizens left for the scene of a blazing well, 20 miles south of Hudson Bay Junction.

While a C.N.R. well digging outfit sought water at a depth of 400 feet they noticed a gas escaping and set a match to it. It ignited at once and is still burning with a flame about ten feet high. There are indications of oil at some points in this district and claims have been staked over the last few years but this is the first indication towards a natural gas well. It is reported that if the well were deepened a great supply of gas would be released.

Message From King George

Replies To Congratulations On Birthday From People Of Canada

Ottawa, Ont. Replying to a message of congratulation sent on behalf of the government and the people of Canada, His Majesty King George, cabled Premier King as follows:

"I sincerely thank you, the government and people of Canada for your greetings and good wishes on this anniversary of my birthday. I much appreciate the loyal sentiments to which your message gives expression."

THOMAS GIVEN NEW POSITION IN BRITISH CABINET

London, England. Prime Minister Ramsay MacDonald, in the House of Commons, made the first announcement regarding his expected plans for changes in the Labor Cabinet when he stated that J. H. Thomas, Lord Privy Seal, at present in charge of the government's programme for relief of unemployment, is to be made Secretary of State for the Dominions—a newly created cabinet post.

Until a few years ago dominion affairs came under the British colonial office. Then, in deference to the increased independent status of the Dominions, the title of that department was changed to the Dominion and Colonial Office, though the administration of it remained in the hands of one minister.

MacDonald informed the house that the approach of the imperial conference, which will be held here in September, and the nature of its business necessitated complete separation of the Dominion and Colonial offices and the placing of a separate minister over each. He then said that Thomas will accept the new post of Secretary of State for the Dominions. It is not entirely new to Thomas, however, as in MacDonald's first government, in 1924, he was colonial secretary and became extremely popular with the dominion governments and their representatives in London.

SUBSIDY ON WESTERN COAL IS ANNOUNCED

Ottawa. The terms by which interprovincial movement of Western Canada bituminous coal will be subsidized by the Dominion Government were announced by Hon. Charles Stewart, Minister of the Interior.

By an order-in-council signed by the Governor-General coal mined in the Crow's Nest Pass district of British Columbia, and in the bituminous and sub-bituminous areas of Alberta, and shipped to points in the province of Manitoba will be subject to a reduction of freight rates which will enable it to compete with foreign coal. The assistance to the industry will be $1 a ton, effective for one year beginning June 5. The reduced rate will be applicable to coal used for domestic and industrial purposes.

Another order-in-council will give assistance of 50 cents a ton on briquettes and lignite coal in carbonized form mined in Saskatchewan and is applicable only when briquettes is applicable only when briquettes are used for domestic or industrial purposes. It will apply for one year, commencing June 1.

The administration of these assisted movements of coal will be under the direction of the Dominion Fuel Board. Regarding the British Columbia and Alberta coal, it was announced the rate reduction will apply only if the coal has less than 12 per cent moisture and a calorific value of more than 11,000 British thermal units per pound in the raw state.

"This assistance," declared the Minister of the Interior, "is in line with the government's policy of giving every encouragement to Canadian products and industry. It will result in lower costs to the consumer and will, it is believed, do much to relieve the unemployment situation, whereby miners are working only a few hours a week."

Calgary Man On Committee

Members Of Pensions Board Have Been Announced By Minister Of Health

Ottawa.—The personnel of the War Veterans' Allowance Act Committee was announced by Hon. J. H. King, Minister of Health and Pensions in the Federal Cabinet.

The chairman is Walter S. Woods of Calgary. Other members of the committee are Lieut.-Col. Dougall Carmichael and Major F. J. Garneau.

Mr. Woods was a member of the 1st Division of the Canadian contingent and for the last ten years has been superintendent of the Soldiers' Settlement Board at Calgary. Col. Carmichael, who comes from Owen Sound, was minister without portfolio in the Drury government. Major Garneau is the son of the late E. B. Garneau, of Quebec, Que. He is a member of the staff of the Department of Soldiers' Civil Reestablishment in Ottawa.

Made Record Flight

Commercial Airways 'Plane Travels 1,630 Miles In Eleven Hours

Edmonton. All records for air travel in the north country were smashed when a Commercial Airways aeroplane conveying the first mail and express to Aklavik, N.W.T., situated at the mouth of the Mackenzie River, reached the far northern post, making the hop from Fort McMurray, a distance of 1,630 miles, in 11 hours and 5 minutes.

It was the first mail since the winter tie-up, and factors, traders and natives gave the red Bellanca 'plane a boisterous greeting. It brought mail, express and those things that ordinarily would not be available to anyone in Aklavik for several months.

As it is a two-hour trip from Edmonton to McMurray, anyone leaving this city now can reach the rim of the Arctic Ocean in close to 14 hours.

New Radio Receiver

Atlantic City, N.J. A radio receiver capable of adjustment to compensate for tonal deafness of the individual listener has been demonstrated to radio engineers assembled here. Julius G. Aceves, consulting engineer of the New York inventor of the device, explained its function and performance before a meeting of the Radio Club of America.

Depends On France

Rome.—Italy is willing to suspend her 1930 naval building programme pending the outcome of the proposed Franco-Italian conversations on naval limitation, if France agrees to do the same, Dino Grandi, the foreign minister, announces.

THE WEATHER

AT ALL times the weather is a common subject of conversation. Its ever changing vagaries makes it at once the most suitable and most universal opening subject when conversing with either strangers or friends. There are times, however, when the weather conditions become more than a mere topic of conversation but something of utmost importance to everyone living within a certain geographical zone.

The present time is an example. Here we are almost in the middle of June and in this district at least no rain of any importance has fallen this season. This is coupled with the fact that last season was exceptionally dry and the winter snows were comparatively light. It is not necessary for us to stress absolute need for rain in an exclusively agricultural community, every school boy knows its importance. Furthermore every school boy knows that there are fruitful areas and dessert areas on this earth, in most cases the difference being caused by the supply or non supply of water.

Looking back over a period of twenty years it does not seem possible that here in central Alberta we should be suffering from lack of moisture. It does not seem so very long ago since we had plenty and some to spare. In fact casual conversation often centred around reports from the country south of Calgary where at that time weather conditions were extremely dry, so dry in fact, that farmers with extensive land holdings could do nothing else but pack up what few things they possessed and leave their farms. Here, when discussing weather conditions, people often stated that whatever else befell us we would not be dried out. And at that time the statement seemed sound. But here we are, almost if not quite, in as desperate straits due to lack of moisture as the south country was some number of years ago, and in further contrast the south country for the past few seasons have had sufficient moisture. What is the answer? It is not likely anyone knows. The best one can do is to go back over the years and try to find a solution. There are numerous weather theories. Based on the existence or on the non existence of "spots" on the surface of the sun, scientists have worked out two cycles of maximum and minimum rainfall for the earth. But while this may be quite true as regards mean or total precipitation for the entire globe, it does not take into consideration comparitively local differences of rainfall. For instance reports indicate there is sufficient rainfall this season south of Calgary and north of Edmonton, but not sufficient in the territory between. So it would appear whatever value the sun spot theory may have as regards mean precipitation over the whole earth, it has little value when viewed in the light of local conditions. Consequently, in forming or attempting to form any opinion regarding strictly local conditions, one is forced back to the personal reminescences of the old timer. Even Edmonton meteorlogical records, if they go back that far, are not altogether satisfactory, as if this district had enjoyed the rains Edmonton has this summer, our crops and gardens would be looking better. In fact we appear to be in an oblong block extending a few miles north and south east and west which is the driest in the whole province.

So to get some local weather history, a representative of the Mercury called upon Mr. J. Gladue, a native of Alberta and a resident of Tofield district for 43 years. Mr Gladue was born in Lac St. Anne and has seen some 73 summers come and go. He is now residing just west of town, apparently hale and hearty and when our representative met him smilingly cheerful. Mr. Gladue told our representative that exceptionally dry years in this territory were unusual. With 43 years' experience, he said that the big majority of years gave ample rainfall. He recalled one year—and only one—some 73 years ago, when the summer passed with out rainfall. This was the year of the Beaver Hills fire, when the earth was so dry the top surface burned away all fall and winter long. This of course was sod and would not occur on cultivated lands. From then on there has been plenty of moisture until the last two years. Some time in this intervening period the men folk of the Cookson family recall being able to travel by boat from their place just south of town to Beaver Lake. Going back further still, Mr. Gladue says he has been told by men who have passed on that at one time conditions were so dry buffalo have been seen wading across certain sections of Beaver Lake. He places this approximately eighty years ago.

Therefore it is quite obvious that this district has seen like conditions before and these conditions were followed by years of ample moisture and abundant crops. Will history repeat itself? Mr. Gladue believes it will, we believe it will. To us the present dry period is the abnormal condition and not the normal one.

It is strange how the rainfall has veered from central Alberta to the south. But a little calm thinking will soon convince one that through the centuries that have passed central and northern Alberta have received more rainfall than the southern portions. We have the trees as evidence for this.

On the gently rolling prairies of the south there are few trees, and if by chance a few wind blown seeds germinated, they have been dried out or burnout by prairie fires before they grew to any size. The soil is rich enough to grow trees, it is remarkable where trees will grow given moisture, but the rainfall in past centuries has been inadequate to make southern Alberta a treed country. In contrast, central and northern Alberta must have had ample rainfall or the trees would not be here.

There is still sufficient time for rain to come and at least partly save the situation this season here, but even if it does not, as serious as the situation would be, it might be worse. Judging by the past years, we can confidently look forward to good crops again.

SENIOR WIN OVER INTERMEDIATE BALL TEAM BY 9-7 SCORE

On Wednesday evening last the local senior and intermediate ball teams met for the second time this year and again the seniors were victorious.

The intermediates took the field first with Ed Hill in the box. The seniors thought this would be a good time to get a few runs and they went on a batting spree which netted them 7 runs. After this disastrous inning the intermediates settled down and played ball, so air tight that the seniors were unable to score until the last inning when they got two runs to win the game. The intermediates kept adding to their score as the game progressed and in the 4th inning the game was tied 7-7. The 5th and 6th inning went scoreless and as previously stated the seniors got two runs in the 7th inning to win.

In order to turn in a win the seniors had to use three pitchers. Joe Wiltsen started in the box but the intermediates soon took a liking to his offering and he was soon replaced by Luther Leach who was also to the liking of the intermediate swatters. Then they had to put in their star pitcher Bert Calvert whose spitball was working perfectly. He managed to finish the game. Outside of the 1st inning Ed Hill pitched good ball and was ably backed up by the rest of his team mates. One startling feature of the game was the base stealing of George Agnew, who held down first base for the seniors.

LINE UP

Senior:—p. Joe Wiltsen, c., G. Fontaine, 1st., Geo. Agnew, 2nd., L. Scot, s.s., B. Calvert, 3rd., Geo. Bissett, l. f., R. Skitch, c. f., E. Beale, r. f., L. Leach.

Intermediate:—p., Ed Hill, c., A. Francis, 1st., J. Kallal, 2nd., F. Hill, s.s., W. Worton, 3rd., F. Meadows, l.f. R. Martin, c. f. P. Thompson, r. f. S. Worton.

Patterson of Vegreville umpired to the satisfaction of all.

THANK YOU — IT CERTAINLY IS A HELP IN A DRY SEASON

W. Worton,
Editor Tofield Mercury,
Tofield, Alberta.
Dear Sir:

I am enclosing Post Office Money Order for the sum of $7.50. If I am correct, this amount will pay for your paper during the ensuing year as well as the two years back subscription.

I appreciate the prompt and courteous manner in which you have been sending my copy of the Mercury.

Yours truly,
T. N. CARLISLE

Political Advertisement

Mundare, May 20th., 1930

To the Electors
Electoral Division of Vegreville
Ladies and Gentlemen:—

Having been nominated to contest the Electoral Division of Vegreville in the Liberal interests in the forthcoming provincial general elections, I feel it my duty to place before you, briefly, my views on some of the issues of the day. Newspaper space is necessarily limited and I cannot, therefore, do more herein than outline the general features on which I base my appeal for your support.

1. The public debt of the province has been unjustifiably increased beyond the bounds of reason in the past nine years—since the Greenfield and Brownlee governments took office. The introduction of sound business methods and no more increases to the public debt save for necessary public works will results in immediate saving and eventually enable the province to repay part of the load now being carried by the taxpayers.

2. The Supplementary Revenue Taxes should be first decreased, then abolished.

3. More attention should be paid to the development of district and market roads and a fixed policy of main highway construction be adopted for a term of years. Gas taxes and auto license fees to be set apart for road construction.

4. I oppose the proposed new School Act, on the ground that it is unnecessary, unduly expensive and concentrates too much power in the hands of the Minister of Education and his department.

5. Adequate inspection should be provided for our rural public schools and I favor an increase of government grants thereto on the basis set by the former Liberal Governments.

6. I favor an extension of the public health service, particularly in districts where medical assistance is difficult to secure on short notice.

7. Co-Operative companies and other organizations receiving government assistance by way of loans, grants or guarantees should be subject to the strictest inspection and supervision in order to guard against further misuse of public moneys.

8. I strongly deprecate class government, whether such government be comprised of business men, professional men, working men or farmers. Any class government lend itself eventually to the Mussolini tactics pursued by the Brownlee-Hoadley government of this province.

9. The paternal legislation introduced by the present government and added to year by year is a menace to our citizens and should be abolished. It deprives the citizen of his individual initiative, leads to bureaucratic methods of government, prevents the necessary inflow of capital to develop our industries and natural resources and deadens the sense of civic responsibility which should be the heritage of every citizen.

10. The province will be taking over shortly the administration of the Natural Resources under the generous terms granted by the Liberal government at Ottawa. While favoring government ownership of these resources and such government control as may be required to protect the interests of the people, I am not in favor of the government attempting to develop the resources at the public expense.

For the above and other reasons which will be made public during the campaign, I am soliciting the support of the electors of this division. If elected, I will be at the service of every class of citizens within the electoral division, with out distinction as to race or vocation.

Your Obedient Servant.
HARRY A. WHITE

Astonishing Event Predicted

But It Will Not Occur For 172 Years

Looking into the future exactly one hundred and seventy-two years, astronomers make the most astonishing prediction of an event that no one has ever witnessed since man began to record history.

This great event is to take place in the northern sky. It will be the arrival of Polaris, the North or Pole star, at the North Pole.

When that happens, according to the calculations of astronomers, the Pole star and the celestial North Pole will be less than one-half of one degree apart, twenty-eight minutes of an arc to be exact.

But when they meet, the Pole star will pass on without a pause, and in a few more centuries will be so far away that there will be no North star.

The star has been used as a guide to the true north for so long that men have forgotten the time when there was no Pole star. There have been many such times, however and there will be again, for it is only once in 26,000 years that the North Pole of the celestial sphere and this particular star come so close that they virtually meet.

"It is not the star," says a scientist, "but the earth that is to blame." Instead of revolving constantly in the same plane, its axis slowly changes its direction from year to year as the earth moves about the sun. If this axis were continued as a mighty pointer sticking out into space from the North Pole, the tip of the pointer would describe a gigantic circle in the sky, taking just under 26,000 years to make one trip round its orbit.

"In its course the tip of the pointer would point once at the Pole star—as it is going to do in 2102 and then pass on, to approach in turn, at intervals sometimes of many thousand years, other stars and constellations.

"It is a curious coincidence that sailors undertook their first long voyages across the sea at a time when Polaris was near enough to the true north to serve as a fairly efficient guide and supplement to their crude methods of navigation."

Accidents In "Safety First" Week

"Safety First" week in England ended as it started—with a deplorable aggregation of week-end accidents. Nevertheless the promoters had the gratification of presenting many medals and diplomas to drivers for their immunity from accidents over a long period. One London tram driver in twelve years covered 250,000 miles, equalling eleven journeys round the world, without an accident.

Teacher: "Who was it that prompted you? I distinctly heard someone whisper that date."

Student: "Excuse me, but I expect that was history repeating itself."

Birds Wait In Vain

Man Who Charmed Them Is Dead In Paris

Henri Julien, the aged bird-charmer of the Tuilleries Gardens, in Paris, is dead.

Every day, for forty-five years, in peace and war, Julien came at lunch-time to the gardens and fed the sparrows there. He sat on an iron chair facing the Louvre, and called them by name, but they were always waiting for him, chirping excitedly.

They came and perched on his head, they poised themselves on his hands, they fluttered close to his mouth and pecked crumbs from his lips.

Nurses with children and midinettes who spent their lunch-hour in the Tuilleries used to stand and watch the old bird-charmer with fascination, but none knew who he was or whence he came. He would spend an hour with his feathered friends, and then vanish.

The sparrows wait in vain for their friend. For Henri Julien, old and broken, committed suicide by jumping from the window of his fourth-floor attic.

The History Of Iceland

Record Has Been Kept From Time Of Island's Discovery

In that strange island Iceland,—burnt-up, the geologists say, by fire from the bottom of the sea, a wild land of barrenness and lava, swallowed many months of every year in black tempests, yet with a wild gleaming beauty in summertime; towering up there, stern and grim, in the North Ocean; with its snow jokuls, roaring geysers, sulphur-pools and horrid volcanic chasms, like the waste chaotic battle-field of Frost and Fire;—where of all places le least looked for Literature or written memorials, the record of these things was written down. On the seaboard of this wild land is a rim of grassy country where cattle can subsist, and men by means of them and of what the sea yields, and it seems they were poetic men these, men who had deep thoughts in them, and uttered musically their thoughts. Much would be lost, had Iceland not been burst-up from the sea, not been discovered by the Northmen! The old Norse Poets were many of them natives of Iceland.

Poultry From Windsor

At the World's Poultry Congress, to be held at the Crystal Palace, London, England, July 22 to 30, there will be birds from the King's home farm at Windsor. His Majesty has followed the regulations, filled in the forms and sent in the fee in the same manner as the most modest poultry-keeper. The Windsor poultry will be shown with birds from 55 other countries.

Plan New Records

Major Sir Henry Segrave holder of the world's automobile speed record, and Malcolm Campbell, his predecessor as titleholder plan new assaults on speed records. Segrave has designed secretly a motor boat, Miss England II., with which he hopes to attain 100 miles an hour. Campbell, it was said, is completing his design for a new racing car.

British war graves in France and Belgium number more than 555,000 according to a recent count.

Some men never appreciate their children so much as when making out their income tax.

Search Was Rewarded

Ship Sent Out By Franklin's Wife Brought News Of Explorer's Fate

Sir John and Lady Franklin had been married seventeen years when Sir John set out from Greenhithe to find the North West Passage. It might be three years before they met again. News came for three months. Then no news. England stirred. Three years—and there began that bombardment of the Arctic silence which never ceased until the snows had yielded their tragic secret. Expedition after expedition pierced the ice-bound solitudes. Where it was not possible to send Government rescue ships, Lady Franklin sent auxiliary vessels which she had fitted out herself, crying for aid, when her own means were gone, to the whole world, which responded again and again. It was one of the ships she sent — "Ommaney's Assistance" — which brought first news of him. When the government had given up the search, it was McClintock, in the little yacht "Fox," which she had fitted out, who found at last, in the cairn at Point Victory, the simple story of the heroes who had forged the last link in the North West Passage with their lives.

Stowaways From Porto Rico Held Prisoners

Three Girls Reach New York But Fail To See It

Three young Porto Rican girls left their homes in San Juan to go to high school in light summer dresses and with schoolbooks under their arms, they loitered at the pier to watch the steamship "Coamo," of the New York and Porto Rico Line, sail for New York.

"Let's go on board," suggested one. Her chums thought it a fine idea. So they walked up the gangplank and, one idea leading to another, decided to remain on board although they had neither tickets nor money.

While two of the girls were discovered the second day out, the other one calmly posed as a first class passenger, took her meals regularly, and slept at night in the lounge, blithely assuring the steward she preferred it to her cabin.

Her true status as a stowaway was discovered only when the liner arrived at New York, and she tried to go ashore without a landing card.

All three are being kept on board until the "Coamo" sails for Porto Rico.

Silk From Carbon Dioxide

From carbon dioxide in the air eventually will be obtained wood pulp, artificial silk, paper, explosives, and other material, said Dr Herbert Levinstein, president of the Society of Chemical Industry, in an address to the British Institution of Chemical Engineers. Everywhere in the atmosphere and water vapour, he said, the same fundamental chemical constituent is found.

A cynic says: If you are given something for nothing, there is usually something wrong with "something."

The Suez canal varies in width from 220 to 250 feet on the main stretches to 280 at curves. The canal is about 100 miles long.

Before Her Baby Came

"I have used several bottles of Lydia E. Pinkham's Vegetable Compound and find it helps me wonderfully, especially before childbirth. I have five lovely children. After my last baby came I had a miserable pain in my right side so I bought another bottle of the Compound and I feel fine now. I work outside during the fruit season in addition to my housework."—Mrs. Charles Slingerland, R.R. #4, St. Catherines, Ontario.

Planning Bigger Airships

Could Be Constructed To Carry Paying Loads Says British Designer

Critics of the new airships were answered by Lieut.-Col. V. C. Richmond the designer and Major G. H. Scott the navigator of R-101. They were the guests of the City Livery Club at a luncheon in the Carpenters' Hall, London, England.

Colonel Richmond said that he could see no reason technically why airships much larger than those so far built should not be constructed to stand the stress of weather and to carry useful and paying loads.

The British Empire was, he thought, peculiarly suited to airship transport because of the long distances that had to be traversed over land and sea.

Economics, just as much a question of research as the building of the ships, was to be the next part of their program. "Do not ask me what will be the fare to India. You might as well have asked George Stephenson what would be the fare from Stockton to Darlington.

"Once speed has been achieved in conjunction with reasonable comfort, airship travel will become a necessity, and it is impossible to forecast what people will pay for a necessity. It is equally impossible to pass an estimate on the quantity and flow of passengers. The factor of speed will create a demand."

None of the calamities predicted for the two new airships had, he said, come true. Both R-101 and R-100 had flown their trials in some of the worst weather ever recorded for October and November. "Finally, the Germans have now decided to copy us instead of our copying them."

A new section, Colonel Richmond also said, was being put into R-101 to overcome the unexpectedly great weight of the engines and other components, and after research would be conducted into the problem of long journeys across the sea.

Major Scott said it was quite wrong to say that hundreds of men were required to handle these ships. R-100 and R-101 had never had more than fourteen men to bring them to the mooring mast. In spite of all criticism, airship development had been a success, and what was now wanted was continuity of development. "We have to show that these ships are reliable and can run to schedule."

Lady Farmer In Lead

A lady farmer now tages the lead in the contest being conducted at the Brandon Experimental Farm, the 24th week of the Manitoba egg laying contest showing the pen of "barred rocks" owned by Miss H. M. Purdy, of Balcarres, Saskatchewan, in the lead with 1,006.2 points and 975 eggs.

Purely Educational

The Saskatchewan Industrial Development Board has recently been organized as a province-wide body, according to W. R. Kinsman, secretary, "to create in the people of this province an industrial consciousness that will encourage and support present industries and new industries. Its aim is purely educational."

Douglas' Egyptian Liniment is especially recommended for spider, or infection of cow's teat. Invaluable also in cases of spavins, curbs and splints.

Would Solve Some Problems

The perfect bridge hand is said to contain thirteen cards of one suit. Now if someone will work out a perfect mill hand, a perfect deck hand on a perfect harvest hand, some problems may be solved.

Customer—"I'd like a nice birthday present for my son. He likes something to blow."

Helpful Merchant—"How about a good handkerchief?"

Minard's for Insect Bites.

Inland Fisheries Show Gain In Production

Marketed Value Last Year In Manitoba Over Two Million Dollars

While agriculture the basic industry of Manitoba, together with manufacturing, mining and other industries has advanced substantially in the province in recent years, the production from the inland fisheries has probably shown the greatest gain. In the past five years the fisheries production has increased more than 1700 per cent. In 1924 the market value of the fish caught in Lake Winnipeg, Manitoba, Winnipegosis and other lakes was $1,222,000, while last year, it was $2,634,000. In 1929 the commercial fishermen of the province caught 33,000,000 pounds of fish, a record for Manitoba, with a marketed value of $2,634,000.

IS BABY TEETHING?

Teething time is a time of worry to most mothers. The baby is nervous, fretful, feverish. His little gums are swollen and sore, diarrhoea, constipation, colic and sometimes convulsions set in—neither baby nor mother can sleep. These troubles can be quickly banished, however, through the use of Baby's Own Tablets concerning which Mrs. Louis Grubb, Teeswater, Ont., says:—"I have used the Tablets for all my babies while teething and have found them a splendid medicine." Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Bananas Grown In England

An exhibit which attracted considerable comment at the Royal Horticultural Society's Fruit Show, in London, England, was a bunch of bananas weighing nearly half a cwt., which had been grown in England. This is the first time for 25 years that bananas grown in this country have been exhibited at one of the society's shows.

New Storage Elevator

It is reported from Ottawa that a 2,000,000 bushels interior storage elevator is to be built at Lethbridge by the Federal Government this year, supplementing prairie wheat storage facilities now existing in similar elevators at Saskatoon, Moose Jaw, Calgary and Edmonton.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Noisy Nuisances

A Massachusetts court has ruled that airplanes flying less than 100 feet from the ground commit a trespass on private air right. But what we are more interested in discovering is how far our horizontal air rights extend, as against the neighborly radio?

Little Helps For This Week

"Changed into the same image from glory to glory."—2 Corinthians iii. 18.

O hearts of love! O souls that turn
Like sunflowers to the pure and best!
To you the trust is manifest
For they the mind of Christ discern
Who lean, like John, upon His breast.
—John Greenleaf Whittier.

Stand in Christ's presence and mirror His character, and you will be changed in spite of yourself and unknown to yourself into the same image from character to character. Every man is a reflector; that is the principle upon which this is based. He cannot help reflecting, he cannot help showing the environment in which he has lived, the influences that have played around him. All friendship, all love,—human and Divine,—is spiritual, so that it is no difficulty in reflecting the character of Christ that we have never been in visible contact with Him. He does not appeal to the eye. He appeals to the soul, and is reflected, not from the body, but the soul.
—Henry Drummond.

Miller's Worm Powders are complete in themselves. They do not only drive worms from the system, but repair the damage that worms cause and so invigorate the constitution that it speedily recovers from the disorders of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

Survey Of Wood Waste

The Vancouver Forest Products Laboratory conducted by the Forest Service, of the Department of the Interior, is engaged on a survey of wood waste in British Columbia sawmills with a view to assisting the industry in devising methods of profitable utilization of wood now wasted.

Minard's Drives Away the Headache.

An automobile which can be taken to pieces and placed in a small garage has been invented in Germany.

Gyproc Gives PERMANENT PROTECTION

MADE from Gypsum rock, Gyproc Wallboard does not burn. And this year it has a new smooth Ivory finish that needs no decoration (when panelled) although you can tint, paper or plaster it if you wish.

Structurally strong, inexpensive, easily and quickly put up, Gyproc Wallboard gives permanent fire protection to the walls, ceilings and partitions of your home.

Your dealer's name is listed below. Ask him for complete details of this pioneer Canadian fire-safe Gypsum board or write for free interesting book, "Building and Remodelling with Gyproc."

TOFIELD MARITIMERS ATTEND PICNIC AT EDMONTON ON SATURDAY

On Saturday, June 7th, a large number of former residents of the maritime provinces held an enjoyable picnic at Borden Park, Edmonton. The usual frolics were held including races of all kinds and other athletic events.

Noted speakers gave interesting addresses which were listened to attentively.

Among Tofielders present were Mr and Mrs. Geo. Bruce, Mrs. Firth and family, Mr. and Mrs. F McGaffey Mr. and Mrs. W Forman, Mrs. Mary Dawson and W Stairs, Mr. and Mrs. Arthur Gill Mr and Mrs. M. Kendall and Mrs. Stine.

SYNOPSIS OF "REDSKIN"

Wing Foot, son of a Navajo Indian Chief returns to his tribe after his graduation from college. Unable to accept the ancient superstitions and customs of the Indian, he finds himself an outcast among his own people but he strives to conform outwardly and wins back some of their favor. When the old tribal medicine man dies and Wing Foot refuses to take his place, however, he is driven from the tribe.

During his school days and college years, he has fallen in love with Corn Blossom, a girl from another tribe, the traditional enemy of the Navajos. Wing Foot goes to find her and she is overjoyed when Wing Foot steals into the village to her. He finds that her father is trying to force her to marry a member of his tribe.

Before Wing Foot can take her away, he is discovered and has to flee. He wanders into the desert where without water his pony dead and near death, he has vision of his mother which leads him to forgotten Valley. There he finds water and oil. His discovery just precedes the arrival of two white oil prospectors and they race Wing Foot to the nearest telegraph station to file the claim.

Meanwhile Corn Blossom has escaped and, pursued by her tribe, she heads for the Navajo reservation and Wing Foot. Wing Foot beats his competitors to the telegraph station, places his claim and returns to tell his people of their good fortune. He arrives at the village just as Corn Blossom's pursuers close in.

Wing Foot averts the threatening battle by telling the Indians of his oil discovery which will make them all rich. His oratory makes peace between the tribes and he claims Corn Blossom as his own.

RECEPTION FOR ANGLICAN MINISTER

On Friday night last the members of the Holy Trinity Church met together at the Institute rooms to extend a hearty welcome to Rev. Mr. G. W. Wilson who is to take charge of the parish during the summer months.

Mr. T. W. Teape introduced Mr. Wilson who expressed his pleasure at the reception accorded to him and at the prospect of his work among us.

The W. A. then served lunch and afterwards a presentation was made to Mr. Teape, who has conducted services through the winter months. Everyone enjoyed the informal reception and we wish Mr. Wilson every success.

AMISK CREEK

Mr. and Mrs. Sam Olson of Shoats, have moved to Vermilion, where Mr. Olson is taking care of a pump house on the C. N. R. They did not move to Saskatchewan as reported a week or two ago.

Frank Johnson from Amisk Creek school was awarded second prize for singing at the Camrose musical festival.

Mr. A. Erickson spent a couple of days in the city this week.

Mr and Mrs. J Blackburn and family from Lavoy and Mr. and Mrs. Shandie from near Stettler were guests at the I. C. Olson home last Sunday.

Mr. and Mrs. R. O. Berg motored to Camrose last Thursday to visit their daughter Ruby, who is attending college there.

Myrtle and Marvin Moen, the twin children of Mr. and Mrs. E. A. Moen, celebrated their ninth birthday last Tuesday, June 3rd. Mrs. I. H. Olson's birthday was also on the same day, so a quilting bee was held at the home of Mrs. E. A. Moen. Nearly all the members of the Ladies Aid and many visitors were present.

Hennie Annabo and Hazel Hillerud, who have been attending normal school in Camrose arrived home on Friday evening last. The 1929—30 term is now ended.

Mr. and Mrs. L. Rolstad and family from south of Ryley and Miss Jacobsen, teacher from Shore school were visitors at the P. O. Finstad home last Sunday evening.

Mr. E. A. Moen and G. Finstad were shipping calves and hogs to the Pool last Tuesday. They were hauled to the city in a large truck.

TOFIELD STUDENTS ATTEND WEEK FOR FARM YOUNG PEOPLE

Among the large number of young Tofield on Friday, June 13th, when to them at the University of Alberta were, Russell Ferguson, Joe Murray, Harold Schultz and Annie Booth all of Tofield.

THE PREMIER TO SPEAK AT TOFIELD

An event of major importance will take place at the Variety Theatre, people who attended a week devoted Hon. J. E. Brownlee, premier of Alberta will address a public meeting.

He will speak on behalf of the U. F. A. government and the candidature of A. M. Matheson. Mr. Matheson will also deliver an address.

This is the first time Tofield has been honored by a visit from the premier of the province and without doubt there will be a large attendance.

PUBLIC MEETING

Will Be Held In The

Variety Theatre, Tofield

At 8:00 p. m. On

Friday, June 13th.

Addressed By

Hon. J. E. BROWNLEE

PREMIER OF ALBERTA

And

A. M. Matheson, M.L.A.

EVERYBODY WELCOME

GOLF NOTES

Camrose, Alta.—Victoria Park Golf club was the rendezvous for a number of ladies Friday afternoon when friendly games were arranged by the Sports committee. There were twenty members present and all games were keenly contested. Mrs. S. C. Bailey won the honors with Mrs. O. L. Cary as runner up.

Mrs. A. J. H. McCauley, Mrs. E. W. Rogers, Mrs. F Law, Mrs. A. A. Beirnes and Mrs. J. W. Chapman motored over from Tofield in the afternoon and enjoyed nine holes on the course.

TENDERS FOR SCHOOL HOUSE

Sealed tenders will be received by the Board of Trustees of the Silver Lake School District No. 1696 at the office of the Secretary-Treasurer up to noon of the twenty-first of June for the erection of a one roomed Frame school building after Plan Number C. E. 5. Plans for specifications may be obtained from Secretary-Treasurer on payment of deposit of $5.00. Plans must be returned within 24 hours, and deposit will then be refunded. A marked cheque for five per cent of the amount of the tender should be enclosed with each tender as a guarantee that same is bona fide. The lowest or any tender will not be necessarily accepted.

W. LAUNDER,
Secretary-Treasurer.

P. O. Tofield, R. R. 4
Nearest Station, Chipman, Miles Distant 12.

TENDERS FOR IMPROVEMENTS TO HASTINGS LAKE SCHOOL HOUSE

Sealed tenders will be received by the undersigned up to noon of June 28th for putting in new foundation, painting and other repairs.

Specifications may be secured at the office of the Crown Lumber Co., at Tofield.

Work must be completed between July 5th and 19th, both inclusive.

A marked cheque for 5 per cent of tenders should be enclosed with each tender as a guarantee that same is bona fide. The lowest or any tender not necessarily accepted.

Apply to
J. C. CRAIG or
J. O. A. LETOURNEAU, Tofield.

LOST:—About June 1st, a female dog, white, short hair, black spot over one eye. Answers to the name of Balloon. Finder please communicate with Stephen Philipp, Tofield Coal Co., Tofield. 19p

CAR FOR SALE—PONTIAC 1927, Cabriolet, rumble seat coupe. In good mechanical condition and running condition. Four new tires and new battery. Reasons for selling, leaving for Duluth. Terms if desired.—Apply to Laurie Scott, 'phone 21, Tofield. c21

Brewing is an Important Industry in Alberta

ALBERTA'S BREWERY PRODUCTS ARE WINNING THEIR WAY IN THE EXPORT TRADE BY SHEER EXCELLENCE

The Brewing Industry is an important factor in the industrial life of this Province.

It is hardly necessary to emphasize the millions of dollars which have been invested throughout Alberta in this Industry.

Hundreds of Albertans enjoy steady employment throughout the year in the brewing, storing, transporting, of the products of the five great modern breweries of Alberta.

Alberta Brewery Products are served by the bottle or glass at hotels. Sold by the barrel or case from our warehouses.

Order from your nearest warehouse at EDMONTON

Premier Brownlee Visits Tofield

On Friday night last, Premier Brownlee, speaking on behalf of the government and the candidature of A. M. Matheson, U. F. A. candidate for the Vegreville constituency in the forthcoming provincial election, addressed a goodly number of people at the Variety Theatre.

There undoubtedly would have been a much larger number present to hear Mr. Brownlee had the weather been more favorable.

The Premier's address, while lacking the fire of the traditional political meeting, was nevertheless a sensible presentation from the government's viewpoint, of the public questions of the province. He made it clear that his was not an address or policy of promises, but the government asked for support in the coming election on the strength of their record. Not once was the Premier heckled and at the close of his address, when the opportunity was given for asking questions, none were forthcoming.

The meeting opened with a few introductory remarks by the chairman, Mr. George Abernethy, who on behalf of the Tofield U. F. A. expressed pleasure at the visit of the Premier.

Mayor Swift on behalf of the town then extended a cordial welcome to Mr. Brownlee.

Hon. J. E. Brownlee, Premier of Alberta, then addressed the meeting. He appreciated very much the hearty welcome accorded him by the chairman and the Mayor, and it was a real pleasure to him to be able to, from time to time, visit as many towns and villages in Alberta as possible. He was pleased to see so many had braved the inclement weather to be present.

He was pleased to be there to say a few words on behalf of A. M. Matheson, M.L.A. He had been associated with Mr. Matheson for the past nine years and had found him inspiring and enterprising. The only fault he had to find with Archie was that he was a Scotchman. He then told two Scotch stories, expressed appreciation of the ladies being present and then proceeded to deal with the more serious parts of his adress.

He first pointed out that judging from the official nominations, it was not possible for either the liberals or the conservatives to have a majority in the next house. There should be, he said, one strong party, not a number of groups.

Speaking of unemployment, he said that this was beginning to become a serious matter. Ever since he had lived in the province he had observed considerable unemployment during the winter season, but this was the first year he has observed it during the summer season. And he felt sure that when winter came there would be much unemployment in the province. To show that the government had done something regarding this problem, he said the Labor party's manifesto stated the government had done well and the Mayors of Edmonton and Calgary also commended the government for their work and action on this matter. There must be a strong and well supported government to do unemployment work.

Has the record of the government been such as they can ask for support? the speaker questioned. In proof that it had the speaker read clippings from Calgary and Edmonton daily newspapers, which while disagreeing with their method of organization, agreed that the governments administration had been good. Here the speaker stated, he did not come to them with promises of things to be done but on their record of things accomplished. He mentioned one or two things. First the sale of the government railways. This was a night mare. The government owned railways blocked progress at every turn. There was so much money required for the different charges due to railway bonds, operation etc., that when anything else was considered, this matter was a constant bogey. At first no one would buy. Later the government was offered 19 million dollars, this offer being refused. They were greatly criticised for refusing this, but when they were later offered 25 million dollars and accepted, the criticism ceased. Thus one big problem passed [illegible].

Then there was the matter of natural resources. Alberta obtaining her natural resources had become a matter of negotiation for years. When the present government took office they approached the Dominion Government and were informed that for Alberta to have control of her natural resources they must give up the subsidy then being received in lieu of them. After eight years of negotiating, Alberta received the natural resources and retains the subsidy also. Thus problem No. two disappeared.

Problem No. 3 was more general. It was composed mainly of general financial and administrative work, and in this respect they were receiving more criticism than in regard to anything else. The province have had two distinct phases, the first leading up to just after the war. Up to that time money was spent freely, as it was expected development would come quicker than it did. There was considerable public debt when the government assumed office nine years ago, and with a series of charts and government figures, the premier endeavored to show that the criticism levelled at them was prejudiced and unfair. He said the province is now in good financial shape.

He spoke of the telephone system being put in better financial condition, though to do so they had found it necessary to raise the rates. The past nine years had been years of consolidation and the finances of the province were now in a sound condition. They will not have to show deficit or raise taxes.

The speaker went on and explained the capital debt, stating that when large expenditures were made for public needs, it was not wise to try and pay all out of one years taxes, as people years hence would receive the same benefit as people at the present time. Consequently bonds were issued to be paid yearly, and the unpaid portion represented the capital debt. There was no province in the Dominion that had not increased its capital debt during the past nine years.

They were criticised regarding Mr Greenfield's office in London. He explained this office was more than a mere immigration office, as it was able to perform some very valuable services to the province apart from immigration.

They had been criticised regarding the provincial police, some claiming better service could be rendered by having the policing done by the Dominion police. He did not consider it a good thing to change as their organization were able to perform many duties for the province the Dominion police could not.

In the matter of education, the government had he believed done well. They had passed the equalization grants act, and now the number of schools open for the entire school year were more numerous than before. The effect of the act was to have more children get more teaching. He had heard much about the Baker School act, and spoke in favor of it, but he said there was no desire to force the issue until the people were ready for it.

At the present time agriculture was not in the best of condition, and he did not know when it would change. Agriculture must have leadership and the government will endeavor to bring in the best experts and leaders.

The Premier spoke on the wheat pool guarantee, stating the guarantee was given, not so much to assist the pool, as to allay the panic that would surely have occurred had the pool been obliged to throw their grain on the market at that time.

In conclusion he promised if the U. F. A. government were elected to give best and honest service. Applause.

Mr. Matheson's address was very brief. He thanked those present for coming out on such an unfavorable night, to hear Mr. Brownlee and he was sure they were well repaid. He said that while the government had been freely criticised there had been very little constructive criticism.

They were still being criticised for the 1921 audit, the opposition having to go back and find bones to rattle that were dead and buried long ago. The government was not a class government as actual legislation would show. Applause.

The chairman then asked whether there were any questions, and there being none the meeting was closed by the singing of the National Anthem.

IMPORTANT NOTICE

Electors are reminded that in this election ballots should be marked with figures 1 and 2 according to your first and second choice of candidates. Do not use a X as this will spoil your ballot.

Many Attend Liberal Meeting

On Monday night, before an audience that well filled the Variety Theatre, the cause of the liberals in the forthcoming provincial election was presented by Mr Harry White, liberal candidate for this constituency and Captain Bowen of Edmonton. Both speakers gave excellent addresses which were well received and to which was given hearty applause.

Mr. Joseph Rogers, veteran liberal of this district occupied the chair and on the platform in addition to the speakers and chairman were J. D. Hannan, former liberal candidate and Mayor Swift.

After a few introductory remarks by the chairman and Mr. J. D. Hannan, Mr White was introduced.

Mr. White's address was forceful and penetrating. Without any wasting of words, he drove home his points one by one with telling effect.

In part he said: He did not imagine a few weeks ago, that he would at the present time be appealing to the voters for their support on election day. It was only by the persuasion of many of his friends that he allowed his name to go before the nomination meeting. However, now he was nominated he had entered the campaign with vigor and enthusiasm and was there appealing for their support. He was a liberal, he was born a liberal and so far had seen nothing to make him change his mind. He noticed however, in this constituency that there was no conservative candidate nominated, and consequently he felt justified in asking for the conservative vote on election day. If the Tofield conservatives felt he was in anyway worthy of their vote he hoped he would receive it.

In 1921 when the liberals were voted out of power, he felt that Alberta took a backward step. This condition cannot continue. He mentioned the labor government of England and the political muddle they were in, especially as regards India.

In 1921 when the farmers went into power, they went in on the strength of a large number of promises. Out of all the promises they made they only kept one, that of the audit, and then they found everything O. K. It was a very inefficient government, so inefficient, that the premier, Mr. Greenfield, was asked by his own party supporters to resign—and did so. Mr. Brownlee tried it in 1926 and results were no better. Before their election to office the farmer party were loud in their promises of economy, but but they did not reduce taxes, they increased them. With double the revenue being received there has been no reduction in taxation. One primary thing the people expected when the farmers went into power was a reduction in taxation, but instead of reducing it they had steadily increased it. In 1921 there were 91 forms of taxation in Alberta, today there are 100. In 1921 there were 600,000 people in Alberta, to-day there are 640,000 a mere increase of 40,000. Yet the taxation had doubled which [illegible] individual was paying twice as much now as under a liberal regime. The debt was now twice as large as it was. Interest on provincial debt has also doubled, it was 2½ millions of dollars now it is five million dollars. Out of every dollar the government takes in, 35c is paid out for interest. This does not sound much like the farmers told us in 1921. In 1921 the liberals left the province with a debt of $51,000,000 [illegible] was after all court-houses and other public buildings had been built. It works out at about three million dollars a year since the liberals went into power. Since the farmers went into power the debt had increased at the rate of five million dollars a year—does that sound like [illegible] promises?" If they had not [illegible] any promises at all, this record would have been sufficient for the electors to demand a change. It would have been a fine thing for Alberta, if like Saskatchewan, we chose a conservative government, not a class government. Saskatchewan deliberately kept away from a class government. He was not foolish enough to think one government would last for all time, and the question now is, have we left the present government in long enough?"

The speaker went into the question of the rural credit act and its abuses, endeavoring to show how loosely the structure was framed. He cited the Donatville incident where large losses were sustained.

He stated that the government was not actually a farmers government, he never believed it to be a farmers government.

He cited a number of members including our own, and said they were just a bunch of political opportunists. They figure, he said, if they can get the U F A nomination, they are elected. The political opportunists made a financial muddle and if elected will do it again.

Captain Bowen said in part, He was pleased to be at Tofield. He remembered having spoken in that hall in 1926. There was he said a great revulsion of feeling against the present administration. As one who had taken an active part in both campaigns, he felt sure that the government had lost much of the prestige it enjoyed in 1921. So much so that it was confidently expected in well informed quarters that it would not only be returned in much smaller numbers, but would have difficulty in procuring a majority over all other groups in the house.

In Mr. Brownlee's manifesto he stated that he appealed to the electorate on the record of an honest government, which said the speaker was quite true. But they had had nothing but honest government since the first liberal government went into power in Alberta. He had personally heard Mr. Greenfield, former premier of this province say, "That he would be pleased, if when he laid down the reins of government, it was found his government was as good as Mr Stewart's. The premier was also appealing to the country on the record of procuring the natural resources. As a matter of fact before Mr. Brownlee was premier and Mr. McKenzie King was in Alberta, Mr. McKenzie King said that the Liberal party were returned to power, he would to turn over the natural resources. He has done so. Mr. Brownlee, so said the speaker, claims he stood out for a better deal, but in fact it was the school question that caused the delay, but the liberals did later give Alberta a better deal than at first offered. The liberal party at Ottawa are entitled to some credit. The premier has complained of the worry the Alberta railway gave him. When the farmer party took office the railways were being operated by the C. P. R. When the opportunity to sell the railways first came the liberals said wait, and the conservatives sell. The government waited and later sold at a better price, but considering the value of the roads, and the potential wealth of the north country, there was no great credit coming to them for waiting, but there was foresight on the part of the liberals for building the roads. Speaking of finances he said the government received four million dollars from auto licences and gas tax. They only spent on highways a million and a quarter dollars, which raises the question as to whether this was a business administration. When the farmer first went into power, we were going to have a new orientation of democracy, whatever that may mean, but if this is a new orientation of democracy, all he can say, is that it is a miserable affair.

The government is constructed on too narrow a basis. It is neither fair nor just, neither is it democracy. It is not representative government. The speaker dealt with this question for some time, explaining that in days gone by men had shed blood to have truly representative government.

It has been said, if elected, the liberals would wreck the wheat pool. This was not true. During the war when there was talk of a wheat board with compulsory marketing he had been opposed to it. He did, however, believe in the Wheat Pool but he was of the opinion that the wheat pool management had not been fair to the farmers. The attitude of the government to the mixed farmer had been one of "let George do it," while they thought only in terms of wheat, the livestock industry has been slowly dwindling. The government has been lax in not keeping the farmers better informed on the world markets, and in not encouraging the livestock industry.

In closing, he said, that now the province controlled the natural resources, greater responsibilities would rest upon the government. Now was the time to get away from class government as we need the best men and brains in the province in the legislature.

He appealed for support on behalf of Mr. White on election day. (Applause.)

The meeting then closed with the singing of the National Anthem.

For Constipation

You do not have to experiment with ENO'S "Fruit Salt." Millions have, in the past sixty years, proved its worth as a non-habit-forming regulator. There is only one ENO. Resolutely refuse substitutes.

ENO'S "FRUIT SALT"

An Encouragement To Progress

The subject of immigration has for many years been a live topic in Canada and never more so than during the past year or two. There is, however, this difference that whereas for many decades the [illegible] of the subject was largely as to ways and means whereby a large volume of immigration could be secured in more recent years the thought of our people has rather been directed towards the successful colonization of the [illegible].

That is to say where at one time the main objective was to get immigrants in large numbers to settle upon our vacant lands, the main objective now is to see that those who do come make a real success of their venture, adapt themselves to the new environment in which they find themselves, and by associating themselves with the life and activities of the communities in which they locate identify themselves with Canada and become Canadian citizens in thought and aspiration as well as in name.

To a greater extent than ever before native-born Canadians and those of our citizenship who call the British Isles "home" have come to realize and appreciate the fact that immigrants coming to Canada from lands other than those under the British flag or speaking the English language are [illegible] keenly anxious to become Canadians in the full meaning of the term. Appreciation of this fact is helping to break down old barriers of prejudice and the English-speaking Canadian is becoming more and more anxious to co-operate with and assist his fellow-Canadian of foreign extraction.

In a recent issue of this paper there appeared an article in the news [illegible] outlining a plan originated by the Canadian National Railways under the direction of Dr. W. J. Black the directing head of the departments of Agriculture and Colonization of that system, having as its object the encouragement of community progress and development and the attainment of the fullest possible measure of Canadian citizenship by those rural communities of the three prairie provinces which are of European origin.

The plan is simple but far-reaching and of tremendous importance. It involves the carrying out of a series of competitions among such communities to be held annually for a period of five years, with three substantial prizes, of $1,000, $500 and $250 respectively to be awarded each year in each of the Provinces of Manitoba, Saskatchewan and Alberta on the understanding that the money be utilized in community work of some progressive nature.

In other words each of these rural municipalities or groups of school districts within municipalities in which the population is made up of people of continental European origin of the first or second generation, which display the greatest interest in co-operation among themselves to promote education, public health and a better class of agriculture, and show the best results will be awarded these prizes which, in turn, are to be used in still further promoting progressive community betterment.

The community which through the co-operative action of its people secures the best schools, the most regular attendance of pupils, the largest percentage of children going on for secondary or university training, which takes the keenest interest in matters of public health, social welfare, music, arts and handicrafts, which enthusiastically supports community organizations such as agricultural societies, co-operative marketing pools, women's institutes and home makers' clubs, libraries, etc., or which evince the greatest interest and reveal the greatest progress in the improvement of agricultural methods will be the winners of these substantial prizes.

But the greatest gain to such communities will not be the winning of the prizes but in the direct and indirect benefits which will accrue to each individual [illegible] community as a whole from the practice of these worthwhile things. The prizes are after all but an additional incentive to work for the welfare and advancement of the community which the people therein call home. The prizes are but a tangible encouragement to our [illegible] other communities [illegible] Canadian citizenship, to demonstrate through a determination to make use of and emphasize the best Canada has [illegible] in the development of their particular section of the Dominion.

Corns Quick Relief! PUTNAM'S Corn Extractor

Ocean Bed Is Changing

Shipping Has Been Endangered By Upheavals In Pacific

Strange things are happening in the murky regions of the ocean bed. In the Pacific the bed has been rising so much that shipping has become endangered. Off the west coast of Nicaragua the charts show an ocean depth of 222 feet, but the figure is now actually 2 feet. Another sounding showed the actual depth to be 51 feet where the chart showed 1,000 feet. Sudden upheavals on the ocean floor recently worked havoc among the telegraph cables, many of the strongest were snapped like string, including one of the latest, which normally takes five different sets of messages at once in each direction. When a break occurs the cable ship goes out, delicate apparatus aboard shows the break within two yards of of the actual spot and dragging commences. Up comes the cable. A new length is inserted to make the join, and so critical is the actual work of joining the strands inside that the film of grease on a man's hand can actually prevent the join from being effective.

BRIGHT EYES ROSY CHEEKS

The Birthright Of Every Girl

Dull eyes mean misery and weakness — a sure sign of a bloodless condition. Anaemic girls and women have full, heavy eyes with dark [illegible]. The bright eyed girl or woman is always happy and well.

There is one way to make the eyes bright, to bring the glow of health to pale cheeks, that is to invigorate the body with new blood, rich, red health-giving blood. Dr. Williams' Pink Pills do this and they do it well. Concerning them Mrs. Robert Devitt, Brougham, Ont., says: "My daughter became so ill and nervous we had to take her out of school. She was pale and thin, her eyes were dull and the least exertion upset her. I began giving her Dr. Williams' Pink Pills and in less than six months you would not know her. She gained in weight and strength and is now the picture of health."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Canada's War Pensions

Liberality Shown By Act Recently Passed By Parliament

The recent War Pensions Act passed by the House of Commons and the Senate keeps the Dominion of Canada in the forefront among nations of the world as to liberality in dealing with war veterans. So far, Canada has paid in pensions and soldiers rehabilitation $835,000,000. Soldier's insurance, given without medical examination, is at present self-supporting, but before the conclusion of the scheme the loss as estimated will be over $[illegible].

This year's expenses for pensions [illegible] is estimated at $51,204,000. Next year this branch is expected to cost $2,000,000. The new scheme giving the equivalent of old age pensions at an earlier age to "burnt out soldiers" will cost $2,000,000 this year and increase annually to 1937, when it will be $15,000,000. It will expire in 1975, and the aggregate cost will be $400,000,000.

An immediate outlay of $7,487,000 will be involved in replacing those on the pension list who commuted their pensions. There are 5,048 in this class. The law is made broader in widow's pensions and medical examination and this will also add to the annual cost.

New Telegraph System

Office-To-Office Connection Would Keep Messages Secret

A new system of telegraphy for London has been suggested by which messages tapped out on a keyboard, like a typewriter keyboard, in a private office, will be transmitted and automatically reprinted in the office of another subscriber. If the new system is installed a subscriber wishing to telegraph by it presses a button to call the exchange, and dials the number of the subscriber to whom he wishes to telegraph, in the same way as an automatic telephone is dialled. When the exchange signals that the connection has been made, both subscribers can typewrite to each other. Their messages will be telegraphed and re-typed automatically. [illegible]

Preparing Valuable Report

Dr. Weir Making Survey Of Conditions Regarding Nursing Profession

Dr. G. M. Weir, D.Paed, head of the school of education and director of the summer session, University of British Columbia, who is making an all-Canada survey of conditions regarding the nursing profession, has been loaned by the B.C. officials to the Canadian Medical Society and the Canadian Nurses' Association with a view to preparing a report on the educational, economic and sociological problems of the nursing profession. His head office is in Toronto.

Recipes For This Week

(By Betty Barclay)

[illegible]

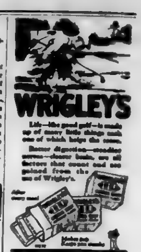
1 package lemon flavored gelatin.
1 cup boiling water.
¾ cup strained tomato juice.
3 tablespoons vinegar.
1 teaspoon salt.
¼ teaspoon pepper.
2 cups mixed cooked vegetables, finely cut.

Dissolve gelatin in boiling water. Add tomato juice, vinegar and seasoning. Chill. When slightly thickened, fold in vegetables. (A mixture of several of the following may be used: Celery, green peas, green or yellow pod beans, asparagus tips, onions or carrots.) Turn into small individual molds. Chill until firm. Unmold and serve with meat course. Serves 8.

SPECIAL DEVIL'S FOOD CAKE

½ cup shortening.
2 cups sugar.
4 eggs.
1 cup milk.
2½ cups flour.
3 teaspoons baking powder.
3 squares chocolate.
1 teaspoon vanilla.

Cream shortening and sugar together. Add egg yolks well-beaten. Sift together dry ingredients and add alternately with the milk. Add melted chocolate and vanilla. [illegible]



WRIGLEY'S

Life—like the good golf—is made up of many little things each one of which helps the score.

Better digestion—steadier nerves—clearer brain, are all factors that count and are gained from the use of Wrigley's.

Aid For Faithful Servant

Man Who Travelled With David Livingstone Gets Pension

As the result of an appeal for funds to aid Matthew Wellington, the faithful servant of David Livingstone, the explorer-missionary, he is assured of an income of $5 a week for life. Wellington is 88 and lives at Mombasa, Africa, so that the pension will care for his simple needs. Matthew was with his master at his death, helped to embalm the body, and accompanied the coffin from the wilds to the African coast. The response to the appeal from Scotland was gratifying, and the money is now being sent to the old man through the Resident [illegible] of [illegible].

Nothing As Good For Asthma. Asthma remedies come and go but every year the sales of the original Dr. J. D. Kellogg's Asthma Remedy grow greater and greater. No further evidence could be asked of its remarkable merit. It relieves. It is always of the same unvarying quality which the sufferer from asthma learns to know. Do not suffer another attack [illegible]

Extensive Program Has Been Arranged For This Season's Work In North

The growing importance of Canada's Far North is indicated in the extensive program now being arranged by the Department of the Interior through its North West Territories and Yukon Branch for its work in the Territories during the coming season. The activities and projects contemplated include arrangements for the reception and establishment of the Government reindeer herd, the enlargement of the medical service, the organization of the warden patrol in Thelon Game Sanctuary, the extension of the 1930 voyage of the Department's expeditionary ship, and the opening to prospectors of the Coppermine mineral reserve.

During the coming year most of the areas in the Northwest Territories where there are trading posts and settlements will be under active medical surveillance. Dr. Livingstone, senior medical officer, has already left for Churchill from which point he will travel by dog team to Chesterfield, where the Department of the Interior has built a house for his accommodation. He will visit all the Eskimo settlements en route. With Chesterfield as a centre, Dr. Livingstone will be in touch with Baker Lake and the other important posts in the districts on the west side of Hudson Bay. He will remain in charge of this post until the arrival of the Department's patrol ship "Beothic" early next autumn, when he will be replaced by the ship's doctor. Dr. Livingstone will return to North Sydney on the "Beothic" and will later proceed to Fort Smith, N.W.T., which is the Department's headquarters for the District of Mackenzie. At this point there is a large mission hospital, and he will take over the duties of the retiring medical health officer and have general supervision of the medical work of the district. The scattered nature of the medical work in the Mackenzie delta and Arctic coast to the east and west, under Dr. J. A. Urquhart, stationed at Aklavik, has necessitated improved means of transportation, and to meet this a motor hospital boat has been built at Edmonton and with the opening of northern navigation will be taken to Fort Smith. From this point it will proceed under its own power to Aklavik and at the same time carry Mr. J. F. Moran, chief inspector, on his annual tour of the Mackenzie district. Other departmental medical officers in the Territories are Dr. R. D. Martin, at the mouth of the Coppermine, and Dr. H. A. Stuart, on Baffin Island.

Preparations for the reception of the reindeer herd of 3,000 head, now on its way overland from Alaska, which will arrive early in 1931, will be completed this year. Mr. R. T. Porsild has arrived at Aklavik by aeroplane and will supervise the erection of corrals and buildings on the range east of the Mackenzie delta.

The Coppermine mineral reserve will be opened for staking on July 1, and Major L. T. Burwash, who made an inspection of this field in 1929, will go in by aeroplane early in the season so as to be on the ground as soon as possible. Later, if conditions permit, he will fly to King William Island to carry on further investigations with regard to the fate of Sir John Franklin.

The organization of the regular patrol of the Thelon Game Sanctuary for the protection of wild life, particularly the musk-ox, will be completed this year. Mr. W. H. B. Hoare, who returned last autumn after a twenty months' investigation of the area, will go north to superintend the erection of warden cabins at the east and west ends of the sanctuary and the establishment in the reserve of wardens and native helpers.

This year's cruise of the Department of the Interior's expeditionary ship "Beothic" will be slightly different from that of former years in order that she may enter Lancaster sound after the ice has moved out. If conditions then permit she will proceed to Winter Harbour, Melville Island and renew the supplies in the cache established by Captain Bernier, of C.G.S. Arctic, in 1908-9, which proved of such service to the northern party of the Canadian Arctic Expedition of 1913-18, and to Inspector Joy of the Royal Canadian Mounted Police during his notable winter journey of 1,800 miles, in 1929.

In addition to her usual work in carrying relief personnel and supplies to the various posts in the Canadian Arctic archipelago, the "Beothic" will take to Lake Harbour, on the southern shore of Baffin Island, sufficient lumber and supplies to erect a house for a resident officer there. This house will be occupied for the next two years by Mr. and Mrs. J. Dewey Soper. Mr. Soper will continue his investigations respecting the blue goose and its nesting ground, will survey certain parts of the shore line, and make observations in regard to terrestrial magnetism. Mrs. Soper, who is a trained nurse, will be of great assistance in cases of illness among the natives.

The services above mentioned are, it will be noted, nearly all additions to the administrative work of the North West Territories and Yukon Branch, which has been steadily growing for many years, and they show both the increased interest which citizens are taking in Northern Canada and the forethought which the Department of the Interior is exercising to ensure that the needs of the Territories will be adequately met.

Judgments Act Reciprocal

Ontario Makes Law Court Pact With Province Of Saskatchewan

The reciprocal enforcement of the Judgments act is now in operation between Ontario and Saskatchewan, according to an announcement made by Attorney-General W. H. Price.

The act was recommended in 1926 by the Dominion committee on uniformity of law and was passed by all the provinces last year, but was made subject to proclamation by order-in-council.

Ontario put through the order to make it effective on May 9, and Saskatchewan proclaimed its act on May 28. It will now be possible for a business concern to get a judgment in Ontario and collect from a person living in Saskatchewan without the necessity of suing on judgment, as was heretofore the practice.

Colonel Price stated that legislation, in his opinion, was of far-reaching benefit, and he expressed hope that the other provinces would soon see their way clear to follow in the course set by Saskatchewan. The committee on uniformity of law expressed the opinion, at the time they recommended such legislation, that general adoption and operation of it was most desirable.

Cattle In Prize Class

The highest individual price and the highest average price for the cattle from any one contributor at the recent National Holstein sale at Toronto, were secured by the six animals sent by the Canadian Pacific Supply Farm at Strathmore, Alberta. A four-year-old heifer from the herd brought $1,000, the highest price of the sale; while a young bull brought $675, the highest price in the bull class. The six animals averaged $650 as compared with $237 for the average of the 64 animals vended at the sale.

Built First Automobile

Andrew Lawrence Riker, 61, designer and builder of the first gasoline-propelled locomobile, died recently at Fairfield, Conn. In 1884, he designed and built his first automobile, an electric tricycle. He introduced the sliding gear transmission, steel frame and the four-cylinder vertical motor with high tension ignition.

The automotive industry in the United States used 47,000,000 yards of upholstery cloth in [illegible].

Labrador, often thought of as a land of the far north, is in reality no farther north than Scotland.

Winnipeg Newspaper Union Fashions

(By Annabelle Worthington).

2947

One of the most practical fashions of the season for the school miss of 6, 8, 10 and 12 years is illustrated in navy blue wool crepe with beige crepe collar and cuffs. The scallops of collar and cuffs are accented by vivid red taffeta bias binding. Matching shade red bone buttons emphasize side scalloped closing of bodice. Red suede belt completes this jaunty outfit.

Style No. 2947 is made at a remarkable saving, for in the 8-year size, it takes but 2 yards of 40-inch material with ⅝ yards of 32-inch contrasting. The bodice has a one-piece back, front in two sections. Seamed at sides and shoulders. The two-piece skirt is seamed at sides and pressed into inverted plaits at either side of front and attached to bodice. It is now practically ready to set sleeves into armholes and stitch collar at neckline.

Wool jersey in French blue with collar and cuffs of blue and white checked woolen is very smart.

Beige and brown checked woolen with plain brown is sportive.

Featherweight tweed in mauve-red tones with plain red woolen can be worn all through the Fall without a top coat.

Orchid chambray with white pique, cotton broadcloth in geometric print in red and white with plain white pique, red and white gingham check with plain white linen, and tan sports weight linen with brown are attractive tubbable fabrics.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Places Huge Stamp Order

The Chinese government has just placed an order for the printing of 2,500,000,000 stamps. The contract was secured by a London firm and is said to be the largest order of its kind ever given to a firm in England. Printing of the stamps will start at once.

Prospects For Good Trade

Fresh Milk Would Find Ready Market In Orient

Canadians of all classes are accustomed to a fine quality of fresh milk. Most of them will be astounded to learn that there are countries where such milk is not available even to people who are ill. It is another revelation of our luxurious privileges that are just taken for granted in a rich country.

Having learned that some of our surplus products of the dairy might meet a crying need in the Orient, Canadians will prudently seek to discover if some business can be done in supplying the need. It requires fourteen days for a liner to carry the milk across the Pacific to Shanghai in refrigerators. Indications are that it can be done successfully. It has been transported to London in good condition. Both China and Japan are short of milk. There is an opening for Canadian export that would be very welcome among peoples who are rapidly adopting our diet. It demands skilful executive work to place Canadian products on the distant Oriental market, but even expensive experiments offer prospects of lucrative trade and that is what will build up this country.

Rust Expert To Visit England

Dr. Craigie, Of Winnipeg, Will Spend Year In Study

Dr. J. H. Craigie, head of the Rust Research Laboratory, Winnipeg, is leaving at the end of July for England where he will deliver a paper in connection with his rust investigations at the International Botanical Congress, which is being held at Cambridge in August. Dr. Margaret Newton, of the Winnipeg Rust Research Laboratory is also attending this conference and will later visit various investigation laboratories in Britain and the continent.

Dr. Craigie plans to spend the next year at Cambridge and the other institutions studying their work and methods in connection with plant diseases while Dr. Dillon-Craig, of Cambridge, will visit the Winnipeg institution in a similar capacity for the coming year.

Dr. Craigie was recently awarded his doctor's degree at the University of Manitoba, his thesis being on his work in connection with the discovery of sex in rust fungi. His work in this connection was considered the most outstanding achievement in connection with rust investigation that has yet been accomplished.

Planning New Air Mail Line

Group Of Japanese Business Men Behind Scheme Is Report

A project of inaugurating a regular passenger and mail air line between Japan and the United States and Canada to shorten the distance between the continents to three days, is reported to have been organized by a group of Japanese business men and financed at a capitalization of $75,000,000. Four huge airships, resembling the Graf Zeppelin, which encircled the globe last year, are expected to be employed for the regular air trips.

The Japanese Government has been officially asked for the necessary permits and those behind the enterprise say they propose to go right ahead with their preparations. Seiji Hoshino, noted Tokyo business man and one of the promoters, says the plan was projected last year shortly after the visit of the German dirigible. The single fare for a passenger, he said, would be $1,500.

Deaths in civil aircraft accidents in England last year totalled 33.

Increase Of Wild Life In Canada's National Parks Proves Sanctuaries a Success

A dispatch to the Commissioner of National Parks, Department of the Interior, from A. Bryan Williams, Game Commissioner of British Columbia, announces the safe arrival of the carload of elk recently shipped from Buffalo National Park, Wainwright, Alberta, to the Queen Charlotte Islands. The animals are a donation by the Dominion to the Provincial Government for restocking purposes on those islands. They were captured from the wild elk herd, now numbering over 600, roaming the Buffalo reserve and were particularly fine specimens of their kind. They were cut out of the main herd by the park riders, corralled until safe to handle, and then placed in specially constructed crates. Through the co-operation of the Canadian National Railways, a special baggage car was provided which was attached to the regular passenger train for Prince Rupert, and went through express to that port. Here the elk were transferred to a boat sailing to the Queen Charlotte Islands. No loss or injury was sustained in transit and according to the report the animals are already settling down and adapting themselves to their new surroundings.

The successful transfer of wild animals as large as these by rail and water for over 1,000 miles was in itself an achievement, but the greatest interest attached to the undertaking lies in its significance from the conservation point of view. A scientific philosopher has described this era as the close of the age of mammals. From every part of the world in the last quarter of a century have come reports that wild life was being destroyed at a far greater rate than it could reproduce itself. The inevitable spread of civilization, with its concomitants, the breaking up of land, draining of swamps, felling of forests and many other operations has been destroying the world over the natural homes of big game. In recent years, too, the forces of destruction due to mechanical invention and greater facilities of transportation have increased enormously, and disastrous inroads have been made in many species.

A few years ago there was organized in England a conservation movement known as the Society for Preservation of the Fauna of the Empire. Its president, the Rt. Hon. the Earl of Onslow, in reviewing the depletion of wild life throughout the Empire today, stated that the only satisfactory method of ensuring the preservation of wild animals in the far distant future is by the formation of sanctuaries or the establishment of national parks. As an example of what could be accomplished, he cited the policy of the National Parks of Canada.

It will be recalled that about twenty years ago the national parks of this country were made game sanctuaries not only in name but in fact. An adequate system of warden patrols was established and the regulations rigidly enforced. As everyone knows the results have surpassed the most sanguine anticipations. Sheep, goat, bear, elk and deer, which had practically disappeared from these regions, have now come back in such numbers that the parks have become the wild life reservoirs of the West. The British Columbia Government has been drawing on them to restock its own depleted game areas. Two regions in the southern part of the province in recent years have been stocked with Rocky Mountain sheep—that much prized trophy of the sportsman. Two or three years ago a herd of elk was also shipped from Buffalo park to re-stock areas between the Okanagan and Kettle valleys. The National Parks of Canada have also been able to furnish from their increasing stocks, big game animals for zoological exhibits or as nuclei for conservation experiments in various parts of the world.

These results prove clearly the truth of Lord Onslow's contention in a recent report, that an ultimate world bankruptcy in wild life need not be accepted as inevitable. While adequate protective measures, he pointed out, will help to maintain the stocks, it is only through the creation of national parks such as have proved so successful in Canada, that the final rescue of many species can be assured. Canada, he declared, in setting an example in conservation to other countries and its abundant success is a happy augury of what others may achieve.

Scottish Ayrshire Export Trade Grows

Canada and States Taking Large Consignments Of Cattle

Scotland is rapidly developing an important export trade in Ayrshire cattle, the country's native dairy breed. The other week a consignment of 19 pedigree beasts, mainly from Ayrshire, was sent to Ontario, [illegible].

Hugh Bone, secretary of the Ayrshire Cattle Herd Book Society, says that the export trade has increased greatly in last two years. He added: "We have exported 172 head of Ayrshire cattle since the end of March, and as the average price is between £90 and £100 a head it is obvious that the trade is a very valuable one. Last year we presented 30 head of Ayrshires to the University of British Columbia to form the nucleus of a herd there, and since then two more consignments have gone there. Canadian and American dairymen are the best foreign customers for Ayrshires. They find that our cattle can produce milk with a higher butter fat content on small rations. Three Ayrshires can thrive on poor land where only two cows of other breeds could."

Young Poultry Fanciers

Fourteen Boys' and Girls' Clubs In Armstrong, B.C.

Armstrong, in the Okanagan Valley, holds the record among the towns of British Columbia, if not of Canada, for juvenile poultry fanciers, having no less than fourteen boys' and girls' poultry clubs with a membership of 120. This is largely due to the enthusiasm and organizing ability of G. W. Game. The majority of these young folk met in conference recently. They had a very enjoyable and profitable time, and, as they posed for a group photograph, they made an inspiring spectacle, boding well for the future of the industry in the premier poultry province.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

WORLD HAPPENINGS BRIEFLY TOLD

Sir John Simon, head of the recent British commission to India, plans to return to India August 3, aboard the "Duchess of Atholl."

French ports of Calais, Boulogne, Havre Dieppe and Cherbourg are reported well satisfied that the British Government has decided against a tunnel under the English Channel.

Carol Caraiman, citizen, has become King Carol II. of Rumania, by a vote of the Rumanian parliament, which lacked only one of being unanimous.

Andrea Macedo, a Portuguese, sailed from Morocco, June 8, for New York, in a 20-foot sloop named the "Aulo. He was the lone passenger, sailor and navigator.

Amy Johnson, whose lone flight to Australia has roused the British, has been given $50,000 by Lord Rothermere's Daily Mail in recognition of her performance.

Two hundred members of the Agrarian Producers' Union, of the Argentine, will arrive at Victoria, B.C., on September 14, to commence a tour of [illegible].

The Prince of Wales and Prince George have both entered 'planes in the King's cup air race to be held July 5. Squadron Leader Don, who has been the Prince of Wales' pilot on recent flights is expected to fly the royal heir's entry.

For the first time an aeroplane will be used for inspection of Indian agencies and reserves in the Mackenzie River district. Inspector C. C. Parker, of the Department of Indian Affairs will leave Waterways, Alberta, early in July, his most northerly objective being Herschel Island.

Western Canada New Mecca

Request For Information Received From United States Motorists

Motorists in many parts of the United States, having exhausted the possibilities of travel in Eastern United States, are now looking to Western Canada as their new Mecca. This was the frank statement in a letter received by the local office of the Saskatchewan Motor Club from its Southern Illinois affiliation, the Auto Club of Egypt, which urgently requested a generous supply of maps, booklets, holiday and road information concerning Saskatchewan.

A Century Old Song

That fine old song "Rocked In the Cradle Of the Deep"—a perpetual challenge to basses—was written by Emma Willard, nearly one hundred years ago. Emma, an american poet of note in her day, wrote it on July 14 1831, after a violent storm at sea during a voyage she made aboard the good ship "Sally," says Thomas F. Madigan (in "Word Shadows Of the Great"). So that she was one person at least who went to sea before writing about it.

In the first three months of this year 10 British army aviators were killed in five crashes.

Jubilee Impressions

A Few Reasons Why Manitoba Is Holding Celebration

The enthusiasm with which the people of Manitoba are preparing to celebrate the Diamond Jubilee of the Province, on July 15 next, might lead an outsider unfamiliar with our progress and development, to enquire what it was all about. He would need to be told that the Province was formally admitted into the Canadian Confederation on July 15, 1870, and that the present generation was showing its pride and satisfaction at what had been accomplished in the sixty-year period.

The outstanding fact in connection with Manitoba's history as a Province is that her people have practically achieved the impossible in the production of foodstuffs. One need not go far back into the annals of the nineteenth century to find a positive and emphatic declaration of opinion on the country's resources, from a man whose position should have given him the right to speak with authority. He was foolish enough to insist, on more than one occasion, that wheat would never grow in any place more than ten miles from the Red River. His cue was taken up by many lesser "authorities," and the whole territory was apparently doomed and damned as a source of cereal food supplies. What has been the real situation? Manitoba wheat has secured a firm position of leadership in the markets of the world, and has held that distinction for more than forty years. Without desiring to reflect in any way upon the fertility of the Red River district, it may be added that most of the wheat is produced much more than ten miles from that famous waterway. Oats and barley add their testimony in rebuttal of the foolish prophecies of men who should have realized the value of silence. The cultivation of grain, in fact, has provided the foundation for Manitoba's progress. Farmers who knew their business came here from other lands, mostly from Ontario, to take a look at the soil and examine the other elements of crop production. In nearly every case one look was enough. Those who stayed and worked with energy and determination, succeeded in establishing forever the reputation of this Province as a centre of high-class agricultural prosperity. They were not daunted by weird tales of visitations of grasshoppers, drought, frost, hail, floods and all the other torments of the "crape-hanging" era. Nor did they flinch on the rare occasions when they encountered these torments, singly or in combination. They persevered and won through, perhaps they did not realize at the time that they were "achieving the impossible."

The dire predictions regarding the possibilities, or rather the impossibilities, of grain production were repeated and multiplied when it came to the consideration of other items relating to human sustenance. They were, it seems, to be disregarded as possible factors in the economic life of the new Province. Could live stock, for instance, be expected to survive in a land where even the buffaloes, with unlimited grazing areas at their disposal, found it difficult to exist? Absurd, according to the wiseacres of that day. But the agricultural pioneers did not agree with them. They "knew their onions," but they knew even more about their hay and grass, and chopstuffs, and strawstacks and shelter and stabling. They knew, too, that if a little care were exercised in choosing the proper breeds, and some degree of special attention were accorded the stock during the comparatively short periods of abnormal winter weather, good results could be obtained. The justification of their faith is to be found in the prize distributions at leading stock fairs throughout Canada and the United States during the past thirty years. Manitoba cattle have held their own with the best that could be produced anywhere. It is a matter of gratification to the people of Manitoba that her first citizen, his Honor the Lieutenant-Governor James Duncan McGregor, has risen to his eminent position in the community largely through his success as a breeder of pure-bred cattle. That success has been due to intelligence, persistence, hard work and a refusal to believe that "it couldn't be done."

The story is [illegible] in regard to other phases of farm activity. Who is there among the middle-aged people of Manitoba who does not remember the day [illegible] butter from Eastern Canada was considered essential to human existence here? A quarter of a century ago it was almost impious to suggest that this Province should manufacture its own butter. Today the Manitoba [illegible] is known and appreciated all over Canada, and in many [illegible] markets as well. During the past ten years it has won most of the cups and prizes at leading exhibitions in every part of the Dominion, and has set a standard in the manufacture of butter which is a model for creamerymen in all the other provinces. As for eggs, the leading authority in the Dominion is on record with the statement that for excellent flavor and food value the product of the Manitoba hen is invaluable. Honey represents another instance where local achievement in the matter of quality has crowded out [illegible] article. The canny housewife who buys a pail or jar of Manitoba honey knows she is getting the best that is to be had.

The refusal to lie down or retreat in the face of serious problems has always been a characteristic of Manitoba pioneers, and luckily that fine spirit [illegible] in most of their [illegible]. Courage, [illegible], enthusiasm, perseverance and idealism, coupled with a lavish expenditure of muscular energy and perspiration, has gone far towards giving Manitoba so proud a place in Canada and in the Empire. Incidentally the prophets of famine and starvation have been put to shame. That in itself is worth while.—Old Timer.

No Longer a Mystery

New Zealand Trade Commissioner Knows Why Canada Imports Sausage Casings

"Until I went to Canada in 1926, I could never understand why the Canadians spent so much money in importing sausage casings from New Zealand—about £70,000 pounds a year it is now," said Mr. J. W. Collins, New Zealand Trade Commissioner to Canada, at the Auckland Chamber of Commerce luncheon.

"I found the explanation when I landed at Vancouver, and went to a football match. I was accosted by a small boy, who solicited business in these words, 'Hot Dogs, 10 cents. Good for folks.'

"In my travels through Canada I soon came to realize the enormous production and sale of the so-called 'hot-dog,' and I did all I possibly could to increase the production of that delectable food. When I am among the Canadians again, I am going to use my best efforts to induce them to put in a bit of butter with the bread and mustard that always accompany the 'hot-dog.' If they do, it will mean at least another 10,000 tons a year of sausage casings from New Zealand."—Morning Herald, Auckland.

Protection For Air Pilots

Royal Air Force Is Introducing Fireproof Clothes and Wings

Fireproof clothes for airmen and fireproof wings for their machines are to be introduced in the Royal Air Force. It is expected that as a result the tragic toll of deaths following airplane crashes will be reduced to a minimum.

A cheap and easily made fireproofing solution has been discovered for treating clothes and other fabrics.

It is a mixture of borax and boric acid, and is said to be so effective, that when a four-ounce cotton fabric was treated, it could not be ignited by a naked flame.

The Fabrics Co-ordinating Research Committee has already approved the solution's use.

Fast Travelling

George McDougall, a member of the Regina Flying Club, left for Winnipeg one afternoon recently, with W. Corson, in a Moth 'plane arriving in Winnipeg at 7 o'clock. Half an hour later he climbed aboard the mail 'plane for Regina arriving at 10:20, have made the round trip in eight hours.

"You're a dear, sweet girl," sighed the despondent suitor. "God bless and keep you! I wish I could afford to."

One shipyard in Glasgow, Scotland, now is employing 7,000 men.

Cutworm Outbreaks, 1930

Are Present In Exceptional Numbers and Over Wide Areas

(Kenneth M. King)

The cutworm outbreak which was predicted for this spring is materializing in very serious proportions and over wide areas. Two types of cutworms are involved.—The Red-backed cutworm group generally throughout the park belt, and the pale western cutworm in a few districts as detailed below. It is important to distinguish between these two kinds, because of a marked difference in means of control. These cutworms are present in exceptional numbers, and the early hatching and generally dry conditions of this season are [illegible] a heavy rate of damage, although the [illegible] of the [illegible] the cutworms.

Districts Involved:—The Red-backed cutworm seems to be [illegible] abundant this year in the bush country, throughout the park belt, and into the [illegible] of prairie [illegible]. It is particularly destructive in gardens and to the broad-leaved crops, [illegible] may also be seriously damaged.

The pale western cutworm occurs in two areas.—(1) It is [illegible] abundant this year in south central Saskatchewan in the heavy soil of the [illegible]. The outbreak [illegible] Balcarres, Indian Head and Rouleau on the east to Moose Jaw, and possibly to Eyebank and Central Butte on the west. Southwardly, it probably extends to the International Boundary, in the heavy soil. (2) An outbreak is also expected in extreme western Saskatchewan, especially around Alsask, extending possibly to Madison, on the east, and Maple Creek in the south.

How To Distinguish.—Cutworms can be readily distinguished by their soft round bodies, and their habit of cutting off the plants completely at or near the surface of the ground. The only other spring pest of similar type of [illegible] is the wireworm, which can readily be distinguished by its smaller, hard, [illegible] yellow body, and the fact that it attacks the seed and lower stem, seldom cutting off the plant completely.

It will be noted that the two types of cutworms mentioned may both be abundant in certain districts. The red-backed cutworm may be readily distinguished by the definite coloration,—usually a dull red,—upon the back, and the distinct lines lengthwise of the back. The pale western cutworm is almost colorless, except for the slight color given by the food and other contents of the body; it usually has a very greasy appearance.

Control Measures:—Red-backed Cutworm: Poisoned bran bait is a very effective and practical means of control, either in gardens or in large fields, for all cutworms of the red-backed type. The important thing is to watch the fields closely and use the bait in time to save the crop. If a field is ruined, use of the bait will permit immediate re-seeding safely.

Three things are essential in using this bait for cutworms:—(1) The bait must be put out in the evening, since it is only at night that these cutworms come above the surface to feed. (2) A warm night should be chosen, if the thermometer registers less than fifty degrees Fahrenheit at sundown, it will be too cool to secure a good [illegible] results are secured when the surface soil is moist. (3) The bait should be evenly spread over the surface, since the worms must come in contact with the bait in order to feed on it: a very thin application, 20 to 30 pounds per acre, is sufficient.

The bait is prepared as follows:—Bran, 20 pounds. Paris Green, ½ pound (or white arsenic, 1 pound); cheap molasses, 1 quart; water, 4 or 5 quarts.

The dry bran and poison are first thoroughly mixed together (keeping mouth and nose covered with a damp cloth, during the process). The molasses should be dissolved in the water, and this mixture then slowly stirred into the poisoned bran until it is thoroughly [illegible] and free from lumps. CAUTION.—Keep any unused bait or poison out of the way of children or animals.

Pale Western Cutworm:—Poisoned bran bait has not proved effective against the pale western cutworm; (hence the special importance of distinguishing it from the red-backed kind). In fact, there is very little that can be done. [illegible] fields are heavily infested by the pale western cutworm, except to avoid waste of seed by delaying re-seeding until the cutworms have ceased [illegible]. These cutworms migrate very little, even when a field has been eaten bare, and cases are known in which 4 or 5 seedings have been destroyed in the same field in one spring. This year, re-seeding will [illegible] be safe about the end of June: this is, of course, too late for most crops, but barley may perhaps be used, or oats for green feed or hay.

Where only parts of a crop are destroyed by this cutworm, the remainder may be partially protected by ploughing a deep furrow around each undamaged area.

Reports and Queries.—Circulars giving fuller information about either or both of these types of cutworms may be had upon request.

Immediate reports of any important outbreaks which may occur in your district would be welcome.

Reports or queries may be addressed either to the Department of Agriculture, Regina, or to the Dominion Entomological Laboratory (University of Saskatchewan), Saskatoon.

Large Entry From B.C.

Canada will have on display at the Crystal Palace, London, England, during the fourth World's Poultry Congress, July 22-30, a grand total of 863 birds, with 452 exhibition birds and 344 production birds. The remainder will be made up of ducks, geese, and pigeons. A few specially good rabbits are also being sent forward. British Columbia's entries total nearly half of the production breed birds.

A Nevada man has invented an automobile attachment that flashes a lamp on the instrument board of a car when a tire is punctured.

SUNDAY SCHOOL LESSON

JUNE 22

THE RISEN LORD AND THE GREAT COMMISSION

Golden Text: "Go ye therefore, and make disciples of all the nations."—Matthew 28.19.

Lesson: Matthew 28.1-20.

Devotional Reading: Psalm 116.1-9.

Explanations and Comments

The Empty Sepulcher and Its Message, verses 1-6.—The Gospels do not describe the [illegible], they report it simply and briefly. Matthew tells of the visit of Mary Magdalene and the other Mary to the sepulcher late on Saturday, the Jewish Sabbath, as Sunday, the first day of the week, began to dawn. Mary Magdalene [illegible] Magdala, a city on the [illegible] of the Sea of Galilee, [illegible] had been freed from "seven demons," Luke 8.2, and who is often wrongly confounded with "the woman who was a sinner," Luke 7. "The other Mary" was the [illegible] of James, Mark 16.1. These two had been present at the crucifixion and the [illegible] 61.

Matthew adds here, what no other Evangelist does, that there was a great earthquake, and an angel rolled the stone away and sat on it. His appearance was dazzling like lightning, and his raiment white as snow; through fear of him the watchers trembled and became as [illegible] dead men. The Greek word for angel means "one who is sent as a [illegible]." The angel "answered" the look of amazement and fear of the women and said "Fear not ye, for I know that ye seek Jesus who hath been crucified." "The 'for' gives a reason for the soothing tone of the address. The angel recognizes them as friends of the Crucified."—A. B. Bruce. Then he added the amazing news: "He is not here, for He is risen even as He said." See Matthew 12.40; 16.21; [illegible] 23. "Come," he further added, "see the place where the Lord lay." The condition of the tomb as seen by Peter and John is described in John 20.5-7.

The Glad Message, verses 7, 8.—They were not to stand long in mute amazement, but were to carry the glad news to others: "Go quickly, and tell His disciples, He is risen from the dead, and lo, He goeth before you into Galilee, there shall ye see Him: lo, I have told you." Recall His promise to His disciples Matthew 26.32.

"The Lord is risen indeed,
He is here for your love, for your [illegible]
Not here in the grave, nor the sky,
But here [illegible] and [illegible];
And true the [illegible] was [illegible]:
'Why seek ye the living among the dead?'"

Richard Watson Gilder.

The Final Interview and Commission, verses 16-20.—"All authority hath been given unto Me in heaven and on earth", in these words Jesus [illegible] His royal authority: His right to command rested upon the fact that He is King. The future of His Kingdom was His supreme concern, and He proceeded to issue His royal command "Go ye therefore, and make disciples of all nations, baptizing them into the name," i.e., confessing the name, "of the Father, and of the Son, and of the Holy Spirit, teaching them to observe all things whatsoever I commanded you."

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

51 Wellington St. W. TORONTO, ONT.

LARGER VOLUME OF IMMIGRATION FROM BRITAIN

London, England.—Despite a decrease in the volume of British emigration to other parts of the Empire in 1929 as compared with 1928, emigration to Canada showed a substantial increase, according to the report of the overseas settlement committee, made public today. The report is confined to a statement of events in 1929 and it is presumed the general policy of the Empire governments with regard to overseas settlement will be discussed at the Imperial Conference in October.

During 1929 the total number of emigrants from Great Britain and Northern Ireland to non-European countries was 143,686, compared with 136,834 in the preceding year. Notwithstanding this increase in the total migration overseas the total who went to other parts of the Empire was 106,900 in 1929.

The figures for 1930 were 108,952. The number assisted to go overseas under the Empire Settlement Act increased from 47,888 in 1928 to 72,218 in 1929.

The substantial increase in the movement to Canada was due to the ten pound rate, the report states. The total movement to Canada was 66,366, compared with 46,799 in 1928. There was a decrease in the movement to Australia.

The report describes the scheme for settling 3,000 families on farms in Canada, which started in 1924, and is now completed, as the most successful large scale enterprise yet undertaken under the Empire Settlement Act.

New Order For Stockyards

May Be Permitted To Do Business In Restricted Areas

Ottawa, Ont.—Public stockyards were excluded from the restrictions placed on a designated area while testing for bovine tuberculosis is conducted, by an order-in-council passed by the Federal Government. It will [illegible] that the Minister of Agriculture may issue an order that a public stockyard in a restricted area may be permitted to carry on its business just as if the area had not been established.

Saskatoon is the only place in Canada affected at the present time, officials of the Department of Agriculture said. While no order had been passed affecting the stock yards in that city, one is expected, they said.

When tests of bovine tuberculosis are being conducted in a specified area, there can be no movement inward except that of tested cattle. Stockyards protested that this worked an injustice on them and that it seriously affected their business. This led to the order-in-council which excludes them from the restrictive terms.

Contracts End In December

Married Women Will Not Be Employed In Winnipeg Schools

Winnipeg, Man.—Married women will not in future be employed as teachers in Winnipeg schools, it was decided at a meeting of the school board.

Married women now employed will be given notice that their contract will terminate December 31, 1930, unless exceptional circumstances prevail to warrant continued employment after that date.

It was also decided, in view of the existing unemployment situation, that the board will "record its disapproval of the acceptance by its employees of remunerative vocational employment."

Apply For Oil Leases

Prince Albert, Sask.—Saskatchewan's [illegible] oil [illegible] is apparently gathering momentum. The Dominion land office here has received two applications for oil leases on two sections of land in the vicinity of Kakwa, 17 miles south of Hudson Bay Junction, where oil and natural gas was struck by water well drillers recently. The applications have been forwarded to Ottawa for approval.

'Plane Carried Huge Sum

Miami, Fla.—An aeroplane bearing two million dollars in cash arrived here from Jacksonville to meet financial situation caused by the closing of the Bank of Bay Biscayne and four others. President Rohil of First National announced the money would be used through other Miami banks to pay off all concerned in the closed houses.

Underworld Haunts Raided By Police

Six Hundred Suspects Are Arrested By Chicago Squad

Chicago, Ill.—Nearly 600 alleged hoodlums were rounded up as a special "strong arm" police squad slashed into underworld haunts, bent on ridding Chicago "for all time" of criminals.

Stirred to drastic action for solution of the murder of Alfred ("Jake") Lingle, Tribune reporter, and other gangland slaughters, the squads, armed with shotguns, revolvers and tear bombs, crashed the thug hangouts with a vengeance. Patrol wagons, loaded, began arriving at police headquarters in a stream shortly after 10 p.m. and at midnight there was no sign of a let up.

The prisoners poured in so fast that the attaches of the bureau of identification were swamped and extra details were called on to assist in the work of booking.

As soon as word of the raids was circulated, a veritable swarm of attorneys, bondsmen and others interested in seeking liberation of the suspects also descended on headquarters, but their efforts came to naught, bail being refused in each instance.

Jury Acquits Oliver On Assault Charge

Son Of Ex-Premier Of B.C. Found Not Guilty

Vernon, B.C.—It took less than 20 minutes for the assize court to bring in a verdict of not guilty against Charles Oliver, son of former Premier John Oliver, charged with assaulting Dr V. E. Latimer, in Penticton, last November 28. It was almost a foregone conclusion following the address of Chief Justice Morrison to the jury that Oliver would be acquitted and a murmur of satisfaction ran around the packed court room when the verdict was given.

Only four witnesses for the crown were examined and little time was lost by Hon. R. L. Maitland, K.C., chief defence counsel in cross-examination. Mr Maitland put in no defence but immediately opened his address to the jury.

The jury retired at 3.40 p.m. and rendered their verdict at 4.00 p.m.

Legion Objects To Fiction War Books

Condemns Those Not Founded On Actual Facts

Cardiff, Wales.—War should in no circumstances be made the subject of works of fiction, was the view expressed at the annual conference of the British Legion here.

War books came in for a good deal of criticism and a resolution was adopted condemning books in which the author does not draw on actual facts and personal experiences. The elimination of war as a subject for fiction was urged as a measure of respect for dead and maimed soldiers.

Another resolution urged the council of the Legion to take steps to counter the "[illegible] propaganda" contained in books which slandered the character of Great Britain and belittled the principles for which she entered the war.

Greeted By Home City

Hon. R. B. Bennett Receives Rousing Welcome In Calgary

Calgary, Alta.—Hon. R. B. Bennett is back at his western home after firing the opening gun of his election campaign at Winnipeg, followed by a second speech at Regina. The Conservative leader arrived in Calgary at a late hour, but a large crowd was on hand to greet him at the station and wish the opposition chieftain success in his campaign.

The assemblage cheered the Conservative leader time and again, and they lined up to shake him by the hand. The Calgarian Highlanders, of which Mr. Bennett is honorary colonel, were on hand and rendered music of welcome.

Survey Planned For Fall

Churchill.—Surveying of the townsite of Churchill will be done by the province of Manitoba, next fall, and construction will start next summer, Hon. D. G. McKenzie, Minister of Mines and Natural [illegible], stated here.

Could Not Be Prevented

Boston.—No practical measures have been suggested which could have prevented or minimized the force of the 1929 stock market panic, according to Richard Whitney, president of the New York Stock Exchange.

Settles Old Dispute

[illegible] Not Liable For Militia Expenses During Strike

Ottawa, Ont.—The Province of Nova Scotia is "not liable to pay to His Majesty in the right of the Dominion all expenses and costs incurred by reason of the calling out of part of the active militia in aid of the civil power in Cape Breton" during June, 1925. This was the majority judgment of the Supreme Court of Canada, delivered by the chief justice here Mr. Justice Newcombe dissenting, and Mr. Justice Cannon finding that liability was "conditional."

This settles a five-year-old dispute between the Dominion and the province in which the Dominion claimed reimbursement in the sum of $120,116.73, the cost of despatching and maintaining troops of the permanent force in Cape Breton during the coal-miner strike of 1925.

Trans-Atlantic Trip Is Postponed

R-100 Not Coming To Canada Until End Of July

Ottawa, Ont.—The R-100 will not begin her trans-Atlantic trip to Canada until after the general election on July 28. This was conveyed to the Minister of National Defence, Hon. J. L. Ralston, in a cable received here from the British Government.

The postponement of the dirigible's flight is in accordance with an agreement between Canada and Great Britain.

The start of the flight will be made during the last three days of July, the cable said.

PRINCE MAKES HIS FIRST WORLD-WIDE BROADCAST

Glasgow, Scotland.—Making his first world-wide radio broadcast, the Prince of Wales, standing on the famous Clydebank wharves on the occasion of the launching of the Canadian Pacific Railway liner "Empress of Britain," said the building of the new liner was the most important milestone in the recent history of the British mercantile marine.

The vessel, the Prince said, represented the last word in shipbuilding and as to appointments would be found to have no rival. The building of what the Prince described as "this wonder ship" was another sign of the sound imperial policy of the Canadian Pacific Railway.

His Royal Highness went on to say the C.P.R. had built 16 vessels in Great Britain since the war at a cost of £20,000,000 and this when shipbuilding in Great Britain was at a low ebb.

Winnipeg, Man.—Radio brought the voice of His Royal Highness the Prince of Wales from Great Britain to Western Canada as clearly as though he had been speaking directly through the microphone at one of the big Canadian stations. Listeners-in all over the Prairie Provinces heard the heir to the British throne launch the new Canadian Pacific liner "Empress of Britain," his companion speakers being Lord Aberconway, British shipping magnate; and E. W. Beatty, K.C., President of the Canadian Pacific Railway.

Reception through CJRX at Fleming, Sask., and CKY, at Winnipeg, two units in the chain of 91 stations in Canada and in the United States that received the broadcast over beam wireless from England to Yamachi, Quebec, was excellent, and enabled newspapers to take verbatim the report of the speeches of His Royal Highness and Mr. Beatty.

VISITING CANADA

Mrs. Ralph Booth, wife of Captain Ralph Booth, who will pilot giant dirigible across the Atlantic to Montreal, is now staying in Toronto, Ontario.

Ships Collide In Fog

Many Lives Lost When Passenger Steamer Rams Oil Tanker

Boston, Mass.—Flaming oil, spurting from the depths of a stricken oil tanker, believed to have been the "Pinthis," of Fall River, was thought to have claimed the lives of more than 40 persons aboard that ship and the passenger liner "Fairfax," outbound from Boston, when they collided in Massachusetts Bay.

So suddenly did the tragedy occur that not a single survivor of the tanker was believed to have escaped the fog-shrouded inferno which followed the impact.

At least a score of the "Fairfax's" passengers and crew were unaccounted for while the "Pinthis" carried a crew of 19.

Aboard the big passenger liner scenes of wildest confusion succeeded the shock of the crash. Men and women, believing the ship doomed, hurled themselves into the sea only to perish amidst the raging oil which poured from the tanker in all directions. Others were burned in their berths by the white heat of the fire which seared the port side of the ship.

The flames which swept both craft melted their radio antenna and temporarily ended possibility of summoning aid. The tanker, afire from stem to stern, settled slowly into the water plunging from sight 30 minutes after the crash.

Ship Receives Page Of "Evening World"

Was Sent By Radio and Picked Up Intact

New York.—For the first time a newspaper has been spread out on waves of ether and picked up intact by a steamer at sea.

The experiment was successfully concluded when the first page of the Evening World was sent to the United States liner "America," at the moment 2,310 miles from New York. The paper was sent by the Radio Corporation of America's new photo-radio apparatus.

A mysterious cylinder, with purple ink, spun out intact the newspaper page that had appeared on the sidewalks of New York. Pictures and type were reproduced as clearly as the city, while the steamer was nearing her port of call, Plymouth, England.

Three Subs Launched

Barrow-in-Furness, Eng.—Three submarines for the British Admiralty—the "Regulus," "Regent," and "Rover"—were launched at one shipyard here within the space of 24 minutes.

First Bride on New Ship

When the new Canadian Pacific coastal steamship "Princess Elizabeth" was being welcomed to Vancouver recently with a civic luncheon, at which city and port officials praised the company for its initiative and foresight in building up such a fine coastal fleet, Mayor W. H. Malkin, Vancouver port superintendent, promised to present the first bride who travelled on the new ship with a bouquet. So when Mrs. L. Goodge boarded the ship with the groom, she was duly handed a bouquet by George Fitch, secretary to His Honor, as the first honeymooner to take the Vancouver-Victoria trip on the "Elizabeth." Picture shows, left to right, Captain R. W. McMurray, marine superintendent, B.C. Coast Steamship Service; L. Goodge and Mrs. Goodge, and Mr. Fitch.

Successor Not Appointed

Australia Has Not Yet Chosen New [illegible]

Canberra, Australia.—In well-informed political circles it is stated Lord Somers, governor of the State of Victoria, will act as governor-general of Australia for about six months after the departure of the retiring Governor-General, Lord Stonehaven, in October.

The reason given is that Premier Scullin has asked to have the appointment of Lord Stonehaven's successor deferred in order to enable him to consult the Dominions office when he is in London attending the Imperial conference in October.

Some time ago the appointment of a native-born Australian to the post was mooted and the name of Rt. Hon. Sir Isaac Isaacs, chief justice of Australia, was mentioned. Premier Scullin at the time said there was nothing to prevent the appointment of an Australian.

Winnipeg Lawyer Going To Norway

Will Represent Government Of Canada At Coming Celebration

Winnipeg, Man.—James C. Berg, Winnipeg barrister and a prominent worker in Norse societies for many years, received word of his appointment by Premier Mackenzie King as representative of the Dominion Government to the celebration of the nine hundredth anniversary of the introduction of Christianity into Norway, to be held at Trondhjem, Norway, in July and August.

Mr. Berg is the son of one of the earliest Norwegian settlers in western Canada. Representatives of Saskatchewan, Alberta and British Columbia governments are expected to sail with Berg, early in July.

Simple Service For Late F. E. Trautman

Many Attend Funeral Of C.P.R. Official At Fort William

Fort William, Ont.—Impressively simple obsequies were held here for the late F. E. Trautman, for the last 18 years Canadian Pacific Press representative in Western Canada.

He was buried in the city where a large part of his career as a pioneer western newspaperman was passed as editor of the Fort William Times-Journal.

The cities of Port Arthur and Fort William were officially represented as was the railway company, and a large number of private citizens also paid their last respects.

Interment was made in the family plot in Mountain View cemetery.

FIRE DESTROYS GRAIN ELEVATOR AT PORT ARTHUR

Port Arthur, Ont.—Three hundred thousand dollars damage is estimated as result of the destruction by fire of the Union Terminal Elevator workhouse. The building broke into flames from unexplained cause and the conflagration raged for more than ten hours before it was brought under control.

Thousands of lake-head residents, roused from their beds by the crackling of flames and the commotion caused by the action of all available fire-fighting equipment, gathered at the scene. The reflection of the flames, which swirled to 100 feet in the air, cast a red glow over the entire lake-front in the darkness.

Estimate of the damage was unofficial, as the head offices of the company are in Winnipeg, and representatives at the lake-head would hazard no figure as probable loss.

Fifty thousand bushels of grain stored in the work-house were destroyed as the flames roared through the structure, spurning efforts of firemen to place it under control. Eleven empty box cars belonging to Canadian Pacific and Canadian National Railways took fire on the siding adjoining the burning building and were completely destroyed.

Winnipeg, Man.—Officials of Union Terminal Limited, refused to estimate loss as the result of fire destruction of the company's work-house at Port Arthur. It was stated at the head office here that "absolutely no figures are available."

Only the cement tanks of the Union Terminal plant remain intact. The grain they contained may be ruined by heat. The watchman had a narrow escape getting out in the darkness after the light went out. Heat from the burning pile was intense.

CROP REPORTS ARE WATCHED IN OLD LAND

London, England.—The truth about the Canadian wheat crop is anxiously awaited here because of despatches from Canada giving rise to the impression that there will be a shortage and that the price will be higher in the Old Country this coming winter.

The Winnipeg correspondent of The Daily Telegraph cables that Canada is faced with the prospect of another short wheat crop, adding "this important information was not obtainable from the Wheat Pool because of their attitude that 'we told the truth last year and the world would not believe it, now the world can find out for itself.'"

He reports, too, that the Canadian farmer resents being called a Shylock because he wants a price for [illegible].

This despatch to The Daily Telegraph contrasts with the optimistic [illegible] statistics, and has left the public here in doubt as to what prospects really are.

If the Canadian wheat crop is short and the price of bread rises, there will be an outcry by the protectionists and the Empire free traders for an understanding with Canada, and they will use this fact to advocate protection against Argentine wheat in favor of Canadian.

Mail 'Plane Badly Damaged In Crash

Two Passengers From Calgary Cut By Flying Glass

Moose Jaw.—An air "bump" under the left wing of a mail 'plane caused it to drop 10 feet to the ground, collide with the flood light at the east end of Moose Jaw flying field, and flop onto its back. Two passengers, R. V. Price and F. A. Ogilvie, both of Calgary, and proceeding to the Lions' convention at Regina, were cut by flying glass.

The 'plane, Boeing CF-A10, was badly damaged, two wings, the tail plane and the engine mount being bent and twisted. Work of repairing [illegible] morning.

Major Thompson, superintendent in charge of the Western Airways plant at Moose Jaw flying field, stated the accident was unavoidable and that the pilot was in no way to blame for what had occurred. "It was just one of the bad 'breaks' which happen," he said.

Will Visit Native Land

Two Hundred and Fifty Icelanders Will Attend Celebration In Homeland

Winnipeg.—Two hundred and fifty Icelandic residents of Western Canada, most of them from Minnesota, left here by special train for Montreal, where they will embark for their homeland to attend the millennial celebration of the Icelandic parliament. Hundreds of their compatriots crowded into the station to give the party a royal send-off.

They sail from Montreal on the Canadian Pacific liner "Montcalm."

Prominent in the party were Hon. M. G. Bjornson, of St. Paul, who will represent the state of Minnesota at the celebration, and Captain Sighrygur Jonasson, of Arborg, Man., a resident of Canada for 58 years who, despite his 76 years, was among the most enthusiastic of the group.

Settlement For Swedes

Stockholm, Sweden.—Some Swedish people, who fled from the Ukraine because of unsatisfactory conditions under Soviet rule and who came here with the idea of joining relatives in Canada, have already emigrated to the Dominion. Arrangements for establishing the remainder in Sweden are proceeding satisfactorily. A public subscription, started for the purpose, resulted in about $250,000 being raised and in addition a grant was made by Parliament.

Urges Second Term For Hoover

Fort Myers, Fla.—Thomas A. Edison told interviewers here that he would urge President Hoover to seek election for a second term. The aged inventor said "the United States government is the most inefficient big business organization in operation today," and he added he did not blame the president. The vast size of the business, he said, was responsible.

A chain of airports from coast to coast is advocated by the Canadian Chamber of Commerce.

HEALTH SERVICE of the CANADIAN MEDICAL ASSOCIATION

THE BABY IN THE SUMMER

There are certain points which require attention during the warm weather in order to keep the baby healthy, to protect him from disease, and to make him comfortable. There are some conditions associated with hot weather which are apt to cause upsets and disease in the infant.

[illegible]

now being given to babies. If it does occur, it should be dealt with at once. Stop all feedings, give as much unsweetened boiled water as the child will take, and place him under the doctor's care. Summer diarrhoea is a serious and often fatal condition unless properly and promptly treated.

If the baby is cared for in the manner indicated, there is no reason to dread the summer.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St. Toronto, will be answered personally by letter.

U. F. W. A. NOTES

The U. F. W. A. met at the home of Mrs. F. A. Gray on June 12th.

[illegible]

Alfalfa being a legume it is highly important to save the leaves. From determinations made at the Morden Experimental Station alfalfa leaves constitute from 42 to 49 per cent of the plant. In feeding value, alfalfa

CURING ALFALFA

Alfalfa should not be allowed to lie in the swath too long after being cut as the leaves will shrivel and fall off while the stems are still full of moisture thus cutting off the flow of moisture as the water becomes sealed up in the stem when the leaves fall off and curing is considerably retarded.

At the Morden Experimental Station the time alfalfa is allowed to lie in the swath depends upon the weather. If the day is dull it is allowed a longer time in the swath, while if the day is bright, sunny, and hot, it is raked up fairly green.

If the crop is heavy and the swath is thick it is necessary to shake out the swath. This can readily be done by the use of a tedder. If a tedder is not available then forks should be used. If the weather is fine the hay is allowed to lie in the windrows and in this way the air can pass through the windrow and drying is hastened. If the weather is not favorable then most of the curing is done in small coils. Under no circumstances should coils be large as the large coils settle and prevent the air from passing through and will cause discoloring and in some cases mould. The method of curing depends upon the weather. Good judgement must be used, and it may be advisable to hasten process by allowing to lie longer in swath and in windrow, even at a sacrifice of some of the leaves, in order to get hay cured and stacked.

TOFIELD Chautauqua

1930 SEASON

Commencing Thursday Evening, July 3rd and Continuing Every Afternoon and Evening Until Wednesday, July 9th

11 Superb Programs 11

Stage Plays, Music, Vocal and Instrumental, Lectures

DAILY PROGRAAM

FIRST DAY

EVENING—Popular Broadway Comedy—"Broken Dishes"—Martin Erwin and Cast.

SECOND DAY

AFTERNOON—Musical—Lowell Patton with Esther Dunham and Vitali Podolsky.

EVENING—Gala Entertainment—John Burkowitz, assisted by Dunham, Podolsky and Patton.

THIRD DAY

AFTERNOON—Marguerite Austin and her "Royal Serenaders."

EVENING—Concert—Royal Serenaders. Lecture—"The Inexcusable Lie"—Private Harold R. Peat.

FOURTH DAY

AFTERNOON—The Popular Entertainers—Dorothy Dyer and Bessie Andrus. Lecture—"The Indis of Today"—Johan

EVENING—Miss Dyer and Miss Andrus in—"Half Hour of Familiar Melodies". "The King of Jesters"—Jess Pugh.

FIFTH DAY

AFTERNOON—A Play For Children—"Jack and the Beanstalk"—Featuring Winnifred Parker and Co.

EVENING—The Old Favorite "Pollyanna"—John Burke, Winnifred Parker and Company.

SIXTH DAY

AFTERNOON—Music From Old Mexico—Ramos and Ensemble.

Lecture—"The Man of Galilee"—Guy Detrick.

EVENING—Grand Closing Concert—Ramos and Ensemble.

Canadian Chautauqua to Present Big Musical Feature

MARGUERITE AUSTIN AND HER ROYAL SERENADERS

Marguerite Austin and Her Royal Serenaders will be one of the big musical attractions of the coming Canadian Chautauqua here this season. This delightful orchestra has won exceptional popularity because of its versatility, real musicianship and the verve and spirit with which the varied selections are presented. Marguerite Austin who heads the orchestra, is a distinguished British violinist, a licentiate of the Royal Academy of Music London, and a graduate of the Brussels Conservatory. She is a charming and entertaining personality, as well as a finished artist.

TWICE BENEFITED BY SAME REMEDY

Recommends Lydia E. Pinkham's Vegetable Compound

Cobourg, Ontario—"Years ago when I had a sick father and a nursing baby to care for, I got all run down and I took Lydia E. Pinkham's Vegetable Compound to get strength to do my work. Another time at Change of Life, I had severe headaches and felt tired all the time. I took seven bottles of the Vegetable Compound and felt like a new woman. I recommend it to any woman who is at the age when she needs building up."—Mrs. T. L. [illegible], R.R. 4, Cobourg, Ontario.

The Cost On Bad Roads

Much Higher For Average Driver Than On Pavement

That travelling over a bad road costs the average driver at least two cents a mile more than travelling over a good road costs him is a conservative deduction based on a study of motoring expenses made by Iowa State College's engineering experiment station. The experimenters studying the records of eight hundred [illegible]

Birds Attracted To Alberta Sanctuary

Find An Attractive Halting Place At Farm Refuge

"There's millions of geese there now," remarked a recent visitor to the farm of H. C. Ellergodt, near Provost, Alta. "Millions may be a little figurative," he continued, "but there are untold thousands, and they look like millions to an ordinary observer."

The Ellergodt farm and lake, together with Sullivan Lake, about two miles away, is one of the wonder places of the Dominion every spring and fall, when the annual migration of the geese from end to end of the continent takes place. It rivals the famous Jack Miner bird-field near Kingsville, Ontario.

Like his eastern compatriot, Mr. Ellergodt has made his farm a private sanctuary or bird refuge, where every spring, countless thousands of wing weary feathered wayfarers find rest and security on their semi-annual pilgrimage half around the world.

Besides the noble Canada geese, which form the bulk of the immense flock, thousands of the white snow geese, better known as "waveys," and hundreds of swans have learned to accept the hospitality of Mr Ellergodt, and the sight of countless myriads of migrants at this time of year is one never to be forgotten.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and Biliousness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills. They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains, unpleasant after effect following, on the contrary a good tonic. All Druggists 25c and 75c red pkgs.

Used Experience To Advantage

Man Who Recovered From Insanity Leads Movement To Aid the Mentally Sick

One of the leading figures at a world conference on mental hygiene recently in Washington was Clifford Beers, who was himself an asylum inmate for some time as a victim of insanity. He ultimately got better and resumed his place in society, and when success came to him—he was a graduate of the University of Yale—he devoted his time to leading a world movement in aid of the mentally sick.

A man who has suffered from a terrible illness or affliction, and who, whether he gets better of it or not, devotes his time or money to the cure or prevention of that trouble in others, has found his true niche in life.

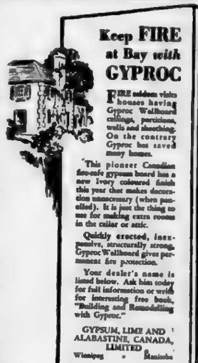
MINARD'S "KING OF PAIN" LINIMENT



FIRE seldom visits houses having Gyproc Wallboard ceilings, partitions, walls and sheathing. On the contrary Gyproc has saved many homes.

This pioneer Canadian fire-safe gypsum board has a new ivory coloured finish this year that makes decoration unnecessary (when panelled). It is just the thing to use for making extra rooms in the cellar or attic.

Quickly erected, inexpensive, structurally strong, Gyproc Wallboard gives permanent fire protection.

Your dealer's name is listed below. Ask him today for full information or write for interesting free book, "Building and Remodelling with Gyproc."

Kingman News

Mr and Mrs. Thor Grahn and family motored to Cooking Lake on Sunday.

Dan Scramstad of Edmonton was a business visitor here for a few days last week.

Mrs. H. Farmer visited with relatives in Edmonton for a few days.

Harold and Anthon Melness of Camrose visited at the Hertz home on Wednesday evening.

A number of ladies surprised Mrs. W. McIntosh last Wednesday in honor of her birthday.

Mr. and Mrs. Bob Stirrit and family were Sunday visitors with Mr. and Mrs. T. Gibson.

Mr and Mrs. E. Erickson visited with Mr and Mrs. Jack Erickson on Sunday.

Mr A. Asp. Herbert and Gertrude, Mr A. Danielson, and Harry Erickson motored to Dried Meat Lake on Sunday.

A few Kingmanites attended the speech by Premier Brownlee at Camrose on Wednesday evening.

Visitors at the H. Paulson home on Sunday were Mr and Mrs. M. Berg, Mr and Mrs. Joe Berg, Mr. and Mrs. T. J. Rognass and Mr. and Mrs. Thomas Rognass.

Lakeshore

The monthly meeting of the Women's Missionary Aid Society was held on June 10th at the home of Mrs. M. Seale.

Mrs. H. MacGillivary and baby daughter are guests at the Booth home.

Dr. Miller from St. Stephen's College, Edmonton, conducted the service in the Lakeshore School on Sunday.

The Women's Missionary Aid Society are holding a strawberry social on Friday, June 27th, at the home of Mrs. R. T. Murray. Strawberries and cream, Angel food ice cream and cake served cafeteria style. Everybody welcome.

We are pleased to report that Betty, little daughter of Geo. Weatherill is much improved in health. Nurse Ardis Wood assisted in caring for her a few days.

RYLEY PLAY POSTPONED TO FRIDAY, JUNE 20th

Owing to the exceptionally bad roads which made it impossible for some of the cast to be present, the play, "Come Out Of The Kitchen", billed to be presented at the Ryley Hall on Friday last has been postponed to the evening of Friday, June 20th.

Despite the unfavorable weather conditions, a large crowd assembled on Friday last, and one act was shown and it speaks well for the production that when the audience was given the alternative of having their money returned or tickets for the coming performance, practically all decided to attend the postponed presentation on Friday, June 20th.

NEW SLANT ON FOOTBALL IN SATURDAY'S PICTURE

A football's viewpoint of a game has been provided gridiron fans by Joe August, cameraman at the Fox Studios in Hollywood. A score or so of ingenious devices were employed by August to obtain eye close-ups of scrimmages in the Army Navy football game which climaxes "Salute" a dramatic story of West Point and Annapolis coming to the Variety Theatre on Saturday.

MR. AND MRS. YAKABUSKI TO GO EAST EARLY IN JULY

In the early part of July, Mr. Pete Yakabuski, will sever his connection with the Canadian National Railway at Tofield and will leave for Eastern Canada where he will retire.

Mr Yakabuski has been section foreman here for the past 19 years and during that time has made many friends among whom he is respectfully known as "Pete."

Mrs. Yakabuski came to Tofield some nine years ago, and she too, has made many friends here. Both were devoted members of the St. Francis Catholic church, Mrs. Yakabuski often quietly and unobtrusively rendering succor to those in need.

The Mercury wishes them many years of happy retirement at their home in Renfrew, Ontario.

CHAS. ROBINSON

Local and Personal

Watch for the beginning of a series of Municipal hail insurance advertisements to appear next week.—J. O. A. Letourneau.

An afternoon tea and good supper will be served at the garden party at Mrs. Abbotts home on Friday, June 20th. Everybody Welcome.

The W. A. will hold a lawn social at the home of Mrs. McCarthy on Thursday, June 26th from 3 p. m. till dark. Come and enjoy tea in the open air. Music. Everybody Welcome.

The Ketchamoot annual picnic will be held on Saturday June 28th not on July the 1st as previously announced. It will be held on the McDevit farm unless other plans are arranged. Chicken dinner will be served with all the trimmings, basketball, baseball games, races etc. will be the order of the day. Come one. Come all.

Come to the U. F. W. A. Earthquake Bridge Social in J. B. Warner's barn on June 23rd. If you don't want to play bridge, come to the social gathering. Cafeteria lunch. Bridge 25c. Starts at 8.15 sharp. Be on time or miss some of the fun.

The visiting speakers at the political meeting last Friday night were entertained at the home of Mr. and Mrs. Pincott. Premier Brownlee remained over until the morning train, Mr. Matheson leaving after the meeting.

Friday, the 13th, was no unlucky day for Mrs. J. Nelsand, for in addition to it being her birthday, she received, in celebration of the event, three dozen gorgeous roses from Vancouver. They were sent by Mrs. Urquhart, her daughter, and arrived in perfect condition. Needless to say they were greatly appreciated, as what lady could receive three dozen gorgeous roses without being enraptured with them.

Cliff Stutzman who has been attending high school at Hesston, Kansas, arrived home on Saturday night. He will assist his father, W. Stutzman in the management of the filling station.

Mr. and Mrs. Harold Micke and family returned from Banff on Saturday night, where they had spent a week's holiday.

Mr. R. W. Pincott motored to Edmonton on Tuesday.

Mr. Thos. Whitmore is a visitor to town this week.

Robert Hopgood, teller at the local branch of the Bank of Montreal, returned from Edmonton on Friday, where he has been spending his holidays.

Mrs. H. Rollins of Viking is visiting the Wood home for a few days.

Mrs. Hobson returned from a visit Coronation on Monday.

Mrs. J. W. Chapman visited the city on Tuesday.

We are pleased to report that Miss Helen McCauley who was taken ill with scarlet fever is improving.

Stan Yakibuski who has been away painting elevators this spring is in town this week.

Mr. Geo. Bence is visiting his father, who is very ill, at Summerside, Prince Edward Island.

EDMONTON EXHIBITION — JULY 14th to 19th

The Edmonton exhibition is annually becoming more attractive, as the directors adopt various features of special interest to those living in Northern Alberta.

In lieu of the pageant this year the feature attraction will be Thavlu's Revue—an artistic musical and dancing production which will go into moving pictures at the close of the Western Canada Fair circuit. Poodles Hanneford's horse act is one which the fairs have been endeavoring to secure for some years, and is the most famous horse act on the continent. Those who have lived in Alberta for many years, will be interested in the dancing group of ten halfbreeds from St. Paul Des Metis, who were the star dancers at the recent C.P.R. Festival.

A new midway will please those who like to mix a little fun with their recreation; the Morris and Castle shows will play the midway for the first time and one of their stellar shows is a real embalmed whale.

But of course the Edmonton Exhibition is first and last an agricultural exhibition, and a $50,000 prize list should attract a splendid entry list. In addition to the classes for livestock, a number of special classes have been made for farm women, and for ladies over 70 years of age; the prize money for bread making and similar accomplishments is extremely attractive.

The entries close on June 28th, and the lists are free to those asking for them.

H. B. ROGERS

Electoral District of Vegreville

TOFIELD DISTRICT

As this letter is being read by you, election day will be upon us, the day when, by the casting of your ballot you will decide who will represent you in the provincial legislature for another four years.

Being urged by many of my friends to become a candidate, and having done so, I have for the past two issues of this paper, presented my manifesto to you. I have also had the pleasure of meeting many of you, both at the liberal meeting held on Monday, and privately.

In this, my last public communication to you before election day, I wish to thank you for the courteous manner in which you received me and the many little kindnesses accorded me. And as a last word, I would like to say this, that whatever your opinions may be regarding the interest taken in the southern portion of the constituency by your former member of parliament, I personally, fully realize that a member of parliament MUST have the WHOLE interests of his constituency at heart. Therefore, ladies and gentlemen, if elected, it will be my bounden duty to see that the southern portion of the district receives the same amount of attention from me as the northern portion.

Trusting that my presentation of the election issues may have met with your favor, and respectfully soliciting your vote on Thursday.

I remain,
Yours faithfully,
HARRY WHITE

A. M. Matheson Again Elected

THIRD TERM FOR LOCAL MAN

As a culmination as to what was at Tofield a very quiet election campaign A. M. Matheson, was elected to the legislature for the third term. His only opponent, Harry A. White, of Mundare, liberal, gave him a comparitively close run, the elected man's majority being considerably cut down over previous elections.

Previously to the election, with the exception of the last two or three days, there appeared to be very little interest taken in it. The townspeople when questioned had very little to say, and the farmers taking victory for granted, had little to say also.

It was not until the visit of Hon. J. E. Brownlee that any degree of interest was shown, and this being a wet stormy night, the attendance was small and there was not a great deal of enthusiasm. This meeting being closely followed by the visit of the candidate and Capt. Bowen in the liberal cause, a little political enthusiasm crept in and a number of groups of citizens were observed discussing politics on the street.

Election day was fine and a large number of voters turned out to cast their ballot. In Tofield both Liberals and U. F. A. were active in bringing people to the poll to vote and considerable good natured banter was heard. One lady, taking advantage of a ride down town to replenish the vinegar bottle, was teased regarding the contents.

By noon the U. F. A. forces appeared confident but the early afternoon vote appeared promising for Mr. White. There was little of an unusual nature, even the cars lacked the "Vote For ——" signs.

At six o'clock, when the ballots were counted by deputy returning officer Pincott, it was found that Tofield town gave A. M. Matheson 180 and H. A. White 137.

The total vote for the constituency was Matheson 2360, White 1762 a majority of 598. In the House the U. F. A. will have 41 seats the other 22 being liberals, conservatives, labor and independents.

Local and Personal

J. W. Chapman is in Edmonton Wednesday and Thursday of this week, representing the town at the annual convention of the Union of Urban Municipalities.

Mrs. S. Tanner of Bruce County, Ontario, was a recent visitor at the Emery home.

Miss Jean Baptiste, nurse in training at the Royal Alexandra Hospital, Edmonton, is spending a three weeks holiday with her parents here.

At the beginning of next week A. B. Clutterham will board the Essex and head its nose southward. He will be accompanied by Blake. Together they will visit Portland, Seattle and other Pacific coast points. Just before they get to the last bill in their pocket books they will turn around and head back home. Here's hoping they have a whale of a time while they are away and that they will arrive back home safely.

Word has been received that a new butcher shop is to be opened in Tofield. J. R. Duford and Mr. Vangrois who have four other shops throughout Alberta, has purchased the lot between W. Stutzman's Service Station and McLaughlin's Garage from Mr. Frenski. They also purchased his butcher shop equipment. They are intending to start building right away.

J. W. McMullen has returned from Bellingham, Washington, where he has been visiting for the past few months.

A number of Tofielders motored to Ryley on Friday last to see the presentation of "Come Out of the Kitchen". It was a very good play and well received by the large audience present.

Mr. Clifford Lee and Clifford Hetherington of Ryley were up at the farewell party for the teachers on Thursday.

Miss Bertha Lee of Edmonton was home over the week end.

Miss Clara Abbott was a visitor at her home over the week end.

Miss Lenabelle Jeffries, formerly of Edmonton, now teacher at Silverlake school, was a visitor at the McClymont home over the week end.

Laurie Scott was a visitor to the city on Monday of this week.

Mr. Jim Warner returned from the east and is back on the job at the C. N. R.

Mr. F. O. Ball of Edmonton was a visitor in town this week.

Laurie Scott of Tofield has been chosen to catch for the Edmonton all star ball team, when they play the Texas Colored Ball Team. Frank Ball formerly of Tofield is also playing for the Edmonton team.

Examinations are in full swing this week and they will be finished on Friday. Then come the holidays.

The many friends of Mrs. and Dr. Bain will be interested and pleased to learn that a young daughter recently arrived at their home at Rochester, Minn. Dr. Bain has graduated from the University of Minnesota having qualified for a M.S. in surgery. This was a post-graduate course, he having graduated from Dalhousie College at Halifax, prior to coming to Tofield some years ago.

Miss Constance Lillingston, president of the Edmonton Diocesan Women's Auxiliary addressed the members of the Holy Trinity W. A. in the church on Tuesday June 17th. Her talk was helpful and very interesting and all those who were able to attend appreciated her visit and interest in our branch.

The Holy Trinity W. A. will meet at the home of Mrs. Malcolm on Wednesday, July 2nd, at 2:30 p.m.

The roads were slippery with mud last Wednesday and just as he was crossing over the tracks and on to the other side, Bud Hannan's car skidded into the ditch. The ditch was about 12 or 15 ft. deep and the car turned over. Bud, just to show that he is luckier than Lindy, crawled out unhurt. He was taking home a new Victrola and a number of records and no damage was done either to machine or records. Looking over the car on Thursday, it was hard for one to believe it had been toppled over into the ditch the night before, for there was not even a scratch on the paint.

Our advertising columns this week carry an advertisement of high grade furniture. It is not often furniture of this class is sold by auction in small towns and those desiring furniture of this type should make it a point to attend. F. O. Ball will cry the sale, which will be held at Mrs. Hobson's residence.

Ketchamoot Items

We are very thankful for the bountiful rains during the past week, which were truly, "million dollar rains".

Mrs. H. Smith and little daughter Maxine of Camrose, has been visiting Mrs. Smith's parents, Mr. and Mrs. Geo. Lawson and brothers and sister the past week.

A very large construction outfit passed through our district Wednesday, coming from Stettler. We understand they have the contract to grade the road from Tofield to Camrose.

Election day passed off quietly on Thursday. 50 voted for Matheson and 3 for White. Mr. G. W. Sears acted as deputy returning officer. Mr. W. A. Mitchell, poll clerk.

Mrs. Allison has had the eighth grade class at the home of W. A. Mitchell on Thursday and Saturday afternoon. The pupils are Margaret Mitchell, Annie Boorsch, Torval Nomeland and Charley Sears.

Miss Mabel Lawson, of Camrose, spent Sunday of last week at the parental home.

The basket-ball girls gave a dance at the Barnes house Friday evening, they also sold ice cream cones. There was a large enough crowd present to net the girls $16.95.

Mr. and Mrs. Wm Lee and daughter Viola attended the silver wedding of Mr. and Mrs. Aronson near Mundare Friday afternoon. Mrs. Lee and Mrs. Aronson are old friends and school mates.

After basket-ball practice on Tuesday evening some thirty young people enjoyed a wienie roast near the basket-ball court. Mr. and Mrs. O. Barnes, Mrs. and Mrs. S. Nomeland were also present.

The basket-ball team consists of Miss Selma Nomeland, captain; Hazel Sears, secretary; Mildred and Gertrude Ingram; Inez, Goldie, Soma and Helen Sobbin.

"Wise people change their minds". So we consider ourselves very wise. The Ketchamoot picnic will be held on Tuesday, July 1st, and Mrs. L. Carlisle's farm, just west of the old Owen farm; south of Henry McGinitie. A real celebration is anticipated. Chicken dinner and supper will be served cafeteria style in the Carlisle house which is well sheltered from the wind and dust and a place to keep dry in case of rain. A real good baseball diamond out near the road also a stand will provide you with treats. So come and spend the day with us and we will assure you a real good time.

YOUNG PEOPLE'S SOCIETY HELD SOCIAL EVENING

On Thursday evening last a farewell party was given in honor of the departing school teachers by the Young People's Society. There were also a number of older folk present. The evening was spent with dancing and playing cards. At midnight a delicious lunch was served including a freezer of ice cream kindly donated by Bill Eldred. At this time presentations were made to Miss Lela Clement, Miss Annie Booth and Mr. H. A. (Bert) Swift who are going to take the momentous plunge this fall. The recipients of the gifts responded appropriately.

The party broke up with the singing of "Old Lang Syne" and "For They're Jolly Good Fellows".

HOLY TRINITY CHURCH (Anglican)

Morning Prayer and Sermon 1st and 3rd Sunday in the Month at 11 a. m. Evensong and Sermon every Sunday at 7.30 p. m.
Sunday School - - 11 a. m.
Rev. G. W. Wilson.

GOLF TOURNAMENT NOW IN PROGRESS

Now that the weather is more favorable, golfing enthusiasts at Tofield are enjoying much golf. A tournament has been organized in which many are participating. The tournament is divided into two groups, namely after the first round, the winners will compete against each other and the losers will do likewise.

The results at present writing are: Rowe defaults to Anderson, Lorbekmo 45, Malcolm 60, Agnew 49, McLaughlin 50.

Lindbrook

Well we've had our June rains and they have certainly altered the complection of things, now if the prices were any good we should have nothing to growl about.

A bad motor accident took place here last week one mile south of Mr. W. Gleave. A car driven by Mr. A. E. Silverstden of Lindbrook Store collided with a car from Ryley. Mr. Robt Smith who was with Mr Silverstden had his arm so badly cut that he had to be taken to the Edmonton Hospital. We hear that he is coming along fine and hopes to be out of the hospital this week.

No, Woolworth's aren't going on building on Lindbrook corner the piles of lumber there, are for building bridges on the new road, Edmonton—Tofield. Carloads have been unloaded so Lindbrook has now reached the dignity of a "dump".

Messrs Burton and Tiedemann unloaded a car of building material here last week.

Mr. C. J. Kortsman cut his hand badly with a saw, necessitating medical treatment but is getting O. K. now.

The section crew had to jump for it last week when their hand car got smashed by a train. Luckily no one was hurt, only the hand car.

Good luck, kids! may you all pass thru your exams this week with colors flying and enjoy your coming holidays thoroughly well, and when writing exams don't forget what Julius Caesar said to MacKenzie King at the opening of the Irish parliament and what Napoleon did at the battle of Agincourt.

HARRY A. WHITE SINCERELY THANKS HIS SUPPORTERS

To the people of the Vegreville Constituency I wish to extend my most sincere thanks. When one realizes that in the proceeding campaign, of 1926 there were over sixteen hundred votes in all, of a majority over the Liberal total, one cannot but be convinced that the Liberal cause has made a mighty nice stride forward. I deem it a great honor to have been the Liberal candidate under such circumstances.

Again thanking my many many friends and supporters.

I am sincerely,
HARRY A. WHITE.

LIBERAL PRIMARY MEETING

On Saturday night last, the liberal primary meeting for the Tofield poll was held at the Tofield Town Hall. There were only three present, Mr. Jos. Rogers, Mr. A. J. H. McCauley and Mr. John Chapman. As the object of the meeting was to appoint three delegates to the Liberal Convention to be held on Wednesday, June 25, those present wisely elected themselves as delegates.

The small attendance was no doubt due to the slackening of political interest immediately following an election.

WEDDING BELLS
Yakibuski — Chorachysh

On Thursday of last week, Mr. Jim Yakibuski and Miss Chorachysh were united in marriage at St. Francis' Roman Catholic Church at Tofield. The Church was nicely decorated with flowers, Father Hughes officiating.

The happy couple left for a honeymoon trip to the United States and will return about July 4th, when they will again leave for Eastern Canada for a trip of several weeks duration.

LAWN SOCIAL

On Friday evening last quite a number attended a lawn social arranged by the ladies of the Eastern Star Lodge and held at the home of Mrs. L. Abbott. The afternoon was spent with various amusements among which was a fortune telling booth. How many are going to inherit riches we cannot say but those present in the afternoon and a number who arrived later were served a splendid supper. The weather was cool and inclined to be showery.

'Fresh from the gardens'

The Problem Of Markets

It may be poor consolation to the wheat producers of Western Canada, who are in a quandary over the problem of selling their product in the markets of the world at a price which will yield to them a reasonable profit over the cost of production, to learn that they are by no means the only producers of a commodity used throughout the world who find themselves in difficulty of a like kind. And because the producers of these primary commodities are experiencing difficulty in finding markets, the makers of secondary and manufactured articles are also feeling the pinch, and find themselves overstocked with goods which they cannot at the present sell.

The situation which exists is not one that affects Canada alone or any one commodity alone but the whole world. It is a problem of over-production in the majority of cases. It affects not only the primary producers in all countries, and the manufacturers, but it reacts adversely upon every class of business and every individual. Because there is a glut of primary products the transportation companies are losing business and in turn they are employing fewer men in their manifold departments. Merchants require less help because less goods are being sold, office staffs are reduced and the resultant shortage of money and of buying power on the part of everybody has slowed up or put a temporary stop to building construction activities.

No country in the world is immune from this present condition. It is world wide but fortunately Canada is less seriously affected than any other of the great trading countries of the world.

While Canada's problem is wheat, Brazil's is coffee. While other countries grow coffee, notably Java and Arabia, Brazil is the great source of supply. It has been steadily increasing production, as have other countries, growing more coffee than the world could consume. In order to prevent prices falling to a ruinous figure below actual cost, Brazilian Governments bought up the surplus and kept it off the market to be released in years of a short crop. The result is Brazil now has sufficient coffee on hand to meet total world requirements for two years with another big crop coming on. The financial strain has proven too great, and that country is now endeavoring to float a huge loan, $100,000,000 or more, at a high rate of interest, and in doing so has given a pledge it will buy no more coffee and will liquidate its present enormous holdings within ten years.

Sugar is in much the same position as coffee. In 1926-27 world production of sugar was placed at 23,750,000 tons, or about 300,000 tons less than consumption. The following year production exceeded consumption slightly, but in 1928-29 production jumped to over 27,000,000 tons, or far in excess of world requirements, while this year's estimates indicate a still greater production.

Cotton, too, joins the procession. In the last five years the United States produced on the average 40% more cotton than the average for the preceding ten years. The average for the ten-year period ending 1925, was about 11,000,000 bales; in 1926, about 18,000,000 bales were produced. Texas, formerly a great cattle ranching state, is now the greatest cotton producer among the states. Oklahoma is also going in strongly for cotton, and both states are using machinery, as against the old hand picking system, with a result similar to the revolution in wheat production through the introduction of the combine. One Texas farmer harvested 1,700 bales of cotton with five laborers, whereas under the system in the old cotton growing states 100 workers would have been required to plant and cultivate and 300 more to pick the crop by hand. It is estimated that Texas alone could produce twice as much cotton as present world needs.

Rubber, copper, tin, zinc, silk and other basic commodities are all in the same class, production out-stripping consumption, the increase in the latter not nearly equalling the increase in the former, and in regard to some commodities, silver for example, actually declining.

Coupled with this situation was the huge withdrawal of money and credit into the speculative stock market during the past two years, ending in the crash of some months ago. The effect was that farmers were deprived of their usual credit facilities and this reacted unfavorably upon their retail purchasing, which, in turn, reacted upon consumption, consumption on manufacturing, manufacturing on labor, and labor on consumption. All business slowed up.

In the case of Malay rubber, Cuba sugar, Brazil coffee, the idea prevalent was that control of distribution was the same as control of production. As one writer says, there could be no greater mistake. Production is controlled by the direction and energy of human activity aided or retarded by forces of nature. Prices are arrived at by the relationship between supply and demand. If demand is greater than supply prices rise. If supply is greater than demand they fall.

In Canada the source of national prosperity, it is now admitted, lies in the wheat crop of the West. World wheat production is steadily, even rapidly, increasing. The biggest problem therefore confronting Canada today is to find a profitable permanent market for its wheat. To the solution of that problem every Government, the Wheat Pools, farmers' organizations, manufacturers, merchants, citizens generally, must bend their energies and turn all devote their best of constructive thought.

More Remaining In Canada

Scientifically Trained Men Not Leaving In Such Large Numbers

A radical decrease in the number of scientifically trained men who find it necessary to leave Canada for employment was cited by Rev. Dr. H. J. Cody, chairman of the board of governors of the University of Toronto, in an address to the Canadian Manufacturers' Association there. Dr. Cody spoke of the work of the Technical Service Council, an organization founded in 1927. During the past year, 1,000 applications for trained men had been received, and 550 graduates had been placed in key positions in Canada. Since 1925 the percentage of the graduating class of Toronto University leaving the country had been reduced from 27 to 3 percent.

DO YOU VALUE YOUR HEALTH?

If your health is poor, if you are pale, nervous and easily tired; if you suffer from headaches and backaches, if your digestion is bad you may depend upon it that these symptoms come from an impoverished state of the blood. That unless this condition is remedied a complete breakdown may follow. Dr. Williams' Pink Pills are a perfect medicine for any one in this condition. They enrich and purify the blood and thus promote health and strength.

Mrs. G. A. Andrews, Halifax, N.S., writes:—"I always keep Dr. Williams' Pink Pills in the house. When I was a young, anaemic girl they completely restored my health. After marriage my health broke down and once more these pills brought me back to health. My friends all tell me how well I look and for this Dr. Williams' Pink Pills deserve all credit."

You can get these pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Women Who Work

Modern Devices Have Not Altogether Eliminated Work In the Home

By some persons whose knowledge of housewives is limited these important members of society are supposed to have been relieved of the necessity of doing any manual work. Excessive feminine indulgence in amusements is assumed to be the sorry result.

Systematic inquiry shows a very different state of things. The bureau of home economics in the Federal Department of Agriculture reports that in country districts and in cities of less than 50,000 population women work in their homes considerably over forty-two hours a week, while the average among thousands of women questioned is fifty-one hours a week.

Plainly, vacuum cleaners, electric washing machines, telephones, canned goods, delivery service and all the rest of the time saving and labor-saving devices have not reduced the housewife to demoralizing idleness. She is not yet threatened with ennui. There is no great danger of her finding too much leisure on her hands. Worry over her mental and moral condition in her supposed state of freedom from toil is, to say the least, premature.—Chicago News.

Fairly Satisfactory Proof

British Fishing Interests Have Decided That Advertising Pays

If the proof of the pudding is in the eating of it, the proof of advertising is in the using of it. So the British fishing interests decided. People ate fish in Great Britain in considerable quantities and had done so for generations. But, as the heads of the business saw it, they did not eat enough nor nearly as much as they would if properly educated in respect of the virtues of fish as a food.

The upshot of it all was that the fishing interests began an advertising campaign. They exhorted the public to "Eat More Fish" and told why. There were doubters, of course. But the far-sighted leaders in the undertaking were confident that the public demand for their fish could be enlarged if they advertised widely and intelligently. They got the fish trade to appropriate for advertising one penny out of every pound sterling of value of fish caught. A small allowance, to be sure. But it effected an increase of more than $1,500,000 in the fishing industry's sales.

Fairly satisfactory proof, one might say, that advertising pays.

Opening Campaign In B.C. On July Fourth

Premier King Will Hold First Meeting At Revelstoke

Vancouver, B.C.—Senator J. H. King was assured here that Prime Minister Mackenzie King will open his election campaign meetings in British Columbia on Friday, July 4, when he will speak at Revelstoke on his way to the Pacific coast. The prime minister will arrive in Vancouver on July 6, and proceed to Victoria where he will address the electorate on Monday evening, July 7. On July 8 he will speak in Vancouver and on Wednesday, July 9, in Kamloops.

Storms Damage French Crops

Cattle Killed By Lightning and Small Animals Drowned

Paris, France.—Storms which raged for several days over widely scattered parts of France severed highways and railroad communications, wrecked homes and damaged crops.

Lightning killed cattle, and flood waters drowned smaller animals in the Burgundy and Auvergne regions and north of Paris. Crop damage is reported to be heavy.

REACTION TO THE NEW TARIFF LAW PASSED BY U. S.

Ottawa, Ont.—The signing of the new Hawley-Smoot tariff bill by President Hoover, in Washington, automatically brings into effect some twelve changes in the Canadian tariff as against United States. These are the items containing provisions for countervailing duties brought into effect in the Dominion budget of May 1 last. Some twenty items in the Canadian tariff contain the countervailing provisions, comprising 16 commodities. All of these are not further changed by the new U.S. bill as in some cases the new U.S. rate is the same as under the Fordney tariff.

The principle of the countervailing duties is that the Canadian tariff will be as high on the particular article coming from another country as the rate that country levies against the same commodity entering from Canada. While the countervailing tariff in this country does not specify United States, the interchange of the same kind of goods between Canada and that country is much greater than between Canada and any other nation.

One of the most important changes with the bringing into effect of the Hawley-Smoot tariff and the consequent applications of the countervailing tariff by Canada, will be its effect on potatoes. Canada shipped to the United States for the fiscal year ended March 31 last, potatoes to the value of $1,173,179. Potatoes went to United States from Canada under a tariff of 50c per cwt. last year, and U.S. potatoes came into Canada free. Under the new tariffs the barrier both ways will be 75 cents per hundred pounds.

Oats, cattle, meats, eggs and butter are also greatly affected by the new tariff wall.

A new tariff law was put into effect by the United States recently and international reaction to it was reflected in actual retaliation in kind by one government, consideration by two others of measures of reprisal and condemnation from the press of several nations. ...

Enter Red-Hot Fire Box

PLAN AIR ROUTE FROM LONDON TO WINNIPEG

London, Eng.—The government is extending no financial assistance to the British expedition under Captain G. R. Watkins, which is to examine the possibility of a direct air route from London to Winnipeg over the Greenland icecap, stated the Hon. Frederick Montague, under-secretary of state for air, in answering a question in the House of Commons.

The under secretary, however, told the questioner, I. J. Albery, Conservative member for Gravesend, that the government was putting the services of a Royal Air Force officer at the disposal of the expedition and was also lending certain meteorological instruments. The war office was lending chronometers and wireless equipment.

The object of the expedition, said Mr. Montague, was to survey and to collect the necessary meteorological and geographical data with a view to determining the practicability of the establishment of a regular air route between Europe and Canada via Greenland. The expedition is to leave shortly.

Captain Geoffrey Robert Sladen Watkins, D.S.O., an officer attached to the air ministry, obtained considerable fame by two recent expeditions to Edge Island, about 400 miles off the coast of Norway. He served for 17 years in the British submarine service, and was one of the three survivors of a submarine which was cut in half in an accident, 1909. He was in command of the E-45 when it torpedoed and sunk another submarine, the German U-76. Captain Watkins is known as one of the most daring aviators alive.

Brownlee Ministry Endorsed

Farmers' Party Sustained In Alberta Election

Calgary.—United Farmers of Alberta, who strode into power in Alberta nine years ago under the guidance of Hon. Herbert Greenfield, have again marched to a third term in administration of the province. Followers of Premier J. E. Brownlee, who held 43 of 63 seats in the last assembly, were certain of re-election with counts still proceeding in many constituencies.

It seemed probable, however, that the Farmer party majority would be slightly reduced.

Two of the cabinet members listed as sent back to the legislature were granted acclamations on nomination day. These were the Premier and Hon. O. L. McPherson (Little Bow).

Two of the three new seats formed in the redistribution enacted at the last session went to the government party. Rudolph Hennig, former member for Victoria, won in Clover Bar, and Hugh Allen had already been given an acclamation in Grande Prairie.

Two Labor members were sent back to the legislature from Lethbridge and Edson. Andrew Smeaton, in Lethbridge, downed W. D. Hardie and Robert Barrowman, Ind., in a three-cornered contest. In Edson, Chris Pattinson defeated Charles Payne, Liberal.

Island Falls Plant Now Supplying Electric Energy In the Northern Hinterland

Saskatchewan's first hydro-electric plant has commenced operations.

Three generating units at Island Falls are in use and power is being transmitted on a 55-mile pole line to the mining town of Flin Flon, on the Saskatchewan-Manitoba border.

Inauguration of the hydro project in the northern hinterland marks an important milestone in Saskatchewan mining development.

When the Whitney interests took up their option on the important Flin Flon claims on December 1, 1927, development was started that has already involved expenditure of close to $25,000,000. Included in this was the building of a border mining town which now has a population of nearly 2,000, and the building of a 90-mile railroad across the muskeg from The Pas to the Flin Flon site.

The Hudson Bay Mining and Smelting Company, Ltd., sponsored by Jack Hammell and the Whitney interests, cast about for sufficient power to operate an electric smelter at Flin Flon. Manitoba power sites were passed up in favor of the Churchill site at Island Falls in Saskatchewan, a distance of 58 miles from the townsite of Flin Flon.

Winter roads were cut through the forest from Flin Flon and in 40 and 50 below weather an almost continuous train of caterpillar tractors tore through the bush to deliver thousands of tons of cement and supplies to the Island Falls site.

Traditional methods of forest freighting were thrown into the discard and history was made that winter. The speed of the operations alone rivalled the mammoth proportions of the entire undertaking.

There are now electric lights at Flin Flon, one of the most up-to-date towns in the northwest, just as there have been electric lights in the modern settlement of Island Falls for some months past.

Lumber in Transit

Checking Up Moisture Content Of Pacific Coast Lumber When It Reaches Eastern Canada

An interesting study being carried out at present by the Forest Products Laboratories of Canada, Department of Interior, is the behaviour of lumber in transit from the Pacific Coast. The Vancouver laboratory has arranged to place in carloads of lumber consigned to Montreal and Ottawa a number of boards, the moisture content of which was determined in Vancouver. Through co-operation with eastern consignees, the Ottawa and Montreal laboratories have been checking up these moisture contents on arrival in the east, to determine the amount of moisture absorbed in transit.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion.

The stomach, liver and bowels will be cleansed of poison, painful and dangerous gas will disappear and the system will feel the effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

WORLD HAPPENINGS BRIEFLY TOLD

Death has removed one of Britain's famous sportsmen, the Earl of Sefton, owner of the Grand National race course at Aintree. He was 59 years old.

Authoritative private advice to the United Press from Moscow, said all the Soviet's spring wheat sowed up to June 10, amounted to 22,176,000 hectares (about 55,550,000 acres).

E. W. Beatty, president of the C.P.R., said his company had a site in mind for their projected London hotel, England but not the Hotel Cecil as had been rumored.

The sudden overflowing of the Lena River in this eastern section of Siberia has swept away 346 homes and 20 other buildings. Many cattle were drowned and other damage was heavy.

Dieudonne Coste, famed French flyer, has been awarded the medal of the International Aeronautic Federation for the most noteworthy achievements of the year in aviation.

Searching among the drawers of an old sideboard, William Bonnell, of Montrose, Colorado, found an old newspaper giving an account of the death and burial of George Washington.

About the time when airplanes will be landing on every apartment house roof or in the commuter's back yard, science will have aided in perfecting an automobile that won't wear out. One British firm has perfected a steel so hard it cannot be scratched with the sharpest file.

Plans are being discussed at Windsor, by the Border Chamber of Commerce, for a good will business and pleasure trip through western Canada, possibly late in August or early in September. It is expected that the tour will be open to other than chamber members.

Bequest For Scientific Work

One Fourth Of Nansen's Fortune Goes To Fund

One-fourth of the fortune of Fridtjof Nansen is to be applied to the Nansen fund. Extracts from the explorer's will, read before the Norwegian Society of Science at Oslo recently revealed that the fund, which is used for scientific work, will benefit to the extent of $25,000.

The directors of the fund will administer the estate, the interest on which goes to Dr. Nansen's sister.

The Nansen Fund has made large grants for several Norwegian polar and oceanographic expeditions in recent years.

Farmers In Public Life

The Farmer's Advocate says "Farmers are getting a grip on things politically. Honourable Walter Lea, a farmer in Prince Edward Island, is now Premier of his Province. Honourable John Bracken, a trained agriculturist, is Premier of Manitoba, and his Honour J. D. McGregor, a noted breeder of Aberdeen-Angus cattle, is Lieutenant-Governor of the same Province.

A Long Felt Want

"Men who desire such dilutions," says the Rev. C. E. Macartney, D.D., "can drink decaffeined coffee and smoke denicotined tobacco, and now we have on every hand dechristianized Christianity." But up to the hour of going to press, there seemed to be no hope for dejazzed jazz, deelectioned elections, and deweatherized weather. Nor even for detaxed taxes.

The female mosquito is not only the one that stings but the one that sings.

Dr. Doolittle Again Makes Trans-Canada Tour

Dr. P. E. Doolittle, who is now serving his eleventh term as president of the Canadian Automobile Association, has driven to the coast again and is now in Vancouver awaiting the start of the "Golden Twilight" caravan of the provincial government to the northern Cariboo district. This time the cross-country driver came from Toronto to Vancouver, travelling over 3,163 miles of roads, most of which were in Canada, within ten days.

After completing his tour with the provincial government caravan, Dr. Doolittle plans to turn east at Kamloops, and drive back again across Canada and to the Atlantic ocean.

War Books Losing Their Popularity

Output Continues Enormous But Sales Falling Off

War books, which have been appearing in great numbers in Europe, are reported to be losing their popularity there. While the output continues to be enormous in many countries, dealers are beginning to complain that they cannot sell near the number they have on hand. Russia is said to be the only nation which did not catch the war-books craze. When Sheriff recently presented an autographed copy of "Journey's End," to the Imperial War Museum, in London, England, the museum announced that it had 36,000 volumes of war books.

Winnipeg Newspaper Union Fashions

(By Annabelle Worthington).

2963

The Ensemble in tweed in heather brown tones undoubtedly is the most practical and smartest fashion that Paris has sent us in some time.

Style No. 2963 sketched achieves youthful sophistication through simulated tuck-in blouse of flat silk crepe in toast-tan shade, with suede belt in soft brown tone indicating higher waistline. The skirt is box-plaited across front with plain straight slim back, preferred for general wear.

The coat is in seventh-eighth length. The fronts are underfaced with plain woolen in harmonizing tone and rolled into revers with collar. Sleeves have cuffs of plain woolen which appears again in applied bands of pockets.

It is designed in sizes 12, 14, 16, 18 and 20 years, and you'll find it very simple to make.

It is very youthful too in mauve-red tweed with matching silk crepe blouse.

Another swagger idea is bottle green novelty woolen with blouse of lighter tone silk crepe.

For more dressy occasions, it is made of woven plaid transparent velvet, used for dress with coat of suede finished broadcloth in blending tone, or of Royal blue velvety woolen coat with dress of matching flat silk crepe.

Manitoba Jubilee Impressions

Celebrations In July To Mark the Sixtieth Anniversary Of Manitoba's Admission Into Confederation

(By Old Timer)

Men who have lived in Manitoba since the early days, and especially those who were born here, love to recall the various fights or squabbles in which the Province was involved during the first half-century of its corporate existence. Most of the questions raised in the stormy days found their origin in the well-known constitutional fog which seems to have always surrounded the relationship of a Province, particularly a new one, to the Federal authority. The learned Solons who drew up the British North America Act, as well as the more or less wise ones who carved it up before it became law, failed to take into account many of the big problems that have developed since. For that reason they were unable to lay down in plain words the points of distinction between the respective jurisdictions. Many and varied were the legal and political battles that ensued. The present differences are so mild that by comparison it might almost be said that negotiations are now conducted in silence.

When the Canadian Confederation was established in 1867, four diverse units of British territory in the north-eastern section of the continent agreed to come together and forget, as far as possible, their differences. Since they all retained their provincial status, however, with the necessary, and also some unnecessary, governmental machinery in each case, there was still plenty of room for argument. If the Fathers of Confederation (who rightly received so many tributes during the Jubilee celebration three years ago), could not adjust the situation between the Federal jurisdiction and that of the four units which had been established for generations, how could they be expected to foresee and care for problems relating to a new territory subsequently taken into the union? It simply wasn't done, for the reason that it couldn't be done.

The Diamond Jubilee celebrations through the Province on July 15 next, are intended chiefly to mark the sixtieth anniversary of the admission of Manitoba into Confederation, and there is no doubt they will in every case be worthy of the occasion. When the event actually took place in 1870, there was much shaking of heads, particularly in the East, about the wisdom of the step. A review of the litigation and other trouble that has followed would seem to justify some of the doubts, and it is a matter for congratulation now that these have been dispelled. Manitoba was the first of the new territories to be absorbed, and her problems were without precedent, insofar as her relations with the "rest of the family" were concerned. It is little wonder, then, that when trouble did arise there was plenty of it. This Province was variously regarded as the "martyr," the "stormy petrel" or the "ugly duckling," according to the particular viewpoint of the politician who was expressing an opinion on the subject. Whatever the occasion, Manitoba was prominently in the limelight. Whether it was in the matter of railway competition, enlargement and adjustment of boundaries, educational autonomy, insufficient subsidies, or control of certain phases of commercial affairs, there was at no time any doubt about Manitoba's position. If there was a fight, she was supposed to be in it, like the mythical Irishman. What is more, she not only desired to be in it, but she had her wish gratified to the full.

From the standpoint of material advancement, the most important battle was that in connection with the boundaries. When the Province was instituted in 1870, it was a tiny affair, and was facetiously likened to a "postage-stamp." After a little more than ten years of discussions the Government headed by Sir John MacDonald at Ottawa, arranged to have the boundaries greatly extended. Indeed, under the proposed scheme a large section of what is now Western Ontario, including the town of Rat Portage (Kenora), would have come under the jurisdiction of Manitoba. But the Ontario Government, under the leadership of Hon. Oliver Mowat, saw a fine chance to raise a commotion, and it was duly raised. When the smoke and haze of legal action had cleared, it was found that the Mowat Government had won out, and Manitoba's eastern boundary was fixed in its present location. There was no Mowat to interfere with the westward extension, so that the boundary was pushed out about 130 miles without difficulty. Finally, in 1912, a large and important section in the north was added, giving the Province a long stretch of seaboard on Hudson Bay, including two possible ports, Nelson and Churchill. The telling about this boundary fight is simple enough, but a large volume would be required to record the history in detail. The same is true of the other disputes, some of which made or unmade political reputations in various parts of the country. The sequel has been that Manitoba has come to symbolize the protection of Western rights and Western interests. She has played and is still playing an important part in the affairs of Canada.

ELECTED GRAND MASTER

J. BELL

Of Vanguard, Sask., who has been elected Grand Master of the Grand Lodge of Saskatchewan, I.O.O.F. for the year 1930-31. Other officers elected: Deputy Grand Master, M. A. Fletcher, Colgate; J. M. Clark, Yorkton, deputy grand warden; grand secretary, F. B. Gray, Regina; grand treasurer, H. E. Armstrong, Regina; grand representative, Hugh Green, Watson; grand representative for two years, J. A. Hagerman, Unity.

Is Easily Mastered

The art of swimming is so agreeable and so easily mastered and the places where it is taught by competent teachers are now so numerous in our cities that even urbanites ought not to grow to maturity without being able to do what any poor fish can. Country youth generally finds a "swimmin' 'ole" and teaches itself.

The owner of a popular brand of car was having trouble in starting his engine.

After watching for ten minutes the man wrestle with the starting handle a little boy asked his father:

"How far will it go after he has finished winding it?"

Another good thing about old Dobbin. He didn't leap aside and attack a telephone pole when a bee stung the driver.

SUNDAY SCHOOL LESSON

ATTEMPTS AT APPRAISING CHRIST

Golden Text: "Thou art the Christ, the Son of the living God."—Matthew 16.16.

Devotional Reading: Isaiah 2.2-4.

Explanations and Comments

In the triumphal procession of the Roman conqueror, kings and princes walked as captives in the emperor's train. Thus all the greatest men of the past generation seem to have joined Christ's triumphal procession. Let us call the roll of the great. Among Carlyle's last words were these "The most important event ever transacted in this world is the life and death of the Divine Man in Judea, at once the symptom and cause of innumerable changes to all people in the world." By acclamation, John Ruskin will be voted the first place among the English prose writers of the last two centuries. But Ruskin says his life "has been dedicated not to the study of the beautiful in face and flower, in landscape and gallery, but to an interpretation of the truth and beauty of Jesus Christ." Another modern humanist is Matthew Arnold. But, dying, Matthew Arnold said: "Christ came to reveal what righteousness really is. For nothing will do, except righteousness, and no other conception of righteousness will do, except Christ's conception of it—His method and secret." James Martineau asserts that Christ must be called "the regenerator of the human race. The world has changed and that change is historically traceable to Christ." We all know that Shakespeare, perhaps the greatest intellect ever known in its wide and many-sided splendor, paid the lowliest reverence to Christ in passage after passage. All the great poets of our age, Lowell and Longfellow, Browning and Tennyson, unite in saying,—

"Thou seemest human and divine;
The highest, holiest manhood thou;
Our wills are ours, we know not why;
Our wills are ours to make them Thine."

—Newell Dwight Hillis, in "The Influence of Christ in Modern Life."

His Constant Companion

Captain Carried Purple Silk Umbrella With Him Everywhere

In Wilste, Holstein, Henry Moeller, 15, decided to go to sea, sailed on a clipper ship for Hongkong. His aunt said goodbye to him and presented Henry Moeller with an umbrella of purple silk with a carved snakewood handle. "It will be handy in case it rains," she said.

In 1880, Henry Moeller became captain of the "Lackawanna Railroad's river barges. In 1903, he became captain of tugs for the Hamburg-American Line. In 1920, he retired and went to live in Hoboken, where he often sat in the backroom of Meyer's Hotel, drinking beer with other old captains. Recently he died. His daughter obeyed his request to place, under the dirty, salt-stiffened pilot coat in which Henry Moeller was buried, the purple silk umbrella which he had carried on all his voyages, short or long.

Poland has spruce forests estimated to cover 1,900,000 acres.

The ordinary person's lungs contain 76,000,000 air cells.

PILE PAIN
[illegible]

Motor Fuel In Western Canada

Unlimited Quantities Can Be Commercially Produced In Northern Alberta

Gasoline in almost unlimited quantities can be commercially produced from oil sands in Northern Alberta, according to Dr. K. H. Bosmer, of the University of Alberta, addressing the National Research Council. A new method which yields light oils suitable for the production of gasoline is credited to Dr. Bosmer and Dr. A. K. Clark, also of the University of Alberta; and a semi-commercial plant, now in operation, shows, it is said, that Western Canada, at least, will shortly be independent in the production of motor fuel.

Food For Babies

Food Question Is a Serious One In the Hot Days Of Summer

Hot summer weather is very trying on babies and the food question is a serious one every mother must solve correctly if her infant is to avoid ailments common in this period. Breast feeding is obviously best for baby, but it happens in so many cases that this is impractical. Rather than experiment with all sorts of foods it is wise to use one that is known for its value as an infant food. Eagle Brand Condensed Milk has been used continuously since 1857 and is highly recommended by leading physicians as a safe, pure, easily digested food for bottle-fed babies. It is simply pure milk and pure granulated sugar. Feedings are easily made up according to directions on the can. Eagle Brand is especially satisfactory in difficult feeding cases. Frequently it agrees perfectly with babies who cannot assimilate any other food. Mothers who would appreciate a very helpful booklet on the care and feeding of baby may obtain a copy of "Baby's Welfare" from the Borden Co., Limited, Montreal, free, if they mention this paper when writing.

Chinese Children Starve

More than 200,000 children have died of famine in Northern China since January, according to Commissioner MacKenzie, of the Salvation Army. The Commissioner, who recently returned to Australia from China, said that 30,000 Chinese wives and daughters had been sold for $2 or $3 each to provide food for the remainder of their families.

Prevented By Law

"You are suffering from brain fag and ennui," announced the specialist. "You should take more interest in your business."

"I should like to," replied the patient.

"Then why don't you?" demanded the specialist.

"The law won't let me," replied the patient. "I'm a pawnbroker."

"Because they accept much smaller salaries," says a contemporary, "women are ousting draughtsmen from their jobs." The designing females!

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

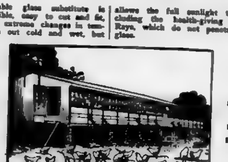
WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE



USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Keep yourself well-regulated

A dash of ENO in a glass of water every morning or night avoids the evils of constipation.

Entirely safe and natural in its gentle but effective action, ENO'S "Fruit Salt" can be taken regularly without forming a harmful habit.

ENO'S FRUIT SALT

The Third "Tele" Wonder

Telegraph and Telephone Have Been Followed By the Telechron

We owe a great deal to "tele."

What is "tele," you ask? What does it do to help along the human race? Here below I give the one-two-three of the "teles" to which we moderns owe so much.

1. The TELEgraph enabled Grandfather to cover thousands of miles in a few seconds, where once it had taken weeks and months.

2. The TELEphone appeared in Father's day, and once again the limitations of time were destroyed.

It isn't necessary to elaborate upon these two. Their stories are old and, sad to say, familiarity has almost bred contempt for the marvels of telegraphy and telephony. But today we are learning the wonders of

3. The TELEchron, which has virtually eliminated time's last frontiers. For those of you who are not familiar with the word, may I say that telechron is merely the impressive name of ancient Greek origin for the modern electric clock, which is self-starting, is operated by ordinary alternating electric current, and is so honest that it can't possibly give you anything but the correct time unless the current stops altogether.

Think of what this means to men and women everywhere! No more will it be necessary to say, "It's 2 o'clock by my watch, 2.10 by mother's, and half past by the clock in the kitchen." No more will it be necessary to ask the telephone operator for the correct time. No more will Catherine or John be too early or too late for work because some clock or watch has lost or gained. The newest "tele" is an inexpensive home regulator that removes the myriads of troubles of the family that does not have absolutely correct time.

Bring on your "teles," Messrs. Inventors! If you have other ideas along the lines of the telegraph, telephone and telechron, by all means work overtime to perfect them in our generation. Others will probably invent many devices for the comfort of our sons and daughters—we crave more "teles." Richard B. Bond.

Fruit On Prairies

Plum Trees and Apple Trees Flourishing At Brooks, Alberta

Hundreds of plum trees and apple trees in private gardens and in those of the Canadian Pacific Railway at Brooks, Alta., are in bloom, and represent one of the sights of the neighborhood. Ten years ago a thousand of these were introduced and planted, and they gave a good account of themselves from the start. Their growth in the last three years, however, as seen in blossom time, has been almost spectacular.

Sure She Knew

A little girl from the city had been visiting in the country, and was being questioned as to what kind of a time she had. Finally some one said, I bet you don't even know how to milk a cow.

"But I do," she said.

On being pressed for particulars as to how it was done she replied. "You take the cow to the barn and give her some breakfast food and water and then you drain her crankcase."

Explorations In Northland

Publish Diaries Of German Explorer Who Died In Baffin Land

Preserved by the Eskimos of Baffin Land, ultimately finding their way to a missionary depot at Blacklead Island, and from there to Germany, the diaries of Bernhardt Hantzsch, published in Germany during the Great War, have now been made available to the Canadian people in translations done by Mrs. R. M. Anderson, M.A., Ottawa, and issued by the North West Territories branch of the Department of the Interior, as an appendix to a recent publication, "Southern Baffin Island."

Hantzsch was the first white man to cross Baffin Land from east to west, travelling to Foxe Basin in 1910. His supplies were lost in a shipwreck in Cumberland Sound in the summer of 1909, but with a few Eskimos he succeeded, in spite of untold hardships, in making his way across almost gameless country. He finally succumbed to sickness and starvation, and was buried by his aboriginal companions near Hantzsch River, on the west coast of Baffin Island.

The German explorer's diaries were preserved by the Eskimos and taken to the missionary at Blacklead Island, who sent them to relatives of the deceased traveller, in Germany. The scientific results of his expedition were compiled and published in Germany during the war. They remained unknown on this continent until made available to government circles in 1928 by Mrs. Anderson's translations.

Among the outstanding discoveries of Hantzsch was the one which established that Foxe Basin penetrated deeper inland than was formerly thought. That has since been confirmed by the Canadian explorers, Burwash and Dewey Soper.

Definition Of Success

Not What Majority Of People Think It Is

He has achieved success who has lived well, laughed often, and loved much; who has gained the respect of intelligent men and the love of little children; who has filled his niche and accomplished his task, whether by an improved poppy, a perfect poem, or a rescued soul; who has never lacked appreciation of earth's beauty or failed to express it; who has always looked for the best in others and given the best he had; whose life was an inspiration and whose memory a benediction.

Has Eye For Detail

Recent biographies of Queen Mary have failed to mention one of her most striking characteristics. She has the unusual gift of what is called "the photographic eye." She never forgets the arrangement of a room, and after a lapse of years will remember that the position of some article of furniture has been changed or that something has been removed.

Canada's Forest Resorts

Evidence of the popularity of the summer resorts in the national forests administered by the Forest Service, Department of the Interior, was afforded by the fact that eight hundred motor cars were counted on one occasion during the summer of 1929 at a band concert at Kamsack Beach on the Duck Mountain National Forest, Manitoba.

Caters To Germs

One of the most remarkable kitchens in the world is to be found at the Lister Institute for Preventative Medicine, Chelsea, England, where meals are prepared daily for nearly 3,000 different types of germs.

Johannesburg, South Africa, will build a million-dollar library and museum.

New Jewels Are Cheap

Imitation Gems Made Of Casein Extracted From Milk

There seems absolutely no end, nowadays, to the wonders which science has in store, and chemistry, that most fascinating child of hers, is always surprising us with new, and astonishing marvels. Milk from cow, for instance, can be transformed with the help of a knowledge of chemistry into a remarkable substance used in the making of a great number of things. This is because all milk contains "casein," which, when extracted from the milk, is so very useful.

The separated casein can be dried and made solid. Before being so treated, moreover, it can, of course, be saturated with a coloring matter of any shade desired. Casein is dried by being subjected to chemical treatment, and quickly hardens into a solid substance which can be cut, worked, and shaped like wood by a lathe.

When in this state casein can be, and is, employed for many things such as curtain-rings, knitting-needles, name-plates, serviette rings, bangles, lamp-shades, and so on. Such things are just as attractive made from casein as similar articles made of celluloid, and are safer. But casein, thanks to chemistry's latest revelation, can now be rendered almost transparent.

As already mentioned, casein will take any coloring desired, and when it is made as transparent as possible, cut, polished, and set, it is difficult, without very close inspection, to tell these "milk stones," as they might be called, from the commoner sorts of precious stones. In fact, casein is almost universally employed today in the manufacture of imitation jewellery. For, of course, it is cheap, anyway, infinitely cheaper than real stones would be. Those who are in the habit of wearing cheap jewellery are happily unconscious of the fact that in all probability they are merely decking themselves with milk which once came from a cow.

Irish Free State Has Low Marriage Record

Proportion Of Unmarried People Greater Than Any Other Country

The proportion of unmarried people in the Irish Free State is greater at all ages than that of any other country. This fact is revealed by the last Irish Free State census, just issued. It is also shown that there is a marked tendency for marriages to take place comparatively late in life. Eighty per cent. of persons between the ages of 25 and 30 years are unmarried. The next highest known percentage of males unmarried at 25-30 years is that of Sweden (64). The corresponding figure for England and Wales is 48, and that of the United States 36 per cent.

The Squared Circle

Ace High: Would you lend me a dollar, Charley?

Four Flush: Surely!

A. H.: Thanks. Just give me fifty cents.

F. F.: Here it is old man.

A. H.: Now, you still owe me fifty, don't you?

F. F.: Sho! Sho!

A. H.: And I owe you fifty.

F. F.: Check!

A. H.: That makes us even. Many thanks.

She (somewhat foggy on musical matters)—"Is Bach composing much now?"

He—"No, madam, he's decomposing."

The eastern two-thirds of New Guinea, the largest island in the world, is largely unexplored.

The word "villain" originally meant "villager."

May Replace House Names With Numbers

London Suburbanites Do Not Take Kindly To Idea

A shiver of apprehension is going down the spinal columns of residents in many classy little suburban areas. The registrar-general, in making preparations for the general census, to be held next year, is appealing to local authorities to have all houses "adequately numbered."

Therefore it is that a great disquiet has settled upon the owner-occupier of the "bijou residence," the "charming villa," and the "eligible bungalow."

Are all those dinky boards with legends as "The Oaks," "The Elms," "Mon Repos," "Clovelly," "Chez Nous," "Fair View" and so forth to be scrapped and their place to be taken by a vulgar fraction or at any rate a vulgar numeral? The registrar-general suggests postmen are apt to lose their way, or at the least their competence at delivery among all those Arcadian descriptive efforts.

It is to be feared the registrar will have his way, assuming that the local authorities are of his way of thinking, too. The latter possess powers to compel "The Limes" to bear an unimpressive 36, and for "The Nook" to suffer the indignity of being labelled plain 17.

Recipes For This Week

(By Betty Barclay)

CHICKEN TIMBALES

2 tablespoons butter.
½ cup stale bread crumbs.
¾ cup milk.
1 cup chopped cooked chicken.
½ tablespoon chopped parsley.
2 eggs.
Salt and pepper.

Melt butter, add bread crumbs, and milk, and cook in double boiler five minutes, stirring constantly. Add chicken, parsley, and eggs slightly beaten. Season with salt and pepper. Turn into buttered individual molds, having molds two-thirds full, set in pan of hot water, cover with buttered paper, and bake twenty minutes. Serve with cream sauce.

ORANGE SYRUP SAUCE

1 cup orange juice.
1 teaspoon grated orange rind.
1 cup sugar.
Juice 1 lemon.
Grated rind ½ lemon.

Put ingredients into saucepan, and boil fifteen minutes. Skim, strain and pour into sterilized glasses. Use as a sauce on vanilla ice cream or on baked rice pudding. This sauce when sealed in sterilized glasses, will keep well, and will be found convenient to have on hand for emergency in the summer.

Douglas' Egyptian Liniment is a quick, certain remedy for Hoof, Rot, or Thrush. Four or five applications are usually enough.

How She Saw It

An Irish girl was imported from the Emerald Isle to act as general servant for a middle-class household. Her mistress suggested to her the propriety of sending a post card to her relatives with news of her safe arrival and assurance of her welfare. The girl did so, and added the following brief impression of her environment: "I came here in a cab without a horse, they play the piano with their feet, and they shout at people in the hall that aren't there!"

Everything Special

A special carpet in two shades of pink was woven for the June wedding of Miss Gasquet, heiress of the Woolworth millions. A gardener grew roses of the same shade as her dress, and a designer specially studied Miss Gasquet, in order to "absorb her personality," before designing her wedding dress.

Minard's for Insect Bites.

Graves Of Heroes Moved

Work Has Been Completed By British War Graves Commission

Removal of the graves of 450 British and Dominion soldiers from the cemetery at Ploegsteert, Belgium, to a spot about half a mile away, has been completed and the long dispute over the matter has been settled, according to an announcement of the British War Graves Commission. During the World War, the cemetery was constructed beside the ruins of Chateau Rosenberg, which had been destroyed only a short time before. After the war, the owner of the chateau, a Frenchman living in Belgium, announced that he desired to rebuild the chateau and that the graves would be too close to the reconstructed building. After several years of negotiations, the offer of the owner to donate land for the new cemetery was accepted and the bodies were removed.

BACKWARD BABIES

Thrive After Use Of Baby's Own Tablets

Derangements of the digestive organs are responsible for most of the ailments which afflict young children and keep them backward in development. Baby's Own Tablets regulate the stomach and bowels restoring them to normal action and this is all that is necessary to set the little sufferer safely on the road to health and happiness.

Baby's Own Tablets are specially designed to correct indigestion, constipation, colic; break up colds and simple fevers and to allay teething pains. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

An Extraordinary Experience

Wife Of English Peer Talked To Him From Mid-Atlantic

An extraordinary experience befell Lord Brecknock at the Aldwych Theatre, London, England. He was sitting comfy in the stalls with a small party, when a theatre attendant approached him and said "Mid-Atlantic wants you." Scarcely understanding what it was all about, he suffered himself to be led to the telephone and spoke to Lady Brecknock, who had called him from the "Majestic" with as much ease and lack of trouble as if he was making a local call. It is a proof of the efficiency of the telephone service that he was located at the theatre in question within four minutes of the call having been put in at his house in London.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

Girl Chooses Novel Engagement Gift

Every Blind Person In Her Home County Will Receive Radio Set

A man who recently became engaged to a Gloucestershire girl asked her to choose something as an engagement gift. The result of her choice is that every blind person in the county who is without a wireless set will be given one. The total cost will amount to about $50,000. The gift includes the cost of maintaining the sets. The donor does not desire the identity of his fiancee or himself to be revealed.

Little Helps For This Week

"Thou shalt give unto the Lord thy God according as the Lord thy God hath blessed thee."—Deut. xvi 10.

For the best that thou canst be
Is the service asked of thee.

The Almighty in His providence, does not ask of us uniform rents for our rights and lives, as earthly landlords sometimes do. He only asks for the rightful use of the talent entrusted to us. The taxes of Heaven are never per capita, but always pro rata. Not the form observance of each and all alike, but every heart's desire, every hand's readiest service. Not the number of acres you till, but the quality of your tilling determines the profit of the harvest in spiritual as well as material farming. This standard exacts no promises, but it accepts no apologies; for there is no occasion for apology when you have done all you can.—Jenkin Lloyd Jones.

Mosquitoes Prefer Blondes

Although the Brunette Is Not Entirely Overlooked By This Pest

Mosquitoes prefer blondes and will pass up a brunette nine times out of ten when there is a blonde in sight.

This was the assertion of Herman Horning, city entomologist and an authority on mosquitoes and their habits.

"Mosquitoes and flies are sensitive to light," explained Mr. Horning. "They are easily attracted to light-haired folks, both men and women, and seem to prefer fair people to dark.

"Another noticeable thing is that in fields where mosquitoes hum around cows or horses it will be found that light-colored animals are the greater sufferers."

Mr. Horning made it clear, however, that the brunette was not entirely overlooked by the mosquito.—Philadelphia Ledger.

All Branches Represented

All branches of organized activity in the Province of Manitoba were represented at a meeting in Winnipeg, when plans for Manitoba's diamond jubilee celebration on July 15th were launched. The celebration will commemorate the 60th anniversary of the province's entry into confederation.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

Leads In Export

"Canada exports more manufactured goods per head of population than any other country in the world," says the Farmer's Sun. "The figures are "Canada, $84.80; Great Britain, $68.90; Germany, $32.68; France, $30.86, and the United States $25.13."

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

FIFTH PROVINCIAL CROP REPORT

Issued by the department of Agriculture, Government of Alberta, Edmonton, June 21, 1930

Reports received from south of Calgary indicate that during the past fortnight several windy days with high temperatures have checked growth which up to that time had been very satisfactory. Summer fallow had been standing up well but crops sown on spring ploughing were beginning to suffer. Little or no rain had fallen during this period but reports of hail, over a large area on the night of June 20th crowded a much improved crop prospect. Irrigation has been generally practised throughout the irrigated areas.

In the central and eastern parts the previous rains within the last few days have done much to relieve the serious condition caused by continued dry weather and high winds. Estimates place the damage from

236,529 pounds increase in Canada alone in last five weeks

"SALADA" TEA

'Fresh from the Gardens'

Canadian and World Progress

The above is the main heading of an article in the current issue of Toronto Saturday Night dealing with the present economic situation. The sub-headings to the article state "Dominion's Rate of Advancement Far Above Other Nations. Favorably Situated To Share Again In Progress."

Because owing to the present temporary depression in Canada, as throughout the world but fortunately less acute in this country than elsewhere there is a tendency on the part of many people to become unduly pessimistic, it is perhaps well to pass on some excerpts from this very illuminating article in the Toronto paper.

Economic life is ever in a state of flux. The fortunes of nations are affected by some radical change which may raise or lower their status among the powers. Business men find themselves drawn into the current of new demands and competition through which the most careful navigation is necessary. Even persons in the most humble circumstances and those who for one reason or another are not engaged in active work cannot fail to notice how their living habits are altered over a period of time.

The most recent period of prosperity probably lends itself to more thorough analysis than any other, for one reason, because from the data available we can more accurately measure the forces employed; we can well determine the degree of economic recovery from the most disastrous conflict in history. Ten years ago the receding tide of war influences left a mass of economic disorder. Inflation of credit and currency, severe depression in commodity prices, unstable political conditions, an enormous weight of debt and taxation and serious labor troubles—these were but a few of the difficulties which faced world business.

The economic forces of the world were finally mobilized along the broadest front ever occupied by an army of workers. The ensuing advance was not uniform the world over, the United States, Canada, France and Argentine swept ahead of other countries but progress was made almost everywhere on the globe and in this period of intense economic activity world production reached a record level.

An analysis made by the Canadian Bank of Commerce bears out this statement. An interesting sidelight in that analysis is a comparison between the progress of Canada and that of the world as a whole. It should not be taken for granted that Canadian production of basic commodities exceeded that of every other country, but it is a proven fact that the rate of increase in Canadian production exceeded that of the world by a wide margin in many of the most important branches of economic life.

This advance of Canada was so rapid as to place her among that small group of nations which enjoys a highly diversified economic organization, and one which has a broad field of opportunity for the application of agricultural and industrial science and the direction of business into the safest channels.

Consider a few figures. Between 1923 and 1928, world wheat production increased 12 per cent., but in that same period Canadian wheat production increased 35 per cent. Coarse grains production increased in Canada 21 per cent., as compared with a world increase of only 5 per cent. Coal production, world increase 5 per cent., Canada, 22 per cent. Oil production, world increase, 24 per cent., Canada 66 per cent. Lead production, world increase 11 per cent., Canada 42 per cent. Copper production, world increase 18 per cent., Canada 81 per cent. Pig iron production, world increase 11 per cent., Canada 81 per cent. Steel production, world increase 20 per cent., Canada 63 per cent. Automobile production, world increase 7 per cent., Canada 64 per cent. Paper production, world increase 9 per cent., Canada 31 per cent. Aluminum production, world increase 15 per cent., Canada 125 per cent. Artificial silk, world increase 103 per cent., Canada, 217 per cent. Water power developed, world increase 17 per cent., Canada, 43 per cent. Foreign trade value, world increase 3 per cent., Canada, 26 per cent.

The foregoing cannot of course be accepted as a complete registration of the world's economic activity, nor should it be regarded as painting a picture of unalloyed prosperity, perhaps it goes without saying that the world has not yet reached that ideal state where the work of all its people [illegible]

Tribute To Dr. Eckener

People Take Visits Of Graf Zeppelin As Matter Of Course

A writer in the New York Evening World says: "It is interesting, as showing what has happened with regard to this 'air-mindedness' that is so often spoken about, that the Graf Zeppelin, fighting the worst weather that it has ever encountered, caused the smallest stir by its arrival here that it ever caused. People now take it for granted that it will arrive safely and sail safely on schedule, just as they take it for granted that the "Europa" will arrive and depart safely and on schedule, or the "Bremen," or the "Berengaria." She has become, in the minds of the American people, a sort of aerial liner, a little more exciting, no doubt, than an ocean liner but in pretty much the same class. Dr. Eckener, then, if he is a reflective man, will realize that this matter-of-fact acceptance of his presence was perhaps the highest tribute to him and to his ship that could be paid. People no longer wonder about the Graf Zeppelin, but realize that regular air transport over the Atlantic is now a reality.

Some credit to Mr. Hoover as a prophet, it seems to us, is due in this connection too. It will be recalled that quite casually, before any of us had ever seen the Graf Zeppelin, he said that regular airship travel across the Atlantic would come in a few months. Well, here it is.

PALE FACES JADED NERVES

Due To Weak, Watery Blood

Anaemia—impoverished blood—comes on stealthily that it is often well advanced before recognized. Fatigue and discomfort, the earliest manifestations of the trouble are seldom taken seriously. Soon the face becomes pale, the nerves jaded; the heart palpitates violently after the slightest exertion, the appetite becomes fickle and before you realize it you are in a terrible plight!

At such time, by enriching and purifying the blood Dr. Williams' Pink Pills will build up the nerve cells and correct the run-down condition. [illegible]

For a Unified India

New Era Is Visualized In Second Volume Of Simon Report

India, with its teeming millions, its history stretching back into dim antiquity, ever a story of division and differences, its many religions, is visualized in the second volume of the Simon report as ultimately one strong unified nation occupying an important place among the British commonwealth of nations.

Although the process may take many years, the report foresees India eventually welded into one great confederacy under a federal government to which not only British India, with the exception of Burma, but also the individual Indian states under native rulers would adhere.

In the meantime the report recommends the building of a federation founded on the eight governors' provinces. The remaining governor's province, Burma, would be entirely separate from India.

The provincial governments would be the schools in which the training of the Indians in self government would be continued. A constitutional framework would be set up for the provinces by a revised India Act, which would be broad enough to permit of adjustments to meet the varied requirements of the different provinces and permit of the unhindered or uninterrupted growth to complete responsible government.

The governor of the province would form his ministry but while it would not be necessary in every province that every minister should be a member of the legislature, members from the legislature would be eligible for any of the portfolios in the cabinet and there would be joint cabinet responsibility. At present in the provinces there is a division of responsibility and restricted authority.

The British army must remain in India. The well-being of India and the well-being of the Empire require its presence there for many years to come, much as it is constituted today.

Reduction In Postage

Rates On Letters and Parcels Outside Canada Are Less

Reduced postal rates on Canadian mail destined to foreign countries with the exception of the British Empire, France and North and South America, became effective July 1, according to [illegible] by Postmaster-General's Department. The changes resulted from the World Postal Congress held in London, England, last year, and will affect many countries of the world.

Under the new rates, letters will be carried for five cents for the first ounce and three cents for each subsequent ounce or fraction. The postcard rate will be three cents. The rate on printed matter will be one cent for each two ounces.

Commercial papers will be carried for five cents for a packet not exceeding 10 ounces in weight and one cent for every two ounces thereafter. The rate on samples will be two cents for a packet not exceeding four ounces in weight and one cent for every additional two ounces.

International reply coupons will be sold at seven cents each and the redemption value will be at the rate of five cents in postage stamps for each coupon.

All these rates apply only to parcels or letters destined to points outside Canada.

Speed Boat Shipped

British Girl Has Entered Craft For International Trophy

"Estelle V.," the motor boat with which Betty Carstairs hopes to establish a new record at Detroit, was shipped from England on the White Star liner "Calgaric," accompanied by five mechanics. From Halifax the boat will be shipped by Canadian National Railways to Gravenhurst, Ontario, where it will be tuned up in the Muskoka Lakes before the Detroit races.

As a result of Major Segrave's death, Miss Carstairs will be the only British entrant for the international trophy.

Many mothers have reason to bless Mother Graves' Worm Exterminator because it has relieved the little ones of suffering and made them healthy.

Puzzle For Fishermen

Scotch fishermen who have handled thousands of tons of many kinds of the finny tribe are puzzled over a large fish of unknown species which was caught in a net in Moray Firth, 20 miles off the Banffshire coast, recently. The oldest fishermen say it is unlike any they have ever seen. It was still alive when landed, hours after its capture.

Minard's Drives Away the Headache.

No Question About It

"Yes, my friends," said the theological lecturer, some admire Moses who instituted the old law, some Paul, who spread the new. But after all, which character in the Bible has had the largest following?"

As he paused, a voice from the back bench shouted "Ananias."

Postal savings in Japan recently passed the $1,000,000,000 mark.

Coal Movement Arranged

Everything Ready For Shipments From Alberta and Saskatchewan Into Manitoba

All administrative arrangements in connection with the movement of Alberta and Saskatchewan coal into the Manitoba market under the recently granted subvention to aid in the costing of imported fuel, are now completed, it was stated by Frank G. Neate, secretary of the Dominion Fuel Board, Ottawa. Mr. Neate was in conference, at Winnipeg, with operators from Alberta and Saskatchewan and also with distributors and railway officials.

"The machinery is all set up to handle the administrative work, the co-operation of the railways has been secured and the operators and distributors understand what is required of them," said Mr. Neate. "With the weapon now in their hands with which to [illegible] the importation of foreign coal, it now is up to the coal people to use it."

English Language Spreading

American Books Have Extensive Market in Foreign Countries

The wide and growing prevalence of the English language is attested by the fact that countries to which our tongue is that of a foreigner take high rank among the purchasers of books published in the United States. The Department of Commerce supplies the information that American books have an extensive market in foreign countries. While naturally the United Kingdom and Canada supply the largest number of readers, the country that stands third in the purchase of books made in the United States is China. Latin America and the Philippines take large numbers. That the third best customer for books printed in the English language is China shows how widely the English language is spreading, and with it, of course, Anglo-Saxon culture.

A Prime Dressing For Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Eclectric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

After 82 years of waiting the congregation of St. Michael and All Angels' Church, Helensburg, Scotland, have just decided to complete the erection of the uncompleted church tower.

Use Minard's for Rheumatism.

Cleanliness Assured

By dropping a coin equivalent to five cents in the slot of a new machine in Berlin, Germany, one may get a sufficient amount of water to wash the face and hands. Added to this are a package of powdered soap and a paper towel.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

SOUTHERN CROSS LANDS SAFELY AT NEW YORK

Roosevelt Field, New York.—Completing his flight from Ireland which was interrupted by a landing at Harbor Grace, Newfoundland, Capt. Charles Kingsford-Smith brought his famous monoplane "Southern Cross," to a safe landing before a wildly enthusiastic crowd.

He first appeared out of the northern sky, a speck attended by a dozen smaller specks, shortly before 6 o'clock, but passed high above to circle above Manhattan.

Although he had flown 1,100 miles from Harbor Grace, Newfoundland, he treated the crowd awaiting to acclaim him, to a spectacular exhibition of vertical flying before bringing his ship to a perfect three-point landing directly before the throngs massed behind a high wire fence.

The four men of the "Southern Cross," Captain J. Patrick Saul, Evert Van Dyk, and J. W. Stannage, were neither physically nor nervously weary.

Deafness bothered them a bit, from the long enforced roaring of the three ancient Wright whirlwind motors, but they were nimble and widely agrin when they clambered out of the big blue-bodied ship into the hands of the mob.

It was a reception that might have reduced lesser men to damp, frightened exhaustion, for the arrangements, made so carefully and so constantly revised all day, broke down utterly and shamefully.

It had been planned that after the United States health and customs inspectors had cleared them, the Nassau County reception committee, the New York City [illegible] committee, and finally, Sir Ronald Lindsay, the British ambassador and his diplomatic party, should formally greet the flyers.

But instead the police lines failed to hold the gentlemen of the reception committee got hustled about with no regard for their eminence. Sir Ronald was rudely poked in the stomach by an excited copper, the coat was nearly torn from the back of Henry Allen, the Australian high commissioner to the United States.

It was the worst hurly-burly that has ever occurred on Long Island flying field, where there have been many notable shindies between the cops and the citizens.

The flyers, as a result, were nearly trampled under foot as they stepped down into the noisily cordial crowd and it was fifteen minutes before the 175 county police under Chief Abraham Skidmore, were brought into sufficient discipline to cease shoving members of the reception committees and get the flyers to the operations office.

There at last, when the last politician's hand had been shaken and the last reception committeeman photographed in proud proximity to the fliers, the rapidly wilting Kingsford-Smith was permitted to receive a cablegram from his fiance, Miss Mary Powell, of Melbourne, to greet a couple of his oldest friends in this country, and to tell the story of his last great flight to the newspapermen.

It was his last great flight, he stressed. When he sets the "Southern Cross" down at Oakland, California, he will have completed his aerial circumnavigation of the world which commenced two years and one month ago.

And when that is done he will marry in September and give himself to the more humdrum but vastly more profitable business of directing a flying transport service in Australia.

Harbor Grace, Nfld.—Baffled by fog thick as soup and more dangerous than buffeting winds, the Southern Cross, veteran of the air, paused here, 1,100 miles short of New York, and the goal aspired to by Captain Charles E. Kingsford-Smith, daring Australian airman, and his three companions.

The trim silver monoplane, its three motors roaring through the night, spanned the North Atlantic in 31 hours and 25 minutes, and, having flown the 2,180 miles from Port Marnock on the Irish coast, settled out of the morning mists here at 6 a.m., E.S.T.

They had four gallons of gasoline left when they landed, after having flown about for hours lost in the darkness and impenetrable fog. At one time, the Southern Cross was reported past Cape Race, on the southeastern tip of this promontory of the continent. They actually flew several hundred miles farther than the airline distance from Ireland to Newfoundland.

Thirty Lives Lost In Dynamite Blast

Lightning Strikes Boat In St. Lawrence River and Sets Off Explosives

Brockville.—When a bolt of lightning struck their boat and utterly demolished it, 30 men were buried to their deaths in the waters of the St. Lawrence River near here. Only 12 of a crew of 42 are alive, and of these several are in hospital in a more or less serious condition.

The boat was the "J. P. King," a drill boat owned by J. P. Porter and Son, of St. Catharines, Ont. It was engaged on a Federal Government contract to blast out the ship channel off this river port. Lying off Cockburn Island, one of the eastern fringes of the Thousand Island group, the boat was engaged in drilling a shoal when a thunderstorm [illegible] from the west.

Suddenly, there was a deafening report audible for miles around. A blinding sheet of lightning reached down from the heavens. The boat was struck by the electricity which ran down into packed dynamite in the shoal. Literally, the boat was blown to atoms.

Men had no chance to escape. They were caught [illegible] in a trap. Those who [illegible] instantly by the force of the explosion were blown [illegible] into the water in such a dazed state that they sank before help could reach them.

Heroic rescue work was carried out by the United States coastguard cutter 211 in command of Captain G. G. Lok, of Olcott, N.Y., and carrying Commander M. R. Rasmussen, chief inspector of the Buffalo district. This boat was proceeding east along the shipping channel about half a mile west of Cockburn Island when the "J. P. King" was struck. Full steam ahead was ordered and she plowed her way through the water.

Two or three tenders belonging to the drill boat also rushed to the scene but between them only 12 men were rescued. A few men hanging to driftwood, scattered debris, tangled and twisted spars, that was all that remained of the $100,000 drill boat, the largest of her kind in Canada and her crew of 42 men.

Noted Visitor From Japan

Leading Statesman Crossing Canada On Way To Geneva

Victoria, B.C.—One of Japan's leading diplomats and statesmen, Mineichiro Adachi, former ambassador to France and Belgium, passed through Victoria aboard the liner "Korea Maru." He is accompanied by his wife and is on his way to Paris and Geneva.

"Hon. Herbert Marler, the Canadian minister to Japan, is making himself very popular in my country," Mr. Adachi said. "He travels extensively all over the empire and is very well known in all parts of Japan, even though he has been there only about a year. The presence of so fine a man as Mr. Marler in Japan is doing much to strengthen business and racial ties between Japan and Canada," Mr. Adachi said.

He will visit Ottawa and Washington before sailing from New York to Europe.

New Zealand Requires Canadian Engineer

Services Of Outstanding Man Needed To Repair Power Plant

Wellington, New Zealand.—Services of an "outstanding Canadian engineer" are required by New Zealand. The government has cabled its trade commissioner in Canada asking that he secure such a man. The "job" is that of effecting repairs to the recently completed Arapuni power plant. Canada's great strides in the science of building and maintaining such power plants is largely responsible for the fact that a Canadian is wanted.

Speed Record For Women

Detroit.—What was declared to be an international speed record for women was set here when Amelia Earhart, flying over a measured 64-mile course at Grosse Isle airport, averaged 174.9 miles an hour. Miss Earhart flew a standard Lockheed Vega plane.

Manufacturing More Butter

Winnipeg, Man.—Manufacture of creamery butter in Manitoba continues to increase rapidly, according to a report from the Department of Agriculture. The make for May, it is stated, was 20½ per cent. greater than of May, 1929.

Austrian sound-film interests are seeking government support.

PLANS APPROVED FOR AN EMPIRE NEWS SERVICE

London, Eng.—By an almost unanimous vote the Imperial Press conference placed its seal of approval on the resolution which was proposed by E. Norman Smith, of the Ottawa Journal, that "this conference approves the principle of mutual and co-operative interchange of cable news between the component parts of the Empire."

Subsequently B. C. Nicholas, of the Victoria Times, moved a further resolution that the communications committee be authorized to investigate and report upon the feasibility for co-operative news distribution for the Empire. The purpose of this resolution, Mr. Nicholas explained briefly, was to translate the conference decision into practical fact. There was considerable opposition to the Nicholas resolution, however, and Mr. Nicholas did not press it.

During the morning's discussion, J. B. F. Livesay, general manager of the Canadian Press, a delegate, submitted a tentative scheme for the creation of a British Empire Press Association. The scheme suggests the establishment of national co-operative news service, similar to the Canadian Press, in the various units of the Empire, with a central office in London, through which the national units could exchange Empire news. The association, suggested Mr. Livesay, should be "mutual and co-operative from crown to base, girdling the world with a news service owned and controlled by the newspapers of the British Empire."

C. F. Crandall, of the British United Press, Montreal, pressed the need for individuality in news service. The Hon. Theodore Fink, chairman of the Australian section, approved of the principle of the news interchange but was not prepared to proceed at once with consideration of a definite scheme. K. C. Roy, of India, doubted if the creation of a co-operative news service, such as that suggested by Mr. Livesay, would be possible in [illegible]

Victor Sifton, The Leader-Post, Regina; J. W. Dafoe, Manitoba Free Press, Winnipeg, and W. Rupert Davies, [illegible] were enabled to give their readers a first class service.

T. C. List, of New Zealand, pointed out the advantages secured by New Zealand by the establishment of a co-operative news service there. A similar system for all parts of the Empire would be all to the good. Allan Powers, Australia, and G. A. L. Green, South Africa, both doubted the immediate expedience of an Empire co-operative service. R. J. Kingston Russell, South Africa, supported the idea.

In further discussion, Lord Burnham observed that the Canadian case was unanswerable, but suggested postponement of the resolution until the next Imperial Press Conference. J. H. Woods, managing director of the Calgary Herald, then replied that the Canadian delegation was a unit in support of Mr. Norman Smith's resolution approving the principle of co-operative interchange of news. He urged that the matter should not be postponed.

The conference then voted on the question and the Canadian resolution passed with very few dissenters.

WAR VETERANS' ALLOWANCE

Daniel Leeck, totally disabled war veteran, who will be first to get war veterans' allowance when new act goes into force September 1.

Traffic Problems Discussed

Canadian Good Roads Association Holds Convention In Toronto

Toronto.—Realization of a coast to coast highway across Canada, uniformity of traffic laws and signs in the provinces, elimination of level railway crossings and regulation of aeroplanes were the topics of discussion [illegible] delegates from [illegible] was held here [illegible] of the Canadian [illegible]

Federal Aid For Highways

Canadian Good Roads Association Will Urge This Matter

Toronto.—Federal aid for main highways, provincial as well as interprovincial, will be urged on the Dominion Government by the executive of the Canadian Good Roads Association, it was decided here at a conference between that body and representatives of the Ontario, Quebec, Manitoba, Saskatchewan and New Brunswick governments, the railways, the Dominion Railway Board and other bodies.

The executive will also draw up a proposed schedule of uniform traffic regulations, which it is hoped all provinces will adopt. This code will cover a speed limit, lighting and brake equipment, and registration fees.

A plan for federal aid for highways in Northern Ontario was made by Hon. William Finlayson, minister for lands and forests for Ontario. Mr. Finlayson declared that these highways would be a valuable link in a national chain, but that the area through which they extended was very sparsely populated at present, and that unless the Dominion contributed towards the cost, the whole [illegible]

Britain's Naval Program

Program For 1930 Includes Three Six-Inch Gun Cruisers

London, England.—Rt. Hon. A. V. Alexander, first lord of the admiralty told the House of Commons that supplementary estimates in the government's 1930 naval construction program would be presented shortly for three 6-inch gun cruisers, nine destroyers, three submarines, four sloops and one net-layer and target towing vessel. They would cost about [illegible]

The first lord said orders for laying down these vessels would not be given until the last quarter of this financial year, and that only a small sum would be required to be spent on the vessels specified.

"I would emphasize," remarked Mr. Alexander, "that these ships are required in replacement of others which have passed the age limit and to enable the royal navy to carry out its current duties in time of peace and that the program has no relation to those of other powers."

UNITED STATES IS WORRIED OVER GRAIN SITUATION

Washington.—Political and official Washington is watching the slumping prices of grain and cotton closely these days.

Two Democratic senators from Texas and Oklahoma states which produce both crops, called the senate's attention to the record lows recently, connecting the price drops with the new tariff bill.

The Oklahoman, Senator Thomas, made a novel proposal for dealing with the world market which fixes most American farm prices. He introduced a resolution to authorize the president to call an international conference to solve economic barriers, consider a system of international crop reporting and study a plan for control of production of exportable agricultural products.

At the Farm Board, Chairman Legge stuck close to his position that the time has not yet come to act, because the farmers have not put their 1930 crops on the market yet. That time is perilously close, however, and in the southwest marketing of grain has already begun.

Arrangements made during the past year however put the board in shape to act quickly when the time comes, and funds already on hand of the board's first quarter million appropriation can be supplemented by money which Legge is able to borrow if needed from private banks at the prevailing low money rates.

The board intends to market 300,000,000 bushels of grain of the new crop and to lend money to enable farmers to hold their grain if the price at harvest time is too low. The board believes that money is available to handle this, and consequently the $250,000,000 authorized but not yet appropriated may not be needed. The government's expected deficit next year is also a factor to be considered in seeking farm appropriations.

The board had no comment to make on the telegraphed request of Governor Reed, of Kansas, for immediate action to bolster the price of grain.

SAY BANKS NOT PRESSING WHEAT POOL FOR CASH

Winnipeg.—Reports that Canadian lending banks were pressing the wheat pool and the prairie governments for cash to cover a portion of advances in the 1929 grain crop were characterized as "nonsense," by officials concerned.

A London newspaper is stated to have published a report that the provinces might be asked to put up part of their guarantee and that a grave financial crisis was involved.

Referring to the newspaper's reported estimate that a demand of 10 cents per bushel would involve $1-000,000,000, Pool officials commented that the statement was "so foolish that it does not require an answer."

S. L. Cork, chairman of the committee of the Pool's lending banks, remarked that he did not know of any such situation. Recently, Premier John Bracken, of Manitoba, stated that no additional step by the provinces was necessary.

At the present time cash wheat is selling well under $1.00, which was the amount of the Pool's initial payment to members. Two days ago, initial payments on remainder of the 1929 crop yet to be delivered by Pool farmers were cut to 85 cents per bushel.

It is known that the amount of grain in Pool farmers' hands is small, the Pool has termed the amount "insignificant." The initial payment cut had the added effect of barring non-pool farmers who might have joined up merely to cash in on a hold-over which they failed to sell when the prices were above the dollar-mark.

In February the prairie provinces met and decided to guarantee, backed by their resources, the loans made to the Pool by banks in order to finance the initial payment. This was done in order to prevent the Pool being forced to unload wheat on depressed market in order to realize collateral sufficient to protect the margin required by the banks on loans.

Report On Manitoba Grain Fields Encouraging

Crop Summary Issued By Department Of Agriculture

Winnipeg, Man.—Grain fields in Manitoba look "very well," by virtue of satisfactory growth during the last few weeks and despite slow May growth and cold spring weather, according to a crop summary issued by the Manitoba Department of Agriculture. Early-sown wheat is reported in the shot-blade and fall rye has been headed two weeks or more.

In most places, moisture requirements have been met, though slough-water is not plentiful due to drought of one year ago. Soil drifting has been pretty well outgrown, though it was quite prevalent a short time ago in central Manitoba. The few hailstorms recorded in the province have done considerable local damage.

Cut-worm damage on the whole has been slight, it is stated, and the season for their activity will soon be over. Hay prospects are fair to good and while tame-grass and clover acreage is below average, the growth is fair. Animals have been doing well the past month.

General Election For Britain

Ramsay MacDonald States Labor Party May Go To Country In the Fall

London, England.—The possibility that a general election might be necessary before fall was expressed by the Prime Minister J. Ramsay MacDonald, at a meeting of the Labor Party here.

The Prime Minister made the statement in explaining his action in commons earlier in the day, when he announced the government was dropping the education bill and the consumers' council bill for the balance of the present session.

MacDonald said that in view of the likelihood of a general election before autumn, it was not desirable to face the contest "with the decks littered with lumber."

Amendment Given First Reading

London, Eng.—Recent agreements between the Dominion Government and the provinces of Manitoba, Saskatchewan, Alberta and British Columbia, regarding the natural resources of the respective provinces, had an echo in the House of Lords when first reading was given to an amendment to the British North America Act, designed to give effect to the agreement.

THE TOFIELD MERCURY

A Weekly Newspaper Published At
Tofield, Alberta
W. Worton Publisher

DOMINION DAY—

THERE IS special charm attached to anything new. A new house, a new car, a new radio, new furniture, anything new excites interest, lends itself to appraisal and judgement, and is praised or condemned according to what people see in it.

A new country is no exception. A new country has the eyes of the world upon it. Where people are cramped for elbow room, literally and figuratively, they are looking out towards a new land where opportunity beckons and promises are worthwhile.

There is a special charm about being a citizen of a new country. Historic associations are splendid, citizens of faded empires have many things to be proud of. Achievements embracing honor and glory, conquest and enterprise, colonial schemes, vast and inspiring; these things the citizens of many countries can visualize by looking back to-day. Citizens of such countries have cause to be proud and Canadians in general congratulate them heartily—for Canada is a new country. The achievements of Egypt, Greece, Rome, France, Spain, Britain, are all of historic interest and pride to citizens of those countries, while the United States in the full glory of its strength to-day has both retrospection and introspection. But Canada is new. Compared to most nations, her viewpoint is as a young man's hopes as against an old man's dreams. To-day, with a territory capable of supporting ten times the present population, Canada can look forward to one hundred years of steady progress. One's imagination can visualize great progress. Cities where there is now bald prairie or bush; factories, workshops, stores, elevators, mines, all these things, with the passing of time will be brought into being on the prairies of Canada. Gigantic ships of the air and water will transport cargoes of foodstuffs to other lands. Harbor cities will grow larger, commerce will become greater, living will be more healthful, bright and even luxurious for many in Canada. Men living to-day will be as great in their day and generation toward their country as were the fathers of confederation in their day and generation. Men living to-day will have the opportunity of bringing to a success such grandiloquent schemes as constructing a transcontinental railway or building a thoroughfare above turbulent waters. Canada to-day is in the making. It is paradoxical to say so, yet Canada's main history is before her, as regards time, not behind her. Other nations' glories may lay in memories, but Canada's glories lay in achievement.

Even so, Canada is not by any means devoid of history. There is much material of historic interest pertaining to Canada both before and after Confederation. To those who become enthusiastic over martial exploits may regale themselves with the story of General Wolfe at Quebec. Westerners may read with pleasure and pride the story of the Riel rebellion, while the stand made by Canadian troops in France during the world war, is a lasting tribute to bravery, endurance and sacrifice; a stand that will never be forgotten as long as the memory of the greatest war of all time shall last. In the field of science also, there is cause for pride for present day Canadians. Alexander Bell, a Canadian, made the first telephone, and what has speeded up modern business more than the telephone? Other things, too, coal mine science of the maritimes, wheat culture at Ottawa, beneficial medical discoveries by Alberta doctors.

It is not that present day Canadians have not a deep sense of historic associations, but rather, that they realize that at the best the building of Canada is only partly done, and that they themselves, must take from the hands of those already grown weary, the manifold tasks of making Canada a great nation among great nations. They realize too, that the time will come when they too, will be compelled to pass on to others, the burdens that comprise the task of making Canada great.

This is written on Monday, on Tuesday of this week small boys will commemorate confederation by exploding fire works. Public speakers politicians, newspaper writers and such like will become enthused and attempt to enthuse others regarding the greatness of Canada. However, the majority of citizens after enjoying the holiday Dominion Day affords, will go about their respective businesses in a safe and sane manner, and by doing so will be doing their portion towards making a new country both mature and great.

COMMUNICATION

Editor
Tofield Mercury
Dear Sir,

While I have no desire to deprive Mr. Harry White of any solace he may find in the result of the vote of June 19th, still I feel that it is only fair to Mr. Matheson, to the U. F. A. and to the local man who ran in 1926, that the false impression conveyed in Mr. White's letter to the Mercury of June 26th should be corrected.

Mr White stated "when one realizes that in the proceeding campaign of 1926 there were 1000 votes in all, of a majority over the liberal total, one cannot but be convinced that the liberal cause has made a mighty nice stride forward."

The official figures for the first count in the election of 1926 gave Matheson 1906, Hannan 1396, Fraser 407, Bahry 337.

According to the system of transferrable vote used in Alberta, a candidate must receive over half the votes. So Mr. Bahry, second choice and Mr. Fraser's were devided between Mr. Matheson and Mr. Hanan, giving the final count as follows, Matheson 2217 and Hannan1702. In other words the U. F. A. candidate had a majority of 515 over the liberal candidate.

In the unofficial count of 1930 the U. F. A. candidate had a majority of [illegible] over Mr. White. This result was achieved despite the fact that seven rural townships have been cut off the provincial constituency since the election of 1926.

Yours truly
T. E. Seale.

Urchin. "They get in half price, sir".

BANK OF MONTREAL CROP REPORT, JUNE 26, 1930

General. In the Prairie Provinces scattered showers, which have been fairly general, and heavy rains in some areas, have benefited crops which were backward and adversely affected by high winds. Conditions now are fairly favourable, but more moisture and warm weather are needed. In Quebec the weather generally has been favourable, but in some sections continuous rains have adversely affected growth, principally on low lying lands. The present warm weather should be beneficial. In Ontario generous rains, followed by ample warmth, have promoted steady growth throughout the province. The season is ten days ahead of the average. In the Maritime Provinces growing conditions in general have been good, and recent showers have been beneficial. In British Columbia the cool unsettled weather of late has retarded growth and crops are about ten days later than usual. Details follow.

Prairie Provinces

Alberta. Northeastern area. In some localities there has been severe damage from soil drifting and cut worms, but crops now are making progress after recent rains. Southeastern area. Early sown wheat is poor, but that sown later is in good condition. More rain is needed in the next ten days. Western area. Crops have been damaged by strong winds, but recent rains have been beneficial. Saskatchewan. Northern area. Wheat generally is well stooled, six to eight inches high and possibly 50 per cent in shot blade. The average damage from all sources is reported at 10 per cent. Southern area. More rain is needed in many sections. The average height of wheat is from eight to ten inches. There is a fair stand and from 50 to 60 per cent is in shot blade. The damage from all sources is estimated at from 5 to 15 per cent and is more serious in the Regina and Moose Jaw area. Manitoba. All crops are healthy, recent rains and the prevailing warm weather promoting rapid growth. Wheat is up ten to twenty inches and advancing into shot blade.

U. F. W. A. BRIDGE DRIVE

The "Earthquake" bridge drive, which was put on by the U. F. W. A. on Monday evening, June 23rd was very well attended.

One or more distinct shocks were felt by the players at every table, the climax being reached when the winners of the last game had to turn over their points to the losers. The ladies first prize was won by Miss Stella Clement and Mr. Burrard was high gentleman. Thos. Jones and Mr. McCallister received the consolation prizes.

Lunch was served cafeteria style and future menus of substance W crop provided for by the home cooking table.

A very pleasant evening was the report of all those who were present.

DAIRYING IS MOST LUCRATIVE BRANCH

Dairying is the most lucrative branch of farming over a long period of years, it is announced here after a detailed study of the agricultural industry.

States were used as a basis of the calculation.

Comparing the year 1927 with 1919 it becomes apparent that the grain farmer received in 1927 only 54½ per cent of his 1919 income; the fruits and vegetables producer 82 per cent; the meat animal producer 85 per cent. The dairy and poultry producer received 101 per cent of his 1919 income.

CHAS. GORDON NOMINATED BY LIBERALS—A. LUCHOVITCH BY U.F.A.

Nominating conventions of both liberal and U.F.A. political parties were held last week. Mr. Chas. Gordon was chosen as the liberal standard bearer. Mr. Gordon is well and favorably known throughout the constituency, having built up a large business on the north line. He unsuccessfully opposed the U.F.A. candidate in the last federal election, and without doubt inspires the confidence of a large portion of the electorate.

Mr. Luchovitch is the sitting member, and the choice of the U.F.A. over one or two others named at the convention.

There is every possibility of a close contest.

Celebrated Humorist Coming at Chautauqua

Jess Pugh, who will present his inimitable entertainment at the coming Canadian Chautauqua here this season, has been called the Prince of Fun-Makers. If laughter, as has been said, is good for the soul, then this man is truly a mender of souls.

Jess Pugh has such a buoyant temperament, such an infectious laugh and engaging smile that he dissolves like magic the most stubborn case of blues.

JESS PUGH

To call him a reader or an impersonator is sadly inadequate. He is so much more than these terms imply. Yet he is a finished artist, with the shades and high-lights of character portrayal at his finger-tips.

Jess Pugh has a keen understanding of human nature and an inherent good-will that permit him to caricature without malice the various types he finds amusing. There is never a sting in a Pugh portrayal.

One of the most popular figures in Mr Pugh's gallery of characters is the snuff-stricken reader, a masterpiece of sheer comedy so cleverly presented that audiences roar with mirth at the plight of the luckless young amateur performer in his struggles to ignore the effect of a large dose of snuff.

Madge: "What do you think of a man who is constantly deceiving his wife"?

Jack: "He is a marvel."

Popular Mexican Musicians at Canadian Chautauqua

THE RAMOS ENSEMBLE

From sunny Mexico, the land of song and flowers, comes The Ramos Ensemble to delight Canadian audiences with their captivating music. Senor Hesiquio Ramos, concert pianist and composer, his son Rafael, violinist, and his three daughters, Rosa, Concepcion and Lupe, hold a distinguished place in musical circles in their native land. Mandolin, mandocello and other instruments typical of Old Mexico are featured by the Senoritas, who are charming singers as well as instrumentalists.

The Ramos Ensemble will appear on the last afternoon and evening of the coming Canadian Chautauqua here.

"Pollyanna" to Be Presented at Canadian Chautauqua

SCENE FROM "POLLYANNA"

"Pollyanna," the outstanding comedy-drama to be presented at the coming Canadian Chautauqua here by the Martin Erwin Players of Canada, is based on Eleanor Porter's famous novel of the same name. Pollyanna, with her sunny optimism and her philosophy of gladness, has been transferred to the stage by Catherine Chisholm Cushing in the play which will be seen here with extraordinary fidelity to the character in Miss Porter's novel.

Here is a great play, filled with laughter, pathos, gripping drama and romance, and leaving the audience in a glow of good humor.

Nearly One Billion Dollars Invested In Electric Power Stations Throughout Canada

Nearly one billion dollars was invested in central electric power stations in Canada at the end of 1928, or $[illegible] to be exact, according to an official report issued by the Canadian Government Bureau of Statistics. This is twice the amount of the investment in this industry in 1920 and over $80,000,000 more than the total in 1927. An indication of the importance taking place in electric power developments throughout Canada and the amount of capital being invested, is given by the statement in the report that the total of $[illegible] was a larger capital expenditure than the railways of Canada reported for 1928.

The rapid growth of the pulp and paper industry in the Dominion in recent years has been an important factor in the growth of central electric power stations. In the year under review, the electric motors in the pulp and paper mills of Canada had a rating of [illegible] horse-power or 36 per cent. of the total rating of all [illegible] motors in manufacturing [illegible] tries and mines, an increase of [illegible] per cent. since 1920.

Central electric power stations in Canada in 1928 produced 16,237,394,000 kilowatt hours, an increase of 13 per cent. over the output in 1927, and 177 per cent. compared with the 1920 output.

The number of customers who purchased power from the central electric power stations was 1,404,040, an increase of 52,057 over 1927. Only 1.5 per cent of the electric power produced in the central stations is from fuel plants. Water power is among the principal of Canada's natural resources. There is available 20 million horse-power at ordinary minimum stream flow throughout the year rising to over 33 millions for at least six months of the year. To date only about 5,500,000 horse-power have been harnessed.

Compared with other countries, Canada stands second only to the United States in turbine horse-power installation, and second in turbine horse-power installation per 1,000 of population, Norway alone being higher. On a per capita basis Canada has nearly five times the installation of the United States.

There is now scarcely a village in Canada that does not enjoy the advantages of electric power. In British Columbia, for each 100 of the population, 15 families are using electricity for lighting their homes; for all Canada the average is 14.8. This means, reckoning 4.63 persons to a household, that over two-thirds of the homes in Canada, rural and urban included, are using electricity for lighting and other domestic purposes.

Using British Typewriters

Four Now In Offices Of Mounted Police, At Regina

The British preference has made its show in the equipment of the R.C.M.P. offices in Regina. There are now four high grade typewriters made in Great Britain, used in the R.C.M.P. offices.

It is said by those that use the machines that they compare in price with the cheaper United States machines, and in performance with the best machines manufactured in the United States. The typewriters have strongly built frames, and though displaying a slight variation to the standard machine manufactured in the United States, have the standard keyboard.

In No Danger

Sandy McPherson was travelling to Glasgow and on the way, he felt thirsty, so he took out a bottle and drew the cork. Just as he was about to take a taste, a fellow passenger in clerical garb addressed him:

"Excuse me, sir, but I am 65 years of age, and I have never tasted a drop of whisky."

"Dinna worry yersel'," said Sandy, "you're no' gaun tae start noo."

"Let's go for supper to the 'Three Sparrows.' The other day I found a collar stud in the soup."

"? ? ? ? ? ?"

"Perhaps we'll find a neck-tie today."—Pague Gales, Yverdon.

May Be Made Useful

Possible That Goldenrod Farming May Become Popular

Goldenrod is a beautiful flower and a pestilent weed. It grows all over the country and so comes as near as anything to being our national flower. Modern medical science says it is not goldenrod but ragweed which causes hay fever. If Henry Ford's experimental goldenrod farm in Georgia succeeds in commercializing Edison's rubber, we may see goldenrod farming becoming as widespread as wheat farming is today. This is not impossible, but hardly probable. Yet every crop the farmer grows was once a weed and has been made into a crop by somebody's discovery that it is useful to humanity.

Co-Operative Associations

Organizations In Canada Now Reach Total Of 900

Co-operative associations in Canada number 900, according to the latest federal figures, with a total membership of 512,000, which includes the grain growers of the Prairies, the largest co-operative body in Canada, dairy farmers and fruit and vegetable growers of the eastern provinces. Apart from these there are some 26 co-operative distribution societies affiliated with a central co-operative union. There is also a number of consumers' co-operative societies outside the union of which the majority are in the western provinces.

Winnipeg Newspaper Union Fashions

(By Annabelle Worthington).

A stunning outfit for deb and the little sub-deb who follow closely in the styles of her debutante sister.

Style No. 3282 is printed tub silk [illegible] would appeal to any smart miss in its attractive dusty-pink tones. The shoulder and hipline bows are of plain faille ribbon in the deepest shade of the print.

The long-waisted bodice is caught with plaits at left hip beneath the bow, which makes the right side quite deep emphasizing its diagonal line. The gathered tiers of skirt are decidedly youthful.

This versatile model comes in sizes 12, 14, 16, 18 and 20 years.

It is dainty for afternoon in chiffon in coral-red shade.

Wool challis prints, printed dimity, printed batiste, pastel flat washable crepe silk, printed lawn and printed voile are smart.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

To Enlarge Grain Elevators

Increasing Grain Handling Facilities In Western Canada

At the last session of the Federal Parliament of Canada $1,000,000 was voted for increasing the grain handling facilities in Canadian Government storage elevators at Moose Jaw and Saskatoon, Saskatchewan, and for the construction of a new elevator at Lethbridge, Alberta, at a cost of $[illegible]. The storage facilities at the Moose Jaw elevator are to be enlarged this year at a cost of $[illegible] and an addition to the one at Saskatoon is to cost $400,000. Canada is well equipped with grain elevators. There are a total of 5,461 with a combined storage capacity of 358,355,000 bushels. With the exception of the huge terminal elevators at Fort William, Port Arthur, Montreal, Vancouver and other ports, nearly all our country elevators located at railway stations throughout the three prairie provinces — Manitoba, Saskatchewan and Alberta the great grain producing area in Canada. Over 90 per cent. of the total wheat crop of Canada is produced between Winnipeg and the Rocky Mountains.

Registered Seed Wheat

One Hundred Million Bushels Of 1929 Wheat Crop In Saskatchewan Was Progeny Of Registered Seed

Based on an average distribution of 20,000 bushels of registered seed wheat annually during the last five years, it is estimated by M. P. Tullis, general [illegible] of the Saskatchewan Registered Seed Growers, Limited, that at least 100,000,000 bushels of the 1929 wheat crop of Saskatchewan was the progeny of registered seed, after allowing for three-fourths of the increase in each year finding its way into commercial channels. The high grade of the bulk of the 1929 crop, says "The Optimeter," was attributed by Mr. Tullis to the steady stream of registered seed sent out to the farms during the period.

Weeds On Highways

Provide Source Of Infection To All [illegible] Fields

A. R. C. Smith, of the Weed Inspection Department of Western Ontario, stated recently that the matter of weed control on public highways is very important, in that the highways provide a source of infection to all the surrounding fields. The importance of controlling perennial sow thistle cannot be emphasized too much. Mr Smith declared that it was estimated that 100,000 acres of that weed was harvested in the province in one year.

The Red Cross

High as God's mountain
Where white, melting snow
Refreshes dry valleys
And grain fields below.

Deep as the [illegible]
Of the mother, who gave
Her son, that forever
Old Glory might wave.

Broad as the bosom,
Of blue seas, that rest
In His hand. Let us give
Not our "bit," but our "best."

The world is behind
And God is above
The Red Cross of Charity,
Mercy and Love.

The Changing Times

Conditions Nowadays On the Farm Are Different According To This Informant

Today's farmer is changed from that of yesterday's; he is coming to be an oily individual who controls a lot of levers and lets the machinery do the sweating. He is more familiar with the monkey-wrench than he is with the pitchfork and through the aid of the gasoline tractor, the nightmare of inability to get sufficient help for seeding has been largely banished. Spring work is no [illegible] the hectic business it used to be. Moreover when his day's [illegible] is through in the field, so is he; he doesn't have to spend half the [illegible] caring for horses. His wife notices the difference in setting just so many less places around the mealtable.—Lindsay Post.

Crude Oil In Canada

Unlimited Potential Source Of Crude Oil In Coal

Sources of crude oil in Canada other than wells are the oil shales of the Maritime Provinces and the bituminous sand deposits in Alberta, but the great and almost unlimited potential source of crude oil is coal, and this Canada possesses in abundance. The study of coal for the discovery of processes for unlocking the oil and other riches that lie hidden in it, and the examination of the most economic methods of utilizing it, hold the attention of coal research workers today in Canada and elsewhere.

Rash Extravagance

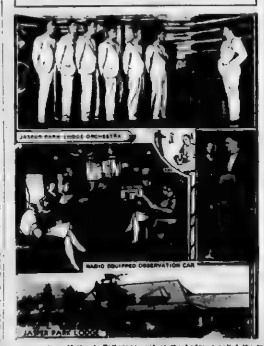
Mrs. Isaac: "Vake up, Isaac! A burglar is trying to get in!"

Isaac: "Vell, vait till he opens the window and I shoot."

Mrs. Isaac: "Vy don't you shoot [illegible]"

Isaac: "Vat! and break a pane of glass?"

BROADCASTS FROM CANADIAN ROCKIES



The Canadian National Railways have blazed a pioneer trail in Canadian radio broadcasting and it again made history with the transcontinental broadcast from Jasper Lodge, Jasper National Park, on the occasion of the opening of the Lodge for this season. This was the first broadcast to be made from Jasper, in fact, it was the first time a radio programme has found its origin in the Canadian Rockies.

Irvin Plumm and his Jasper Park Lodge Orchestra, which has just commenced its sixth summer engagement at the Lodge, supplied the instrumental music for the historic broadcast. Madame Gladys Bell Owen, of Regina, who was the principal soprano in the New York production of "The Miracle," and Sydney J. Hendra, tenor, of Edmonton, were the soloists.

The illustration above shows: Irvin Plumm and his Jasper Park Lodge Orchestra; a Canadian National Railways observation car equipped with combination radio and phonograph; [illegible] fore the "Ritz"; Jasper Park Lodge.

Band of Intrepid Scientists To Penetrate Greenland In Order To Study Glacier Movements

Better Class Of Grain

Ninety-Eight Per Cent. Of the 1929 Wheat Crop Was Of Merchantable Quality

Of the total estimated wheat crop of 1929—viz., [illegible] bushels—98 per cent. is reported by crop correspondents as having proved to be of merchantable quality, this proportion representing 292,478,000 bushels. The previous year's corresponding figures were 98 per cent. or 527,[illegible],000 bushels out of a total crop of 566,726,000 bushels. Of other grain crops the merchantable proportions were as follows: Oats, 96 per [illegible] (96 per cent the year before), barley, 96 per cent., (95 per cent the year before); rye, 97 per cent., (96 per cent. the year before), buckwheat, 94 per cent., (86 per cent. the year before); corn for husking, 78 per cent., (76 per cent. the year before), flaxseed, 96 per cent., (96 per cent. the [illegible] before); potatoes, 85 per cent., (79 per cent. the year before), turnips, 92 per cent., (87 per cent. the year before), and hay and clover, 92 per cent., (86 per cent. the year before. A complete summary appears in the April number of the [illegible] Bulletin of Agricultural Statistics.

Demurrage Would Be Heavy

Thousand Dollars a Day Against Zeppelin If Behind Schedule

Demurrage charges at the rate of $1,000 a day would have been charged the Graf Zeppelin for every day she was behind schedule arriving at Lakehurst. The schedule of charges was arranged specially for this trip of the Graf Zeppelin. Besides the pre-arrival demurrage there was a $3,000 fee for preparing for the big ship's care at Lakehurst and refueling cost $2,000 a day besides the cost of the fuel. After refueling was completed, $1,000 a day would have been charged for whatever time the Zeppelin's take-off was delayed by adverse weather. Thus the profits of the voyage could be largely diminished. Heretofore the Zeppelin has been entertained free of charge at Lakehurst. The first strictly commercial trip with commercial charges, gave a good idea of the real cost of lighter-than-air transportation, a cost vastly under-estimated by laymen in the [illegible]

Demand For Homesteads

Number Of Entries In Western Canada Show Decided Increase

The first four months of the present year showed 503 more homesteads filed upon in Western Canada than during the same four months of last year. The [illegible] was almost entirely by Alberta, though British Columbia showed a small gain. The other two provinces were slightly under the 1929 figure. The total for the present year is 4,897. In their order of importance the entries are given as follows: Alberta, 2,611 as against 2,135 last year; Saskatchewan 1,341 as against 1,363, British Columbia, 209 against 165, and Manitoba 194 against 194.

Money Spent By Tourists

United States Visitors To Canada In 1929 Spent About $299,000,000

In 1929 United States visitors to Canada spent about $299,000,000 and Canadians spent in the United States about $91,000,000.

Of the amount of United States money which flowed over the border about $309,744,000 went by motor car. A table prepared by the Department of Commerce on the basis of questionnaires furnished automobile tourists estimates the gross expenditures of three groups of automobiles during 1929 as follows:

Sixty-day cars $163,653,000.
One-day cars $44,416,000.
Six months' cars $674,000.

Whitefish Fry For Western Lake

The recent dumping of 50,000,000 whitefish fry into Lesser Slave Lake should improve prospects for tourist fishermen, according to R. T. Rodd, supervisor of fisheries, just back from a tour over the grounds.

Using Spiders Webs

Spider's webs are being "cultivated" in Canada for use in aerial photography and surveying, being stretched across viewfinders to help operators secure more accurate direction.

It is just as true religion to take care of your health as to take care of your morals.

The lonely frozen wastes of Greenland are being penetrated by an intrepid band of German scientists who have just arrived, under the leadership of Prof. Alfred Wegener, meteorologist of the Austrian University of Graz. The object is to investigate meteorological and geophysical peculiarities of Greenland. Except the inaccessible Antarctic, Greenland is the only territory where a vast permanent ice cap exists. Its present condition is that of northern Europe during the ice age.

As Greenland is one of the world's "cold air centres," measurements of temperatures and variations of air pressure are of the greatest importance for framing Atlantic weather forecasts. They are indispensable if Greenland is to become, as has been suggested, a future half-way point for aerial transportation between North America and Europe. Movements of glaciers and icebergs will constitute an important part of the investigations of Prof. Wegener and his men. Previous measurements have shown that Greenland glaciers move 100 times faster than Alpine glaciers, that is, with a speed of 30 to 60 feet a day.

To obtain exact figures, measuring instruments must remain in position for a whole year. The expedition plans to remain on the inland ice for 15 months, and make observations at three bases: one on the coast; one at the edge of a glacier and one inland. The latest instruments adaptations of the echo-sounders used in measuring ocean depths have been taken to ascertain the thickness of the Greenland ice cap. The heaviest ice crust previously measured was 4,000 feet thick, and it is believed that further inland, the thickness will be 10,000 feet. Whether the weight of this prodigious mass of ice has pressed the land down to sea level, or even below it, the natural process in Scandinavia during the ice age will be studied.

Unusual Restaurant In Berlin

Waiters As Well As Patrons Are Deaf and Dumb

A restaurant has just been opened in Berlin where complete silence rules in spite of the most animated conversation. From the outside nothing distinguishes this remarkable [illegible] "Kneipen." In most of these places there are also one or two bars for the hurried guest who requires no more than a drink and a "bite." Two similar bars faced me when I entered the deaf and dumb restaurant, but they are not used much. The deaf and dumb are not usually in a hurry, and although their quick gestures and facial expression often gave me the impression that they were excited, it is merely the need to express themselves by movements which creates the false impression of an excited crowd. Some of the patrons were having dinner obviously in animated conversation, others had finished and were playing cards. All is deadly silence. Even the waiters were deaf and dumb and the only sounds that could be heard were the clatter of plates and occasional tinkling of a coin.

Judge Kept the Evidence

An American lawyer of international reputation has been staying in London during the last few days. He told his friends how he went to some town in the South, where it was very hot, to plead a case. At lunch time the judge asked him if he would like to join him. The lawyer accepted. The judge gave him some first-class whisky. "How did you get it?" he was asked. "Oh," said the judge with a chuckle, "we had a big bootlegging case here last week, and I kept the evidence."

McGinty: "I've a terrible corn on the bottom of me foot."

Pat: "That's a foine place to have it. Nobody can step on it but you."

"Your husband is very well fixed as a doctor."

"Yes. His patients go to their death for him."—Karikaturen, Oslo.

WORLD HAPPENINGS BRIEFLY TOLD

On June 24, the King and Queen received the delegates to the Imperial Press Conference in the throne room at Buckingham Palace.

British Columbia expects to benefit from the new Australian tariff just introduced in the [illegible] House extending a British preference to lumber.

Mr Bennett Scott, the song composer whose "Take me back to dear old Blighty" was sung by soldiers all over the world, died at his home at Loraine Mansions, London, England.

Mr and Mrs Joe V [illegible], of Detroit, were burned to death when their airplane fell at the municipal airport, in Toledo, Ohio, and burst [illegible].

President Hoover has approved transfer of the obsolete submarine P-12 from the navy to the U.S. shipping board which will charter the craft to Sir Hubert Wilkins for North Polar explorations.

F. E. Beattie, aged 50, an accountant in the Bank of Hong Kong and Shanghai, at Shanghai, disappeared from the "Empress of Russia." It was reported on the steamer's arrival at Vancouver. He was a passenger en route to Scotland with his wife.

Vincent Massey, retiring Canadian minister to the United States, who delivered the annual commencement address at the University of Michigan, Ann Harbor, was awarded an honorary degree of Doctor of Laws.

L. R. McGregor, new Australian trade commissioner to Canada, arrived at Victoria recently from Sydney with his wife and two children. He is particularly anxious to introduce Australian wines to Canada.

Switzerland Is Prosperous

Has Population Of Over 4,000,000 and People Are Good Workers

Switzerland, which has an area of only 19,950 square miles, has now a population of roundly 4,000,000 to which it has risen from 3,300,000 in 1900. Small as the country is, it has 30 towns of over 10,000 people. While the population has increased the mountainous regions are being deserted. The general growth of Switzerland is the more remarkable for the fact that one-fifth of the whole territory is mountainous and unproductive. [illegible]

Canada's Military Force

[illegible]

HOW THE RICH FARMER EQUIPPED HIMSELF AS A PROTECTION FORM MOTOR-ACCIDENTS IN THE CITY.—[illegible]

Many Accidents Caused By Neglected Cars

Carelessness Allows Defects To Develop In Mechanical Parts

Automobile owners in the United States who neglected to keep their cars in good condition were responsible for five thousand of the lives lost in traffic accidents during the last calendar year. This estimate is made by the framers of the report recently submitted to the National Conference on Street and Highway Safety at Washington, by its committee on the maintenance of motor vehicles. To learn that fully fifteen per cent. of the traffic fatalities recorded in 1929 are actually traceable to lack of proper care of cars is an enlightening disclosure. The studies of the committee into causes of motor accidents have convinced its members that stricter official inspection of all automobiles is urgently needed.

Essentially this report charges that because of improper maintenance defects are allowed to develop in vital mechanical parts of a car, brakes and steering gear are allowed to become dangerously worn or drop out of adjustment, horns, windshield wipers, rear lights and headlights unrepaired [or] become ineffective. A steady increase in driving speeds in the last few years has served only to increase the hazards created by the negligence of those who own cars and permit them to be operated when they are unfit to be driven on public highways. The committee recommends legislation that will enforce periodic inspection in States where such a precaution is not now taken. It suggests that in the case of old cars that have been resold several times a certificate of inspection should be required when drivers' licenses are issued.

Pulsating Stars

Theory Advanced That Certain Stars Do Not Rotate

A theory that certain stars do not rotate, is presented to the American Association for the Advancement of Science, by Dr Ross Gunn, of the Naval Research laboratory. These non-spinning stars are those which pulsate, that is, which expand and contract. Some of the pulsating stars have the habit of enlarging their diameters millions of miles. They beat like vast fairy hearts.

One class of pulsating stars, the Cepheid variables, are the "lighthouses" of the sky, that is, they enable astronomers to calculate the vast distances of space. Dr. Gunn's theory comes from study of magnetic fields about stars, especially those [illegible]

Moose Pose for Photo

In the north woods at Metagama, North Ontario, where M. U. Bates runs his camps, moose are unusually plentiful this spring. Mr. Bates was visiting one of the camps the other day and looking in a cabin found two infant moose asleep in one of the bunks. He lifted them out but they came back to the veranda and, finding a sunny spot, had another nap. The moose were quite tame and are here shown being posed for a photograph. The snapshots were taken within a mile of the Canadian Pacific Railway tracks near Metagama.

A World Subject of Discussion

The whole civilized world is discussing one subject today. Tariffs. And in those countries which are the most highly organized, where the standard of living is highest where the most modern and efficient methods of production both in agriculture and in industry prevail, the discussion is most keen and the feeling most bitter.

For over a year now it has been said that the United States has been in the throes of a nation-wide struggle over the new Hawley-Smoot tariff, the effect of which is to raise duties against all other countries to a height never before attained.

In Great Britain Lord Beaverbrook, supported by his fellow publisher, Lord Rothermere, is engaged in a great campaign of publicity with the object of arraying the British people into support of a new fiscal system, based on the idea of free trade within the Empire or as near thereto as it is possible to get with tariffs against all foreign countries. Right Honorable Premier Baldwin has stated on more than one occasion that the campaign of industry duties, coupled with a referendum on the question of placing a tax on food supplies in order that a preference may be given to the overseas dominions.

In France in Germany, in Italy, and in other European countries feeling exists in bitterness has developed against the United States because of the higher duties that country has levied against the world. All those nations, heavy debtors to the United States, feel certain that the only means whereby they can pay their war debts to the U.S. namely by exports to that country to them largely closed to them. Talk of reprisals is general, and in a number of instances higher tariffs have been imposed, particularly on products and manufactured goods in which the United States is a large exporter.

The vision revealed in Australia, finding itself over-burdened with an extremely heavy national debt, and in need of larger revenues, has raised its tariff to new high levels, and in regard to certain articles has absolutely prohibited their importation.

In Canada, the recent Budget of Hon. C. A. Dunning, imposing countervailing duties on a specified list of articles against the United States, raising other duties as against that country and increasing the scope of the preference now enjoyed by Great Britain and other parts of the Empire, was also a daily household topic all over the Dominion, and the outstanding issue in the general election campaign now in progress.

Without presuming to offer any opinion on the relative merits of High Tariffs Low Tariffs or no Tariffs at all because it is not the province of this paper to enter the realm of partisan discussion, and such discussion is rightly barred in this column, the question may well be asked What is to be the outcome of this world tendency on the part of practically all nations to erect trade barriers one against the other, and each one against all others?

Certain facts must be recognized and admitted by all. It cannot be denied that Tariffs do engender hard feelings and suspicions between nations, and when such feelings develop, no matter what the cause, there is always a great danger of the flaming bitterness becoming gradually more intense and the opposing peoples brought to a frame of mind where they are less ready to co-operate in other matters for the common good of all. In a word, international goodwill is placed in jeopardy and a situation created where some little spark might easily start a mighty conflagration,—another World War in fact.

But even should such a dire calamity not result, what is going to be the economic effect on the world and on each separate nation, if one and all pursue the policy of erecting trade barriers each against the others? The logical end of course, would be the complete cessation of international trade With each nation refusing to buy from other nations, or at least making it as difficult as possible to do so, it would inevitably follow that no nation could sell to any other nation, or to a very limited extent. This is a situation that must be faced because it is looming up on the horizon in view of the economic and fiscal policies now under such wide discussion.

If nations decide not to buy largely, or at all from other nations, it follows, we repeat, that there will be no buying nations to which other nations can sell With this reduced to the advantage of any nation? Take the United States as an example If it refuses to buy from others, and those others in return refuse to buy from it will the United States be able to sell? Can its own people consume the enormous output of its factories and fields? The answer, of course, is "No." Then the inevitable result is less production, which in turn means less employment, and decreased employment means decreased buying power, and that means a still further decrease in consumption, less production, employment buying power

It needs further that if other nations will not buy goods made in the United States the manufacturers there in that country will erect branch factories in foreign lands and employ the people of those countries Then those foreign people will secure employment at the expense of the United States worker

And if other countries follow the same policy and do likewise, how much better off will any one of them be than if they continued to raise those crops for which by nature they are best fitted to produce, or manufactures largely for world trade and each distribute freely one to the other?

The need of the hour in all lands would appear to be sound thinking and some remembrance of basic economic principles, divorced from purely individualistic desires and ambitions

Keep Outdoors In Summer

Get the outdoor habit this summer. It improves both the body and the mind. The longer Chelsea can be coaxed out on the porch, pens can be stalled and pastures reached out in the open air quite as efficiently as inside. You can even take your lunch tray outside with a few extra steps and eat on the lake in the great outdoors

Not only has King George of England worn the same trousers for 20 years, but it seems he hasn't had it refashioned or the band changed.

You probably think you have [illegible] but you haven't.

Find Free Ocean Trip

Arthur Pape wanted to see Paris. He saved with only eight dollars the 16-year-old youth boarded a boys liner and mingled with the passengers for three days without being discovered. His discovery however, he was allowed to run free until the ship docked in England Here he was put in jail until a ship set out for the U S. and was placed on board, made the voyage very safely, and landed here with 25 cents of his original capital.

Prepared For Emergency

Jones called upon his friend Smith and found him sitting in his shed with the much-mended inner tube of his bicycle over his knees.

"Punctures, Smith?" he asked sympathetically. The other shook his head.

"Then why are you covering the tube with all those potatoes?" inquired Jones wonderingly.

Well, you see," explained Smith, when I do get a puncture it'll be already mended."

Cubbie's first telegram was made of a piece of pipe organ with a hole at either end.

Farm Loans Act

Six Counties Province Have Taken Advantage Of the Act

Six of the provinces of Canada, Nova Scotia, New Brunswick, Quebec Manitoba, Alberta and British Columbia have taken advantage of the Farm Loan Act of Canada, securing long term mortgage credit. At the end of last month it is said that the sum of $1,351 000 had been approved Each borrower becomes a shareholder in company with the Canadian and Provincial Governments and receives his share of the profits. Loans are made on first mortgages on farm lands and farm buildings.

A REAL NERVE TONIC

In a Beautiful Supply Of Rich Health-Giving Blood

Sufferers from nervous debility find themselves lonely, hopeless, and unable to keep their minds on anything They are totally unfit to perform their everyday duties

Dr. Chase's Nerve Food builds nerve tissue in a terrible mistake This wonderful food cure gives a fine supply of rich, red blood To secure this result Edmund De Willamar Pink Pills should be taken at the same time. Supplying the blood is their whole mission. Concerning them Mrs. Alfred Bentley Rearwell Ont., writes "Two years ago I was in a very bad state of health for seven months, extremely nervous and run down. My doctor recommended me but me till I began Dr Chase's Nerve Food. I had improved since improved and today I am well and able for anything without feeling tired or troubled

You can get these pills from any dealer in medicine, or Edmund De Willamar Medicine Co. Brockville Ont

Saskatchewan Appointment

P. C. Ward Now Chief Clerk Of Natural Resources Department

Official announcement was made recently of the appointment of P. C. Ward, Regina, as Chief Clerk of the Provincial Department of Natural Resources. Mr Ward is also a member of the public service commission, and in the absence of Mr. Hanbury, is chairman of the board. Previous to the appointment of the commission, Mr. Ward was civil service commissioner for a number of years.

Use Miller's Worm Powders and the little pests will trouble you no more These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites are thrown off by the system in connect with such conditions The worms are speedily evacuated with other refuse From the travels Rosemont is imported to the organs and the health of the child steadily improves.

Saskatchewan Coal Receipts

Handled 57 Per Cent. Of All Coal Grains Delivered In Province

During the present crop year Saskatchewan Co-operative Elevators Co. have handled 57.2 per cent. of all the grain delivered in the province according to an official report. This is the highest percentage that the organization has handled in any crop year to date.

Red Clover Seed Record

The production of red clover seed in Canada has been the largest in the past quarter of a century One of the most important legume crops, red clover for seed is produced for exports on barely acclimatized seed. Special attention is being paid by the Seed Branch of the Dominion Department of Agriculture to the growing of registered red clover seed

The Terror Of Asthma comes Him

a thief in the night with its dreadful wheezing, robbing its victim of breath. It seems beyond the power of human aid to relieve until tried in cases of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then must come with a rush Life's sweet breath, the feeling of the remedy be used persistently, the disease be put permanently to rout. This no substitute

Canada Should Encourage

Canada was encouraged to the most empty optimistic sentiment by a cow born in by Sir William Lett Editor Saskatoon Star in an interview given at Toronto. He had visited the United States and the countries in Europe and had found Canada in mind he believed to be healthier financial condition than any of the others.

Robbers Resort To Bites!

Mercury's mosquitoes are the real son of mosquito and bite by bites A dependable mosquito

MINARD'S KING OF PAIN LINIMENT

Weather Service For Fliers

Conditions Made Much Safer For Adventurous Air Navigators

The non-stop planes which may soon be making trips to Europe in almost certain death unattended flight across the North Atlantic, have a new aid. This is new weather service, started in May. Fifty four planes of the first companies owned by Imperial Air Ste Ste are pictured that organization has a fleet 500 flying the route and no one need fear that the North Atlantic, wrote night have made it in the other direction.

Take, for illustration, one of these pictures, the weather map of the North Atlantic, on November 25 last, made during investigations flying from Newfoundland to Ireland.

Each of these planes made the course of the winds trace a rout shape, that which is a fleet 500 flying the route from Newfoundland to Ireland.

Each of these planes was equipped with a wireless set one-third the distance out from each shore. Its instantaneous reports to the land station were received by it. This information was then plotted on the map. Pin pricks were made in the chart for each plane, with the gulf Stream, centering above the stream. Isobars, or lines of equal pressure, to swings of nearly 1 000 miles. Northward blowing winds, southward blowing currents, were cut down 10 miles an hour as it often far more. These figures must be multiplied by two to obtain the actual disadvantage.

The fastest plane was southward Bay for a fair wider ocean to ocean, as the Atlantic ocean liners were pushed back nearly to Chicago. The new ocean forecasting can warn of tempests' plane taken.

The resulting charts are made by Dr. James Kimball, of the New York Weather Bureau. For 15 years, he has worked voluntarily extra hours on ocean weather, as a hobby. E. B. Calvert, chief of the forecast division at Washington, has given two trips to Europe, in getting the work started

Alberta Gas Fields

Three Hundred Million Cubic Feet wasted Daily, Being Burned In the Air

Oil and gas are not distributed in Alberta fields have combined gas capacity of approximately 500,000,000 cubic feet daily, according to official report. This is the highest percentage that the organization has handled in any crop year to date.

This figure is made up as follows Turner Valley: 300,000,000 cubic feet wasted daily, burned in the air Fyon 150,000,000 to 200,000,000 cubic feet used daily.

Bowood Imperial Well: This capped well is believed capable of producing 60,000,000 cubic feet daily

Medicine Hat Field: This field has a capacity of about 30,000,000 cubic feet daily.

Waterwright, Etholene and other small fields: Combined capacity of about 30,000,000 cubic feet daily.

Medicine Hat Field: This field has been a combined capacity of about 30,000,000 cubic feet daily.

Keep your stock free from blemish with Dr. Douglas' Egyptian Ointment. Removes inflammation, quickly relieves bruises, sprains, strains, swellings, contraction of cords, stiffness of joints, and sore muscles.

Books Can Be Decorative

The decorative use of books is greatly overlooked in many houses. Books, rightly used, are a concrete evidence of alert mental life going on in the home and a definite aid in becoming an important part of an interior decorating plan. If you have much space, walls of low book shelves are extremely satisfactory, to balance a fireplace or an overstuffed davenport, table and lamp unit.

The first sheet of paper is stated to have been made from the bark of a mulberry tree in the year 75.

Mentor's metal production is increasing.

Mining Advertising

Twelve Issued By Light Dragoons In 1931 Made Attractive Reading

Have the military authorities lost their art of attractive advertisement. Most people think that the twentieth century is much superior to the nineteenth so far as advertising is concerned, but there are no modern recruiting posters that can compare with a notice issued on behalf of the Light Dragoons in 1931, and which was referred to by the Secretary of State for War recently "You will be mounted," this notice informed prospective recruits, "on the finest horses in the world, with regard clothing and the richest accoutrements in your society is excited! You are admired by the fair." If kind to be had out the alluring prospect of marriage with "a human widow" or "a rich heiress," which rendered the Light Dragoons's situation "truly enviable and desirable."

Recipe For This Week

(By Betty Barclay)

SUMMER SALAD COMBINATIONS

Here are a couple of simple recipes for summer salads, that should come in handy at this time. Liberal servings of each should be allowed per person but one of the hearty foods, and then put yourself in better position to stand the heat of summer.

Cherry Delight Arrange three or four large cherry sections around edge of a lettuce cup made by cutting a small head of lettuce in two and removing center from one half. Fill cup with cottage cheese mixed with cherry juice and moistened with mayonnaise or boiled dressing

Orange and Strawberry For each serving use one slice pineapple, quartered, and three or four orange slices, halved. Garnish with four large, ripe, unhulled strawberries. Top with a marshmallow half.

A DELICACY WITH FRESH BERRIES

1 package vanilla junket.
1 pint milk.
Strawberries.
Powdered sugar

Make junket according to directions on package. When ready to serve, dust lightly with powdered sugar and fill up the glasses

Fruits like oranges, pineapple and strawberries should not be put into the milk when making junket, as the fruit causes it to whey. Crushed and sweetened, these fruits make tasty toppings.

Blackberries or raspberries may be put into the dessert, also canned or preserved berries, peaches or other fruits.

Mimard's Liniment gives quick relief.

Rivalry Bay's Packet

Handbags carried by women are beginning to rival the small boy's packet for variety of contents. One bag examined recently contained a handkerchief, bundle of letters, diary, mirror, comb, purse, note-case, stocking-mending outfit, cigarette case, lighter, powder-puff, lipstick, keys, patterns of cloth and a shoe-lace.

I NO LONGER SUFFER-

Cut Down Food Wastage

---by covering all perishable goods with Para-Sani Hevvy Sealed Paper. Para-Sani moisture-proof, tested vermin proof, resists all rot, even ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

Dopleford Paper Products

Western Representatives:
MUNTER-MARTIN & CO., REGINA, SASK.

REVIEW WORK OF LABOR MINISTRY IN GREAT BRITAIN

London, Eng.—England's second Labor Government has completed a year's work and while the record in not found it has kept parliament working long hours turning out legislation enhanced by many important measures.

Protection of the consumer against profiteering, the removal of certain injustices under the Widows' Pensions Act, the improvement in the unemployment insurance (dole) scheme, the raising of the school-leaving age to 15 years - with the right to go into employment at 14 under conditions not readily obtained - the [illegible] ing of the miner's working day, and reorganization of the mining industry, are a few of the domestic issues which have been the largest for the Labor Government.

In the international sphere there has been a renewal of diplomatic relations with Russia and the signing of a preliminary agreement for ratification of the [illegible] ing debt of the optional [illegible] acts respect to the Dawes and Young Plans, withdrawal of British troops from the Rhineland - a step which paved the way for Anglo-Egyptian pact, the repatriation settlement of the Chanak affair, and finally the renewal of real friendship with the Dominion of New Zealand, the [illegible] former government was responsible for that advancement.

All of these issues and many more show the first year of the second MacDonald Government to have been one of great activity, but a wide front despite its masterly position in parliament does not mean that the country is to depend upon Liberal votes to keep them in power.

Only a real problem of unemployment and the Indian troubles have not responded after a year's labor, premier's administration.

One suggestion that has been made that the government will introduce a bill providing for extra borrowing to the extent of $100,000,000 as an effort to help the unemployment situation. There is also the suggestion that the number of contributions, now amounting to about $7.80 over a period of 26 weeks, should be reduced because the cost of the dole upon being [illegible] ed, may have to be reduced.

These latter suggestions are however, political talk, and may not materialize.

Air Service Discussed

British Minister Urges Dominions To Develop Civil Aviation

London, Eng.—The office of the secretary of state for dominion affairs was one of the busiest spots in London recently, with colonial representatives and officials of the department gathered to hear and discuss the views of Thomas, secretary of state for air.

Dealing with the subject of civil aviation, Lord Thomson urged the colonies to develop light aeroplane clubs and the formation of the Imperial Air Ste Ste.

The first quarter five-year average, there was a decrease of approximately two per cent. during the period under review. Bituminous coal produced during January, February, and March, totalled 3,704,167 long tons; anti-bituminous 162,612 tons, and lignite 1,136,056 tons. Saskatchewan was the only province to record an increase in output over the first quarter of last year. Figures were published at the Dominion Bureau of Statistics.

Alberta's output of 1,638,294 tons for 41 per cent. of the total Canadian production and recorded a decrease of 9.5 per cent. from the first quarter five year average. Nova Scotia's total of 1,813,615 tons and Saskatchewan's total of 174,331 tons were respectively, 11 per cent. and 17 per cent. higher than the quarterly five-year average. In the province production 561,800 tons, a decrease of 14 per cent. from the 1926-1930 first-quarter average. New Brunswick's production was slightly higher than the five-year average.

Saskatchewan's Coal Production Higher

But All Canadian Output This Year Shows Decrease

Ottawa, Ont.—Coal mined in Canada during the first quarter of 1932 amounted to 3,971,808 tons, a decrease of 14 per cent. from the output of 4,625,736 tons for the first three months in 1930. Compared with the first quarter five-year average,

Sixteen Dollars Dinner.

London, Eng.—Leaders of all British political parties conferred recently on the present situation in India. It is understood they were acutely concerned with preliminary arrangements for the Indian Conference, in London, next October. No statement was issued.

Train Wreck In Russia

Moscow, Russia.—Twenty-two persons were killed and 36 injured in the terrible smashing of a train near Leningrad. The accident followed the switching of a passenger train onto the wrong track.

Start Thirty-Five Day Tour

Trophy Plane, Created To Shorten Indoors By Plane

Ottawa, Ont. Carrying $25,000 in trophy money in the interests of the for north, two cubic monoplanes piloted by officers of the Department of National Defence, took off July 1 from Rockliffe Aerodrome The planes will take 17 R. A. F. Avro of the Department of Indian Affairs and W. S. Cain, Deputy Minister of the Ontario Department of Lands and Forests, on a 35-day tour of the Dominion and Provincial Commissioners are of Indian treaty number 9.

Valuable Discovery

Pitt Flies Lake Bed' Said To Be Rich With Gold

The Pan. Bat. —Copper exploration has merged high volume of gold has been found on the bed of Pitt Flin Lake, Manitoba. According to a statement issued by R. E Phelps, vice-president of the Hudson Bay Mining and Smelting Company, it is understood that the discoveries have been made in the course of prospecting at the mines, it was announced.

Kingsford-Smith Honored

Given Bank Of Wing Commander By Australian Government

Canberra, Australia. — Announcement has been made by the House of Representatives that Squadron Leader Kingsford-Smith had been presented with the Bank of Wing Commander in recognition of his westward trans-Atlantic flight.

Premier Scullin said that the government was anxious to give him some grand mark of appreciation of his achievement, but that the conferring of titles clashed with Labor policies.

Mr. Scullin's motion has been made that the government will introduce a bill providing for extra borrowing to the extent of $100,000,000 as an effort to help the unemployment situation. There is also the suggestion that the number of contributions, now amounting to about $7.80 over a period of 26 weeks, should be reduced because the cost of the dole upon being [illegible] ed, may have to be reduced.

These latter suggestions are however, political talk, and may not materialize.

HOUSE OF LORDS HAS APPROVED RESOURCES ACT

London, Eng.—The British North American Bill, an amendment to the British North America Act empowering the agreements entered into between the Canadian government and the provinces of Manitoba, Saskatchewan and Alberta, for the return of the natural resources to those provinces, as well as the agreement for the return of certain crown lands in British Columbia, passed through all stages of the House of Lords without amendment.

The British Government is hastening the passage of the bill in view of the celebration of the 25th anniversary of Manitoba's entry into confederation, which falls on July 15.

In moving passage of the bill, Viscount Cecil, Lord President of the council, explained the bill was merely intended to place the provinces of Canada on the same footing as the older ones.

Lord Passfield, who replied to convey the government's very best wishes to the Premiers of Manitoba on the forthcoming happy anniversary, expressing the hope that the provinces would have continued prosperity.

Winnipeg, Man.—Proclamation of a public holiday in Manitoba, July 15, will be made shortly by an order-in-council by the provincial government. The day marks the celebration of the 25th anniversary of Manitoba's entry into Confederation, as well as the date of return of natural resources to the province.

New Canadian National Steamer

Above is shown S.S. Prince Henry, the latest acquisition to the Canadian National fleet on the Pacific Coast tourist route, which arrived at Vancouver, is a tribute to the shipbuilding art of British yards. The vessel is 504 feet in length and fitted in the most modern way for passenger accommodation, designed for the Pacific Coast tourist traffic, is ultra modern with decks for 504 first class and 70 second class passengers. The vessel will have a Board of Trade license to carry 1505 day passengers. S.S. Prince Henry is the first of three new ships which will ply between Vancouver and Seattle. The second sister ship S.S. Prince Robert and S.S. Prince David will inaugurate a 16-day run between Vancouver, Victoria and Seattle.

Canadian Given U.S. Citizenship

District Court Of Appeal Reverses Decision Of Lower Court

New York — Douglas Clyde Macintosh, theology professor at Yale and Marie Averil Bland, Canadian born girl who studied there, were refused to take the oath to bear arms in defense of the United States, when on Delegates were present from all parts of country, were refused citizenship.

Macintosh, of Winnipeg preached.

Dates for the 1931 festivals are Manitoba, at Winnipeg, April 26 to May 2, Victoria May 1 to May 9 Vancouver, May 13 to May 23. Alberta, at Lethbridge, May 25 to May 30, and Saskatchewan, June 1 to June 6.

These dates have been arranged to allow the same judges to officiate at each of the festivals.

Adjudicators appointed were: H S. Robertson, of Glasgow Herbert Samuels and H Plunkett-Green, of London.

Will Recover Bodies

Brockville, Ont.—As the representative of the Minister of Public Works and the Dominion Government, Captain T. D. Caldwell visited the bottom of Brockville man who lost their lives in the "J. B. King" drill boat disaster, assuring relatives that the government would do everything humanly possible to bring about recovery of the bodies of the men still missing.

Airplane Crash

Saskatoon Instructor Pilot Narrowly Escapes Death In Accident At Prince Albert

Prince Albert.—D. W. Motz, Saskatoon instructor pilot, narrowly escaped death here when a Moth 'plane crashed on the exhibition grounds while being demonstrated to directors of the local light aeroplane club.

Motz was standing at a low elevation before about 50 persons, and in passing the crowd, the engine of the right wing hit the earth and caused the machine plowing up the field at terrific speed before reversing uncertainly for about 75 feet, the plane finally coming to rest against a group of his miraculous escape from death.

School Board Probe

Vancouver, B.C —Charges that the city had suffered a loss of $30,000 through short deliveries of supplies to the school board, and that coal and coke paid for by the board had been delivered to an employee's home were made at a meeting of the select committee of the city council investigating the affairs of the school board Complete denial of the charges was made by those charged with benefitting from them.

Escapes From Burning Plane

Pilot Lands On Lake and Swims To Shore

Mont Louisbert Ont Al Chesshire, formed as air pilot on Bi Northern Airways Corporation, missed death by only a moment when his plane took fire over northwest Ontario's forest country according to word reaching here The flyer, who is piloting a flight to Tokyo, brought his burning ship to the surface of a lake and swam into the water and swam to shore, uninjured

The accident occurred in the vicinity of Milledge, Ont., 60 miles west of Mont Louisbert on the Canadian National Railways. En route from Mont Louisbert to The Pas, Man Chesshman's plane developed engine trouble while he was speeding along at 1,500 feet. As he prepared to bring his pressure-equipped plane to a landing the engine started again, back-fired, and the oil on the exhaust pipe ignited

Flames spread in a flash to the body of the Fairchild machine and Chesshman nosed in a perfect landing on the surface of a nearby lake.

CROP SEASON IS BACKWARD ON THE PRAIRIES

Ottawa, Ont.—Generally throughout Canada the crop season is backward, and in many of the important agricultural regions moisture has been too long both stands and growth, according to the weekly crop report issued by the Bureau of statistics. Conditions have changed slightly for the better in the prairies, but timely rains have still to be needed in July and August.

However, there is still a strong tendency for reported to lengthen the advantage of crops in Manitoba and the prairie belt, which have been most favored throughout June while the specialized wheat-production regions of Central Saskatchewan and Southern Alberta are not receiving enough moisture to enable them to recover from previous damage by drought and wind and cutworms.

Moisture is needed at present in fill the winter wheat Cutworm damage, which has been the heaviest known for some years, is confined to scattered late-sown crops. Hail has damaged crops in a few districts however, but in less than usual up to this date The wheat crop, which has exceeded many times the yields earlier than last year, is now generally more backward Rivers will be short

Manitoba conditions are still favorable, and good crops are almost assured in the southern areas Only the southwest premier reports the need of rain.

Saskatchewan conditions vary greatly but some improvement is noted in some regions of the north and east, while the central and southwest districts, more favorable in wheat production, are still complaining of drought The rains are likely able to keep the crop up to the average promise.

New Ruling Is Welcomed

Bonded Grain In United States May Be Held Over For One Year

New York — The port of New York authorities recently pointed out that a serious threat to the trade commerce" of the port of New York has been removed by a new administrative provision in the tariff law permitting Canadian grain to remain in transit one year before exportation

General concern was manifested by port officials and grain trade over a ruling in November by the commissioner of customs requiring railroads to dispose of all bonded grain in transit within ninety days after receipt.

Enforcement of this decision, it was feared, would have resulted in the grain trade and an accumulation of grain would have been dumped upon a market with no support demand. A committee representing the port authority, the grain exchanges, trunk line railroads, elevator interests and others, proceeded to Washington and following conferences with treasury officials outpayment of the ruling was held in abeyance pending legislative action.

Find Radium-Bearing Ores

Impossible To Estimate Extent Of Discoveries In Manitoba

Winnipeg Man Discovery of radium-bearing ores on the area east of Lac Du Bonnet is stated to have been made by employees of the Winnipeg River Tin Company. R T Packard, president of the firm, states that uraninite has been traced for more than five feet deeper, and that examinations have proved the exact strength and extent Owing to irregular nature of the deposits, he says, it is impossible to estimate the extent of the ore-body.

New Liquor Board Ruling

Soldiers' Clubs In British Columbia May Sell Beer

Victoria, B.C.—Sale of beer by the Soldiers' Clubs, the most important departure undertaken by the government in the handling of the liquor situation since the inauguration of beer by the glass in licensed premises will commence almost immediately.

An order-in-council passed by the cabinet recalled powers given the Liquor board to license Soldiers' Clubs to sell beer, under the Liquor Act amendments passed by the legislature in March.

CHARLES GORDON,
Liberal Candidate

To The Electors, Electoral District of Vegreville:

Ladies and Gentlemen—

Having been honored with the nomination of the Liberal party to contest the electoral district of Vegreville in the interests of the Mackenzie King government, I feel it my duty to ask before the electors my reasons for soliciting their support at the polls on July 26th. In the comparatively brief space available in a newspaper, one can do no more than summarize the outstanding points on which the Mackenzie King government leaves its appeal to the country. But, during the campaign, various speakers will explain in detail both the major and the minor issues involved.

In this constituency, no Conservative candidate will be nominated, hence, the campaign must, necessarily, be based upon the record of the Government

All indications point to the return of the present administration under Mr. Mackenzie King to power on July 26th. It is most unlikely that any such situation will arise as in 1925 when the fate of the government was in the hands of a small group. No prime minister of Canada will attempt to carry on government again under such conditions. It is, therefore only reasonable to look for candidates directly supporting the government, thus taking the business affairs of the country out of the realm of uncertainty and placing them on a stable and assured foundation.

The number for Vegreville from 1926 to 1930 is on record as having opposed the Dunning Budget, a long with numerous other government measures According to his own statement he "voted with his group right or wrong."

It may be fairly decided that the representative of a group can claim to be a true representative of the whole of the people. For a constituency A member of parliament who seeks to his constituents than to act as a rubber stamp for a party of thought. He often has constituents' the exercise of his own judgement on measures and policies, irrespective of party or group affiliations. Yet the late member for Vegreville voted with his group, right or wrong. The Dunning Budget of 1930 was the most important piece of fiscal tracking tariff measure presented to parliament since 1907. It embodied several features for which the agricultural interests had been contending for it be voted against it, right or wrong.

I cannot believe that, in taking this stand, the Vegreville member fairly represented the actual sentiment of the electoral district of Vegreville.

Against his father in this thing's place that of the Liberal government which has held power in Canada since November 23rd 1921 with the exception of about three months in 1926. I can mention only the main items of policy importance

1. The consolidation of the government owned railways into one integrated system under the presidency and management of Sir Henry Thornton. Prior to this consolidation the various government-owned railways, operated and rapidly running in red, were controlled to half a dozen different directorates all managements. Consolidation resulted in an immediate reduction of expenses in head offices in operation, in maintenance and in bond with better service to the public Sir Henry Thornton, the President and General Manager of the greatest railway system in the world, has transformed Canada's greatest liability into Canada's greatest asset. There is no political interference with the Canadian National Railway system. The record of the Canadian National Railways is astounding in its success

Who made it possible?

The Mackenzie King government

2. The construction and completion of the Hudson's Bay Railway, affording the farmers of Western Canada closer access to the markets of the world.

3. The encouragement of Canada's trade and commerce, which has doubled since the Liberal government took office This was brought about by encouragement of superior methods of transportation as in the Canadian Mercantile Marine; the deepening of the Welland canal and other waterways, the establishment of commercial agencies in the principal trading centres of the world; the negotiation of trade treaties and conventions with other countries whereby reciprocal benefits were obtained; the development of the natural resources of the country

4. The elevation of Canada from the "colonial" status to that of an independent fully self governing Dominion within the Empire.

5. The reduction of taxes, such as the Income Tax, the Sales Tax Cheque Tax, Excript Tax, Postage reduction, together with constant reductions in the tariff on machinery and articles in common use. Tax reductions mean reduction in prices.

6. The substantial reduction of the public debt through shrewd and careful financing.

7. The settlement of a long-standing dispute with the Maritime Provinces on generous and advantageous terms.

8. The restoration of the natural resources to the Prairie Provinces on a liberal basis, acceptable to all three provincial governments concerned

9. The encouragement of agriculture through scientific research, the extension of the activities of the experimental farms; the campaign for better seed conducted by the Seed Branch, combating animal diseases; instituting a system of grading such as eggs, pork, beef, mutton, butter, cheese, fruit, potatoes etc., thus establishing a standard of excellence which is recognized.

10. The extension of the British Preference under the Dunning Budget of 1930, where nearly 600 items on the tariff list are free or subject to lower rates, while others have been materially reduced. Increased trade with Great Britain will be an outcome of the extension of the preference.

11. The Dunning Budget of 1930 with its reduction of duties and its provision for reciprocal arrangement with other countries in the way of counter-tariffs duties.

All these points, with many others in the credit of the Liberal government will be elaborated upon during the campaign. The whole record of the government is one of achievement and progress. Vegreville constituency cannot afford to vote against such a government.

I beg also to point out that for over twenty-seven years I have resided in this constituency and have extensive business interests here. I am thoroughly familiar with every part of the district and believe that I have a good understanding of all needs. My record as a citizen and as a public man is before you—it will bear the closest scrutiny.

Unemployment has been made an issue on this campaign. But unemployment is a characteristic of large cities and industrial centres, rather than rural constituencies such as Vegreville. But it is fair to point out that I am by far the largest employer of labor, skilled and unskilled, in the newly-formed Canada's greatest liability into Canada's greatest asset. There is no political interference with the Canadian National Railway system. The record of the Canadian National Railways is astounding in its success

LOSS PURCHASING POWERS, GRAIN SURPLUSES, INJURED CANADIAN WHEAT POOL SALES

VERMILION, July 7.— Marketing of Canada's wheat crop in the past 12 month has been hampered by the annual combination of surplus grain production and lowered purchasing power in the wheat consuming countries to such an extent that world cash receipts from exporting countries for exported wheat had been cut down by 300,000,000 bushels, said George Melver, Winnipeg, general sales manager of the Canadian Wheat Pool here Saturday.

In the course of his address to the 200 delegates at the Alberta Institute of Co-Operation, he stated as follows, the theory that the surpluses in the raising of tariffs against wheat were rendered impotent the co-operative method of marketing part of Canada's wheat. He rapped Australia for the same thing that other countries have had been a decided factor in Russia's ability to compete with thousands of unemployed could provide the demand but no money with which to buy.

Russia as a factor in grain export markets was also discussed by the general review of the world situation in grain.

When the operation period arrived he declined to be drawn into revealing the amount of wheat the pool has on hand but stated that the total Canadian carryover of the pool and non pool wheat, at the end of the crop year this month would be less than a year ago.

He was drawn into a debate with one member from the floor of the house who argued that the wheat pool should have not Argentine competition, as he believed it was up to

Referring to the heavy carryover of Canadian wheat last year, Mr. Melver stated early in his address that July of last year it was generally feared that the stocks of Canadian wheat would move out readily despite the fact that a large part of the 1928 crop still in the bins was a low grade which did not sell on world's large volume. If there was any other opinion held or expressed, he said he emphatically never heard it.

He then recounted how Argentine shippers deluged European ports at very far below Canadian prices and of how hat fall European crops were in much better than estimated and that buying overseas dropped to low ebb. Again he declared that stories about the Wheat Pool feeding out for $2 a bushel were pure fiction.

"Wheat did not move so normally as in previous years people far removed from farming valued opinions on the situation and the Wheat Pool was even blamed for losses by speculators in oil and mining stocks.

Although France, Italy and Germany effectively had been savaged in wheat, they had practically a double crop in one season without the usual 20 per cent decrease in harvesting, besides large quantities of coarse grains and roots. These conditions would scarcely be repeated and would not this year prove the same headaches to Canadian wheat.

Big Market Break

Another factor that upset everybody's calculations was the big New York stock market break, the ramifications of which extended all over the globe, adversely affecting commerce in the consuming countries just mentioned. These countries boosted tariffs on wheat.

"The Theory has been laid out that they put the tariffs on to retaliation against the Wheat Pool. I don't think that any sane man can agree with that view of how to broke the Pools.

"I think", said Mr. Melver, "that tariffs were put up against low-priced wheat, to prevent the demoralization of their home grain markets. It was simply a policy to protect cheap grains offered on world markets from interfering."

In Germany it was a political move and the price of wheat in Berlin was fixed by the cost of foreign wheat $1.20 a bushel. It was just a question of how long the consuming industrial public would stand for that contribution to the agriculturists, France by government bonus had become exporters of wheat. And all had heard of the so-called Mussolini battle of wheat, by which Italy expected to become self sustaining in foodstuffs.

France had the biggest crop in 50 years, and will have the same crop as well Italy, while it is too early to judge Germany's crop. Argeny Canada will not be up against such unparalleled conditions.

Turning to the British market of past months, the sales manager said that personally he did not believe there had been a deliberate boycott against the Wheat Pool but that there had been the equivalent of it in effect, because England had been able to buy Argentine wheat (of above the usual quality) and Russian wheat at ridiculously low prices. Also France was selling her grain at somewhat lower than very cheapy. Naturally English buyers could not be blamed.

Says Charge Unfair

"But I do not blame them for charging high cost of living against the operation of the Canadian Wheat Pool. They were not the only Canadian "it was very unfair," declared Mr. Melver.

Turning to the Russian wheat problem which hangs over the world like a pall, he confessed that the Wheat Pool did not know but would feel better if it did, for Russia is a puzzle. Accurate reports were almost impossible to secure, experience showed.

Out of the clear sky last December came the news of Russia selling a cargo of wheat and then another while the best news travelled fast and multiplied, the total exports for the season were 8,000,000 bushels" only but it was the uncertainty that frightened the buyers and hurt the market.

Train-loads of tractors, and machinery have been going to Russia but he doubted if a country where people were starving could become great wheat exporters with any degree of certainty.

With barley the situation has been different, Russia having taken away from America's market with exports this crop year of 31,000,000 bushels as against 19,000,000 from North America. Last year the figures were about reversed when North America shipped 80,000,000.

He denied that the reports were unfriendly toward the Pool and said that the grain company had friends Friends or more satisfied customers and the fact was that wheat had not moved nearly more freely under the world situation at stated.

As an officer of the Wheat Pool he said there never had been a time when the spirit of the organization was higher and the confidence in grain trade does not understand.

Farewell Own Grains

When A. P. Sifton, U. P. A. director for the district, who was elsewhere on business, came on the questions, one delegate ask if they had been less world consumption of wheat or whether less had been purchased because of reduced buying power. The sales manager replied that he doubted if Europe had consumed less but utilized its own grain. Of course the Orient consumed less. Japan taking 2,000,000 bushels, against 12,000,000 last year.

Another questioner desired the reason for the 15 cent rise in the current initial payment scale. Mr. Melver said the contract called for the handling of all wheat delivered elevators. With the market price of wheat under the dollar, no one disposed could buy grain and make an immediate profit by delivering it to the pool. He was not suggesting it was being done but naturally the pool had to guard against it.

One member said his district would forward a resolution that they were opposed to the pool going in for actually buying wheat. Mr. Melver said others were so ready to criticize because it was not done more often. He said the campaign that it totalled thirty millions was absolutely untrue. Prior to the government guarantee the pool had bought futures, as it had five years ago and in May 1929

Then arose J. W. Livingstone of Claymore. Is it good policy for the pool to hold back if Argentine sells? What is the use of us fellows growing wheat if you fellows can't sell it? he asked. He argued the pool to get the highest price for it in the same year, not the next year. I can't wait to have it stored up by the Joseph did in Egypt. Is it the policy to hold back?"

Mr. Melver said that surely wheat would be sold at a price but when Argentine shipped it without being sold, boat loads were tied up at Liverpool and Antwerp docks. He asked the delegate if he would advise entering a race with Argentine.

Would Have Cut Price

"We should have sold some wheat ever if we made loss repeat. If he sold at 80, we should have sold some at 90 to show him we held the market", responded Livingstone.

"Can you live cheaper than the farm in land bush" queried Melver. "Well, he certainly cannot live cheaper than I am living right now, I can tell you", retorted the man from Claymore as he sat down.

MOTORISTS MUST HAVE LICENSE

On and after July 15th next, a new type of drivers' license, number plates and defective brakes will be made by the Provincial Police. Have your drivers' license with you when driving, have both number plates attached to your car, lights working and brakes effective, and throby save

CHAUTAUQUA PROGRAMS UP TO PAR

While those attending chautauqua this year for the first time are amazed at the number of high class entertainers that are provided.

In studying the effort of the programs upon the audience one is struck with the wonderful recorded good musical numbers. Not so much the really classical symphony selections, but gems from light and other opera. These present will remember Mr. Newel and Miss Dunham, at the close of singing a selection from the "Chocolate Soldier."

The two plays went over big, while the lecture by Prof. Hall and Mr. Warbler were exceptionally good. Audiences seem to prefer lectures of an informative type rather than purely inspirational lectures.

As we are writing there are still more programs to be rendered, a sextet which are "Pollyanna" and the Lions Ensemble, both high lights of chautauqua week. Guy Detrick in the lecture "The Man of Calibre," will afford a rare opportunity to hear a remarkable lecture.

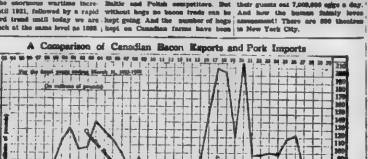
The Bacon Export Market Neglected As Canadian Hog Industry Fails To Expand



We are back at that stage but worse For now our exports, about 30 million pounds in 1926, are almost exactly half over by our imports from the United States This is seen from the bewing line showing our imports since 1926.

That balance means that Canadian hog growers are producing just enough for the home market with no margin whatever for an export trade In general, it may be said that the American imports are not re-exported. They are absorbed into the domestic trade. Bring a pure bred would otherwise be left in the home supplies by the absorption of the Canadian selects and become used in our export Wiltshire trade. To a less degree we certainly have developed the same trend as in Ireland, where the better grades of bacon are shipped to England and the poorer cuts are imported for the domestic table.

In 1926 the year which the chart records begin, Canada had a population of about five million people The number of hogs then reported on farms was 1,734,000. In 1929, when our population was about ten million, our hog numbers on farms were set down as 4,362,000 That is a ratio of about 2½ hogs to every hundred people in 1926, and of 43 hogs today Forty years ago hogs were however then they are today, but the litter is probably larger today and marketing is done much more rapidly. In the turnover of livestock is faster, so that the total amount of pork produced may not be greatly different for the two years. Per capita consumption in Canada, so far as the available records go, seems to have increased. An estimate of the Bureau of Statistics set the pre-war average at 60 pounds per person in 1926 but per capita consumption of all pork was estimated to be 52 pounds a figure arrived at by subtracting the total production less net exports by the total permanent population. This does not seem to take into account the highly important temporary popula-

"Mommy, what is that?"
"A cane-crow."
"That is the first time I have ever seen one, mommy."—Widow Jakob, Berlin.

tion of the new vast tourist trade in Canada. If this were properly given we think the per capita figure reported might be considerably diminished. Yet whatever increase has taken place in consumption over the period 1926 to which it is extended that production has only been made for one of the two Canadian markets. The vast export possibilities in Great Britain have not been neglected in the full sense of the term, but no strong coordinated effort by producers has been made to turn it to proper account. Canadian packers have striven unremittingly for well over a quarter of a century to hold that market, first against the competition of Irish and Danish bacon shippers and, latterly, against Danish, Swedish, Baltic and Polish competitors. But without hogs no bacon trade can be kept going And the number of hogs kept on Canadian farms have been insufficient to supply more than one market.

The British market is known in most vital to the Canadian hog producer both with regard to actual size and to the price Paid and Mr. Warbler were exceptionally good. Audiences seem to prefer lectures of an informative type rather than purely inspirational lectures.

As we are writing there are still more programs to be rendered, a sextet which are "Pollyanna" and the Lions Ensemble, both high lights of chautauqua week. Guy Detrick in the lecture "The Man of Calibre," will afford a rare opportunity to hear a remarkable lecture.

Street Accidents in London

Records Show Three Persons Killed and 127 Injured Daily For First Three Months

Official reports show that on each day for the first quarter of this year three persons were killed and 127 injured in the London streets, alone. Last year's totals of killed and injured in London, were 1,263 and 34,231. For the whole of Great Britain there were 6,056 killed and 130,817 injured. During the two and a half years of the South Africans war the total British loss in killed was 5,774. In the same period, on the figures given above, Great Britain and London have lost 14,740 lives in street accidents.

A Boy's Hookup

Just what little hops are made of has been discovered by an English boy of fourteen. Ronald Hollands, the first two running a little above Chesham and the Dutch a little below.

Looked at from the national industrial point of view the loss to Canada of this great trade is important. The British consuming public has been found and can be developed first, enormous sums for transport and other charges are thereby saved, far below the possibilities of production.

Protective Charms

Collection On Exhibition In London, England, Is Extraordinary

An extraordinary collection of charms for curing illnesses have been collected by Mr E. Lovett, of the Folk Lore Society, and exhibited at the Southwark Museum. Among them is the skin of a cat brought to London by a Belgian refugee as a safeguard against catching cold. Potatoes, which, carried in the pocket, are supposed to ward off rheumatism, and strings of lucky beads worn by children during the war to protect them against air-raids, are also features of the exhibition. One woman who came to look at the exhibition, had two acorns hung at the end of ribbon. Whenever she had a pain, she explained, she would tie the ribbon so that the acorns lay against the parts affected.

It is estimated that one out of every 34 automobiles in the United States has an accident at some time during the year.

An Empire Service

Duke Of Connaught Sends Wireless To Go To Canada

"There have probably been no greater openings of any time in the world for young men prepared to work than those presented by Canada today," declared the Duke of Connaught, formerly governor-general of Canada, in his address at Wellington College, Crowthorne, recently There was an enormous demand for qualified engineers and chemists and if Britain were able to keep up sending a steady stream of trained men to the dominions it would be doing a great Empire service.

Planning Sheep Survey

Dominion Government Will Make Complete Study Of Western Industry

An economic survey of sheep ranch ng in Saskatchewan, Alberta, and British Columbia will be undertaken this summer by the Dominion Department of Agriculture, Dr J. Grindon, Deputy Minister of Agriculture, has announced. The work will be under the direction of the agricultural economics branch in co-operation with the Dominion superintendent of farms Preliminary arrangements for the survey are practically completed and field work will get under way in the near future

A complete study of conditions in the sheep ranching industry is contemplated by the beginning of a programme of research work in agricultural economics on behalf of the livestock industry

It is anticipated that between 120 and 200 sheep ranches will be visited in the three provinces, and at these ranches information with respect to all phases of operation will be sought. The economic survey will seek to explain the very liquid of economics of sheep ranching as carried on in different regions.

New Classification For Corn Exhibits

Plan Groups Instead Of Four As Announced For Grain Show

The executive of the World's Grain Exhibition is recommending that nomenclature of the classes for corn be about the same dates in 1932, should undergo in addition as the Prairie is to be conflict and no little congestion as possible.

L. H. Newman, Dominion cerealist, reported on a new classification for corn exhibits which comprises five distinct groups instead of four as formerly as follows: Dent varieties requiring 110 days to mature, flint varieties requiring more than 110 days but less than 120 days to mature, and varieties requiring more than 120 days to mature; and Pint varieties requiring less than 110 days to mature. Total prize money is recommended, namely $10 000 for all classes.

Civilization To Blame

Demand For Rapid Growth Made the Pig Piggish

The pig should worry if a soul psychologist should ever discover about him.

He has proof that it was civilization that made him piggish. The agricultural research center at the University of Illinois is regarded ready to testify that the reason the big "hogs" his food five times as much as ordinarily would be necessary for him to that the demands of civilized man, he keeps civilized growth in the porcine carcasses are the cause of his overgrown appetite

E. F. Ferris, swine specialist, says, that the rapid growth demanded by present day civilization is responsible for the fact that a pig at only about one-fifth the rate maintained by good swine raisers.

The Indian Government has cancelled orders for government railways.

Extraction Of Gasoline From Tar Sands Of Alberta Is Now An Accomplished Fact

Fresh Air For Health

Thousands Of City Men Make Gardens For Exercise As Well As Pleasure

Funny old world, isn't it? Hundreds of thousands of farm boys going to the city to get wealth, with hundreds of thousands of city men digging in little back yards to retain health

The farm boy wants city life, while the city man finds no greater pleasure than to get better exercise than he gets by turning his city property as nearly like a farm as possible

He digs that little bare spot back of the garage. He hoes in the out of the sods of the house. He cultivates as much of his back yard as his wife can spare from her wash lines and as he digs and hoes and cultivates he gets the very kind of exercise he most needs. Truly there is health in the backyard, if one but seeks it.

Not Cold In Alaska

Average Low Temperature Two Degrees Higher Than In New York

The lowest temperature recorded at Sitka, Alaska, during the past one hundred years is four degrees below zero The lowest reported in New York is six below

Weather bureau records for 1927 show that the average low days during the winter when the temperature at Sitka registered more than 32 degrees—while the lowest temperature for the year was 13 degrees

How this isn't printed so that our readers will move to Sitka. But it does show that we all need to undergo something about this section of the world.

High In Mental Ability

George Bernard Shaw Brainiest Man In England According To Vote

George Bernard Shaw, according to readers of The Spectator, the well-known London weekly review, possesses the best brains in the country. The Spectator is a journal circulating among the more thoughtful class of people whose opinions in regard to mental ability are worth considering.

The result of the recent vote is interesting in many ways. Here are the leading men in their "order of merit": Bernard Shaw, 214; Sir Oliver Lodge, 183; Lord Birkenhead, 162; Winston Churchill, 95; Dean Inge, 91; H. G. Wells, 86; Lord Melchett, 62; Lloyd George, 50; Philip Snowden, 46; Sir John Simon, 45.

The present prime minister does not receive a vote and Mr. Baldwin gets but 12. The Archbishop of Canterbury, Dr. Lang, finds no place but the Archbishop of York (Dr. Temple), with 32 votes follows closely upon the heels of Lord Reading, who obtained 35. Sir James Barrie is "placed" by 15 voters and follows G. K. Chesterton's 17.

Bred In Western Canada

A great majority of the people have the mistaken idea that the wild duck supply comes from remote northern fastnesses. Most of the ducks ordinarily hunted for game, except the black duck and perhaps the green-winged teal, to a certain extent, are western in their breeding range. The canvas-backs, red-heads, mallards and scaups, which are shot in Ontario and Quebec in the open season, are bred in Western Canada.

"Don't forget that when you have bought the car you still have the petrol to pay for," says a writer. It's the spirit of the thing that counts.

"Do you see that gentleman? He's the nicest man I was ever married to."—Lustige Sachen, Leipzig.

Experiment a Total Loss

Giant Tube To Convert Gulf Stream To Electrical Energy Collapses

A giant tube built at a cost of more than $1,000,000 and designed to harness the waters of the Gulf Stream to convert them into electrical energy collapsed when sunk into the sea near Matanzas, Cuba, and was destroyed.

The tube was designed by Georges Claude, French scientist. It was built of corrugated steel, was 1,800 meters long and required three months to build.

The plan was to place the great tube in a channel on the bottom of the sea to serve as pipe line from the Gulf Stream to a power plant erected at Professor Claude's laboratory along the gulf shore near Matanzas.

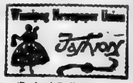
Professor Claude's theory was that the Gulf Stream water being subjected to vacuum would rise to the boiling point and produce steam sufficient to turn great turbines for generating electrical power.

Beauty and Usefulness

No Reason Why Everyday Things Should Not Be Attractive

The consumer has come to rejoice over the reunion of beauty with usefulness. Where else if not in the home should such a movement exert its most beneficial influence? There is no reason why beauty like charity, should not begin at home, why the lamp in the boudoir, the gas range in the kitchen, the ash tray in the library, the automobile in the garage should not be designed and colored by the best artists industry can afford to employ.

This flight into the realm of art which modern business has taken is more than a profitable sales appeal. It is a cultural force that, if not dissipated in a straining toward extremes, may eventually help to raise the level of popular taste.



(By Annebelle Worthington.)

The feminine influence is apparent in a printed crepe silk with flared cap sleeves and bow neckline.

It is the smart moulded silhouette with belted natural waistline. The back is slim and straight.

Circular flared front of skirt provides interesting fulness.

Style No. 3473 comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

It's an excellent model for the attractive summer cottons, as printed dimity, pique prints, embroidered batiste and printed voile.

Flat silk crepe in skylark blue, dusty pink shantung, coral-red linen and candy striped silk shirting are attractive selections.

Monster Inter-Provincial Picnic

Will Celebrate Linking Of Manitoba and Saskatchewan Highways At Gateway On Labor Day

Arrangements are rapidly being pushed forward for the monster Inter-Provincial Picnic on Labor Day on the Manitoba-Saskatchewan boundary west of Roblin. An enthusiastic meeting of the representatives of various communities in Manitoba and Saskatchewan sponsoring this celebration met recently at Roblin, and spent a busy afternoon discussing different items in connection with the picnic. The genial general chairman of the Association, Art Staick, of Dauphin, kept the boys working hard on their various problems. A welcome visitor on the occasion was "Ace" Emmett, of the Manitoba Motor League, who, in his enthusiasm for anything which makes for development of tourist traffic and good roads, made a special solo trip from Winnipeg to attend the meeting. Following the business session, and spurred by the enthusiasm of H. J. Bowley, the energetic chairman of the grounds committee of the Manitoba section, the meeting adjourned to the picnic grounds in the beautiful Assiniboine Valley, eight miles west of Roblin to view the site chosen for the picnic. At this point Manitoba Scenic Highway No. 5 joins Saskatchewan Highway No. 10. All were delighted with the wonderful natural amphitheatre and picnic grounds available through the courtesy of the owner "Bill" Thompson, an old timer of the Roblin district.

At the site chosen for the picnic which will be of the basket variety there is a beautiful level [illegible] bordered by low [illegible] bushes and with the Assiniboine River on the western limit. Rising from the meadow which is on the floor of the Assiniboine Valley, at that point about a mile wide, there is a natural bowl amphitheatre formed out of the banks of the valley, practically free of trees, and ideally suited for accommodating thousands of spectators. A platform can be erected at the base of the hills and speakers can be seen and heard by thousands with comfort. The festivities are slated to start about 11 a.m., when bands from points in Manitoba and Saskatchewan will be presenting a musical programme until the noon hour. Picnic basket lunch will take about one hour, to be followed by a symbolic ceremony to indicate the linking up of the good road highway systems of Manitoba and Saskatchewan at that point. Honorable W. R. Clubb, Manitoba Minister of Public Works and Honorable A. C. Stewart, Minister of Highways for Saskatchewan, are expected to function as the chief participants in this symbolic ceremony. Governor Christianson, of Minnesota and possibly Governor Sorenson, of North Dakota, are expected to be on hand to give the occasion a friendly International flavor. There will be picnic games, a Buffalo barbecue, where a thousand beasts will be broiled if necessary, a sudden death baseball tournament between all star Manitoba and Saskatchewan teams, championship horseshoe pitching contest, children's sports, and many other diversions, entertainments and attractions. Altogether it is freely conceded that a very pleasant time will be had on this occasion. Hot water and hot dogs will be available on the grounds. And the world is invited to attend.

Many will ask what is this all about? The aims and objects of the Inter-Provincial Association, which is the body set up to handle this picnic, is stated in its literature to be "Organized by communities and public bodies of Manitoba and Saskatchewan to celebrate in the form of an Inter-Provincial Picnic, on Labor Day, September 1st, 1930, at the Manitoba-Saskatchewan boundary in the Assiniboine River Valley at the junction, near Roblin, Manitoba, of Scenic Highway No. 5, with Saskatchewan Highway No. 10; the completion and linking of all weather roadway systems of Manitoba and Saskatchewan at that point." While the basis of the appeal to the public and especially the motorists to come and celebrate is largely from the standpoint of well founded publicity, there is a strong sentimental urge behind the proposal. To those who have watched the development of transportation of people and things through the Prairie Provinces from the old Red River ox cart to the present day motor car and motor bus, must come the realization that we in Western Canada stand in the bright light of a new day insofar as transportation over our prairies is concerned. The era of motor transportation is upon us and while we rejoice in its coming, we all have many deeply rooted heart attachments for the old order of things. And so the Inter-Provincial Picnic is conceived as a publicity medium, as a sentimental appeal, and as a disseminating agent of good will between our Prairie communities and our friends to the south of the U.S.A. border, and as a gathering to evidence the fact that good roads for which we have long struggled have brought distant communities practically to each others door.

Using Small Seadrome

San Francisco Air Ferry Has First Anchored At End Of Dock

A seadrome, built on the principles of proposed mid-sea landing places for aeroplanes, has been put in service by a San Francisco bay air ferry [illegible]. It is 100 feet wide, and declared to be the [illegible] floating island landing place in the country.

Shaped like an inverted saucer, the landing contrivance has a smooth rounded top and beneath its hull is a system of air tanks which may be regulated to control the [illegible] and angle at which the device floats. The artificial island [illegible] is carried out with sand on [illegible] to prevent the amphibians from skidding. The sand is cemented into paint. The float is anchored at the end of a dock where more than 25 landings a day are made, with a similar number of take-offs.

Build Annex To Elevator

Big Grain Storage Elevator At Fort William To Be Enlarged

Erection of a grain storage annex of 1,000,000 bushels capacity to the Fort William terminal elevator of N. M. Paterson and Company, is announced by Norman M. Paterson, president, at a cost of approximately $350,000. Construction will start immediately by the Fegles Construction Company, of Minneapolis and Fort William. It will be completed and ready for storage by about October 1. Engineers of the Fegles Company will prepare for construction to begin within a fortnight.

Regina's Population Increases

Population Is Now Estimated To Be Nearly 67,000

Population of greater Regina is now 66,996 according to figures released by the Regina Board of Trade. The figures represent the population of the city on June 1, it was said.

This figure shows a growth of 4,515 over the previous unofficial figure of 62,481 compiled by Henderson's directories and the Regina Board of Trade, reported for June 1, 1929.

Telegraph Lines In Canada

Latest statistics show over 338,000 miles of telegraph lines in Canada; in addition to which six trans-Atlantic cables have their terminus in Canada, five on the Atlantic and one on the Pacific, and handle nearly 8,000,000 cables annually.

To Prove His Belief

A Polar expedition may be launched by Dr. Knud Rasmussen, noted Arctic explorer, to demonstrate his belief that the Eskimos are related to the neolithic men who inhabited the caves of what is now France and other parts of Europe.

SUNDAY SCHOOL LESSON

JULY 13

JACOB, A SELFISH MAN TRANSFORMED

Golden Text: "For what shall a man be profited, if he shall gain the whole world, and forfeit his life? or what shall a man give in exchange for his life?" Matthew 16.26.

Lesson: Genesis 25.19-34, chapters 27-33, 46.28 to 47.12.

Devotional Reading: Psalm 19.7-14.

Explanations and Comments

Jacob Treats His Brother Meanly, 25.29-34. One day Jacob prepared pottage, a dish made of lentils or small beans, and Esau, his brother, [illegible] in faint from the field, [illegible] for it. "Therefore was his name called Edom." "Edom" means "Red". Esau had red hair and red complexion, and it was red pottage for which he sold his birthright, all of these [illegible] to give him the name of Edom, and his descendants were called the [illegible].

"Sell me thy birthright," Jacob demanded, taking a mean advantage of Esau's exhaustion and hunger. By the birthright he meant the rights and privileges of the first born, which later, at least, included a double portion of the father's property and succession to the leadership of the family, priestly rites, and in the [illegible] of Abraham heirship to the [illegible] privileges. Mean as Jacob's [illegible] was, it shows that he [illegible] the value of the birthright, as Esau, who cared only for the gratification of the present moment, could not.

"Behold, I am about to die," Esau exclaimed: he was "tired to death," as we so often say with as little truth—"and what profit shall the birthright do to me?" Jacob knew that when Esau's hunger was appeased Esau would repent his bargain and break it as readily as he had made it, so he asked Esau to swear solemnly to abide by it, which Esau did. It was a sharp bargain that Jacob drove, how sharp Esau did not realize, [illegible] he was not noble enough to appreciate the birthright's value. He had his bread and pottage and went his way, so he despised his birthright. His birthright was nothing that he could see or eat or drink, and therefore he could not appreciate it.

Canadian Bond Sales

Amount Being Invested In Bonds Speaks Well For Prosperity Of Dominion

The first five months of the present calendar year saw Canadian bond sales total $292,677,277, as compared with $226,765,612 for the similar period of 1929, and $210,285,660 for that of 1928. Two thirds of the whole, or $214,899,277, were purchased in Canada, while the remainder, amounting to $77,778,000 were bought in the United States.

Good Even If Old

Students of Ottawa University have been served plum jam which had been buried in the scholastic grounds for twenty-seven years, and they liked it. Forty quarts of the preserves were found buried several feet in the earth by excavators, working on the location of the old kitchen destroyed by fire in 1903.

The front pew in the church may lack the required degree of upholstery, but at least there's no windshield to take a header through unexpectedly.

Presentations To Iceland

Interesting Ceremony Conducted At Meeting At Thingvellir

A bronze tablet, bearing the likeness of Thomas H. Johnson, at one time minister of public works and later attorney-general of Manitoba, was unveiled, at Thingvellir, by Hon. W. J. Major and officially presented to Iceland as Manitoba's millennial gift. The tablet, which bears an excellent likeness of the first Icelander to occupy a [illegible] position in a Canadian legislature, hangs on the wall of the antechamber in the parliament building. A large [illegible] Icelanders were in attendance and after Mr. Major's address "O [illegible]" sounded for the first time in Icelandic legislature halls. The ceremony closed with the Icelandic and British National Anthems.

The gift of the United States was officially presented by Senator Burtness and Dr. Sveinbjoern Johnson. [illegible] presented the [illegible] passed by the last [illegible] of the Canadian [illegible] declaring its [illegible] Iceland with a [illegible] would be most acceptable. The [illegible] of the gift will be determined by the recommendation of the Canadian representatives upon their return.

Germany's gift to Iceland on this occasion is complete equipment for a scientific laboratory. For the building, when erected, Sweden presented a library of 300 books; Norway an exchange scholarship fund; Denmark a Copenhagen porcelain vase [illegible] bestowed upon the president of [illegible] the Order of Commander of the Legion of Honor; a bronze bust of Vilhjalmur Stefansson by the Icelandic American sculptress, Miss Saemundson, was the gift of the Danish women of America.

There were numerous other gifts and countless illuminated addresses in most elaborate bindings. The celebration officially closed after three wonderful days at Thingvellir.

Good Roads Program

Extensive Mileage In the National Parks Being Built This Year

Good roads are being extended to every part of Canada. In the rural districts of every province there is a network of paved or surfaced roads, which not only are of benefit to the motorists, but to the farmers. In the National Parks of Canada, the great playgrounds of the country, maintained by the Canadian Government, there is an extensive mileage of improved roads. The road building programme in these parks this year is a substantial one and the provincial governments are constructing sections to connect the roads in the parks with the principal provincial highways.

Automatic Letter Box

A Berlin post office has been equipped with automatic letter boxes, and when letters posted in them have reached a certain total weight, they are conveyed automatically on a travelling band to the sorting room.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

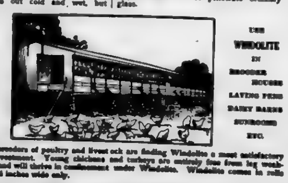
WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE



USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Memorial To General Wolfe

Marquis De Montcalm Unveils Monument Erected In England

Erected on the hill at Greenwich, England, above the naval buildings, and opposite the famous observatory, is a statue of General James Wolfe, erected by subscription from the people of Canada. The statue was unveiled recently in a great ceremony.

The unveiling was made by the Marquis De Montcalm, descendant of the famous Montcalm, Wolfe's great and generous antagonist in the struggle for Quebec and Canada.

The ceremony was performed in the presence of the Duke of Connaught, the former Governor-General of Canada, the French ambassador, the Hon. A. V. Alexander, the first lord of the admiralty, the Right Hon. Thomas Shaw, secretary of state of war, the Hon. Philippe Roy, Canadian minister to France, and other representatives of the three nations most intimately concerned.

Dr. Tait Mackenzie, the sculptor of the memorial, and S. G. Butler, the architect, were present.

The Canadian delegates to the Imperial Press Conference journeyed to Greenwich by London's earliest and now almost neglected highway—the historic Thames.

Wolfe spent much of his early life in Greenwich, and his body which was brought from Canada soon after his death on the Plains of Abraham, lies side by side with that of his father in St. Alphege's Church.

The mayor of Greenwich ceremoniously received the prominent personages at the unveiling. The band played at appropriate intervals the national anthem, the Marseillaise, and O Canada. Inviting the Marquis De Montcalm to unveil the statue, Sir Campbell Stuart, native Canadian and director of "The Times," London, England, spoke of the everlasting pride which Canadians would feel in the knowledge that after 150 years a tribute to Wolfe was made on their behalf by a Montcalm. He hoped the [illegible] would erect in France a like monument to General the Marquis De Montcalm, and he hoped this statue would be unveiled by a descendant of Wolfe.

The Hon. Philippe Roy read a message from Prime Minister W. L. Mackenzie King, of Canada, remarking the importance of the ceremony to Canada, and regretting his inability to attend it.

Descends To Great Depth

A new deep-sea diving record is claimed for William Beebe, of the New York Zoological Society's oceanographic expedition, who descended 800 feet beneath the sea's surface at Hamilton, Bermuda, in a steel ball with fused quartz windows. The lowest depth previously attained was 325 feet. The steel sphere contained an oxygen supply and was fitted with apparatus for absorbing the exhaled air.

"Stop and let the train go by—
It hardly takes a minute.
Your car starts out again intact,
And better still you're in it!"

One Paris hotel will run an airplane taxi service for its guests.

Literary Relationships

Connection Very Intimate Between Canada and Great Britain

There has long been an intimate literary relation between Canada and the Motherland. Canadians read many British books, and there is some traffic in the other direction. Canadian writers have gone to live in England, such as Haliburton, Sir Gilbert Parker, Mrs. Cotes, Alan Sullivan, and others. There has also been a sprinkling of British writers in Canada, such as Tom Moore, John Galt, and Mrs. Moodie many years ago, while the Oliver Goldsmith of Nova Scotia was a relative of his more celebrated namesake.

Another aspect of the relationship lies in the interest of Sir Walter Scott, Thomas Carlyle and Charles Dickens in Canada by reason of near relatives living here. Mr. Frank Yeigh has been exploring this field and gives the result in Queen's Quarterly.

Thomas Scott, a brother of Sir Walter, came to Canada in 1813, as Paymaster of the Seventieth Regiment. He spent the rest of his life in Canada, dying at Quebec, in 1823. He was so nearly a rival of his more famous brother that at one time he was thought to have written the Waverly Novels. Sir Walter, who had not yet acknowledged his own authorship, fenced the question with Lady Abercorn in 1816. "I can assure your ladyship your laudable curiosity would not remain ungratified," he wrote her, "but if Tom wrote these volumes he has not put me in his secret."

Carlyle's interest in Canada was greater, for his brother "Alick" settled near Brantford in 1843, and the two carried on a frequent correspondence. Descendants of this branch of the Carlyle family continued to live in Ontario, one of them being the late Florence Carlyle, the noted painter. Thomas Carlyle viewed his brother's departure with keen regret, and he wrote Alick that he anticipated the rest of the family would follow, "root and branch, even my Mother, for older emigrants than she have gone. Your resolve," he added, "painful to me as it well may be, is one that I dare not say give up. God be with you and guide you whether it is right to go, my dear Brother."

There was yet no railway in Upper Canada, but Thomas Carlyle said steam was daily bringing Canada closer to Britain. "Consider yourself as the harbinger and pioneer of the others, than as one cut off from them," he counselled.

Dickens had the advantage over the others, as he saw Canada during his American tour in 1842, and shortly after his death, his son, Francis Jeffery, moved to Canada, became a member of the North West Mounted Police, and for years shed further lustre on a famous name. He first spent a short time in Toronto, when, "filled with the reckless spirit of adventure," as it then seemed, years ahead of the first railway to the West, he joined the "Scarlet Riders," and had real adventures during the rebellion of 1885.—Toronto Globe.

Oldest City In World

Damascus Has Been Inhabited Continuously Since 2,000 B.C. Or Earlier

The oldest continuously inhabited community in the United States is Oraibi, an Indian village north of Winslow, Arizona, according to the National Geographic Society, which says Oraibi was in existence in 1370, more than a century before the Spaniards reached the mainland of North America, and long before Columbus [illegible]. The oldest city of European origin in the United States is St. Augustine, Fla., founded in 1565, but Santo Domingo, on an island in the West Indies, was founded in 1497. Damascus in Syria is reputed to be the oldest city in the world of continuous existence, being a town in 2000 B.C. or earlier.

What He Took

A man who had married the daughter of a rich biscuit-maker was accosted by a friend in the street and congratulated on his marriage.

"So you have taken, not the cake, but the biscuit this time?" said the friend.

"Yes," answered the other, "and the tin with it."

Her Two Children Had Summer Complaint

Mrs. J. J. MacDonald, Glace Bay, N.S., writes:—"I am the mother of six children, and would not be without a bottle of Dr. Fowler's Extract of Wild Strawberry in the house. My two youngest were very sick with summer complaint, and there was nothing I tried could equal that remedy, and I had tried most everything, but they could get no relief. 'Dr. Fowler's' made a change in both of them in less than two hours."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

UNIVERSITY OF MANITOBA

WINNIPEG

University of Manitoba, Winnipeg.

Spy Lunched With Kaiser

Disguised As German, a British Army Officer Received Valuable Information

A British Army Officer Spy, posing as a German, lunching with the Kaiser, and receiving German submarine policy instructions from the Kaiser himself, during the war—such is the extraordinary story told by Major Thomas Coulson, O.B.E., in "Mata Hari," a sketch of the career of the dancer, a notorious and revolting character, who was shot in France as a spy.

The British officer is said to have been Captain Reilly, who was afterwards shot by the Bolshevists when he went to Russia.

Reilly, it is said, was employed by the Admiralty secret service run by Admiral Sir Reginald Hall. He was known as "Mr. C." and Major Coulson says that he was "the Admiralty's 'ace' in espionage."

He spoke many languages, and knew Europe like his own hand.

"Reilly's most astounding coup against the Germans reads like a romance," says Major Coulson. "It has rarely been equalled and only excelled by his own later exploits in Russia.

"An order had been sent to German army headquarters to send a responsible officer to receive instructions on naval policy from the emperor. The man chosen was an unknown junior officer, for the staff had their own ideas concerning responsibility. However, he displayed considerable intelligence, and a broad knowledge of naval and military matters during the explanation of the new submarine policy which was laid before him.

"He requested amplification of indefinite points — his alertness and zeal so impressed the seniors that they were convinced that their policy would not be misinterpreted at army headquarters, and the emperor was so struck by the amiable young officer that he invited him to lunch.

"The visitor to the Kaiser's luncheon was "Mr. C." the British Admiralty agent.

"How he should have known who was entrusted with the mission I do not pretend to know, but it will look like a miracle when the reader knows that during many months of the war, one of Prince Rupprecht's staff majors was a British agent."—Edmonton Journal.

Question For the Motorist

Week-End Accidents Are Good Subject For Thought

How many more motor accidents will occur over the coming week-end, and how many more lives will be lost in them, and who will be the victims?

That is something every motorist should put in the forefront of his mind when he starts out on his next week-end [illegible] and something he should [illegible] all the time he is travelling.

Of course, it is always the other fellow who meets with an accident, but it may not be that way some day. If every motorist would just remember that he might be the next victim or the instrument through which some one else met death, we believe week-end motoring would be on the decrease instead of on the increase as it is today.

Filmed Interior Of Lung

With lighting effected through a new reflector system, a film of the interior of the lung during an operation was taken recently in Charite Hospital, Berlin, Germany, by Dr. Siebert. The film is said to clearly show details of the operation.

A Rare Occurrence

February, 1866, was the most remarkable month in the history of the world. There was no full moon! That same year, January and March had two full moons each. This never happened before, and will not happen again for 2,500,000 years.

The world's population is now estimated at more than two billion, Asia having over half of this total.

Minard's Liniment for all Strains.

In Class By Herself

University Of Montreal Graduates First Woman Doctor With Honors

The first woman to be enrolled in the faculty of medicine of the University of Montreal, affirmed her primacy by out-distancing all her male confreres, and carrying off the highest honors of her class, when she received her degree as a doctor at the convocation. She was literally in a class by herself since the list was headed "Class A—Miss Marthe Pelland, with highest distinction," her name standing alone in this category. With true chivalry, her class mates gave her a rousing ovation when she was called up to receive her degree.

In the same year as Dr. Pelland began her course in medicine, a friend Miss Juliette Gauthier, enrolled at the University of Montreal, as a law student. Miss Gauthier, who [illegible] an excellent record as a student, received the University degree of LL.D. Although in academic zeal they enjoyed equal status, their position now is another story. Dr. Pelland may, and proposes to, practice her profession, which she is entitled to do, without restriction, but her confrere, Miss Gauthier, will be obliged to rest on her University laurels until the long battle to have women admitted to the Bar in Quebec is won.

Care Of the Eyes

Some Rules Which If Followed Will Keep Them In Good Shape

Avoid very sudden changes from dark to light.

Avoid the use of stimulants and drugs which affect the nervous system.

Avoid reading when lying down or when mentally or physically exhausted.

When eyes feel tired rest them by looking at objects a long way off.

Pay special attention to the hygiene of the body.

Up to forty years bathe the eyes twice daily in cold water.

After fifty, bathe them night and morning in very hot water, then with cold water.

Old people should avoid reading much by artificial light, should be careful about diet and late hours.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Eclectric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

Germany's Monster Land 'Plane

Germany's largest land 'plane, the G-38, perhaps the monster aeroplane of the world, landed in Paris recently. Eighteen passengers were on the aeroplane, which can carry forty-five. It is made entirely of metal, has 2,400 horsepower, a wingspread of 150 feet, weighs 24 tons at full load, and can cruise 2,000 miles.

Combs used by the ancient Egyptians were made of bone, ivory or wood.

In Holland there is a river called "Y." In China is a city called "U," and in Sweden a town called "Å."

"In May and June I was badly rundown and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—Mrs. George R. Gillespie, Pennicky, Saskatchewan.

Lydia E. Pinkham's Vegetable Compound

For Young and Old Alike

ENO is so mild it can safely be given to any child, yet it is quite as effective for grown-ups, eliminating from the systems of young and old alike the clogging waste and poisons which cause intestinal absorption . . . unsuspected constipation . . . Refuse substitutes.

ENO'S FRUIT SALT

Drifting Bottles

Mariners Trying To Ascertain How Far Bottles May Drift In the Ocean

How far bottles may drift in the ocean is a question for which mariners have recently been trying to obtain a satisfactory answer. Two unusually long drifting records have already been reported to the hydrographic office in Washington. In each case the bottle had travelled nearly one-third the distance around the world, or a little more than 7,000 miles.

One bottle, thrown overboard in the North Atlantic near Europe by an officer of the Norwegian steamer "Childar," was picked up near the Marshall Islands. The second, dropped in the same locality from the American steamship "K. R. Kingsbury," drifted 7,000 miles.

The longest bottle drift in the records of the office was made about twenty years ago. A bottle was thrown into the sea on May 21, 1909, and was picked up again nearly three years later on May 19, 1912, after travelling 11,870 statute miles.

Stands Every Test

No Food Has Been Found To Take Place Of Milk

Milk is the food of all foods for mammals—of whom man is the chief. Further, it is the only food actually designed and evolved by nature to be food for them. It is, of course, merely lack of knowledge to regard milk as not a food because it flows as a liquid. In reality, it is solid in the breast and in the stomach; in nature it is only fluid for a second or two of convenient transit from one to the other.

Ordinarily we do not test our foods. Our diet is mixed, and we have a large factor of safety capital on which to draw during time of deficiency. There are four periods, however, during which food may really be tested; growth, athletic exercise, illness, and old age. And no other food can be suggested which remotely approaches milk when tested under these four conditions.

Will Be Preserved

Grave Of Original Of Immortal "Uncle Tom" Discovered By Weed Inspector

The weed-covered monument over the grave at Dresden, Ontario, of Rev. Josiah Henson, the original of [illegible] "Uncle Tom," has been discovered by government weed inspectors, it was stated at the Provincial Department of Highways, Toronto. This relic of the past will be marked in some suitable manner for the benefit of American tourists and students of history.

Rev. Josiah Henson was born July 5, 1789 and died May 5, 1883, at the age of 93 years 10 months and five days, according to the inscription on the monument.

Metallized Paper

M. U. Schoop, of Zurich, Switzerland, has announced that he has developed paper money which will not burn, tear or wear out. His process is described as spraying paper pulp with a protective coating of tin, aluminum or copper. The metallized bank notes are hard-surfaced but are said to be pliable and easily handled.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

Among the few creatures that may live to be more than a century old, are listed the giant tortoise, the eagle, parrot, raven, the German carp, the white-headed vulture.

Minard's Liniment checks Colds at once.

Little Helps For This Week

"As the body without the spirit is dead, so faith without works is dead also."—James 2. 26.

'Tis not the wide phylactery,
Nor stubborn fast, nor stated [illegible]
That make us saints, we judge the [illegible]
By what it bears.
And when a man can live apart
From works, on theologic trust,
I know the blood about his heart
Is dry as dust.

—Alice Cary

The effective life and the receptive life are one. No sweep of the arm that does some work for God but harvests also some more of the truth of God and sweeps it into the treasury of life.—Phillip Brooks.

Persian Balm—alluring, provocative and charming. Fragrant and refreshing as a cool breeze in summer. Delightful to use. Creates complexions of surpassing loveliness. Makes the skin velvety soft in texture. Soothes and dispels all irritations caused by weather conditions. Softens and whitens the hands. Persian Balm is a peerless toilet requisite for women who care for charm and distinction. Use it for hands and face.

Water Shrinkage and Ducks

The water shrinkage in ponds, prairie sloughs and shallow lakes in Alberta and Saskatchewan last year amounted to about 90 per cent. and consequently ducks had a very poor year in these provinces.

A clock in an observatory at Sydney, Australia, is operated by sunlight.

Pure affection is a sentiment free from any taint of any kind, and is as rare as pure charity.

The first Chinese who studied medicine abroad received his medical degree in Edinburgh in 1854.

TAKE NO CHANCES WITH BABY!

Cook Her Food in the "Health Ware"

Doctors recommend Enameled Ware for cooking baby's food. It is so simple to clean . . . so easy to keep sanitary and free from germs. It cannot stain. *There is no metal surface exposed to the food.* Nothing to absorb moisture, flavors nor odors.

Make sure you get McClary Enameled Ware . . . the Modern "Health Ware". Watch for the familiar McClary label.

...th BATTALION (EDMONTON REGIMENT) ASSOCIATION

6th Annual Church Parade

The fourth annual church parade of the 49th Battalion Association will be held in Edmonton on Sunday July 20th next. The parade will assemble on the Market Square at 10 a. m. and will move off promptly at 10.30 a. m. All ranks will "fall in" to these former companies.

Dress—Civilian clothes will be worn with medals and decorations.

The service will be held on Parliament Hill Park, out of doors, so that all relatives and friends of the members may have an opportunity of taking part in the service.

A luncheon, to which friends and relatives may be brought has been arranged at a reasonable price to take place at 12 noon in the Rose Room of the King Edward Hotel.

Special rates on the railways of a fare and third for the round trip for the Edmonton Exhibition will be in force if purchased between July 14 and July 19 for trains reaching Edmonton not later than 2 p. m., July 19.

The service Battalion will supply old Battalion cobbers with a colour party, the brass band and the pipe band and an escort.

The Sunday selected for this parade is the Sunday which opens the Edmonton Exhibition week and it is thought that many old "Diehes" will take in both the exhibition and the parade.

Last year this parade was a great success and attracted much favourable notice. This year it is hoped that still greater success will attend the efforts of the committee.

Every man who at any time served in the 49th Battalion C. E. F. is eligible to attend this parade and is urged to do so. Old "Diehs" will meet old friends and remember that they have not seen for years. Old times, old friends, old stories. It is good indeed to stand shoulder to shoulder again and march to the tune of "Bonnie Dundee" played by the "Good Old Band".

Major General the Honourable S. A. Cruickshank C. B. will command the parade.

EDMONTON EXHIBITION JULY 14—19

All roads will lead to Edmonton the week of July 14th to 19th, when the big annual Exhibition is on, in the capital city.

The flower programme of attractions ever presented to Exhibition patrons has been secured for this year's event, and the new midway shows— Morris and Castle— will doubtless attract thousands of patrons.

Some last-hour changes and additions have been made to the general entertainment programme, and these will include a basketball tournament and some athletic and track events.

A. E. Warren, Vice president of the Canadian National Railway, Western Lines, will officially open the 52nd annual Edmonton Exhibition on Monday, July 14th. The gates will be opened to the public on Monday at noon, and the general programme will be varied from day to day. On Tuesday, and Wednesday, the Cat Show will be held, with the Dog Show on Tuesday, Wednesday and Thursday. A canary and cage bird show will be held on Thursday and Friday, and in the horticultural department various cut flowers will be shown on stated days, the roses, and peonies will be shown on Wednesday, and the sweet peas on Thursday. The Provincial Government's Boys' Camp will be held on Thursday and Friday, the boys will live under canvas in the big camping ground adjoining the Edmonton Exhibition grounds, and an interesting and educational programme is being planned to keep them busy. The live stock judging, generally commences on Tuesday morning. It is hoped that all the judging of school work, arts, women's work, etc., will be concluded before the opening of the Exhibition.

A 50c admission fee will be charged all day Monday, but children will be free to see half the usual rate.

Children's days at the Edmonton Exhibition have been named as follows:

Monday—Official Opening and Children's day.

Tuesday—Farmer's day.

Wednesday—Citizen's day.

Thursday—Old timer's day.

Friday—Poor Boy's day.

Saturday—Midway day.

SHERLOCK HOLMES' CREATOR IS E.-HEALTH SINCE JANUARY, DIES SUDDENLY BY FAMILY

LONDON, July 7—Sir Arthur Conan Doyle, creator of "Sherlock Holmes" and widely known sports-writer, died at his home here today of heart disease.

Sir Arthur was 71 years old. With him were Lady Doyle, two sons and a daughter.

The great novelist and exponent of the occult was stricken narrowly illness two weeks ago and his condition had become more aggravated recently although his death today had not been anticipated.

Sir Arthur's sudden death took his family greatly by surprise. He had been under physician's care during the last six or eight months. His weakened condition was thought to have been brought on by his series of lectures last October in Scandinavia, in behalf of the cause of spiritualism.

Contracted Severe Cold

Until two days ago it had been thought he was getting steadily better. Then he contracted a severe cold. Sir Arthur died at 9:30 o'clock this morning. His son, Dennis and Adrian Conan Doyle and his daughter Jean Conan Doyle, were with their mother at his bedside. He was not powerful, a family spokesman stated.

DO YOU KNOW MARCH 31?

(Experimental farms note)

To identify a variety of wheat from its description on paper is almost an impossibility unless one has made an extensive study of our wheat varieties. In spite of this statement there is a demand for a description of certain characters which will assist in identifying the kinds of Marquis wheat. Whatever colouring into minute detail, certain distinguishing characters are outlined below:

Position describes the shape of a head of Reliance wheat. Head square. A fusiform head is a head which is more or less spindle shaped and tapers like the rest of a carrot, gradually from the base to the tip. Under normal conditions this interval should enjoy a space of 65 to 85 millimetres. A few short awns are found at the tip of the head but these are none what variable in length.

Glume is an important consideration in examining for Marquis. It is here that the average grower fails in his observation of this glume. Hundreds of samples of Marquis grown at the Dominion Experimental Farm, Scott, this conclusion was reached.

When ripe the glumes of Marquis are creamy white and absolutely smooth. Usually the glumes are there as long as wide. The shape of the Marquis glume is an exacting requirement. For this reason the glumes in the seventh node of the head are used for this purpose. More exacting requirements are demanded of the secondary glume which is often the better factor in identifying Marquis. Under normal conditions the shoulder of this glume should be square, but slight variations occur depending on environment. The beak of the glume is always acute and this is often the determining consideration in identifying Marquis.

For a detailed description and illustrations of Marquis, the reader is referred to pamphlet No. 95 "Marquis Wheat" by Sigerson and Fraser, Department of Agriculture, Ottawa.

TENDERS WANTED

The Beaver Lake Livestock Co-operative Marketing Association will receive tenders up to 2 p.m. July 21st, 1930 to contract for the hauling of livestock by motor truck to Edmonton stockyards from territory adjacent to Duvelle, Lindbrook, Tofield, Bardo, Sedalia, Ryley and Holden. Rates to be based on mileage. For further information apply to J. H. Ingram, manager or the undersigned.

T. R. Murray,
Secretary, Tofield, Alta.

The stalwart man heard into the dentist's office and he got forth as follows: "Now, look here, I've got no use for those new fangled notions—gas and cocaine and painless extraction, and all that rubbish. The tooth's a lot of trouble. All you need to do is to yank it out—just yank it out." "Well," said the dentist, "you're a plucky fellow. Just step into the chair."

"Oh!" said the stalwart man, "it isn't my tooth. It's my wife's, she's in the waiting room."

It costs little to have the eyes pierced. Any jeer head will do it for nothing.

The life of an impostor is a very monotonous one, says an ex-convict. It is just one sham thing after another.

Miss Jean Kellner and Mabel Thompson spent a few days last week at the Bardell home.

The Misses, Dorothy Baptiste, Jean Kellner, Mabel Thompson and John Thompson motored to Cooking Lake on Tuesday and spent the day there.

MUSIC EXAMINATION RESULTS

Some results of the recent Toronto Conservatory of Music examinations held at Camrose are to hand as follows:

Pianoforte, introductory grade: Beatrice Baptiste, (honours)
Elementary grade, Betty McCarthy (1st class honors.) Hugh Gordon (Pass)

The above are pupils of Mrs. Carr L. R. A. M.

The prizes given by Mrs. Carr for regular piano practice were won by: Seniors; Betty McCarthy, Beatrice Baptiste; Juniors; Hugh Gordon, Rose Perazoli.

The pupils of Mrs. Firth were also very successful, Zelda Dodds obtaining honours(81) and Dorcadelyn Firth obtaining honours(78.5) Both pupils were in the pianoforte introductory grade.

HON. HARNESS KING'S SPEECH HEARD AT VARSITY THEATRE

On Thursday night last, by arrangement with local agent Harold F. Wood installed a radio and powerful loud speaker in the Theatre and tuned in on the big liberal meeting being held in Edmonton. There was a goodly number in attendance but not a large crowd. Those who possessed radios, tuned in at home, and many visited friends homes to hear the Premier's address.

Hon. McKenzie King went quite deeply into the unemployment problem and gave a great deal of information to show that the government had done all in their power to assist the unemployed and prevent ex-

TOFIELD JUNIORS AND INTERMEDIATE BASEBALL TEAMS WIN MONEY AT RYLEY SPORTS

On Friday last, two baseball teams from Tofield played in baseball tournaments at Ryley.

The Junior team played first against Ryley winning their game by a score of 5-4. The game was all their's until the last two innings when Ryley began to close the gap.

They could not quite make it however and the Tofield boys won out.

The following Tofielders played.

C. Harold Schultz; p. Joe McLachlan; 1st, Ray Martin; 2nd, Harry Bechtel; s.s. Ross Craig; 3rd, Murray McHefley; r. f. Bob Bowtek; l. f. Norman Gilbert; c. f. Gerald Thompson.

The Intermediate team was drawn against Mundare, but the team failed to appear. Consequently, they played Vegreville and at the close the score was even. An extra inning was played and Tofield ran in one and Vegreville did not score, this making Tofield the winner by the score of 2-1

This win entitled them to play against Ryley for first money. The game was something of a walk-away for Ryley. The local team jumped into the lead early and gradually increased it throughout the game. The final score was 10—4 in favor of Ryley. The following Tofield players appeared in the two games:

Bud Rosman, Ed Hill, Kenneth Bull, Ted Kalbfl, Hazel Bechtel, Gordon Worten, Floyd McLachlan, Joe McLachlan, Arthur Francis, Ed Hill.

The Ryley Sports day was a great success. With ideal weather and a large number attending, everything connected with it went forward with the greatest success. Everyone was very pleasing to those present.

The big feature of the day was the baseball. During the day there were playing on the diamond most of the best players in this part of the country. There were teams from Vegreville, Viking, Mirna, Camrose, Andrew and the Ryley home team.

The elimination games commenced in the morning. Camrose beat Ryley in a very tight game 5-6. Vegreville beat Viking 4-3. Mirna beat Andrew. Mirna got the bye. Camrose beat Vegreville, And in the final game Mirna beat Camrose.

Considerable credit is due to the Ryley sporting element for arranging such a good sports day. In the evening there was a very well attended dance held. Martin's Orchestra of Edmonton supplied the music.

U. F. W. A. NOTES

The U.F.W.A. bonds of Vegreville Constituency will hold their annual convention in Vegreville on Tuesday, July 22nd commencing at 10:30 o'clock. It is hoped that all members who can go will be there.

Our next meeting will be on July 24th, at the home of Mrs. M. Rosh. Roll call is to be answered by "Funny Sayings of Aunt Het" and Mrs. Barnhard will read a paper on "Care of Clothing". Visitors welcome.

HON. CHAS. STEWART TO SPEAK AT TOFIELD ON TUESDAY JULY 22

The Liberals are holding a big liberal meeting on Tuesday, July 22nd at the Variety Theatre, Tofield, at 8.00 p. m.

Hon. Chas Stewart, former premier of Alberta, and recently Minister of Interior in the federal government will be present and address the meeting. Hon. Chas. Stewart is known by reputation to all Albertans and is known personally by many of our people, and there will no doubt be a large number out to hear him.

Mr. Chas. Gordon liberal candidate in the forthcoming election will also be present and will address the gathering. Mr. Gordon has been a resident of this constituency for many years and has built up a large business in the constituency. He will place before the Tofield electorate the issues of the day in a concise manner.

Remember the date and time Tuesday July 22nd at 8.00 o'clock

There will also be a meeting at Ryley the same evening at seven o'clock.

Ketchamost Items

A note was arrived to Mr. and Mrs. Jame McMullen on July 10, in Calgary.

Mr. and Mrs. C. A. Ingram were guests of Mr. and Mrs. P. O. Mellow of Shonts a week ago Sunday.

Miss Helen Schultz spent Cheston-open week at the home of her uncle and aunt, Mr. and Mrs. Appleby.

Mr. Frank Hall left Monday for a visit with relatives at his old home at Gladbrook, Iowa.

Mr. Paul McMullen, Mrs. Rose McMullen wife of the late Harold McMullen and her brother, Mr. Prentice motored up from Calgary Tuesday.

Mr. Campbell and daughter Edna motored to Wetaskiwin to visit after which they will go on to Vilna to visit relatives there.

Mrs. Gemeski came from her home in Nebraska, U. S. A. on Friday to be with her son Fred who is still in a critical condition in an Edmonton hospital.

Mrs. Henry McCuntar spent several days in Edmonton last week to be with her sister and brother in law Mr. and Mrs. Gemeski.

Miss Forrest who has been housekeeper at the Schultz home for several years has taken a position in the city.

Mr. and Mrs. C. Barnes and Mr Frank Hall were Edmonton visitors on Thursday.

Mrs. T. D. Ferguson, Misses Viola Lee, Mildred Ingram and William Ingram returned home Monday evening after a few days holiday at the Calgary stampede, also visiting relatives and motored on to Banff on Sunday.

Miss Hazel Sears was a guest of her friend Miss Jean Baptiste between programs at Chesteam Wednesday.

Mr. and Mr. C. Cousbon and children, Miss Hazel Sears motored to Vilna Thursday. Hazel remained at the Cousbon home, Mr. and Mrs. Cousbon went on to St. Paul, where Mrs. Cousbon and children remained for a visit with her mother and sister, Mr. Cousbon returning home Friday.

HAVE NICE FISHING TRIP

Mr. and Mrs. P. Hamper, Mrs. P. Lethebow, Mr. and Mrs. S. Johnson recently returned from an enjoyable fishing trip at Cold Lake. The fishing was good and while the object of the outing was not primarily to procure a large quantity of fish, they did procure a number and caused them to place orders by the Lakeside

TOWN GOSSIP

The warm, even hot weather of the past few days, including the week end provided opportunities, for trips to the lakes and bathing to them. On Sunday there were quite a number of Tofielders enjoying the cooling water of Hastings Lake.

Bert Calvert did some nice diving from the spring board, which, while not very high, was high enough to provide an opportunity for some good diving. Among the Tofielders present, Bert was champion high diver.

Among Tofield families representing there were Mrs. H. E. and J. Rogers, Geo. McLaughlin, W. C. Hall, E. C. Calvert, A. J. H. McCauley, J. Wright and Mr. Worten. There were no doubt others, that our eyes did not notice.

The spot chosen was the beach near Knowsphin Camp, where a number of Edmonton Tuns and Trail Rangers are in Camp. It is an ideal place to bespeet oneself to the water on a warm day, there being a very gradual slope into the lake. For children and those who are not strong swimmers it is especially good.

Chestamere has come and gone, leaving behind pleasant memories for many. The programme, or "yourprogramme" as those connected with Chestamere choose to name them, were uniformly good, but as expected the deficit was just $12.00 to the bad. The unfortunate of time of writing that a four day chestamere will be among next year. There is no doubt that quite a large number of people desire to see it come and there seem to be no dearth of voluntary workers to get the thing over.

The deficit is the stumbling block. With a four day event it is hoped that this will be done away with. There is $600 guarantee for a four day chestamere as against $1200 for a six day. Consequently with gate fees to raise, the event may carry itself. At least we hope it will and we will do all we can to help it, but if it does not, and there is a deficit, we are off of chestamere so far as Tofield is concerned for a long, long time

The truth of the matter is, Chestamere should carry itself. If there is a demand for it, all well and good. If not no good purpose is served by continually requesting individuals to sign the contract and then rope them in for a heavy deficit. Chestamere is, of course splendid, but philanthropy can be better directed the by individuals becoming canvassers for their payers. Also philanthropy and the chestamere contract has little in common.

So here's hoping 1931 chestamere will be a great success.

Quite a few Tofielders attended the Ryley Sports Day, on Friday, the 11. In addition to the two ball teams, intermediate and junior, there were many familiar faces seen in the Ryley grounds. A few might be mentioned. Mr. and Mrs. Fred McHefley, Mrs. Lovel, Mr. Jobb and Gordon, Miss McCusker and a number of others.

It was surprising to see the number of familiar farmer's faces on the grounds. Faces that one have frequently seen on the streets of Tofield were noticed all over the grounds.

All of which prompts the question, is Tofield going to have a Sports Day this year? Last year, what with the fine and dry weather, Tofielders had trouble enough. This year, however, while the district is not exactly bitten on all six, conditions are better than last year. It might have been wise to pass up the Sports Day last year, but is it wise to do the same this year.

No, we believe not. A Sports Day is just one of the numerous things that go "to make" a town. Perhaps relatively unimportant in itself, yet a good Sports Day leaves a favourable impression, among those attending, of the town in which it is held. Very few people care to link themselves with a dead concern and a good Sports Day is just one way of showing the surrounding populace that the town is up and coming.

How's Your Bank Account?

It is a common thing for parents to open a bank account for a very young child taking care of the account until the child is old enough to manage it. Then the bank book is turned over and Dick or Ruth shoulders a new responsibility.

[illegible] was the child is, early in life, taught the valuable habit of thrift. Practical lessons in the keeping of accounts and records are learned. And as these small savings are conserved and mount upwards, a substantial sum of money is created which will make adequate provision for the later education of the child or constitute a reserve of capital to start a boy in business or enable a girl to assist in establishing her own home.

Famous leaders in commerce have said that regular saving, even on a small scale, is the surest foundation for financial success. To save only five dollars a week is to build up a financial reserve which will grow. To contract five dollars debt weekly is to accumulate a growing burden.

Nature starts each of us in life with an account at the Bank of Health, which is handled in trust by older folk until we reach the age of responsibility for the care of the body. [illegible] world whether we handle our health account wisely or foolishly.

How is your account at the Bank of Health? Have you a good balance? Is it shrinking instead of growing? You ought to know.

Nature abhors and punishes waste while she approves and rewards thrift both in what we call the big realm of Nature and in the individual human life.

Experts tell us that reckless and unchecked cutting and fishing threaten the existence of some of the world's largest forests and fisheries. The supplies we thought unlimited may fail. We are learning that continuance of supply depends on conservation, which is simply a bigger word for thrift.

The same is true of health. Nature exacts heavy penalties for waste. Preventive work promotes and assists the practice of health thrift.

Just as a savings account is built up by small deposits, so, too, must our health reserve be built up. Enough food and exercise, enough rest and relaxation, must be deposited in the Bank of Health every twenty-four hours.

These deposits must be in good currency, too. Nature, like our bankers, accepts no bad bills or counterfeit coins.

Why not look into this matter of your account at the Bank of Health? A wise way to begin is to go to your doctor for a complete medical examination. Don't wait until you are sick to visit your doctor; go to him when you are well and have him check you up. Take stock.

Another good plan is to repeat the process of a thorough medical examination at least once a year ... [illegible]

Airplane Flight To Far North

Government Planes To Open Up Air Route In Sub-Arctic Areas

To inspect aeroplane supply caches in the Canadian sub-Arctic and with a view to opening up aerial communication routes in the Barren Lands belt, in the Northwest Territories, a special detachment of the two government seaplanes will leave Rockcliffe Aerodrome in the near future for an air tour which may extend over 25,000 miles, most of it over a little travelled country.

Flight Lieut. F. J. Mawdesley, of the civil aviation branch of the Department of National Defence, will be in charge and will pilot one of the two planes. Flight Sergt. H. J. Winny will pilot the other. In addition to the two pilots there will be two mechanics, Corporal S. C. Dearway, who will be the camera operator, and C. S. McDonald, inland surveyor of the topographical surveys.

The flight will be the first official government step toward the opening up of air lanes in the North West Territories. The majority of the trip will be in the vicinity of the Mackenzie River Basin, the Great Slave Lake area and northward to Coronation Gulf. The flight will also travel over that part of Canada lying to the west of Hudson Bay north of Churchill. With only a few exceptions all the caches to be inspected will be just to the south of the Arctic circle.

The detachment will return to Ottawa before the freeze-up.

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand, the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. ... [illegible] Dr. Williams' Medicine Co., Brockville, Ont.

Saskatchewan Loses Valuable Man

Dr. W. Carrothers Accepts Appointment At University Of British Columbia

Dr. W. Carrothers, professor of economics at the University of Saskatchewan, who has accepted an appointment as professor of economics at the University of British Columbia, will leave Saskatoon in time for the opening of the fall term some time in August.

Born in the County of Fermanagh, Ireland, Dr. Carrothers attended college at Belfast, coming to Canada in 1911. He attended Wesley College, affiliated with the University of Manitoba, graduating from there in 1916 with the degree of bachelor of arts. Upon leaving university, Dr. Carrothers enlisted with the 44th Canadian Infantry, later transferring to the Air Force. He was awarded the D.F.C. and the Croix de Guerre.

Following the war, he attended Edinburgh University and studied under Professor J. Shield Nicholson, obtaining the degree of Ph.D. He was appointed to the staff of the University of Saskatchewan as professor of economics.

At the University of British Columbia, the departments of economics, sociology and political science are combined. Dr. Carrothers will be in the economics section, holding the position of second in the department.

Dr. Carrothers' work during the past four years has received widespread notice. His book, "Immigration from the British Isles," published in 1929, was very favorably received.

He has been closely identified with the work of returned men, for two years holding the position of president of the Canadian Legion here, and he also served a term as president of the provincial command. Since last December he has served as an alderman on the city council in Saskatoon, having been elected in the civic elections at that time.

French Evacuation Of the Rhine

Reports State That Departure Of Troops Was Somewhat Hurried

All was not so quiet and peaceful as official reports stated when the last French troops left Mainz and Wiesbaden recently, according to the Paris Nationalist organ, "La Liberte," which describes the departure under the headline of "violent incidents."

La Liberte says that, owing to hostile manifestations, booing and whistling by the crowd at the Mainz station, Gen. Guillaumat, commander-in-chief of the Rhine army, had drawn the blinds of the compartment occupied by himself and his staff. The newspaper also quotes a German newspaper story to the effect that the French troops covered the distance from their barracks to the railroad station in two minutes, whereas ten minutes was usually taken for the same march.

The Lokal Anzeiger calls it "precipitated departure."

Gen. Guillaumat himself, who arrived in Paris with the president of the inter-allied high commission, M. Tirard, declared the departure of the ... [illegible]

BORDER PATROL IS COMMENDED BY U.S. OFFICIAL

Washington.—The Canadian border patrol was credited by Representative Clancy, Republican, Michigan, with having "practically killed illicit liquor traffic across the United States border."

Emphasizing that the Canadian Government is "absolutely co-operating," Clancy contended that there was no necessity for the "dangerous activities of the United States patrol in operating its boats without running lights." He recently protested to the treasury department that this was the practice of the United States patrol boats.

While lauding the Canadian border patrol for its "honesty, courtesy, service and efficiency," the Michigan representative quoted E. W. Camp, former commissioner of customs, as describing the United States border patrol as "about 80 per cent. crooked or inefficient."

Clancy attributed the difference he portrayed to the different liquor laws of the two countries. Canadians, he said, "respect and obey their liquor law because they have a good one." In the United States, he said, "we can't build our jails fast enough."

France Delays Naval Program

Will Open the Way For Naval Negotiations With Italy

Paris, France.—Foreign minister Aristide Briand has announced suspension of France's shipbuilding program until December, to open the way for naval negotiations with Italy. He told the Foreign Relations Committee of the Chamber of Deputies, at the same time, that "another war in Europe is impossible and inadmissible."

M. Briand assured the committee there was no reason for "emotion concerning the relations between France and Italy." ... [illegible]

Milling Qualities Excellent

Millers In Britain Are Enthusiastic Over Garnet Wheat

Ottawa, Ont.—Considerable enthusiasm was expressed among millers of Great Britain and on the continent who investigated Garnet wheat as to its milling qualities. A report by L. H. Newman, Dominion cerealist, on the result of the investigations of specially bagged shipments of this blend of wheat overseas has been made public. For a time at least Garnet should be shipped as a separate variety instead of mixed with Manitobas. This would give the millers an opportunity of knowing the variety they were dealing with and they could treat it to the best advantage.

The Federal Department of Agriculture decided to submit Garnet to test by millers in the United Kingdom, and in different European countries. A year ago 6,700 bushels were shipped overseas to men expert in milling to obtain their opinions as to its suitability. These men were asked a series of questions, and Mr. Newman's report includes the replies they made.

Would Halt Immigration

President Beatty Of the C.P.R. Would Put Check On Entries From U.S. and Europe

Toronto, Ont.—Immigration from the United States and Europe should be stopped for the time being at least, said E. W. Beatty, K.C., president of the Canadian Pacific Railway, in an interview here. Mr. Beatty would not include on the ban, however, "those British immigrants who bring their own capital and can proceed under their own steam."

"Unemployment is bad in the building trades, I think, because the usual projectors of big buildings are holding back until the wheat situation clears up. But if we have a normal crop this year and it moves out in a normal way, which it should, unless there is a permanent resistance in Europe, which I doubt, the situation in Canada should clear up," said Mr. Beatty.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

WHY BOTHER?

During the ages the superstitions that were associated with the healing art have gradually disappeared. In the earliest centuries treatment was carried out with ceremonial incantations, mysterious potions and dances, and offerings were made to the spirits. To-day, medicine is a science based upon investigation, experiment and analysis.

In the course of this development great progress has been made not only in the treatment of disease but also in its prevention. In one sense, progress has been rapid, but in another, it appears to be slow because there is still much to be learned about mechanism of the human body and there are still diseased conditions which baffle us and which seem to be beyond our control.

One thing that has been clearly shown is that many serious and chronic diseases have their beginnings in what are apparently trivial conditions. Every advanced cancer was at one time a local disease which could have been cured. Chronic heart and kidney diseases do not begin as serious conditions; they pass through an early stage. Tuberculosis usually first shows itself as a mild localized disease.

It is for these reasons that we should bother about what we might consider to be trivial diseases or what seems to be merely a lack of physical fitness. Proper treatment during the early stages is necessary to arrest the progress of many diseases.

The chief objection to self-medication is that it delays proper treatment, which, when it is secured in time, offers the only possible chance of stopping it in the bed a condition which may lead to serious or chronic disease.

The practitioner of medicine is not a magician. The good he can do is limited by the knowledge he possesses. He does not promise cures, but he does offer the benefits of medical science, and if we are unfortunate enough to suffer, it may be because we have not availed ourselves of his skill. We still delay in securing his services, and it is such delay which leads to serious trouble.

Why bother about minor conditions of ill-health? The answer is that the best time to consider disease is when the most can be done with it and that is before it becomes firmly rooted in the body. Proper early treatment has much to offer in the prevention of serious chronic diseases against which, in their advanced stages, we have not any specific remedy. Early treatment is then the answer to Why Bother?

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto will be answered personally by letter.

Stick to your ads. and business will stick to you.

TENDERS WANTED

The Beaver Lake Livestock Co-operative Marketing Association will receive tenders up to 6 p.m. July 22, 1930 to contract for the hauling of livestock by motor truck to Edmonton stockyards from territory adjacent to Deville, Lindbrook, Tofield, Bardo, Dodds, Ryley and Holden. Rates to be based on mileage. For further information apply to J. H. Ingram, manager or the undersigned.

—VOTE LIBERAL—
SUSTAIN AN
ABLE GOVERNMENT

Mark Your Ballots for
CHARLES GORDON,
Liberal Candidate

To The Electors, Electoral District of Vegreville:

Ladies and Gentlemen,—

Having been honored with the nomination of the Liberal party to contest the electoral district of Vegreville in the interests of the Mackenzie King government I feel it my duty to lay before the electors my reasons for soliciting their support at the polls on July 28th. In the comparatively brief space available in a newspaper, one can do no more than summarize the outstanding points on which the Mackenzie King government bases its appeal to the country. But, during the campaign, various speakers will explain in detail both the major and the minor issues involved.

In this constituency, no Conservative candidate will be nominated, hence, the campaign must, necessarily, be based upon the record of the Government.

All indications point to the return of the present administration under Mr. Mackenzie King to power on July 28th. It is most unlikely that any such situation will arise as in 1925 when the fate of the government was in the hands of a small group. No prime minister of Canada will attempt to carry on government again under such conditions. It is therefore only reasonable to vote for candidates directly supporting the government, thus taking the business affairs of the country out of the realm of uncertainty and placing them on a stable and assured foundation.

The member for Vegreville from 1926 to 1930 is on record as having opposed the Dunning Budget, along with numerous other government measures. According to his own statement he "voted with his group right or wrong."

It can be fairly contended that the representative of a group cannot be a true representative of the whole of the people of a constituency. A member of parliament owes more to his constituents than to act as a rubber stamp for a part of them. He owes his constituents the exercise of his own judgment on measures presented to parliament, irrespective of party or group affiliations. Yet the late member for Vegreville voted with his group, right or wrong. The Dunning Budget of 1930 was the most important and far reaching tariff measure presented to parliament since 1907. It embodied several features for which the agricultural interests had been contending; yet, he voted against it, right or wrong.

I cannot believe that in taking this stand, the Vegreville member fairly represented the wishes and sentiments of the electors of his constituency.

Against this futile record I beg to place that of the Liberal government which has held power in Canada since November 2nd, 1921, with the exception of about three months in 1926. I can mention only the main items of public importance.

1. The consolidation of the government owned railways into one co-ordinated system under the presidency and management of Sir Henry Thornton. Prior to this consolidation, the various government owned railways, bankrupt and rapidly running to ruin, were controlled by half a dozen different directorates and managements. Consolidation resulted in an immediate reduction of expenses in head offices, in operation in maintenance combined with better service to the public. Sir Henry Thornton, the President and General Manager of the greatest railway system in the world, has transformed Canada's greatest liability into Canada's greatest asset. There is no political interference with the Canadian National Railway system. The record of the Canadian National Railways is an astounding success.

Who made it possible?

The Mackenzie King government.

2. The construction and completion of the Hudson's Bay Railway, affording the farmers of Western Canada closer access to the markets of the world.

3. The encouragement of Canada's trade and commerce, which has doubled since the Liberal government took office. This was brought about by encouragement of superior methods of transportation as in the Canadian Mercantile Marine; the deepening of the Welland canal and other waterways, the establishment of commercial agencies in the principal trading centres of the world; the negotiation of trade treaties and conventions with other countries whereby reciprocal benefits were obtained; the development of the natural resources of the country.

4. The elevation of Canada from the "colonial" status to that of an independent fully self governing Dominion within the Empire.

5. The reduction of taxes, such as the Income Tax, the Sales Tax, Cheque Tax, Receipt Tax, Postage reduction, together with constant reductions in the tariff on machinery and articles in common use. Tax reductions mean reduction in prices.

6. The substantial reduction of the public debt through shrewd and careful financing.

7. The settlement of a long-standing dispute with the Maritime Provinces on generous and advantageous terms.

8. The restoration of the natural resources to the Prairie Provinces on a liberal basis, acceptable to all three provincial governments concerned.

9. The encouragement of agriculture through scientific research, the extension of the activities of the experimental farms; the campaign for better seed conducted by the Seed Branch; combating animal diseases, instituting a system of grading, such as eggs, pork, beef, mutton, butter, cheese, fruit, potatoes, etc., thus establishing a standard of excellence in farm products.

10. The extension of the British Preference under the Dunning Budget of 1930, where nearly 600 items on the tariff list are free under the preference, while others have been materially reduced. Increased trade with Great Britain will be an outcome of the extension of the preference.

11. The Dunning Budget of 1930 with its reduction of duties and its provision for reciprocal arrangements with other countries in the way of countervailing duties.

All these points, with many others to the credit of the Liberal government will be elaborated upon during the campaign. The whole record of the government is one of achievement and progress. Vegreville constituency cannot afford to vote against the government.

I beg also to point out that for over twenty-seven years I have resided in this constituency and have extensive business interests here. I am thoroughly familiar with every part of the district and believe that I have a good understanding of its needs. My record as a citizen and as a public man is before you. It will bear the closest scrutiny.

Unemployment has been made an issue in this campaign. But unemployment is a characteristic of large cities and industrial centres, rather than rural constituencies such as Vegreville. But it is fair to point out that I am by far the largest employer of labor, skilled and manual, within the constituency. The remedy for unemployment is work and this I endeavor to supply to as many workmen as possible throughout the year.

If honored with your support and elected to the House of Commons on July 28th, I will, as your member, faithfully endeavor to represent your best interests.

I beg to remain,
Your obedient servant,
CHARLES GORDON

The NEW Firestone BALLOON for Speed with Safety

FIRESTONE now announces another new tire—again built in advance of today's car requirements. This new Firestone Heavy Duty Gum-Dipped Balloon surpasses in strength, in toughness, in traction and in wear-resistance, any tire that even Firestone ever built before.

This new tire provides a wide margin of safety at any speed on any road. It has a deeper tread, extra sidewall thickness and scientific construction of alternating plies of live cushion gum and Gum-Dipped cords. Two extra plies of Gum-Dipped cords just beneath the tread absorb road shocks — Firestone engineering and design give you a wide margin of safety for fast driving.

At every Firestone Dealer's, you can recognize the new Heavy Duty Balloons by their magnificent construction and by the gold stripe that stands out against the ebony black sidewalls. See your nearest Firestone Dealer to-day.

The Pending Completion Of Hudson Bay Railway Will Stimulate Mining Interest

With the Hudson Bay Railway in the final season of construction, and with improved passenger and freight service, exploration of mineral properties to which the Bay line is tributary, has started on a really important scale for the first time. Several companies and syndicates have launched programmes to develop groups of claims in the neighborhood of the new steel trail.

A dull mineral season is in view for the region north of Churchill, but reports circulating in mining circles point to interesting activity along the Hudson Bay Railway.

[illegible] quietly, before there are signs of a rush to one of the many new discoveries northeast of The Pas.

However, it is unlikely that prospectors will be allowed to travel north of Mile 412 this year, unless special arrangements are made with the federal government. More than one well-known mining man from northern Ontario has reached The Pas this summer with the hope of travelling to Churchill. But they have been disappointed. In one instance, a man raised an argument here over the fact that an eastern station agent had checked his equipment right through to Churchill, and he had hurried to The Pas, only to find that he could not get to the port. Railway officials explained present regulations to the prospector, and he has to be content to postpone his trip until another season. It is reported in The Pas that efforts will also be made this year to trace down Indian reports that deposits of native silver lie in that great triangle southeast of the Hudson's Bay Railway, and bounded by God's River on the east, and Oxford Lake on the south.

Last year a few samples of beautiful filigree silver ore found their way into The Pas from York Factory. It was stated then that a York Factory man and some Indian companions had found the native metal somewhere in the mystic triangle. Excellent detective work on the part of mining engineers failed to show up the origin of the native silver, and the find, if there has been one, remains undivulged.

For years, Indian lore has hinted of spectacular silver to be found in that 62,500 square miles of territory. This season may see a climax to the silent drama of centuries and, who knows but what a second Cobalt may spring up in that little explored region south of York Factory on Hudson Bay.

Setting Pace In Egg-Laying Contest

Rhode Island Red Hen Lead Of Seven Points

Records of the Canadian egg-laying contest at the Dominion Experimental Farm, Ottawa, this year, show egg production to be 2.7 per cent. above last year and 3.6 per cent. higher than in 1928 for the corresponding period. Birds entered appear to be swinging into greater production with the approach of summer. [illegible] of these 35 pens, 21 are White Leghorns.

While a pen of Barred Plymouth Rocks holds the leading position in the contest to date the leading individual layer so far is a Rhode Island Red. Two Barred Rock entries and this leading Rhode Island have layed the same number of eggs—16—but a slight advantage in weight on the part of the heavier Rhode Island Red gives her a lead of seven points over her nearest rival.

There is, however, indication that this year's egg-laying contest will show the same gratifying increase in egg production which has been in evidence each year since the contests were instituted in 1919. Some very fine records are likely to be hung up at the close of the contest.

Will Work On "E. P. Ranch"

Two Lancashire Girls Take Jobs Offered By Professor Carlyle

Two Lancashire girls arrived in Canada recently on the Canadian Pacific liner "Duchess of York" en route to Pekisko, Alberta, where they will start their careers on the "E.P. Ranch."

The two girls, Doris and Muriel Howe, sisters, said, "We do not know what we are going to do out there; it may be clerical or it may be housework. But that doesn't matter. Professor Carlyle, manager of the Prince of Wales' ranch, engaged us and we are looking forward as much to the new job as we are to seeing our brother who is coming from Saskatoon to meet us."

Doris worked in the office of a grocery business in Blackpool and her younger sister, Muriel, was in the public library at Blackpool.

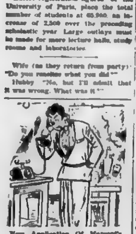
Power Resources Of Manitoba

Claimed That 73 Per Cent. Of Water Power Resources Of Prairies Are Located In Manitoba

The considerable power resources of the Province of Manitoba are estimated at 3,000,000 h.p., of which 200,000 h.p. already are in operation. It is claimed that 73 per cent. of all the water power resources in the Prairie Provinces are situated in Manitoba. The Winnipeg River power sites are estimated to be sufficient to provide for a population of 2,000,000 in Winnipeg and to provide employment for 200,000 industrial workers. This power will turn out products worth in the neighborhood of a billion dollars every year.

More Students In Paris

Latest registration figures of the University of Paris, place the total number of students at 45,960, an increase of [illegible] over the preceding scholastic year. [illegible]



New Application Of Marconi's Invention

"Is that Signor Marconi? Could you light my lamps? The electricity company has cut off the current."—Guerin Meschino, Milan.

Wife (as they return from party): "Do you realize what you did?"

Hubby: "No, but I'll admit that it was wrong. What was it?"

Fruit Crop Prospects

Prospects For 1930 Crop Are Considered To Be Good

The fruit crop prospects for 1930, as on June 1st, are encouraging and, generally speaking, indicate the possibility of a total crop approximating that of 1929, according to the Department of Agriculture's crop report No. 2. Cherries, plums, peaches, pears and grapes, all indicate considerable increase over last year ranging from 9 per cent. in the case of cherries to 24 per cent. for plums. Apples promise well and while the total crop is expected to be less than last year, indications point to a yield equal to or slightly heavier than the average commercial crop for the five-year period 1925-29, estimated at 3,178,124 barrels.

B.C. Canned Salmon

Importance of Canned Industry Is Shown By Figures

Shipments of British Columbia canned salmon from Vancouver to points outside of Canada in 1929 amounted in all to 1,213,697 cases of 48 pounds each, indicating the importance of the Pacific Coast canned salmon industry as a factor in the external trade of Canada. [illegible] Thirty different countries were customers of the British Columbia canned salmon exporters last year.

Does Not Indicate Hard Times

That the American people are still "rolling along" on rubber tires is evident from the March consumption figures of gasoline for forty-three states of the Union, which show use of 26,000,000 gallons daily, or 7.1 per cent. more than in the corresponding month of 1929. This does not look so much like "hard times" or decreased purchasing power.

There are upwards of 1,300 postwomen delivering mail in various parts of England.

The London city directory contains such names as Goteleed, Wy. Whiff, Ohm, Cope and Looney.

CENTER FOR ALPINE CLIMBING

Into a country where there are many important peaks still unconquered and even unnamed, will come Alpinists from all over the world for the 1930 annual camp of the Alpine Club of Canada, July 28th to August 16th, in Jasper National Park. Alpine members of the medical profession of England, will be among those at this year's camp.

In this vast mountain kingdom, climbers will try their skill in the Maligne Lake region, where such peaks as Mt. Sampson, Mt. Charlton, Mt. Unwin, Mt. Warren, Mt. Mary Vaux, Mt. Maligne, and Mt. Brazeau —ranging from ten to eleven thousand feet in height, offer most interesting climbing problems.

It is perhaps the splendid prodigality, the massing of effects that distinguishes the region from all others. In the Rockies the fully of comparisons, where beauty is concerned, is always obvious. There are a score of lakes, each different, which, once seen, hold their place in the heart forever. Yet this stands out among them all. Where many of the others are chamber music, Maligne is the great orchestra. The composition forms one picture but into it has gone enough beauty to make a dozen regions famous.

The Maligne Valley is one of the most interesting in Jasper National Park, not only on account of its remarkable canyon, but because of its two beautiful lakes — Medicine and Maligne.

The famous canyon of the Maligne River is an interesting example of what nature can do in the way of natural carving with uncounted aeons of working and with rushing water as her tool. Its great depth, its narrowness—in places it is scarcely more than a slit between dark walls of rock—and the great size of the pot holes, worn by the water in the course of ages, all make it of extreme interest to the geologist and nature lover and Alpinist.

One of the very interesting freaks of this canyon is the re-appearance at many places throughout its length of subterranean streams. It is believed that these streams form part of the submerged waters of Medicine Lake. Their combined waters so increase the flow of the river that by the canyon its volume is about four times greater than above the gorge.

Big Building Year

Several Large Building Contracts Are Announced In Saskatoon

It looks like a big building year in Saskatoon. A new $350,000 apartment house and a new $400,000 technical school are now under construction, while the Dominion Government is spending about $400,000 on the addition to its grain elevator. Also, contracts running to about $1,000,000 are involved in extension from Saskatoon to Rosetown and Outlook in one direction, and to Melfort and Tisdale in another, of the Saskatchewan Power Commission.

New Type Mail Box

Sweden Installing One Which Gives Detailed Information

A new type of mail box with a detailed information chart is now being installed in Stockholm under the supervision of Sweden's postmaster-general, Anders Orne. The chart not only tells when the box is emptied, but also gives the location of the nearest post office or automatic stamp vending machine, as well as postal rates and the departure of mail trains for various parts of Sweden and abroad.

FASHION

PARIS FAVORS PLAITS

A conservative printed crepe silk with lingerie collar and cuffs of crisp organdie reflects the newest idea of Paris in plaited skirt treatment.

Diagonal seaming emphasizes the slenderizing fit through the hiplines, and at same time carries out the lengthened movement to give height to the figure.

A leather belt slips the natural waistline.

This charming semi-sports frock can be made with 3⅞ yards of 39-inch material with ⅜ yard of 35-inch contrasting in the medium size.

Style No. 2133 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

It is strikingly smart in plain crepe silk in hyacinth blue. Shade with sheer organdie collar and cuffs.

Pastel green shantung with appliqué of dusky chic and washable.

Navy blue wool crepe with white silk pique shows good taste for travel, street or spectator sports.

Feather weight tweed in orangey-red colouring is very attractive with natural linen collar and cuffs.

Wool jersey, crepe de chine, canton crepe, shantung, linen and pique are also appropriate for summer sports wear.

It's simple to make! The bodice is long-waisted, and [illegible] through the hips. The attached two piece skirt is pressed into inverted plaits at each front, achieving becoming fullness [illegible] the hem.

2133

Price 20 cents in stamps or coin (coin preferred). Address Pattern Department.

High Milling Quality Of Canadian Wheat Flour Is Proven Under Rigid Tests

The high milling quality of Canadian wheat flour has recently been further proved by the Research Department of the Board of Grain Commissioners for Canada, as a result of a series of exacting tests. These tests show that blending of from 20 to 50 per cent respectively of Canadian flours with weaker flours grown in other countries give bread varying from 1½ to 42 per cent more cubical content than the country's domestic flour will produce. The largest loaf made during the tests was made from all Canadian flour. Samples of Russian, French, Australian, German, Danubian, Argentine and other wheats were used in the tests. Flour was milled from the samples obtained and loaves made from the flour and the results carefully noted. The addition of 30 per cent Canadian flour with the unblended flour from the wheat of each country was then added and the size of the loaf was increased from 1½ per cent. in the Russian to 26 per cent in the Argentine. An increase to 30 per cent of Canadian wheat made an additional improvement in the size of the loaf.

New Provincial Park For British Columbia

Is One Of World's Finest Stands Of Timber

Cameron Lake Forest, on Vancouver Island, one of the world's finest stands of timber, will be made a provincial park under the plans announced by Premier Tolmie. As a first step in this project, probably the most important ever undertaken in Canada to preserve a virgin forest, the government has ordered an [illegible] survey [illegible] and a report will be filed with the government before fall.

The Cameron Lake Forest, known to travellers from every part of the world, lies between the lake and the hills which are crowned by snow-capped Mount Arrowsmith. It consists of giant fir, cedar and balsam, growing close together and reaching to such heights that the island highway, winding between them, is in twilight on a sunny day.

Women's Institutes

1,150 Women's Institutes In the Rural Districts Of Ontario

There are now 1,150 Women's Institutes in the rural districts of the Province of Ontario with a membership of over 40,000. These Institutes exist for promoting social contacts and whatever is beneficial to the community as a whole, especially to women and children, through co-operative effort. The movement, started at Stoney Creek, Ontario, in 1897, has now become world wide. Women's Institutes, wherever they exist, are non-sectarian and non-party political. Recently an international conference of representatives of Women's Institutes was held at Vienna, Austria, at which delegates from most of the important countries were present.

Destructive Wheat Disease

Loss Caused By Foot - Rot Greater Than Any Other

Of all the fungous diseases affecting wheat "Take-All," or foot-rot, is the most destructive, observed the Dominion Botanist of the Department of Agriculture, at Ottawa. The actual loss caused by it is far greater than by any other single disease, rust included, or perhaps a combination of all known fungous diseases affecting wheat. A peculiar thing about this disease is that it appears only once in a series of years. Fortunately for Canada, the exercise of proper care and the wholehearted support of Western farmers have kept the disease from becoming seriously established in Canada.

When Fate Was Cruel

Income Tax Papers Only Mail Received From Wrecked Steamer

Of 130 mail bags on a steamer wrecked on Shetland only four have been washed ashore, and of these four only one retained its contents in a condition fit for distribution. This was a bag of income tax papers —an instance of that "dry" humor for which Scotland is famous.

The worst of it is that when the papers are returned the authorities will not be able to distinguish the salty marks of the ocean from the tears shed by those by whom the documents were received.

Study Indian Trails

Four French scouts, belonging to an organization similar to the Boy Scouts of Canada, except that they are college students, arrived recently at Banff, Alberta, where in the Canadian Rockies, they will make a study of Indians, for the ethnographical museum of Paris. They are Paul Coze and Gabriel Kyndind, painters, Raymond Oil, naturalist, and Leon Chair, photographer.

The British Empire

The British Empire occupies about one-quarter of the habitable surface of the earth and its population exceeds one-quarter of the estimated number of the human race.

Manitoba Telephone Building

The Manitoba telephone system will commence construction on a 13-storey exchange this year which will cost in the neighborhood of $1,000,000. Tyndall stone will be used.

An alert Italian débutante dealer built his shop over an old mine shaft, so that the upcoming stream of cold air serves to keep his perishable commodities cool.

Canadian Tobacco Industry

Considerable Quantity Of Canadian Product To Be Shipped To England

"If the necessity arises, the government will not hesitate to appoint a special commissioner in England to look after the interests of the Canadian tobacco growers," stated Hon. James Malcolm, Minister of Trade and Commerce here, in commenting on the tobacco domestic situation.

"The Canadian Government is in close touch with the tobacco growing industry," said Hon. Mr. Malcolm, "and through its trade agents in Great Britain, has already put the British manufacturer in close touch with Canadian growers. It is expected a considerable quantity of Canadian tobacco will be shipped to Great Britain this year," he said.

Produces Better Eggs

Poultry Experts Find Large Hen Excels In Production

The larger the hen the better the eggs she lays and the more there are of them. Poultry experts of the Dominion Department of Agriculture find that body weight has a very direct relation to egg production. A three pound hen will average 137.9 eggs a year weighing 22 ounces to the dozen. With each ¼ pound increase in weight there is an increase in the number of eggs layed and their weight per dozen. A four and a half pound hen will lay an average of 200.8 eggs a year weighing 24.3 ounces to the dozen. This information should be of particular interest to farmers keeping poultry flocks.

Ornamental Shrubs

Development Of Hardy Types Of Shrubs and Perennials

Not the least important of the work being done by the Experimental Farms and Stations of the Dominion Department of Agriculture is the development of types of ornamental trees and shrubs and hardy perennials, annuals, and garden flowers suitable for use in all parts of Canada. Many of these have been found suited to even the most difficult climatic conditions and the report of the Experimental Farm or Station nearest you will provide an indication of varieties adapted to use in your locality.

Does Lever Locked

The door of St. Martin's-in-the-Fields, one of London's famous churches, is never locked. The reason they believe is St. Martin's that the church should be a sanctuary for those who are cold and cold, penniless and hungry as well as a place of worship for all.

Airplanes are being used in battles against insect pests in Peru.

"I warn you that you'll have to pay for the bathing here."
"Certainly. Just take it out of my jacket pocket, because I'm committing suicide."—Calberas, Madrid.

WORLD HAPPENINGS BRIEFLY TOLD

Five thousand members of the American Legion and lady members of the Legion auxiliary are to visit Winnipeg for two days in August.

A British Empire Trade Exhibition, the first of its kind to be held in any country outside the empire, is to be held in Buenos Aires from March 14 to April 27, 1931.

A new India House was opened in London by King George with an expression of hope for the emergence of India from her present troublous era into days of peace and contentment.

Official figures on unemployment showed 1,815,200 out of work in Britain on June 23. This was about 70,000 less than on June 16 but 697,491 above the same date a year ago.

Sir Joseph Ward, former premier of New Zealand, who resigned a few weeks ago owing to ill health, is dead. Sir Joseph, who was known as "The grand old man of New Zealand" was 74 years of age.

Ralph Collins, Edmonton, Alberta, has been awarded second prize in an oratorical contest at the convention of the Optimist International, in Erie, Pa. Seven boys from clubs in the United States and Canada competed. David Wolf, Washington, D.C., was [illegible].

Marriages at famous Gretna Green, the elopers' haven in Scotland, are to be made extinct by legislation. The Government plans to pass by next fall a measure which will make legal only marriages which have been performed by a clergyman or a registrar.

The Quai D'Orsay has submitted the name of Arsen Henry, who is French minister to Siam, to the Canadian Government for approval as the next French minister to Canada. Hon. Jean Knight, the first holder of this post, is returning to France to become head of the French Government Press Bureau.

Plans To Visit the Moon

Scientist Has Perfected Model Of a Rocket That Will Make Trip

At Horst, a little bathing place on the Baltic, Professor Oberth has been very busy of late perfecting an exact model of the rocket in which he intends visiting the moon. This model rocket is to be shot up by the explosion of the gas it contains and instruments concealed in it will record the composition of the atmosphere through which it travels. An automatic parachute will bring the rocket down again when the motors are exhausted. The rocket-model is expected to reach a height of 100 kilometers and to bring back valuable records.

Boost For Alberta

Five Thousand Samples Of Alberta Wheat Sent To American Visitors

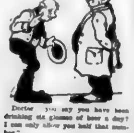
By way of an appropriate "boost" for Alberta, Hon. George Hoadley, Minister of Agriculture for the province, sent off 5,000 samples of Alberta wheat to American visitors to the recent Shriners convention at Toronto. It was pointed out that Alberta has carried off the world's wheat championship at the annual International Exposition at Chicago, four times during the past seven years, the honor going last year to Joseph H. B. Smith, of Wolf Creek.

Building Permits

Building permits issued by 61 cities in Canada during May of this year were valued at $19,621,302. For the first five months of 1930 the total value of building permits issued by these cities had a value of $65,367,[illegible].

A bird's eye is protected by three [illegible].

Another peace note. Italy will build twenty more warships.



Doctor: "You say you have been drinking six glasses of beer a day? I can only allow you half that number."

Patient (after a pause): "I really believe I used to drink a couple more."—Mummel, Hamburg.

W. N. U. 1846

Will Explore Arctic Regions

Youthful Scientists To Spend Year In the North

Fifteen youthful explorers, whose average age is only 23 years, sailed from London recently aboard the exploration ship "Quest" for a year's exploration of the arctic regions. Their work will be done on the ice-covered stretches of Greenland and Iceland. The purpose of the voyage, which is under the auspices of the Royal Geographical Society, is to obtain information with a view to establishing an air route from England to North America across the Arctic regions with only 300 miles over the sea. H. G. Watkins, 23-year-old explorer, is leader of the expedition. His fourteen companions are all about the same age, and each is a specialist.

Watkins made a scientific exploration of Labrador last year and of Spitzenbergen the year before. The expedition will establish a base on the south-eastern coast of Greenland and a station on top of the ice cap, 8,000 feet above sea level. From there they will make notes on meteorological conditions in connection with flying.

The hold of the "Quest" was packed with a year's food supply, including six tons of food for the dogs, which will be picked up at the Faroe Islands. Two airplanes, two speed boats, sledges and several delicate meteorological instruments furnished by the government were included in the equipment.

A pampered passenger is a young turkey who is doomed to be served for the explorers' Christmas dinner.

Reports here said that if the data gathered proves the feasibility of the air route, a test flight will be made, and Canada will be asked to make a similar survey on the western side of the American continent.

Scotland's War Memorial

Not Even the Humblest Worker Has Been Forgotten

No one seems to be forgotten in Scotland's wonderful war memorial which is built on the Rock of Edinburgh.

There it stands glowing with the carved and colored badges of every Scottish regiment that served in the Great War. While in bronze friezes or stained-glass windows, sailors, artillerymen, airmen, chaplains, nurses, and other workers are depicted. Even birds and beasts have their memorials.

Carved on the walls are the words: "Remember also the humble beasts that served and died." Then come medallions framing the heads of a horse, a mule, a camel, a message dog, and other animals, with a cage of carrier pigeons and a group of canaries and mice inscribed, "The tunnellers' friends," because these little creatures are used underground, where their swift collapse when the air becomes poisonous is a warning to men.

Not even the humblest worker has been forgotten by the generous-hearted men who planned the building.

In the shrine is a block of marble set on the rock which rises through the floor, and on this block is a casket given by the King and Queen enclosing books containing the name of every Scotsman who fell in the war. It is a place of pilgrimage to Scotsmen all over the world, this holy place where the noblest heroes and the humblest creatures are all remembered together.

Vancouver Boy Wins Trip To England

Selected As Best All Around Canadian Model Aircraft Builder

Ross Farquharson, 16, of Vancouver, was selected as the best all-round Canadian model aircraft builder at the close of the national championships held at Ottawa. His victory, in both senior indoor events, added to his second and third places in the outdoor contests, won for him a trip to England as the guest of Lord Wakefield, of Hythe. He had a total of 17 points.

J. A. Chamberlin, of Toronto, was a close second to Farquharson in the individual total, winning a first and second in the indoor events to add to the second-place points which he had won in the outdoor contests. He had a total of 15 [illegible].

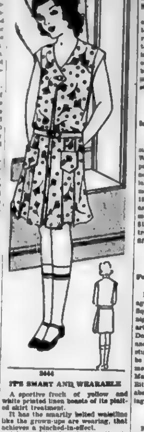
Canadian Coke

During the past four years there has been such a marked increase in the use of coke for domestic purposes in Canada that this fuel bids fair to become a serious rival of anthracite, which has long been regarded as the standard fuel for this purpose, at least in the provinces of Ontario and Quebec.

Minister—And what parable do you like best, my son?

Willie—The one about the multitude that loafs and fishes.

Winnipeg Newspaper Union — Fashion



3444

IT'S SMART AND WEARABLE

A sportive frock of yellow and white printed linen boasts of its plaited skirt treatment.

It has the smartly belted waistline like the grown-ups are wearing, that achieves a pinched-in-effect.

A large yellow bone button attracts attention to the tab closing of bodice with interesting cap sleeves.

The back is quite straight and slender.

Style No. 3444 is simplicity itself to make. It can be had in sizes 6, 8, 10, 12 and 14 years. For the size of 8 years, 1⅝ yards of 39-inch material with ¼ yard of 39-inch contrasting is sufficient to copy it exactly.

The two-piece skirt is merely pressed into box-plait effect and attached to the bodice. Patch pockets stitched at edge of plaits, secure a snug hipline, to keep its line slender.

It's so attractive in white cotton broadcloth printed in sailor blue polka-dots with cap sleeves, belt and pockets of plain blue.

Shantung is stunning in opal-pink shade.

Tub silks in baby blue or baby pink tones is just the cutest idea ever that promises to be very popular this summer for beach and country wear.

Nile green and white pique print worn with green leather belt is smart.

Yellow-beige and brown stripe in men's cotton shirting fabric is very effective with the cap sleeves and pockets cut on the bias and worn with brown leather belt.

Printed dimity, printed handkerchief lawn and gingham checks also appropriate.

Price 25 cents in stamps or coin (coin preferred).

A Remarkable Record

Seven Hundred London Firms In Business For Century Or More

It will be a surprise to Londoners to learn that their great city boasts no fewer than seven hundred firms that have been in business for one hundred years or more. When we consider how easily businesses change hands, how they fall into decay through a change of fashion or the coming of new inventions, how families die out and how the younger generation feels ever the urge to seek fresh woods and pastures new, it is a remarkable and praiseworthy record of industrious enterprise.

Although we may be inconstant in many things, we stand loyally by our prejudices.

The British Broadcasting Service will attempt to broadcast the roar of Niagara Falls.

Takes First Glider Lesson

Prince Of Wales Coached By Famous German Pilot

The Prince of Wales has taken his first glider lesson.

The lesson was [illegible], by Robert Kronfeld, a German who is reputed to be the world's champion glider pilot. It consisted chiefly of a demonstration as how to operate the glider, and it was understood the prince did not actually [illegible] the ship.

The prince long has been an enthusiastic aviator and is reputed to be an excellent pilot, although for reasons of state he is never permitted to make solo flights. He always is accompanied on his flights by one of the best Royal Air Force pilots, but the prince handles the controls except when taking off or landing on strange or difficult landing fields.

Montreal Has Grown Rapidly

Is Now Fifth Largest City On the Continent

Few cities in Canada have shown such substantial growth as Montreal. Within a decade the total assessable property has doubled in value and is now $1,300,000,000. In 1914 the population was 525,000, today there are a million people in the city proper. In 1914 there were 153 miles of streets and today there are 600 miles. The municipal revenue, which in 1914 was $10,500,000, is now $36,720,000. Montreal has reached the rank of the fifth largest city on the continent.

Kept Appointment

Four Men Keep Tryst Started 31 Years Ago

Keeping a tryst started 31 years ago, four men met in Trafalgar Square, London, England, on a recent night. In 1899 six young decorative artists, H. E. Mansfield, G. MacDonald, G. Clifton, E. Bite, Brown and Edwards, were notified that the studio in which they worked was to be razed. They then made a vow to meet once a year. This year only Mansfield, MacDonald, Clifton and Bite were able to attend, but the two absent ones sent telegraphic greetings to their friends.

Agricultural Conventions

Efforts will be made to bring as many large agricultural conventions as possible to the west at the time of the World's Grain Exhibition and Conference, in Regina, in 1932. According to a decision at a committee session, such conventions will be invited to meet directly prior to or following the show in cities other than Regina. Delegates will thus be able to attend Regina session.

Legislative Wheat Pooling

In accordance with the decision of the Delegates of the Saskatchewan Wheat Pool at the recent semi-annual meeting, a referendum will be taken among pool members on the question of legislative pooling. Ballots will be mailed from head office not later than August 1, and each contract signer is being asked to register a vote on the question.

SUNDAY SCHOOL LESSON

JULY 20

MOSES "A COURAGEOUS LEADER"

Golden Text: "By faith he forsook Egypt, not fearing the wrath of the king, for he endured, as seeing Him who is invisible." Hebrews 11.27.

Lesson: Exodus 1.8-14; 2.1-22; 3.1-14; 11.1-10; 32.30-35; Deuteronomy 34.1-6; Hebrews 11.23-29.

Devotional Reading: Psalm 90. 13-17.

Explanations and Comments

The Call Of Moses, verses 1-[illegible].—The summons to become the leader of his people, [illegible] oppression in Egypt and [illegible] forth on their [illegible] to the Promised Land, came to Moses as, in his care of the flock of his father-in-law, Jethro, the priest of Midian, he wandered from the back of the wilderness (that is, the west, [illegible] the front), to Horeb, the mountain of God. [illegible] the bush [illegible] burned [illegible] was not [illegible]. Moses heard God speaking to him. Just as the account of the temptation of Christ in the wilderness must have come from Christ Himself, and is his pictorial way of portraying His inner experience, so the account of the call of Moses in the wilderness must have been told by Moses himself and may have been given by him in this pictorial way. The burning bush may [illegible] outward representation of an inward experience—the flame of enthusiasm for a great cause. Be that as it may, it is assuredly true that [illegible] had the power to see the divine origin of the glowing beauty of the bush; he was able to see God in the things of everyday life.

"Moses stood before an ordinary bush, and he became aware of God; Jeremiah stood before a budding almond tree while all around was dead, and he became aware of God. [illegible] stood before a little primrose on a rock, and it became to him the court of the Deity."—J. H. J[illegible].

"Draw not nigh hither; put off thy shoes (sandals) from off thy feet, for the place whereon thou standest is holy ground." Recall Jacob's sense of God's presence at Bethel and the holiness of the place.

"Earth's crowned with heaven, and [illegible] common bush afire with God,
But only he who sees, takes off his shoes;
The rest sit round it and pluck blackberries."
—Mrs. Browning.

With a new flash of insight Moses knew that God was calling him to a stupendous task, that it was God's will that he should return to Egypt and accomplish the deliverance of the enslaved Israelites. All this is expressed in the words of verses 7-9.

Railway Passes In the Rockies

The map sheets of the Interprovincial Boundary between Alberta and British Columbia published by the Topographical Survey, Department of the Interior, show the three passes of the Rocky Mountains through which railways have been constructed. Crows Nest Pass has an elevation of 4,453 feet; Kicking Horse Pass 5,330 feet, and Yellowhead Pass, 3,711 feet.

English Students For Canada

Hamilton Fyfe, the new head master of Queen's University, Kingston, stated recently that a movement was reaching fruition by which English public school boys will go to Canadian universities in the same manner as Americans and South Africans are Rhodes scholars at Oxford.

Reciprocal Trade

British Bankers In Favor Of Free Trade Within the Empire

Reciprocal trade agreements between the nations comprising the British Empire and the retention of an open market for Empire products was urged in a resolution adopted recently by representatives of several leading British banks meeting in the offices of Hambro's Bank, London, England. The meeting was presided over by Sir Eric Hambro.

"Urgent measures for the promotion of inter-Imperial trade are needed to secure and extend the market for British products, both at home and through export trade," the resolution read. "Bitter experience has taught Britain, that hopes expressed four years ago in the plan for removal of restrictions upon European trade have failed. Restrictions have been materially increased and the sale of surplus foreign products in British markets has steadily grown. While we retain hope for the ultimate extension of free trade worldwide, we believe the immediate step for securing and extending the market for British goods lies in reciprocal trade agreements between the nations of the British Empire. As a condition of securing these agreements Britain must retain an open market for all Empire products while being prepared to impose duties on all imports from other countries."

London Traffic Project

Scheme To Construct Underground Lines For Transportation Of Goods

A scheme is on hand to make possible the removal of goods traffic from London streets. It consists of the construction of underground lines, with fifty-four stations, for the sole purpose of carrying goods. The promoters are anxious to build seventy-five miles of tubes at a cost of about $300,000,000. All the principal railway termini and goods yards would be connected; the docks, wharves, and public stores would have their private stations. It is said that 125,000,000 tons of goods are carried annually in London, and the trade of the Port of London amounts to $144,000,000 a year. According to the promoters of the new scheme the cost of existing congestion in the streets is $120,000,000 per annum, while the railways have estimated at $300,000 a year the amount of money they lose by the detention of goods lorries at Billingsgate Market alone.

Eighteenth Century Newspapers

The first newspaper in Quebec appeared in 1764 when the Quebec Gazette was founded. The "Royal Gazette" and "New Brunswick Advertiser" appeared at St. John in 1785, and the first paper in what was then Upper Canada appeared in 1793 at Niagara (then Newark), under the name of the "Upper Canada Gazette and American Oracle."

China, home of the silkworm, is now importing artificial silk.

It takes eight large eggs, or nine small eggs, to make a pound.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES, LAYING PENS, DAIRY BARNS, SUNROOMS, ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

WRIGLEY'S

WRIGLEY'S is good company on any trip.

It's delicious flavor adds zest and enjoyment. The sugar supplies pep and energy when the day seems long.

In short it's good and good for you.

After Every Meal

World's Air Mail Record

Canada's Mail 'Planes Have Flown One and a Half Million Miles

Although Canada's Air Mail Service really started as recently as 1928, it has already seventeen separate services in operation covering 6,215 miles of territory, extending laterally from Moncton, New Brunswick, to Windsor, Ontario, and from Winnipeg to Calgary and Edmonton. It penetrates three hundred miles beyond the Arctic Circle and touches the most northerly point of any air mail service in the world, Aklavik.

To the outposts of the North Country the service has brought mail in a few hours that formerly took weeks by dog team, the only practicable winter transport prior to the advent of mail 'planes. The air mail service has cut off 48 hours from the transit time of mail from the Atlantic to the Pacific, and will take off 48 more when the trans-Canadian service, which the Canadian Post Office Department is aiming at, becomes a reality. The service has also ended the winter isolation of the Magdalen Islands in the Gulf of St. Lawrence, and has brought a regular winter service to the settlement on the north shore of the St. Lawrence, which under winter conditions was dependent on slow dog team service.

Canada's official mail 'planes have already flown one and a half million miles, and carried nearly a million and a quarter pounds of mail without loss of a single article. The service holds the world's record for speed over a scheduled mail route. Canada, a country of expansive distances, is peculiarly adapted to derive a great advantage from the air mail service.

May Be Aid To Longevity

Chicago Doctor Believes Blood Analysis Would Defy Age

Dr. Irving S. Cutter, dean of North-Western University Medical School, believes a method of delaying old age, soon may be an open secret. Describing laboratory experiments conducted in the school, and in wards of the Passavant Hospital, of which he is superintendent, Dr. Cutter said:

"It has been shown that retention of fluids in the body may be controlled almost at will, increased or decreased by careful management, based on a biochemistry blood analysis. This study bids fair to be of utmost importance in prolonging the lives of patients suffering oedema." Oedema he described as an accumulation of excess fluid in the body tissues, caused by factors closely paralleling those influencing the rapid onslaught of old age. "Scientists have reason to believe that, succeeding in a treatment of oedema, they may defy old age," he said.

"I started out on the theory that the world had an opening for me."

"And you found it?"

"Well, I'm in a hole now."

"My wife is unbearable!"

"Show her your teeth."

"I did once and since then I haven't had any."

Summer Strains

For all the strains the flesh is heir to during the summer months—use Minard's. Popular for fifty years.

MINARD'S KING OF PAIN LINIMENT

W. N. U. 1846

He Realized His Wish

Architect Who Aspired To Musical Fame Aids Others

Two decades or so ago, a little office boy dreamed of becoming a great musician. He would live in congenial surroundings, with other musicians who would have mutual interests. However, he was a poor boy. He worked by day, and by night he went to school. He had no time, no money, no friends who really appreciated his yearnings. Entering college by the night school route, he was persuaded, since he must earn his living, to be practical and take his degree in architecture instead of music.

He graduated and in the following years became tremendously successful, building magnificent buildings, homes, hotels. But always, in the back of the mind of William H. Silk, who had been the boy dreamer, was the desire to help musical and artistic young folks who needed the right atmosphere, the right associates.

Today, an inspiringly beautiful building, the Barbizon-Plaza, rises to overlook Central Park, New York, proof that Silk has realized his wish. Five floors provide living quarters for musicians and music students, segregated in sound-proof rooms. Nationally recognized musical and art organizations will have their quarters there, so that a student may find almost any type of music or art right in the building.

Silk has provided unusual facilities for health and recreation. On the roof is a sun-tan solarium. Immediately below are gymnasium, shower baths and all the modern mechanical health apparatus and massage service.

Increases Ranch Area

Prince Of Wales Adds 2,240 Acres To Holdings

H.R.H. Prince of Wales is extending his estate and preparing to enlarge his activities in Alberta. Under an order-in-council recently issued, authority is given for the sale to him by the Department of the Interior, of 2,249 acres of public land in the vicinity of his ranch at High River.

His Royal Highness already holds most of these lands under grazing leases and the remainder have been under reservation in his favor. Title to the lands is required in order to perpetuate their use as a ranch for raising purebred livestock.

The price the Prince of Wales is paying the government for the lands is three dollars an acre.

His Royal Highness is also securing from the Dominion Government a lease to the mineral rights in these and other lands he holds, 3,860 acres in all. He pays the nominal fee of $1 for the lease, which is to run for 99 years.

The lease is subject to the following conditions:

1. That in case the surface rights cease to be used for ranching or farming purposes by the Prince of Wales or members of the Royal Family, the lease of the mineral rights shall become null and void.

2. That the lease shall not be [illegible].

3. That if the petroleum and natural gas rights pertaining thereto are developed at any future times, such operations shall be conducted in accordance with the regulations for the development of petroleum and natural gas then in force, and the sale of the produce thereof shall be subject to the payment of royalty in accordance with such regulations.

Algeria's Favorite Sport

Camel Races Start and Finish In Great Muddle

Sports may not be taking as rapid strides in Algeria as in some other countries, but the natives there have a competition which they enjoy and which is amusing to spectators.

The sport is camel racing, and is indulged in at big festivals. The choice racer is a different breed from the dromedary. It is called the "mehari."

The start of the race is very muddled, and the camels patter to a very confusing finish. Often three or four riders lay claim to first place and not infrequently the conclusion sees a fight.

The "jockey" is called a "meharist," and he has marvelous command of his mount. He uses neither bridle nor bit, directing his animal by the pressure of his feet and by pinching the camel's hide with his toes.

Casualty Rate Is Low

A report on the progress of civil aviation, just issued, shows that from 1925 to 1929, only 12 passengers were killed and four injured in British commercial aircraft, representing a ratio of 87.87 flights per flyer killed, and 26,300 flights per passenger injured, the approximate aircraft miles per accident being 1,370,000.

BOILS [illegible]

Accident Toll Still Mounting

Fatalities Caused By Automobiles Increasing At Alarming Rate

Deaths from automobile accidents continue to increase notwithstanding all the warnings and precautions. In 1929 the fatalities in Canada, according to a statement issued by the Bureau of Statistics, numbered 1,294, which was considered more than in the previous year, and 80 per cent. more than in 1927. The automobiles in use have not doubled in three years, and some other reason must be sought for the increasing number of these fatalities. Ontario alone had 561 deaths last year from automobile accidents, which is too high a price to pay for either the business or pleasure purposes to which motors are put. A considerable number of the persons killed or injured by automobiles were pedestrians who had nothing to do with the machines, but were the victims of the indifference or carelessness of the motorists concerned. The number of people who own or drive motor vehicles of all sorts is small in proportion to the total population, and up to the present the majority of citizens may fairly be described as long suffering, but they may turn if these fatalities continue. Motorists and those interested in motors owe it to themselves to devise some method of keeping reckless drivers in check and not to have forced on them some plan which may be unjust and which may interfere unnecessarily with both pleasure and business.

Carrying Out Orders

Stenographer Obeyed Employer But Result Was Not So Good

He had found fault with his typist for altering a sentence in one of the letters he had dictated. Her reply was that she thought he meant what she had written.

"I don't want you to think," retorted the great man sharply. "I want you to take down my words accurately and then put them into type on the machine, neither adding nor leaving out anything I may say."

Later in the afternoon the typist brought back the following letter for signature:

"Dear Smith. Spell it with a y, although that's pure swank on his part, of course. In answer to your letter of——Look up the date. We can quote you——Tell me, Walter, what's the most we can charge this old blighter? Very well. We can quote you £10 a ton for the goods free on board. If he accepts we shall have to make sure of our money beforehand, for I don't trust him. Awaiting the pleasure of your esteemed order. Yours faithfully."

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worm Exterminator.

Names Instead Of Numbers

Telephone Operators In San Francisco's Chinatown Need Good Memories

One of the points of interest in San Francisco's Chinatown is the telephone exchange and every operator must be equipped with a long distance memory. There are 4,300 subscribers in this exchange and names instead of numbers are used in making a call. For instance, if you wanted John Smith and there was more than one John Smith in the directory, you would have to explain on what street your John Smith lived, what was his business or give some other characteristic by which the operator could identify him. It is thus easy to understand what a memory an operator in a Chinese exchange must possess.

Linking the Empire

Phone Service Soon Available To Every Important Part

It will soon be possible to telephone from England to India. It was stated by the post office department that, if the negotiations now under way are successful, the operation of the service in this country would be similar to that with Australia, with a transmitting station at Rugby and the receiving station at Baldock, Hertfordshire. This will mean the connection by telephone of almost every important part of the empire.

Her Suitor: "Sir, may I have your daughter?"

Real Estate Man: "Yes, but you'll have to sign a two-year lease."

Minard's Liniment gives quick relief.

Exploring the Depths

Naturalist - Adventurer Sets New Record In Deep Sea Diving

With both poles of the earth explored by land and air, and with only the most remote deserts of Asia and Australia still unmapped, it might seem that anyone traveling only a few hundred miles from New York would have a difficult time finding territory never before seen by man. Yet William Beebe, the naturalist-adventurer, has done that very thing. Protected by a giant steel [illegible] with fused quartz windows and oxygen tanks, he has descended 800 feet into the Atlantic ocean off Bermuda, viewed the fishes and the plants, and returned to the surface safe and sound.

Mr. Beebe's feat is particularly outstanding when one realizes that the greatest depth heretofore achieved by deep-sea divers has been only 325 feet. Yet Beebe now plans to go on down to more than thrice his 800-foot mark, striving for the goal of half a mile.

For some years Mr. Beebe has been revealing sources of adventure in civilization's back yard. His keen eyes find drama even in the insect life on a city rosebush. So it is scarcely surprising that he should be the first to venture into an entirely new world less than a sixth of a mile beneath the paths of everyday ocean liners.—Philadelphia Ledger.

Carries Car On Airplane

Machine Three Feet High and Weighs 1,100 Pounds

Captain R. D. Archibald, who last year flew from Los Angeles to Sydney, N.S., arrived in New York with the announcement he had secured the ultimate in travel convenience.

Captain Archibald brought with him an automobile which he will carry in his airplane on future flights. He started immediately on a trip to Nova Scotia—in the automobile. The airplane in which it will be carried is under construction.

The automobile weighs only 1,100 pounds, he said, and is of British manufacture. He is having a tri-motored 'plane built to contain a space for the car which stands scarcely three feet off the ground. It is upholstered in red morocco.

Might Be Explanation

Decrease In Drinking Because People Are Less Wretched

Dr. Weeks told the London Licensing Commission that the working class is "emancipated" from alcoholism. With his broad conclusion that the drinking habits of the population are improving no one will disagree. Those dreary days of "drunk for a penny and dead drunk for twopence" are gone for ever. They were dreary, and that is why there was so much drinking. Many turned to drink to drown their wretchedness. Perhaps the main reason why drinking is decreasing is that wretchedness is decreasing. For the masses the standard of living is today far too low, but it is much better than it was 30 years ago.—London Daily Herald.

Plants Yearly Tree

Every spring for 48 consecutive years, Cheney P. Whitney, of Shortsville, N.Y., has returned to his old homestead in Orleans and planted a tree. Now ninety-three years old, Whitney has set out his fifty-eighth tree. Every one he has planted since 1873 has thrived.

Good Advice

There is a time for all things. It was a wise wit who suggested: "If you are going to do a good thing, do it now; of a mean thing, wait, until [illegible]." The pity of it is that most of us reverse the process and spoil the order of things.

FROM MOTHER OF EIGHTEEN

Read How This Medicine Helps Her

Cardston, Alberta—"I am fifty-eight years old and the mother of eighteen living children. We live on a farm and I am a very healthy mother considering that I have such a big family to work for. The druggist first told me about Lydia E. Pinkham's Vegetable Compound and I have depended on it for many years.

When I had this picture taken, the photographer was telling me about his wife's ailments and after I told him about the Vegetable Compound he went to the drug store and bought her two bottles."—Mrs. Emma Ballenback, Bx., Cardston, Alberta.

To Rival the Zeppelins

Germany Planning Giant Airplane To Challenge Dirigibles

An airplane company in Berlin plans to make a giant airplane of the "flying wing" type, that is, without a body, everything being carried inside the wings, as a challenge to dirigibles. It will carry 120 passengers, with a "pay load" of 21 tons, and will have a cruising range of 3,000 miles. It will have Diesel engines, burning crude oil.

The world will welcome a test of this kind. So far, the Zeppelins have had a monopoly among big craft carrying many passengers, and have been the only trustworthy trans-Atlantic flyers. They have the great advantage of being self-supporting in the air, whether their motors are going or not.

The airplane, though, has its peculiar advantages, the chief of them being speed. The dirigible may be blown back, or out of its course, by a gale. A 'plane can drive through a gale.

Dirigibles find it hard to cross the North Atlantic because of prevailing head winds, although by turning toward the equator they can swim ahead in the trade winds, as Columbus did. 'Planes with enough motive power and enough size for steadiness may solve the problem for direct routes between Europe and North America.

Nine Daily Foreign Papers In Canada

Chinese Have Four, Japs Two, Jews Two, and Finns One

There are nine daily newspapers in Canada, the Soo Star points out, which are not printed in either English or French. Victoria and Vancouver have one Chinese daily each, and Toronto has two. Vancouver has two Jap dailies. Winnipeg and Toronto have each a Jewish daily and Sudbury prints one in Finnish. There are in addition some 36 weekly papers not printed in either English or French. The claimed circulations of these run from 1,000 to 20,000. Winnipeg prints about half of them although Montreal, Toronto, Vancouver and Edmonton are well represented.

The Sensible Age

Very Difficult To Determine What Is the Sensible Age In Mankind

A young woman in Boston has advertised for a Canadian husband. She is 20 and he must be 30, for, she says with all the wisdom of 20: "You know they are never sensible until they are 30." That is what you might call a classical illusion. Why should a young woman assume that a man is sensible when he is 30 just because it has always been supposed he is.

Actually he is never really sensible if he is any good at all, the poet in him will always at intervals lead him into doing the most crazy things at the most crazy times. If not, he is not sensible.—Vancouver Province.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

Associated Fruit Growers

Co-Operative Organization In B.C. Is Doing a Big Business

In seven years the Associated Growers of British Columbia, a co-operative organization, has shipped 26,462 cars of fruits and vegetables bringing returns of $35,897,433, according to an official report. The cost of operations was less than three and one half per cent. Big crops have not always returned the most money to growers, it was pointed out. In 1927, 3,622 cars brought $4,109,898, and in 1928, 4,460 cars brought $5,[illegible]22,619.

Building Large Hotel

London is going in for buildings on a larger scale. Not only will Thames House, Millbank, be the largest commercial building outside America, but the new hotel to be erected on a site being cleared near the Marble Arch, is to have 2,000 bedrooms with bathrooms, and will be the biggest in Europe.

First Apples Exported

The first apples exported from Nova Scotia are said to have been shipped by sailing vessel from Halifax to Liverpool in 1849, the price realized being $3 per barrel. In 1880 a shipment of 700 barrels was made by schooner to Boston, U.S.A., the price realized being $2.5 per barrel.

Saxony now has 1,543 singing societies with 56,190 members.

Little Helps For This Week

"And thine ears shall hear a word behind thee, saying, 'This is the way, walk ye in it'."—Isaiah xxx. 21.

A Calm Path

Which lies before the feet through common [illegible]
And undistinguished crowds of toiling men,
And yet is hard to tread, though [illegible]
And yet, though level, earns a worthier crown,
For knowledge is a steep which few may climb,
But duty is a path which all may tread.—Lewis Morris.

Let it make no difference to thee whether thou art cold or warm if thou art doing thy duty, and whether thou art drowsy or satisfied with sleep, and whether ill-spoken of or praised.—Marcus Aurelius.

Be not diverted from your duty by any idle reflections the silly world may make on you; for their censures are not in your power, and consequently should be no part of your concern.—Epictetus.

Provides Unique Service

New Yorkers Can Park Their Goldfish At Loew's Theatre

Loew's Lexington Theatre provides an unusual service for New York people. When you go out of town, you can leave your goldfish at Loew's Lexington. There is a huge goldfish pool in the lobby and you simply walk in and dump them into it. The quaint custom was started in 1922, when a gentleman who lives in the East Sixties stopped in, with his fish under his arm, and asked Mr. Crawford, manager of the theatre, if he could leave them there. Mr. Crawford said he could, and the news of this convenient service spread. Every now and then a car drives up and a chauffeur with a goldfish bowl gets out and empties it into the pool. People never come back to claim their pets, because of course they couldn't tell which ones were theirs, and nobody wants anybody else's goldfish. They buy new ones. The system keeps the pool well populated.

Built To Fit

A boat much larger than the stream in which it floats is a very common sight in certain parts of China. Junks navigate with ease these ribbon-like interior canals. These boats, whose superstructure is strikingly large, often hang over the banks of the canals, through which they pass. The bottom of the craft is small enough to "fit into" the stream.

Internally and Externally It is Good.—The crowning property of Dr. Thomas' Eclectric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Canoeists' Paradise

Within the Prince Albert National park lie three important bodies of water, as well as some forty or fifty smaller lakes. These large lakes are so closely connected by waterways that one may paddle for days in this lovely region which has been called "the prairies' wonderland."

There is a grocery store to about 200 persons in the United States.

The Mixed Farmer

It is an old story—yet ever new. It is so much easier to be purely a grain farmer that many have fallen into the easy paths. But while it may be easy it certainly is not profitable, and now the pinch of economics is abroad in the land—fortunate is the man who owns a few cows.

Plan to keep the maximum number of cows your farm will support. Take care of your cream, sell your cream to the Tofield Creamery and you can put up a bold front before "Old Man Hard Times."

THE TOFIELD CREAMERY

W. HESLER, Manager

BEFORE YOU START

Before you start on your vacation trip it is wise to have your car thoroughly checked over by practical men. By doing so you will avoid the numerous petty annoyances that frequently occur to motor travellers when away from home. Remember motor repair work can be done as well and frequently at less cost at home. When you are away strangers do not know you or your car, and are not looking for future business from you.

We have one of the best equipped shops outside of the city. Our work is guaranteed and fair and just prices are charged.

The Tofield Garage

IMPORTED NECKLETS

We have a wonderful assortment of NECKLETS at wonderfully low prices, so cheap you can possess several for the price you formerly paid for one.

Mr. Robert Paul, of Edmonton is visiting his cousin, Rose Craig for a couple of weeks.

Mrs. Thomas Herndon visited friends in the city for a few days last week.

Mrs. C. Coombes is visiting her son in the city for a couple of weeks.

Miss Virginia Ball returned to her home in Edmonton last week after visiting friends and relatives in Tofield for a couple of weeks.

Miss Audrey Jubb left for Shagwa, Alaska, Tuesday morning for a holiday.

Miss Viola Shields, of North Battleford is visiting her friend Georgina Craig for a few weeks.

Mrs. E. Rogers and daughter Mabel and Mrs. A. Hamilton and her son Jack left Sunday morning for Cochrane, Alberta where they will visit relatives for a month.

The Library will be closed the rest of July and the month of August on account of the beginning of Stampede.

Mrs. J. M. Thompson—one we like to mention visitor for a few days last week.

As a warning to stand clear of reckless drivers, the following accident occurs the news of an accident to John Small which occured on Sunday. John was spitting on the road, how long when the axe caught in the clothes line, and springing back struck him on the head. Dr. Law ordered the patient inside for the remainder of the day, because he admired Dr. Meighen's intellect and ability very much and what Mr Meighen had said in the lonchtime, Mr. McKenzie King had answered in the afternoon, and Mr. Bennett in the evening, so that the only thing left was for Mr. Bifton to speak.

The Liberal party were, he said, appealing to the electorate of the country on their record. At election time the opposition always has an advantage. They would make an attack and if not successful would then change to something else. The government were compelled to stick to their record. In all his experience of elections, he had never known a government to have such an excellent record as the present liberal government. There are two distinct policies that of free trade and protection. The liberal government were still of the opinion that a reasonable tariff to the point of revenue requirements was in the best interests of the country. The conservatives under Mr. Bennett believed in a high tariff.

In 1921 there was much pessimism abroad. Many men in high circles of public life and business did not believe that Canada could carry the indebtedness. Canada must, they said have immigration to help bear the burden of indebtedness. He, the speaker, was not in favor of an unrestricted immigration policy, but believed that Canada did then and does now offer an opportunity for a man or family with small capital. He felt that people should not be induced to come here but should themselves desire to come. He believed in certain forms of colonization, though there was this point to be remembered, while the dominion government conducted the immigration department when any of the immigrants failed to make good and needed assistance the provincial governments were responsible for them, however, the liberal government has now announced that there will be no more selected immigration. In 1922 there was a total public indebtedness of $2,500,000,000 the government at we took over the railways, but the

So far, we have been unable to procure a cut of Mr. Lashkevitch of any description, good, bad or indifferent. This is quite of the fact that he would be kept in touch with the local paper, so for an immediate request for any cut sent to us, and we feel certain the observer would have done the same

So far, we have been unable to procure a cut of Mr. Lashkevitch of any description, good, bad or indifferent. This is quite of the fact that he would be kept in touch with the local paper, so for an immediate request for any cut sent to us, and we feel certain the observer would have done the same

The U.F.A. political meeting was not as well attended as it might have been. Mr. Lashkevitch, had a real job convincing the small crowd present that the farmers in the House of Ottawa were responsible for all the good legislation of the past nine years and was not responsible for a lot of bad legislation not becoming law and for waging the dog not of idea.

But the writer of the gossip column was not much concerned with all the figures and extracts, read, as he was to get a blow at that fellow Horton of the Vegreville Observer.

Mr. Horton may or may not be air but he is a poor public speaker, with a strong sense of illwhelms. He writes entertaining, convincingly and hits hard, but always above the belt. He believes every newspaper should be politically-minded, whether it has direct local opposition or not. We believe otherwise

However, he has gone and done it this time. He has made villains of He put Mr. Lashkevitch's photograph in the paper And as Mr. Lashkevitch said last Tuesday night, "what a photograph" He added it up for the audience to see, but as the purpose in the audience could see the fine points of a single column cut held up on the stage. To be sure, we saw the cut when it first appeared, and thought it looked all right, but not so Mr. Lashkevitch. He said he never posed for that photograph, and then said he must have cut it before there were plenty of other much better photos of himself

Anyway, we have learned our lesson. When we print a photograph of Mr. Lashkevitch, we are going to see that he has bib and tucker on, bib and tucker being sheep for tuxedo. He must have a bald and handsome appearance and if he can be induced to place his right hand across his breast and look stern, so much the better, for then he will resemble no less a famous, person than Napoleon.

Really, Mr. Lashkevitch should not complain. All he had to do is have his photograph—anyone he desired—

Hon. Chas. Stewart Speaks Here

Last night (Tuesday) what was the last attended and most interesting meeting for a long time was held at the Variety Theatre. The main speaker of the evening, Hon. Chas Stewart, was present and in addition to rendering a splendid address renewed acquaintanceship with many friends of earlier years.

Mr. Jos. Rogers, chairman, very appropriately introduced the speaker. Mr. and Mr. Stewart really needed no introduction, he being known by most of them. It was a great pleasure to hear him once more address us, and he was sure the audience would listen with interest to the address.

Hon Charles Stewart said in part. He was very pleased to be at Tofield. He looked upon every town in Alberta as a home town. Every community in which he entered he met pleasant recollections of earlier days. He regretted he was unable due to time to proceed to Ryley, but he had a message on his hands himself and had already given two addresses that day. He had just returned from a visit to Ottawa last week and was glad for the southern portion of the province to visit.

He had already been a member of the King government for the past nine years. One of the most important things he went to Ottawa for was to endeavor to place the western provinces on an equality with the eastern provinces. In 1912 Mr. Arthur Meighen, then premier of this province went to Ottawa and pointed out that the natural resources and subsidy in proportion to Prom them on almost yearly, different Governments had been himself, went down to Ottawa to procure the natural resources and subsidy The is ancient history but it is well to remember it. In every journey down they met with objection from the Maritime provinces. The Maritime provinces who had some problems themselves thought this was a good opportunity of pressing their claims which were just. The settlement of the western provinces more difficult Speaking with Arthur Meighen, Mr. Stewart said that the former had declared to him, that he, Mr Meighen, believed the problem insoluble. He mentioned this, because he admired

Mr. and Mrs. Bert Calvert were visitors to the city on Monday of this week.

During the month of August there will be no services held in the United Church.

SYNOPSIS OF "SOMBONE TO LOVE"

William Shelby, Aubrey Weems and Michael Casey roommates, work at Simmons music store. Jean Kendricks buys some music from Shelby and is much moved by the first sight. Jean hides the fact that she is wealthy, fearing her money will frighten Shelby, but when Shelby learns her engaged, Shelby learns her secret. Jean's grandfather and father want that he wants to marry for love, only when he can support Jean properly.

Weems and Casey are angling for rich marriages and they get Shelby involved. Shelby and Weems both see Jean and her father happen into the store and Jean's name is found on a list of wealthy girls in Shelby's desk. Jean breaks the engagement, thinking Shelby a fortune hunter.

At their room, Weems finds a telegram from his aunt asking him to manage her Paisley farm. Shelby gets rich marriages and they get Shelby involved. Weems and Shelby

Marketing and Distribution

The problem with which industry is confronted today is marketing, declares Donald M. Marvin, economist, in the monthly letter issued by the Royal Bank of Canada. To quote Mr. Marvin:

Early economic thought had its birth in a philosophy of trade, but this line of thought was rapidly displaced by theories concerning production. In theory trading operations became a mere adjunct to productive processes, and, except as regards foreign commerce, occupies a very subordinate place in economic literature. The engineering genius of the world has been focussed on methods of manufacture. The last half century witnessed the growth of large scale production and remarkable improvements in productive efficiency but relatively speaking distribution has escaped attention. Today this is changing; the problem with which industry is confronted is that of marketing.

While increased attention is being given to the principles and practices of marketing, data relating to this field are far less comprehensive than for other branches of human activity. Population, production, prices, export and import, and many other kinds of statistics are available in abundance and in a high degree of excellence. Official statistics relating to agriculture, mining and manufacturing have been collected for many years. The number of persons engaged in these activities is known, together with varied information concerning the quantity and quality of their products. There are no comprehensive statistics of distribution and it is in this field that the need for further information is undoubtedly most acute.

The relative merits of the chain store, department store, mail order house and the local independent dealer have long been the subject of controversy and speculation. The fear that the independent merchant is being crushed to the wall by an over-powering competition has frequently been expressed. What the actual situation may be, not only as regards retail trade as a whole but as regards its different branches, can only be discovered when adequate information concerning distribution is available.

Urgent necessity has moved many private concerns to seek information in this field, but private enterprise has gone about as far as it can go in providing this information. Unfortunately the results have been incomplete and only serve to emphasize the necessity of a comprehensive statistical study of the subject. The first requisite for such an analysis of distribution is a census of all manufacturing, wholesale and retail establishments which are engaged in distribution. Such a survey will be undertaken by the Dominion Bureau of Statistics in connection with the regular decennial census in 1931. The schedules will contain questions relating to the kind of business, number of employees, salaries and wages paid, inventories, expense of doing business and capital invested.

This census will be of great benefit to all those who wish to make an intelligent study of the problem relating to marketing in Canada. It will supply the basic statistical material required, and provide a comprehensive picture of the various outlets for an extensive list of commodities and groups of commodities. The relative proportion of cash and credit sales will be given. Presentation of the data in the form of averages will furnish a basis with which individual organizations may judge their own results. A picture of consumer demand in each section of the country will be presented together with information showing the various types of outlets through which they are now reached. Such data will be invaluable in the preparation of advertising and sales campaigns. While the advantages of this type of information to manufacturers and distributors is obvious, the fact that the consumer will benefit through the economies which should result, should not be overlooked.

Studies relative to the cost of living will be assisted by data showing the percentages of consumers' purchases of food, clothing, fuel, and other groups of products. Special methods of distribution adapted to certain districts will be shown, and additional light will be thrown on the movement of commodities between the various provinces of Canada. The compilation of these statistics and others of a like character should produce material of substantial benefit to industry and trade.

The success of this survey will depend very largely on the wholehearted co-operation of those who supply the individual returns. The need for the information has become particularly urgent as advances in methods of production have pressed the problems of distribution more and more upon the attention of business leaders. With the added information made available, a real analysis of the problems of distribution will be possible and more effective measures devised for their solution.

Canadian Destroyer Launched

Destroyer "Saguenay" Is Launched At Southampton, England

The new Canadian destroyer Saguenay was launched at Southampton, England, from the Thornycroft yards recently in the presence of a large and interested crowd. Madame Desbarats, wife of G. J. Desbarats, Canadian Deputy Minister of National Defence, performed the christening ceremony.

A sister vessel, the "Skeena," is to be launched in September. The two destroyers are of special design for use in Canadian waters. They are of 1,320 tons displacement, with a length of 312 feet and a speed of 35 knots.

The "Skeena" and "Saguenay" will replace two destroyers now on loan to Canada for patrol purposes, etc., from the royal navy.

Where Wives Are Cheap

In the Belgian Congo a pigmy wife of the better grade can be purchased for a good sharp knife, while others not so comely may be had for a pinch or so of salt. So declared Mrs. Delia J. Akeley, first wife of the late Carl Akeley, on returning to New York from a 10 months' stay in the African jungle.

NO MORE STOMACH TROUBLE
[illegible]

Vulnerable To Air Attack

Naval Vessels Of Every Type Are At a Disadvantage

Improvements in air warfare are much more important than the public has been permitted to know. General William Mitchell was a little ahead of the times when he asserted that battleships had been made obsolete by aircraft developments. Nevertheless naval vessels of every type are vulnerable to air attack. France's superiority to Great Britain in aircraft is so great that the British Navy, whatever its type of vessels, is at a disadvantage.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

Automobile Insurance Grows

Automobile premiums collected in British Columbia in 1929 totalled $1,500,475. The losses paid were $1,018,576. More than 140 companies handed in returns. The majority of the returns showed a good margin of profit, but several companies met with unusually heavy losses.

Farmer: "How do you like the goat's milk?"

City Chap: "Sorta tastes of the tin, don't you think?"

Germany's foreign trade continues near the record mark.

A Vagabond In Canada

Daughter Of British Minister Of Education Enjoys Trip Across Dominions

It's a good idea to be a vagabond for a while in the opinion of Katharine Trevelyan, daughter of Sir Charles Trevelyan, Minister of Education in Great Britain, who left recently for Montreal and her home in Cambo, Northumberland.

Miss Trevelyan has spent the past two and a half months putting her theory in practice. She has peeled potatoes in cargo boats on the Great Lakes, walked hundreds of miles across the prairies, ventured into the Okanagan and Cariboo districts of British Columbia, and as a final achievement in her adventurous journey across the continent, made a season's first ascent of Mount Edith Cavell, 11,033 feet high.

But out of all her experiences what impresses her the most is that she still has sufficient money left for her next term at Oxford.

"The thing about being on one's own," she said just before leaving Jasper Park Lodge for the east, "is that it gives a feeling of independence, it also gives an opportunity for digesting and thinking over the various things you have experienced during the last few years, as well as taking stock of what you see in your journey."

"That's why I think," continued the young English girl on her way back to England to settle down to a period of comparative tranquility, "everyone should get away from his usual routine for a time, at least every four years. In your own comfortable rut at home you don't get a chance to recognize just what has been happening to you."

Famous German General Dead

General Friedrich von Bernhardi Had Field Command During World War

General Friedrich von Bernhardi, who led the Imperial army both in victory and defeat, died in Berlin recently at the age of 81.

In the war of 1870, General von Bernhardi was the first German officer to enter Paris after its fall. At the outbreak of the great war he was commander of the home units of the fiftieth army corps, but at his own request was assigned to a field command and left for the front in December, 1915.

He was an early advocate of the use of asphyxiation gases, and before the end of the war was recognized as one of the premier strategists of the Imperial army.

Saskatchewan Power

Seven Hundred and Fifty-Eight Miles Of High Tension Lines To Be [illegible]

The Saskatchewan Power Commission is calling for tenders for the building of 758 miles of high tension lines to make available electric energy for the use of some 56 towns and villages throughout the province, while so that the lines can be completed. Work is to be started as soon as possible and in operation by the end of October or beginning of November. The power will be supplied by plants located at Saskatoon, Prince Albert and Moose Jaw.

Minard's Liniment checks Colds at once.

Adding Insult To Injury

The automobile taxi Gaston Herrot, of Paris, has to tell is a strange one. Gaston was knocked down by a taxicab, and when he got out of the hospital he was fined for "letting himself be knocked down." The driver proved he had blown his horn, so Gaston had to pay. It's a new law there.

Owl Cannot Move Eyes

An owl cannot move its eyes. The eyes of this bird are fixed immovably in their sockets by strong cartilaginous cases. To compensate for the inability to move the eyes the bird's neck is so jointed that it can turn its head almost in a complete circle.

PAINS
No matter how severe, you can always have immediate relief:

Wheat Acreage Less

Decrease In Acreage As Compared With Last Year, Is About 3 Per Cent.

Total estimated areas sown to wheat in Canada for the 1930 season is 24,582,300 acres, as compared with 25,254,062 acres finally reported for 1929, according to the weekly crop report recently issued by the Dominion Bureau of Statistics. This is a decrease of 671,762 acres, or about 3 per cent.

The area of fall wheat to be harvested is estimated at 636,000 acres as compared with 834,264 acres in 1929, a decrease of 197,964 acres, or 24 per cent.

Spring wheat occupies 23,947,000 acres, as against 24,420,718 acres in 1929, a decrease of 473,718 acres, or about 2 per cent.

Cereal crops show increases, according to the report: oats from 12,479,477 acres to 12,815,000 acres; barley, from 5,936,542 acres to 6,050,000 acres; rye from 891,944 acres to 1,092,300 acres. Fall rye occupies 763,400 acres as compared with 664,193 acres in 1929 and, spring rye 328,000 acres as against 227,751 acres last year.

Flaxseed shows an area of 451,500 acres as compared with 382,200 acres in 1929.

The area planted to potatoes is estimated at 557,000 acres, as compared with 543,727 acres, an increase of 2 per cent.

Icebound Ships Are Freed

Held In Ice Since Last September Are Finally Liberated

The icy embrace of the Arctic Ocean has at last released its grip upon the American fur trading ship "Nanuk" and the Soviet steamer "Stavropol" held icebound in Siberia since last September.

The "Nanuk" was freed recently when the packed ice moved off-shore while a little later the ice broke up in the bay, freeing the "Stavropol."

It was to the "Nanuk" that Carl Ben Eielson and Earl Borland were flying from Teller, Alaska, last November when their 'plane crashed near North Cape, killing both of them.

Recipes For This Week

(By Betty Barclay)

BOSTON SANDWICHES

Either left-over or canned baked beans can be used for a delicious filling for a hearty sandwich. Whole wheat and Boston brown bread are [illegible].

Press 1 cup baked beans through a coarse sieve and add 1 tablespoon tomato catchup, ½ teaspoon onion juice, ½ teaspoon mixed mustard and ½ teaspoon sugar. Spread on buttered slices of bread and serve with crisp pickle.

DATE PICNIC SANDWICH

The picnic lunch needs plenty of fruits. A few date sandwiches help to bolster this up, and furnish very delicious tidbits as well. Run half a cup of dates and half a cup of walnut meats through the food grinder, using the coarse plate. Mix with one Philadelphia cream cheese and ½ teaspoon sugar. Spread on buttered slices of whole wheat bread.

PIAZZA DELIGHT

½ cup sugar
2½ cups of water
2 cups orange juice.
3 tablespoons lemon juice.
Grated rind 1 orange.

Boil sugar, water and orange rind together for 5 minutes. Chill, add fruit juice and serve.

Wretched From Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dissipates the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and normal happiness.

One Thing At a Time

Declared to have worked wonders with many who sought more slender figures, a new plan of a famous doctor in Berlin, Germany, is attracting patients from all parts of Europe. At the doctor's home no one ever is allowed to go hungry. He or she may eat cereals, fruit, vegetables, meat and poultry according to appetite. But what is strictly forbidden is the mixture of foods. It must be one thing at a time. Even butter must go with bread.

Canada's Forests

The forests of Canada are, in the aggregate, the second most important natural resource, being exceeded in actual value of products by agriculture alone.

Minard's Liniment for all Strains.

Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh, griping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S FRUIT SALT

British Naval Estimates

Additional Estimates Call For Expenditure Of About $1,000,000

The British admiralty has published additional estimates for naval construction for the current financial year, in which £200,200 (about $1,000,000), is asked. The amount will be used for construction, allowed Great Britain under the London treaty.

Of the supplementary estimate, £183,600 is required to meet costs to submarines this fiscal year on three submarines of the 1929 program, construction of which had been deferred pending conclusion of the naval treaty.

The balance of $24,000 will be devoted to the new construction program for 1930.

Grain Via New York

Canadian Exports Constituted 30 Per Cent. Of Tonnage Last Year

Canadian grain constitutes 30 per cent. of the export tonnage from the port of New York, according to an estimate outlined in the annual report for 1929, of the Port of New York authority. It was also pointed out that this Canadian grain earned a gross annual revenue of $8,000,000 for United States railroads and barge canal operators serving the North Atlantic ports, and furnished from 25 to 75 per cent. of the eastbound cargoes of steamships operating from the port of New York.

A Power Of Its Own.—Dr. Thomas' Eclectric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Will Build New Dock

A $4,000 dock is to be built at Sturgeon Landing, Sask., it was learned following a trip made to the outpost by Engineer Davies, representing the Federal Government. Sturgeon Landing is about 135 miles northwest of The Pas, on the Saskatchewan River water route. Much of the freight taken into the north has gone in through this point.

His Sight Restored

Blinded In Right Eye, Sight Is Regained In Peculiar Manner

Totally blind in his right eye for 33 years, Stephen McCormack, of Sydney, Australia, has had his eyesight restored by an accidental finger poke in the eye.

When a piece of stone thrown up by a horse's hoof robbed him of the sight of his right eye, specialists were baffled.

Thirty-three years later McCormack was exercising with a medicine ball when a companion accidentally poked a finger in his blind eye. He was seized with excruciating pains in the head and suddenly his eyesight returned.

German Aircraft For Canada

Representative Of the Junkers Aircraft Corporation Visits Dominion

German aircraft builders are well aware of the potential market for machines in Canada, and the Junkers Aircraft Corporation, of Dessau, even anticipates assembling certain of its various types in the Dominion. One of the company's representatives is now in Montreal to investigate the situation, and will use one of the Junkers monoplanes for demonstration purposes. It is expected that he will remain several months to discuss conditions and prospects with leaders in aviation.

Colorado man has a chicken with only one eye, so in that part of the world there are a few worms that stand a pedestrian's chance of escaping.

If Mr. Ford is going to save an old-time gentleman for his museum he'll have to be quick about it.

WHEAT BUYING TO BE TOPIC AT EMPIRE PARLEY

London, Eng.—The Labor Government, through Rt. Hon. Philip Snowden, Chancellor of the Exchequer, has now made it clear that all the British Dominions can hope for at the Imperial Conference next November is a discussion of the possibilities of participating in a system of bulk purchases through an import board.

This system would, for example, enable the Canadian Wheat Pool to sell to the British Government direct, but whether the government would agree to buy if the price of Argentine wheat was lower than the Wheat Pool price is not known, and will not be known until the conference is held.

The conference will take place in the middle of a raging controversy, because all the parties will have eyes on the next British general election, which is not far off now and unless the visiting premiers are tactful and diplomatic they will find themselves involved.

In spite of Mr. [illegible] declaration, the Laborites are anxious about the outcome of the conference because they realize that if the Dominions make concrete proposals it would be difficult to reject them without giving the Conservatives an opportunity of exploiting such a rejection throughout the country as party propaganda.

Another War Brewing

James W. Gerard Sees Conflict Coming Between France and Italy

New York.—James W. Gerard, ambassador to Germany under President Wilson, expressed the belief upon his return from France that "a new war is brewing between Italy and France."

"It is imminent," he said. "It is in the air."

He talked to no diplomats on his visit, he said. Asked if France were the aggressor, he answered: "I should not say so. She has too much to remember of the last war. I think France fears it."

To Fight Cutworm

Farmers Preparing To Exterminate Pest Next Year

Saskatoon, Sask.—Prairie farmers are preparing for the advent next summer of a prominent visitor, the pale western cut worm. K. M. King, of the Dominion Entomological Laboratory at Saskatoon, urges that an impressive reception be given the insect as well, if not favorably known, in the west. Trouble from the unwelcome guest will be greater even than the extensive damage of this year unless adequate precautions are taken, advises Mr. King.

Tax Incomes For Relief

Australia's Method To Raise Funds For Aid Of Unemployed

Brisbane, Aus.—A special tax on all incomes to provide funds to extend the present unemployment relief works in Queensland, and an arbitration act amendment with a view to abolishing the preference of trades unionists, affirming the right of every man to accept work where and when it is offered, are among the government's proposals at the opening of parliament.

Youthful Traveller

Halifax, N.S.—With a tag on his coat to tell his name and destination, Bazyli Wacko, eight years old, travelling alone from Warsaw, Poland to Star, Alberta, and who arrived in Halifax on the Red Star liner "Westernland," is now on his way west by Canadian National Railways. Bazyli has come to Canada to join his father.

Manitoba Crop Prospects

Winnipeg, Man.—Manitoba's present crop outlook is described as "very encouraging" in a report issued recently by the provincial department of agriculture. Wheat fields are headed, although heads are not long, and are of a good appearance. how well they will fill depends on the weather, the report adds.

Run Over By Mowing Machine

Saskatoon, Sask.—Joseph Walker, 60-year-old farmer of Hanley district, was severely injured when run over by a mowing machine. He is now in St. Paul's hospital here, but is expected to recover.

Canada's Position Sound

Country Merely Passing Through Temporary Period Of Depression

Victoria, B.C.—Sir Henry Thornton, president of the Canadian National Railways, arrived in Victoria at the end of his trans-Canada survey and announced his conclusion on business conditions as follows:

"We can't expect the sun to shine all the time, there are bound to be showers. But so many people are mistaking a shower for a cyclone.

"We have got to look below the surface and see if there is anything wrong with our fundamentals. If you diagnose the position of the country, organically so to speak, you will find that we have the same courageous and intelligent population we had a year ago.

"That tells us that we have no disease, or, as the doctors would diagnose it, we are merely passing through a headache or a cold.

We could not have had the stock market losses of the crash last year in New York, which carried down all the markets in the world, without these losses finding expression in reduced purchasing power of the people in all lines.

"Things will probably mark time for a certain period until the public recovers its purchasing power. If we have a good crop on the Canadian prairies this year we will be well on our way upwards next year."

Noted Labor Leader Dead

James M. Lynch Inaugurated Forty-Eight Hour Working Week

Syracuse, N.Y.—James M. Lynch, former president of the International Typographical Union and leader of that organization's successful battle for the 48-hour working week, died in hospital here of blood infection.

He was born Jan. 11, 1867, at Manlius, N.Y. and came to Syracuse as a printer's "devil" on the Syracuse Herald.

He stayed with the newspaper until 1898 when he was elected first vice-president of the I.T.U. after holding the presidency of the local union for seven terms. In 1901 he was elevated to the I.T.U. presidency, continuing to hold that office until 1914, when he resigned to become Commissioner of Labor.

Greeting For King George

Japanese Emperor Sends Message By Prince Takamatsu

Tokio, Japan.—A greeting from the Emperor of Japan to King George V is on its way to England, enclosed in a golden casket, in the keeping of the Emperor's brother, Prince Takamatsu, who with his bride will be the guest of the King and Queen. The message is in the form of a poem by one of the foremost Japanese poets. It is inscribed on parchment and illuminated by Oriental artists. It was formally blessed by the priests at a special religious ceremony in Tokio before it was placed in the casket, and the casket was then sealed to exclude malignant spirits.

Would Save Millions

Opposition In Australian Government Ask Reduction Of Members' Salaries

Canberra, Aus.—A fresh sensation was caused in Australia with an announcement that the opposition is going to move for reduction in salaries of the Prime Minister and of the members of the House of Representatives. Hon. J. G. Latham, leader of the national opposition, gave notice of intention to move an amendment during debate on the budget. He estimated a saving of 4,000,000 pounds (nearly $20,000,000) could be effected.

Receives Appointment

Toronto, Ont.—Prof. J. C. B. Grant, M.B., Ch.B., F.R.C.S., Edin., newly appointed professor of anatomy, University of Toronto, relinquishes a similar position at the University of Manitoba to succeed Prof. J. P. McMurrich, M.A., Ph.D., LL.D. He was temporary captain of the R.A.M.C. and received the Military Cross for war service.

Decision Left To Dominions

London, England.—The question of whether the forthcoming Imperial Conference will discuss the problem of women's nationality was put to Rt. Hon. J. H. Thomas in parliament, and he replied the agenda was a matter for agreement between the Dominions. He was not able to give any specifications.

Was Celebrated Violinist

Dresden, Germany.—Leopold Von Auer, of New York, celebrated violinist and violin instructor, died of pneumonia at the Sanatorium Loschwitz near here. He was 85 years old.

Six Women Candidates In Election Campaign

One Running In Manitoba and Two In Saskatchewan

Ottawa, Ont.—Miss Agnes MacPhail may have to [illegible] when the hurly-burly's done and the battle's lost or won. For there are twice as many women candidates in the present election campaign as there were in last. Ontario has two, including Miss MacPhail. Manitoba, one. Saskatchewan, two. Quebec, one, a total of six against three in the election of 1926 and four in that of 1925. And women too are likely to have more to say in the result. They are attending meetings. The new system of enumeration has put more of them on the voting lists.

Miss MacPhail was the first woman elected to the Federal House, and for three parliaments she has remained in her isolation.

At Ottawa, Miss MacPhail has been persistent in her attacks on what she considers evidence of militarism. At the League of Nations Assembly last September, she was substitute delegate with Sir George Foster on the disarmament committee—the first woman to represent Canada at the League.

In the 1926 campaign, Miss MacPhail had the [illegible] majority of 1,728, her fight being with a Conservative. Both a Liberal and a Conservative were in the field early in the present campaign but the Liberals did not submit nomination papers.

Miss MacPhail has again a straight fight on her hands.

WINNIPEG PLANS WORK TO ASSIST UNEMPLOYED

Winnipeg, Man.—The cities of Winnipeg and St. Boniface propose to group themselves in an effort to alleviate the unemployment problem under Premier Mackenzie King's dollar-for-dollar scheme. Decision to start at once on the rebuilding of two bridges as relief work for the jobless was reached at a conference of civic officials of the two cities.

Tentatively, it is suggested the Dominion Government, in line with Premier King's promise that the treasury will expend an equal amount with the provinces seeking to relieve unemployment, be asked to pay 50 per cent. of the total expended on the work. The Manitoba Government would be asked to meet 25 per cent. of the cost with the municipalities putting up the remaining 25 per cent.

While the general view of delegates to the municipal conference is that work on the two bridges, entailing an outlay of something more than $1,000,000, should be started at once, a gigantic collective scheme of public works approximating a cost of $6,000,000 or $7,000,000 was considered. An extensive drainage scheme and other bridge construction would form a part of the large scheme.

A delegation was appointed by the conference to discuss with provincial premier John Bracken immediate construction of the two bridges and apportionment of costs.

Canada's Apple Crop

Report Shows Decrease In East But Increase In British Columbia

Ottawa, Ont.—The commercial apple crop of Canada estimated for 1930, as compared with 1929, indicates reductions of 46 per cent. in Nova Scotia, 23 per cent. in Quebec, 25 per cent. in Ontario, less than the five-year average in New Brunswick, while in British Columbia the crop is expected to yield an increase of 22 per cent. The total crop is estimated at 2,112,330 barrels, as against 2,989,915 barrels in 1929, slightly less than three per cent. under the average commercial production for the five-year period 1925-29.

AVIATOR HAS NARROW ESCAPE

Al. Cheesman, Antarctic flier, who escaped without a scratch when his aeroplane caught fire while flying from Sioux Lookout to The Pas. The pilot brought his machine safely to feet, also avoiding a crash.

Ban U.S. Unemployed

Action Is Taken To Prevent Surreptitious Entry

Vancouver, B.C.—Hon. Ian Mackenzie recently appointed Minister of Immigration and Colonization, has asked to have his department prevent the surreptitious entry of unemployed United States workers into Canada.

Instructions have been issued in Ottawa, by Deputy Minister W. J. Egan, to border inspectors to keep a sharp lookout for indications of attempts by United States citizens to make illegal entry into this country. Co-operation of the customs department and mounted police has also been sought, he states in a telegram to Mr. Mackenzie.

Mr. Mackenzie's statement follows: "Having had reason to suspect that unemployed Americans may be surreptitiously trying to make their way into Canada, I wired my deputy minister to exercise the utmost vigilance to see that this does not occur.

"In view of the steps that will be taken in the near future to cope with unemployment in our Canadian cities, particularly in the west, we wish to ensure that the assistance rendered shall be to our own people only."

Women Peeresses

Bill To Admit Peeresses To Membership In House Of Lords Is Defeated

London, England.—A bill to admit women peeresses in their own right to membership in the House of Lords, was defeated by the narrow margin of four votes, 53 to 49.

Lord Astor, who has been the women's champion for many years in their fight for recognition in the Upper House, introduced the bill.

Conservative peers opposing the bill held that the question of the admittance of women should be left until the reform of the whole House was considered, a movement which has been considered for some time.

Unknown At Ottawa

"Pierre La Passe" Did Not Serve With Canadians During War

Ottawa, Ont.—No man of the name of "Pierre La Passe" ever served in the Princess Patricia's Canadian Light Infantry officials of the National Defence Department declared here when asked concerning the man of that name who had given battle to a pair of gunmen in Chicago. There was no Pierre La Passe in any unit of the Canadian Expeditionary Force during the war, the official added.

Ask Penny Postage

London, England.—Reintroduction of Imperial penny postage, in the interests of Imperial unity, was urged in a resolution passed by the British Empire League. The resolution was proposed by Sir Henry Page Croft.

Siamese Princes Arrive

Their Serene Highnesses, Prince Ajiba, Prince Chiranakl and Prince Prasobsri (left to right), nephews of his Supreme Majesty the King of Siam, who reached Vancouver, June 21, aboard the Canadian Pacific liner "Empress of Russia." The two young princes will enter school at Washington, D.C., while their elder cousin, a captain in the Siamese army, will take up temporary residence at the Siamese legation in the United States capital.

Belgium Accepts Invitation

Will Participate In World's Grain Exhibition and Conference

Regina, Sask.—According to word received, Belgium has officially accepted the invitation to take part in the World's Grain Exhibition and Conference to be held here from July 25 to August 6, 1932.

Some little time ago official invitations were sent from the Dominion Government to all countries inviting them to participate. A few countries in which cereal production is not carried on, or carried on to a very small extent, have gratefully expressed their inability to take part, others including the United States, Bolivia, Columbia and Chile have expressed their interest and asked for further information for consideration, and official acceptances have been received from Peru, Jugoslavia, Guatemala, New Zealand, Poland, Czecho-Slovakia, The Netherlands and Belgium, eight in all.

Mr. Mooney, the managing director, is now in Europe for the purpose of interviewing government officials and supplying to them detailed information relative to this great Canadian enterprise. His visit is expected to be the means of stimulating a greater interest on the part of European countries. The fact that many countries, two years previous to the holding of the show, have accepted the invitation to participate and send delegates is taken as a good omen for the 1932 show.

May Send Delegates To Great Britain

B.C. Lumbermen Plan To Promote Sale Of Timber Products

Victoria, B.C.—British Columbia will send a lumber delegation to Britain shortly, as it sent a similar delegation to Australia early this year, to promote the sale of B.C. lumber in British markets, if plans discussed here between the government and E. M. H. Lloyd, representative of the Empire Marketing Board, materialize.

Hon. N. S. Lougheed, Minister of Public Works and a leading lumberman, asked Mr. Lloyd if a B.C. lumber delegation could secure worth while results in Britain. Mr. Lloyd replied that it should be able to do a great deal of good in promoting the sale of B.C. timber products generally.

TWO WARSHIPS SENT TO EGYPT TO QUELL RIOTING

London, England.—Great Britain has approximately 9,000 troops stationed in Egypt, Tom Shaw, war secretary, told a questioner in the House of Commons. The troops consist of three cavalry regiments, six batteries of artillery, six infantry battalions and auxiliary troops, Shaw said. The troops are stationed at Cairo, Ismailia, Alexandria and Port Said.

There was some question among political observers whether the British Government would not intervene in Egypt in view of its obligation to protect foreigners there.

Reports that eight or more foreigners were killed in rioting at Alexandria were not confirmed, however, and it was certain the present British Government would not act precipitately.

The British Government has ordered the battleships "Queen Elizabeth" and "Ramillies" to proceed to Alexandria for the protection of foreign lives and property endangered by disorders at that place.

Prime Minister MacDonald, in announcing the dispatch of the vessels, also informed the House of Commons that Sidky Pasha, the present Egyptian premier, and Nahas Pasha, former premier and Nationalist leader, had been warned they would be held responsible for the protection of foreign lives and interests.

New Form Of Farm Relief

U.S. Farmers Advised To Use Wheat As Dairy Feed

East Lansing, Mich.—Agricultural experts at Michigan State College offer a new form of farm relief to those who are worrying about the price of wheat.

Feed it to livestock, says a statement issued by four department heads. At present prices, wheat is worth $3 more a ton as a dairy feed than as a commercial cereal, the experts assert, adding that farmers can save $10 a ton by feeding wheat instead of corn.

IMPORTANCE OF GARNET WHEAT DEMONSTRATED

Ottawa, Ont.—Garnet wheat is assured a position of first importance in the supply of Canadian wheat going to European markets. This opinion was expressed by L. H. Newman, dominion cerealist, under whose direction the tests of milling and baking qualities of Garnet wheat were recently conducted in Britain and on the continent.

In a statement issued recently based on his recent report dealing with the tests, Mr. Newman set forth that "the overseas" tests arose through the criticism of Canadian millers that flour from Garnet wheat was not as white as the flour of Marquis, and that Garnet being a very hard, vitreous grain might present some difficulties in the actual milling when mixed with Marquis and other wheats now being grown.

"Examination of the report shows fairly clearly, I think, that these objections do not attain to anything like the same degree in England, or on the continent, that they do here," observed Mr. Newman.

"Chiefly because of the fact that over there they blend wheat [illegible] they obtain from all over the world and are experts in conditioning and tempering." Not only do the overseas authorities anticipate no difficulty in blending Garnet, but because of its high grade it will enable the use of larger quantities of low grade wheats such as were produced in Canada in 1929. The livelier flour from Garnet is needed to improve the quality of the woolly flour of low grade wheats. It is as an improver of blends that Garnet will find its greatest value.

Regarding the relation between Garnet, Marquis and Reward wheats from the grower's standpoint the Dominion cerealist declared that Garnet was not intended to take the place of Marquis, nor was it particularly recommended for growing in districts where Marquis could be safely grown. It was an early maturing wheat and extended the production belt of high quality wheat into the early frost areas where Marquis could not safely be grown.

"Too little is known of Reward as yet to afford a detailed comparison," he said. "It is observed however, that Reward takes a few days longer than Garnet to mature. On virgin soils Reward is one of the heaviest yielding wheats known, and it is an excellent exhibition wheat, but in other places it is proving a little disappointing from the yield standpoint."

Indians Holding Congress

Representatives From Canada Will Attend Meeting In Cleveland

Cleveland, Ohio.—Never before in history have North American Indians of all tribes and nations gathered about one council fire, as they will in this city for five days in September. Prof. Nipo Strongheart, prominent Indian leader and director of American ethnology, who is giving his entire time to plans for the congress, has numbered Indians by states, as follows: Oklahoma, 160,000; Arizona, 46,250; New Mexico, 20,000; South Dakota, 20,000; California, 19,000; Washington, 12,900; North Dakota, 10,000. Other states total only a few thousand. Indians of Canada to be represented at the congress will include Blackfeet, Bloods, Peigans, Cree, Sarcee, Sioux, Brantford, and the Mic Mac from Nova Scotia.

Shipbuilding Declines

Great Britain's Shipbuilding Industry Slows Up

London, Eng.—Decline of Great Britain's shipbuilding industry in ratio to that of the rest of the world is revealed strikingly in returns for the second quarter of this year made public by Lloyd Underwriters.

Out of 3,087,000 tons under construction by the world during the three months, 1,302,000 tons or 43 per cent. of the whole was being built in Great Britain and Ireland. This compares with a percentage of 57.2 built by Great Britain and Ireland in the 12 months immediately preceding the war.

Survived Week in Bush

Renfrew, Ont.—After wandering through the heavily bushed country in Admaston township for almost a week, subsisting on berries and sleeping under the protecting foliage of trees, Lloyd Warren, aged seven, for whom an intensive search had been maintained, was found. Doctors said he would be quite recovered in a day or two.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

THE WAY TO HEALTH

If we desire health, if we desire happiness, the good appearance, and the ability required to do our best work both for ourselves and for others, which is possible only through the possession of health, we should consider what is the way to health. [illegible]

that counts. The factor that determines whether or not we enjoy a condition of health is our manner of life. [illegible]

bad habits of any kind, but good habits are as easy to cultivate as undesirable ones. It is necessary to make a start, and then to persist until the habit is formed. The practice must be regular and exceptions must not be made. Every time the practice is missed, a new start must be made, which only makes the acquiring of the habit more difficult. [illegible]

formed, the better, but it is never too late to learn. However, the formation of habits is more difficult in later years, because it means that any bad habits must be overcome. It is never a kindness to a young child to permit him to form undesirable habits, because the day will come when he will have to pay in the results which grow out of such habits.

The health habits have to do with diet, rest, exercise, fresh air, sunshine, elimination and cleanliness, and upon these rests the health of each and every one of us.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

—VOTE LIBERAL—
SUSTAIN AN
ABLE GOVERNMENT

Mark Your Ballots for
CHARLES GORDON,
Liberal Candidate

To The Electors, Electoral District of Vegreville:

Ladies and Gentlemen:—

Having been honored with the nomination of the Liberal party to contest the electoral district of Vegreville in the interests of the Mackenzie King government, I feel it my duty to lay before the electors my reasons for soliciting their support at the polls on July 28th. In the comparatively brief space available in a newspaper, one can do no more than summarize the outstanding points on which the Mackenzie King government bases its appeal to the country. But, during the campaign, various speakers will explain in detail both the major and the minor issues involved.

In this constituency, no Conservative candidate will be nominated, hence, the campaign must, necessarily, be based upon the record of the Government.

All indications point to the return of the present administration under Mr. Mackenzie King to power on July 28th. It is most unlikely that any such situation will arise as in 1925 when the fate of the government was in the hands of a small group. No prime minister of Canada will attempt to carry on a government again under such conditions. It is, therefore, only reasonable to vote for candidates [illegible] supporting the government, thus taking the business affairs of the country out of the realm of uncertainty and placing them on a stable and assured foundation.

The member for Vegreville from 1926 to 1930 is on record as having opposed the Dunning Budget, along with numerous other government measures. According to his own statement he "voted with his group, right or wrong."

It may be fairly contended that the representative of a group cannot be a true representative of the whole of the people of a constituency. A member of parliament owes more to his constituents than to act as a rubber stamp for a part of them. He owes his constituents the exercise of his own judgement on measures presented to parliament, irrespective of party or group affiliations. Yet the late member for Vegreville voted with his group, right or wrong. The Dunning Budget of 1930 was the most important and far reaching tariff measure presented to parliament since 1907. It embodied several features for which the agricultural interests had been contending, yet he voted against it, right or wrong.

I cannot believe that in taking this stand, the Vegreville member fairly represented the actual sentiment of the electors of his constituency.

Against his futile record I beg to place that of the Liberal government which has held power in Canada since November 2nd, 1921, with the exception of about three months in 1926. I can mention only the main items of public importance.

1. The consolidation of the government owned railways into one co-ordinated system under the presidency and management of Sir Henry Thornton. Prior to this consolidation, the various government-owned railways, bankrupt and rapidly running to ruin, were controlled by half a dozen different directorates and managements. Consolidation resulted in an immediate reduction of expenses in head offices, in operation, in maintenance, combined with better service to the public. Sir Henry Thornton, the President and General Manager of the greatest railway system in the world, has transformed Canada's greatest liability into Canada's greatest asset. There is no political interference with the Canadian National Railway system. The record of the Canadian National Railways is astounding in its success.

Who made it possible?

The Mackenzie King government.

2. The construction and completion of the Hudson's Bay Railway, affording the farmers of Western Canada closer access to the markets of the world.

3. The encouragement of Canada's trade and commerce, which has doubled since the Liberal government took office. This was brought about by encouragement of superior methods of transportation as in the Canadian Mercantile Marine; the deepening of the Welland canal and other waterways; the establishment of commercial agencies in the principal trading centres of the world; the negotiation of trade treaties and conventions with other countries whereby reciprocal benefits were obtained, the development of the natural resources of the country.

4. The elevation of Canada from the "colonial" status to that of an independent fully self governing Dominion within the Empire.

5. The reduction of taxes, such as the Income Tax, the Sales Tax, Cheque Tax, Receipt Tax, Postage reduction, together with constant reductions in the tariff on machinery and articles in common use. Tax reductions mean reduction in prices.

6. The substantial reduction of the public debt through shrewd and careful financing.

7. The settlement of a long-standing dispute with the Maritime Provinces on generous and advantageous terms.

8. The restoration of the natural resources to the Prairie Provinces on a liberal basis, acceptable to all three provincial governments concerned.

9. The encouragement of agriculture through scientific research; the extension of the activities of the experimental farms; the campaign for better seed conducted by the Seed Branch; combating animal diseases; instituting a system of grading, such as eggs, pork, beef, mutton, butter, cheese, fruit, potatoes, etc., thus establishing a standard of excellence in farm products.

10. The extension of the British Preference under the Dunning Budget of 1930, where nearly 600 items on the tariff list are free under the preference, while others have been materially reduced. Increased trade with Great Britain will be an outcome of the extension of the preference.

11. The Dunning Budget of 1930 with its reduction of duties and its provision for reciprocal arrangements with other countries in the way of countervailing duties.

All these points, with many others to the credit of the Liberal government will be elaborated upon during the campaign. The whole record of the government is one of achievement and progress. Vegreville constituency cannot afford to vote against such a government.

I beg also to point out that for over twenty seven years I have resided in this constituency and have extensive business interests here. I am thoroughly familiar with every part of the district and believe that I have a good understanding of its needs. My record as a citizen and as a public man is before you—it will bear the closest scrutiny.

Unemployment has been made an issue in this campaign. But unemployment is a characteristic of large cities and industrial centres, rather than rural constituencies such as Vegreville. But it is fair to point out that I am by far the largest employer of labor, skilled and manual, within the constituency. The remedy for unemployment is work and this I endeavor to supply to as many workmen as possible throughout the year.

If honored with your support and elected to the House of Commons on July 28th, I will, as your member, faithfully endeavor to represent your best interests.

I beg to remain,
Your obedient servant,
CHARLES GORDON

DECEIVING THE BEES

(Experimental Farms Note)

Bees do not work by the clock nor do they cease working when their own food requirements are filled. So long as there is nectar available in the fields and weather conditions are favourable for gathering it, the bees will continue to store honey until their hives are filled. A good colony of bees will often store more than double the amount of honey required for its own use and the surplus is the reward of the beekeeper provided he has the nerve to take it. Bees usually have the unfortunate habit of disputing the ownership of this surplus honey and their methods of arguing the question are not only pointed but painful to the person of the opposition. In the past, the usual method of settling the question was to first destroy the bees with sulphur fumes and then take all the honey in peace. This method, however, was like "killing the goose that layed the golden egg" and valuable property was destroyed. The newer method is to take the honey without the bees knowing anything about it. A piece of equipment known as the bee escape board is placed beneath the supers of honey and the bees passing down through the escapes are unable to return to the supers. If these boards are put in place during the afternoon of a day on which the bees are flying well, the supers above will be free of bees the following morning when the honey can be removed without painful altercations with the owners. Not more than two full depth or three shallow supers should be above the escape board at one time, otherwise it will take a longer time to clear them of bees, nor should there be brood or queens in the supers, for then the bees will not leave them at all. Bulletin No. 33 of the Bee Division, Central Experimental Farm, Ottawa, not only describes the bee escape board and how to use it but also shows a photograph of it.

THE CITY AND THE COUNTRY

(Canadian National Railways Magazine)

THE HOLIDAY season is here now, and people are making preparation to leave the cities for change, rest and recuperation in the country or by the sea. The majority seek the woods and the lakes in which Canada is so singularly rich; indeed, in estimating our wealth we too leave out of account those beauty spots—our lakes—with which Nature has so plentifully endowed this land.

This is an attempt to state the relative values of the country and city life for the average man, and it may be said at the outset that having experience of both, the writer makes a frank advocacy for the country. The question of city versus country is not one fit only for discussion by a juvenile debating society. It is receiving the attention of moralist and economist alike. The exodus from the country to the city, from production to distribution, often from production to parasitism, is a matter of grave concern. Personally I never pass the corner grocery on a back street in the city with its two dozen oranges and other unattractive things displayed in the grimy windows without asking myself why so many people are anxious to sell something to somebody instead of going out and producing something basal.

There are various classes to whom the country has no appeal whatever. There is the man bred in our cities or who comes from some city in the Old Land, to whom country life is unattractive and unintelligible. He would prefer to live on one meal a day in the city rather than fare sumptuously in the country. It is the influence of our old friends—heredity and environment coupled with custom. He wants that to which he has been accustomed and he has neither the inclination nor the initiative to enter other fields, and so he remains a problem.

But another class is the country bred people who flock to our cities because they grow weary of country life. In most cases they are exchanging one weariness for another and a heavier. It has been said that ninety-five per cent. of those who come to the cities to improve their condition would have been better off, healthier and happier had they remained in the village or on the farm. Let us take one or two typical cases:—A young man lives in the country, the long hours, the incessant work which demands hob-nailed shoes and overalls make him dissatisfied with his lot and he longs to be free from it all. He has seen the city with its better clothes, its crowds, laughing, jolly and apparently care-free, and his humdrum duties and isolated life seem dull and dreary. The country girl leaves her comfortable home and—as she thinks—her restricted life for the city, where she exists in a back room redolent with the smell of stale cooking, with scarcely a glint of sun and only cluttered roofs and chimneys to contemplate, but then, of course, there are the lights on the street and the free evenings and the "shows" with all their melodramatic, and often demoralizing slush.

One of the greatest of English poets—Robert Browning—has a satire on all this. It is entitled "Up at a Villa, down in the City." The speaker is bored by the country, but of the city he is enamored. It is "bang-whang-whang goes the drum, and tootle-te-tootle the fife, oh, a day in the city square, there is no such a pleasure in life." And it is the bang-whang-whang of this hollow drum which is the attraction to so many failures and hangers-on. Why all this talk of monotony and lonliness in country life? It is the lack of imagination, and failure to estimate real values which accounts mainly for the disarrangement of the country and the glorification of the populous centres where there are so many houses but so few homes, so many attractions and so little of permanent enjoyment.

I write this on the eve of departure for some weeks in the country. My work in the city is interesting and pleasant but I feel as if I were going from existence to living, to revel in the sunlight and drink in the beauty, majesty and wonder of the uninterrupted stars, to hear the music of the wind sighing trough the pines—music more delectable than any produced by the greatest orchestra of machine-made instruments on earth, to hear the joyous lilt of the bird and in the infinite book of nature to read a little more.

A friend of the writer said, "what can the soul of a child be like who lives in a great city and has scarcely ever seen a blade of grass?" We want beauty even though we may not be conscious of our need and we want it as a moral necessity, for beauty is akin to goodness, so close indeed that the old Greeks used the same word for both.

Let those of us who are holidaying in the country go out with open eyes, with insight and appreciation to store up physical energy for the remaining months and the fruits of imagination for all time, and let those who would exchange the country for the city inquire earnestly whether the exchange is not too great a price to pay for the things that are more fruitful and final importance.

Millers of Great Britain and On The Continent Speak Highly of Garnet Wheat's Milling Value

Ottawa, Ont.—Considerable enthusiasm was expressed among millers of Great Britain and on the continent who [illegible] Garnet wheat as to its milling [illegible]. A report by L. H. Newman, [illegible] cerealist, on the result of the investigations of a specially bagged shipment of this blend of wheat overseas has been made public. For a time at least Garnet should be shipped as a separate variety, instead of mixed with Manitobas. This would give the millers an opportunity of knowing the variety they were dealing with and they could treat it to the best advantage.

[illegible], an early maturing variety of hard red spring wheat, was first available to Canadian farmers for testing in field areas in the spring of 1926. Since then it has become increasingly popular with growers of wheat in the prairies, particularly in the northern districts. The question arose should Garnet be allowed to go into the highest grade of Manitoba Northern wheat without restriction of any kind or would it be preferable to set up at least one or two separate grades for the accommodation of the variety or to continue to handle it as at present.

The Federal Department of Agriculture decided to submit Garnet to test by millers in the United Kingdom and in different European countries. A year ago 6,700 bushels were shipped overseas to men expert in milling to obtain their opinions as to its suitability. These men were asked a series of questions, and Mr. Newman's report includes the replies they made.

In his summary of the results obtained from this test Mr. Newman states that while practically all investigators have expressed the opinion that Garnet wheat or mixtures containing the same, might have to be "conditioned" a little differently than would be the present Manitobas, yet this fact did not seem to be of serious moment.

On the other hand, a number of investigators spoke with considerable enthusiasm of the good milling qualities of Garnet wheat when milled alone or in mixtures. It should [illegible]

are able to buy it separately as Garnet wheat. In fact, it has a distinct value of its own, but if mixed with Manitobas, it will not only lose its own distinctive value but will tend to greatly lower the distinctive value of the Manitoba wheats. If your farmers can send forward Garnet wheat of as good a quality as this particular shipment, I do not think they need fear having to sell it at a great discount as compared with Manitobas."

"The question as to how Garnet compares with ordinary Manitobas for blending with [illegible] wheat, is one which obviously could not be answered very definitely in an investigation which had to restrict itself to the crop of a single year. There was some evidence, however, to show that there might be times when by reason of some peculiarity in the season prevailing in certain wheat-producing countries, wheat of the characteristics of Garnet might actually be of greater value for blending purposes than would our present Manitobas. Similarly, there might be times when the latter wheat might be worth a little more for blending purposes. It was also shown that a mixture of Garnet and of Manitobas in fairly definite proportions might, under certain circumstances, produce better results than if either of these two wheats were used alone in the blend.

"While the questions asked specifically of the bakers have been fairly well answered already, yet there are a number of points raised which are worthy of special consideration. Thus, the questions of absorption and bread yield, are points of importance. The findings of practically all of those participating in the present investigation, are closely in agreement with the following conclusions: 'Generally speaking, the flour of Marquis absorbs a little more water than does that of Garnet, and consequently, is inclined to produce a little higher bread yield. Since ordinary Manitobas at the present time consist largely of Marquis, it may be safe to assume that the tendency is for the former to absorb a little more water than is absorbed by Garnet.'" Checking Up On Resources

Gathering Data On Mineral Deposits and Water Power Possibilities

For the purpose of mapping, investigating mineral deposits and water-powers and getting further accurate data concerning the wide variety of natural resources throughout the Dominion, the Canadian Government Geological Survey has 58 parties at work this year in different parts of the country.

Thirteen parties will make topographical surveys. Three will investigate geophysical methods of prospecting and two will collect specimens for the national museum. The other 40 parties will be engaged in a variety of investigations. The most northerly party will work near Chesterfield Inlet on Hudson Bay, in latitude 63 degrees, the most westerly one will be in the Yukon Territory, and the most easterly at Sydney, Nova Scotia.

Forty-six of the parties will be in charge of permanently [illegible] officers of the Geological Survey. The other parties will be in charge of university teachers or specialists from other institutions, who are employed during the field season. With the parties will be 115 university students in geology and engineering.

Fraser River Lumber Exports

Lumber exports from the Fraser River during the first four months of the year amount to 62 million feet. Approximately 4,000 tons of box shook, veneer and lath, and 15 million shingles, were exported during the same period.

Highly skilled laborers are being imported into Venezuela.

Nearly 1,000 new chain stores were opened in Canada last year.

Among the World's Best

Canadian Entries In British National Laying Contest Make Good Records

A report recently received by F. C. Elford, Dominion Poultry Husbandman, shows that Canadian entries in the Overseas Section of the British National Laying Contest now being conducted in the Old Country, are among the leaders, holding third and fourth places respectively. A pen of White Leghorns entered by C. D. Calder, of Cowansville, P.Q., holds third place with a total score of 835 points, while a pen of the same breed entered by J. C. Quantry, Port Dover, Ont., holds fourth place with a score of 782 points. The leading pen in the international contest is an entry of Rhode Island Reds from France, total score 936 points. Second place is held by an entry of the same breed from Ireland with a total of 924 points. With some weeks yet to go the position of the Canadian entries may be materially improved if they keep up their present excellent performance.

Regina's Population Increasing

Present Population Is Now Estimated To Exceed 65,000

By the time of the staging of the World's Grain Exhibition in Regina, in 1932 (from July 25th to August 6th) it is likely that the city's permanent population will be in the region of 75,000 or 80,000. The 1929 Henderson's Directory and the Post Office Department place the present population at between 62,000 and 65,000 while the Board of Trade makes a conservative estimate of 65,000. The transient population of Saskatchewan's capital will rise considerably with the approach of the big Fair

ALPINE MEMBERS CAMP ON MOST BEAUTIFUL LAKE IN ROCKIES

Where year by year increasing thousands are turning to it for rest and recreation, finding among its glorious ranges and by its exquisite lakes continual stores of joy and health, Jasper National Park will be visited this summer by Alpinists of the 25th Annual Camp of Alpine Club of Canada, in the Maligne region, July 29th to August 12th. [illegible]

Growth of Western Provinces Within Recent Years Has Been One of Great Modern Romances

On July 15th the Province of Manitoba celebrated its diamond jubilee as a province of Canada. Manitoba was created a province in 1870, and began its career as such on July 15th of that year. The name Manitoba is a contraction of the Cree word Manitowapow and is said to mean "The God That Speaks."

The first white men to set foot in what is now the province of Manitoba were Pierre Gaultier de Varennes La Verendrye and his sons, about 1732. In the early part of the nineteenth century Lord Selkirk began to establish a settlement of Scottish families on the Red River and this became the foundation stock of the [illegible] white settlement in Western Canada.

In 1870 the province of Manitoba consisted of only a comparatively small section of land on both sides of the Red River. It has since then been twice enlarged and now has an area of 251,832 square miles. The population of the province 60 years ago was about 25,000, now it is over 630,000. The total population of Western Canada in 1870 was about 100,000. In 1930 it is about 2,650,000. Winnipeg, sixty years ago, was a settlement of a mere handful of people; in fact the official census of 1871 gave it a population of 241. Now it is one of the most modern cities of the world with a population of over 300,000.

The growth of Manitoba and of the other provinces of Western Canada in comparatively recent years has been one of the great romances of modern times. Sixty years ago Western Canada was practically virgin territory. Railways did not link Manitoba with the Eastern provinces until the early eighties. Hardy pioneers had begun to flock into the province in advance of the railways, driving their yokes of oxen with their families, and all their worldly possessions loaded on a "prairie schooner" or Red River cart. Many of these pioneers received free land from the Canadian Government. Scarcely any of the rich fertile soil had then been brought under cultivation. The farm machinery of the time was crude, there were no competent advisers, Government experimental farms did not come until several years later. Yet those hardy pioneers stuck it out and numbers of them are enjoying their declining days in the communities they wrested from the wilderness, prosperous, contented with their children's families gathered about them. They have seen civilization step into the west and the wilderness swept out. Today are thriving cities and towns where bleaching buffalo bones marked the outrails of 60 years ago. Today are mighty freight trains, each with its thousand-ton cargo of wheat or merchandise roaring down the roads where the old carts creaked. Today are schools within walking distance of every farm house, churches within driving distance of every home. Today are telephones, radios and every modern con[illegible] linking communities over vast distances by the common bond of the spoken word.

Canada now ranks as the largest wheat-exporting country in the the world, and the second largest producer of wheat, over ninety per cent of which is grown in the three Prairie Provinces. The wilderness of a few decades ago is now one of the world's greatest granaries and also a substantial contributor of other grains, livestock, dairy products, manufactured goods, etc.

If La Verendrye, Selkirk, and others of the early pioneers had been present at the Diamond Jubilee celebration of the creation of the province of Manitoba, they would undoubtedly have been overwhelmed with the metamorphosis that has taken place not only in the area of their original settlements, but throughout the whole Dominion. Yet notwithstanding the marvellous development that has taken place in Western Canada in the past 60 years only about one-fifth of the land suitable for farming is under crop and millions of acres still await the plough. The opportunities of Western Canada are today even better than when the hardy explorer, La Verendrye, arrived in Manitoba from his native town of Three Rivers, Quebec, about two hundred years ago, and Lord Selkirk established the settlement of his courageous kinsmen on the Red River about 100 years ago.

Pattern price 15 cents. [illegible]

To Benefit Agriculture

Idea Behind World's Grain Exhibition Is Outlined

"It is the wish of the World's Grain Exhibition and Conference executive to make the conference representative of the world's best thought along practical and scientific lines," says the official booklet covering the fair at Regina from July 25 to August 6, 1932, "and to secure outstanding contributions from all countries whose experts are recognized as leaders in their particular lines. It concerns really to the organizing of a conference that will constitute a clearing house for world thought and knowledge on every important problem of food crop production and marketing."

Paid Old Debt

A 40-year-old eight dollar debt, which was incurred at the funeral of Jane Gibson, in Vincennes, Ind., negro woman, was paid a few days ago when a son called at a local undertaking establishment and settled the account. The proprietors had forgotten it.

It is estimated that the dirt hanging in the air over Manhattan Island weighs more than 125 tons.

"Doctor, can you tell me a cheap cure for fatness?"

"Certainly, madam, the cheapest is the fasting-cure."—Hummel, Hamburg.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Esme Howard, British ambassador to the United States, who was granted a barony on the recent King's birthday, has taken the title of Baron Howard of Penrith.

Professor Ludwig Stein, internationally known philosopher and author, died at a nursing home at Salzburg, Austria, after an operation. He was 70 years old.

Canadian shipping companies had the bulk of the wheat business on the Great Lakes last month, according to the report of the Lake Shippers Clearance Association.

The British Government is highly pleased by the shipbuilding holiday agreed to by France and Italy, Premier J. Ramsay MacDonald told a questioner in the House of Commons.

The financial situation among Chicago's 12,000 public school teachers is once more acute. It is vacation time and pay cheques are three weeks overdue. To date the back pay amounts to $6,000,000.

Hundreds of thousands, celebrating 300 years of Massachusetts history, heard Sir Ronald Lindsay, British ambassador, bringing the greetings of the ancient mother state to the sovereign state of Massachusetts.

G. W. Jones, Canadian expert on taxation, has arrived at Canberra, Australia, at the invitation of the government of the commonwealth, to advise the administration regarding the operation of the sales tax introduced in the budget brought down recently.

British unemployment figures still are soaring upward, a government report indicated. The Ministry of Labor announced that on July 7 the total out of work was 1,933,500, a gain of 42,925 over the previous week and [illegible] more than the same period last year.

Will Increase Safety In Steel Construction

Electrical Finger "Feels" Strain In Steel When Under Great Pressure

An electrical finger that feels the invisible twists and strains in steel under great pressure was described to the American Society of Testing Materials.

The purpose is to increase safety in construction by making under conditions of actual use tests heretofore confined to research laboratories. The device was described by J. P. Shamberger of Pittsburgh, who said it was designed by F. G. Ritter of the Westinghouse Electric & Manufacturing Company.

No longer than a human finger and not much thicker, it bolts to the side of a rail and records the bending as a 100-ton locomotive thunders over. If placed on a curve it will show the side twist of the rail under the locomotive's thrust. It can be laid upon an automobile wheel to detect how nearly bumps come to causing over-strain.

The finger works somewhat like a slide rule, being of two parts which telescope. This telescoping amounts only to the diameter of a tremor or a vibration, that is, something like one ten thousandth of an inch. Even so slight a motion slides a piece of iron to or from between two sensitized electrical instruments on the finger.

These instruments correspond to the sense of touch. They detect the motion of the bit of iron, and with it the distortion which causes the movement. They register this movement by slight electrical changes.

The "nerves" of the finger then come into play. They are plain wires, which carry the slight electrical disturbances to instruments that amplify them into movements an inch long, that can be calibrated in terms of wear and tear.

Bright Spots At Port Churchill

Northern Port Now Boasts Of Four Lady Residents

Up on the rocky shore of Hudson Bay, Churchill was once "No Woman's Land." For five years—including the winters—Mrs. A. Gibson, wife of the Church of England minister, has made the new port her home. But this summer Churchill boasts its largest contingent of femininity: four women.

Three new lady residents came north on the Muskeg Limited late in May. They were: Mrs. S. Martin, wife of the United Church missionary; her daughter, Margaret; and Mrs. Claude Johnson, wife of the divisional engineer of the Canadian National Railways. All three will reside at Churchill until autumn.

Victim of Hay Fever: "I should like a bottle in my bed tonight, Mary."

Mary: "Yes, sir. Irish or Scotch?"

A Girl Fire Warden

Young Californian Guards Hundreds Of Square Miles Of Forest

Most people start at the bottom of the ladder and work up. A young Californian girl, however, says an article in the Young People's section of the London Daily Mail, has started as high up as it is possible to get, and is doing her exalted job very well.

She is employed as a watcher for forest fires up in a veritable eagle's eerie on the very highest point of Black Mountain, almost 8,000 feet above sea-level, in the San Jacinto range.

From her little log cabin, raised on stilts to give a clear view over the topmost trees, she looks out over hundreds of square miles of forest, signalling immediately when she sees a suspicious column of smoke by day and flickering flame by night.

An Alsatian dog named Mina is her only companion. Food comes up to her on the back of a mule. For water she has to climb some way down to a point where engineers of the Forestry Service dammed up a spring for her.

She admits that she does not like the thunderstorms, when lightning flickers all around her watch-post, but declares that she seldom feels lonely, for she was born in a cottage in the mountains and has always been accustomed to their picturesque solitude.

Grain Stocks Decrease

Grain In Store At End Of June Shows Decrease Of Over Three Million Bushels

Returns received as to stocks of grain in store for the week ended June 27, 1930, show a decrease of 3,277,306 bushels, according to a report issued by the Dominion Bureau of Statistics. Stocks for the week were as follows: Wheat, 12,735,712. Oats, 9,937,331. Barley, 22,620,164. Flax, 812,382, and Rye, 5,241,000, a total of 172,158,000 bushels. Decreases are noted in wheat of 2,281,603. Oats 336,360. Barley, 3,771. Flax, 38,061 and Rye, 387,411 bushels. For the same week last year the amount in store was 146,620,622 bushels.

Judging By Actions

A California paper reports: "After the ceremony, Smith declared, he visited his father-in-law, Daniel Roney's house, whereupon his mother-in-law hit him over the nose, drawing first blood, and his father-in-law fired at him twice with a shotgun. The police believe the Roneys objected to the match.

Candy making is one of the least hazardous of the specialized industries, both from accident frequency and severity.

British airplanes now in regular use carry 22 passengers.

SUNDAY SCHOOL LESSON

JULY 27

DEBORAH "A LEADER IN A NATIONAL EMERGENCY"

Golden Text: "Say to them that are of a fearful heart, 'Be strong, fear not'." Isaiah 35:4.

Lesson: Judges 4:1-13.

Devotional Reading: Psalm 68:4-11.

Explanations and Comments

The Oppression At the Hands Of Jabin, verses 1-3. When Ehud was dead, the Israelites were oppressed by the Philistines, and for fear of them travellers left the highways for the byways. With only his ox-goad as a weapon, probably at the head of many other peasants similarly armed, Shamgar killed six hundred Philistines. Then came a crisis. Jabin, king of the Northern Confederacy of the Canaanites, through Sisera, his commander-in-chief, had for twenty years held a military despotism over the northern districts of Canaan. The children of Israel cried unto Jehovah for help, for Jabin had nine hundred chariots, and they lived on the hills and had none.

Deborah Summons Barak To the Defense, ver. 4-7. The name Deborah means "Bee," and Matthew Henry, that ancient interpreter of the Bible, sees in Deborah, the judge, the fulfilment of her name by her industry, sagacity, and great usefulness to the public, her sweetness to her friends and sharpness to her enemies. She was a prophetess and the wife of Lapidoth. To quote Matthew Henry again: "The termination not being commonly found in the name of a man, some make this name the name of a place: she was 'a woman of Lapidoth.' Others take it appellatively, Lapidoth, signifying 'lamps.' The rabbis say she had employed herself in making wicks for lamps of the tabernacle, and, having stooped to that mean office for God, she was afterwards thus preferred. Or she was a woman of illumination, one that was extraordinarily knowing and wise." Between Ramah and Bethel, in the hill-country of Ephraim, she was wont to sit under a palm-tree as judge, perhaps not so often to settle disputes between man as to declare what was the judgment of God in national affairs, and the tree was therefore called the palm-tree of Deborah.

Barak Requires Deborah's Aid, verses 8, 9. Barak was not brave enough to start forth alone, and refused to go unless Deborah would go with him. Deborah consented, but added that he would not have the honor of the result, for Jehovah would sell Sisera into the hands of a woman. Sisera was killed by Jael, a woman (verses 17-22), but Deborah's words seem rather to apply to herself, that to her, rather than to Barak, would be given the credit for the victory.

Why They Are Flying

Air travellers, during a recent period, were asked why they were flying. Out of 566 passengers, 253 were on business, 146 for the "joy ride," 103 because they preferred the air, 53 to visit friends, theatres, etc., 12 on a tour, and only 1 to take part in a sporting event.

The trap door spider covers its tunnel with a trap door, neatly beveled to fit the opening, and hinged at one side. The door is made of alternate layers of silk and soil.

An "intelligent" perfume filling apparatus has been devised, which refuses to drop any liquid into a bottle that happens to be imperfect.

Consume More Meat

Substantial Increase In the Quality Of Meat Consumed By the Average Canadian

Reports of the Live Stock Branch of the Dominion Department of Agriculture, show a substantial increase in the quality of meat consumed by the average Canadian, particularly beef, lamb and mutton. In 1928, the home market absorbed 648,800,000 lbs., while in 1929 it absorbed 676,800,000 lbs., an increase of 28,000,000 lbs. of beef, or roughly 2 lbs. more per capita. The Canadian market consumed 70,800,000 lbs. of lamb and mutton in 1929, compared with 62,200,000 in 1928, an increase of 8,600,000 lbs., or nearly 1 lb. per capita.

A Good Definition

Col. "Pat" Hurley, of Oklahoma, is a lawyer, but his business interest is oil and real estate. His definition of oil operators is: "An oil operator is a man who doesn't know whether he is four feet from $1,000,000 or 1,000,000 feet from $4.

A property in Durham, England, is held at the "rent" of three grains of pepper yearly.

Outdoes King Of Birds

Flock Of Eagle Raiders Were Annihilated By Airplane

After longing for unnumbered centuries to fly with the wings of an eagle, man has at last even outdone the king of birds. A flock of eagles raiding the sheep ranches near El Paso, Texas, were annihilated by an airplane with a passenger carrying a shot gun. In eight hours the 'plane had accounted for nine birds which a rancher had been trying to shoot from the ground for a year.

White Pine Best For Patterns

White pine is used for 90 per cent. of the patterns made in North America. The reasons for this, are, that white pine, more than any other wood, is easily worked, is of soft texture, is comparatively strong, is very durable and, most important of all, has very little shrinkage, which gives it the power to hold its shape indefinitely after being worked.

Sir Harry Lauder's last annual farewell tour of this country, scheduled for 1931, has this distinction: That he will be seen on it by people still living, who saw him on his first.

Canada's Gold Production

Production In Canada Now Larger Than That Of U.S.

Canada has certainly been making rapid strides in gold production as compared with the United States, and last year the total production of gold out of Canadian territory was actually larger than taken out of United States. The United States, however, has also reports on production from gold mines in Alaska and in the Philippine Islands. According to mining engineers it is only a matter of a little time when the gold mines in Canada will be producing considerably in excess of what the United States is turning out, because the tendency is for the United States to report a smaller production, whereas many of the principal Canadian properties are gradually reporting a still larger output. Twenty-five years ago it was not thought that Canada would overhaul the United States in 100 years, and yet it has been able to achieve it in less than a quarter of a century.

Made Fortune From Linoleum

Ingenuity Of Englishman Started Him On Road To Wealth

Lord Ashton, whose amazing fortune was between thirty and forty millions, owed his wealth originally to his clever father's ingenuity, says the News of the World. The father was a working house painter who started a little shop in Lancaster, where he combined with his trade a picture-framing business. When oilcloth was introduced from America he improved on it by giving it a backing of powdered cork instead of cloth. So linoleum was invented and his fortune made. Lord Ashton himself worked in his father's factory from an early age and proved a wonderful man of business.

A toad gets his meals by snapping his long tongue out at any insect coming within reach. The end of the tongue is sticky, and few are the insects that can escape its grip.

"Why haven't you written out your lines: 'I must sit still'?"

"But I couldn't write them when I had to sit still, sir."—Moustique, Charleroi.

W. N. U. 1947

FASHION

A most attractive cotton shantung in "Buddha" yellow colouring that will tub just beautifully and always appear smart and new, will add chic to your summer wardrobe for mornings and porch.

Striking contrast is achieved through rolled shawl collar of white pique. The turn-back cuffs, pocket flaps and belt repeat the pique. The buttons are yellow with white rims.

The saving by making this becoming dress is enormous.

It is a slim straight type with a panel effect at the front which contributes charming length to the figure. Inverted insets at either side of the front provide ample fulness to the hem and yet retain its straight slender lines.

The belt holds the garment closely to the figure, creating the new pinched in waistline. This belt is passed underneath the front and through the bound opening at the right side.

Style No. 3489 can be had in sizes 16, 18 years, 36, 38, 40, 42, 44 and 46 inches bust.

It takes but 2¾ yards of 40-inch material with ⅜ yard of 36-inch contrasting to make this one-piece dress for the woman of average figure.

It is equally smart-fashioned of men's cotton shirting fabric that is used so extensively this season for sports frocks. Cut the insets, belt, pockets, cuffs and collar on the bias for contrasting trimming effect.

Printed pique, linen, printed batiste, printed dimity, tub silks and pastel handkerchief lawn are lovely ideas for its development.

Pattern price 25 cents in stamps or coin (coin preferred).

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Canada's Exports To China

Include Hot Water Bottles, Newsprint and Milk

A unique Canadian export to China is large quantities of rubber hot water bottles. Unique, that is, in point of the purpose to which they are put, as they are used by the Chinese of all classes as part of their wearing apparel in winter and are replenished from innumerable hot water shops found on every street corner in Chinese cities.

Other goods which it seems strange to be shipping from Canada to such a far-off land as China, are ice cream, frozen strawberries and fresh milk. These are sent to the Orient from British Columbia.

Another interesting fact is that some of the greatest Chinese daily newspapers are printed entirely on Canadian newsprint, and large quantities of Canadian wood-pulp are used by the Chinese commercial presses, according to a report received here from the Canadian government trade commissioner at Shanghai.

China may seem a far-away country, known chiefly for its endless internal strife and silk and curios, though it had its golden age when Europe was still in the darkness of barbarism. Yet it is one of the great modern trading countries of the world, with a total annual commerce of over $2,000,000,000.

Origin Of Figures

Figures Used In English Were Copied From the Arabic

The origin of figures is almost lost in the darkness of time. Hindus, Chaldeans, Egyptians and Chinese knew figures, or at least, used for their own calculations signs corresponding to our figures. Hebrews and Greeks employed as figures the letters of their alphabets. The Romans used for figures the initial letters of the numbers they wished to designate. The Arabs borrowed the form of their figures from the designs on Solomon's ring which represented a square crossed by two diagonals. Make this design and see for a fact that in it is found all the figures used in English, which are copied from the Arabic, with the corners rounded.—La Liberte.

Kootenay National Park

The Kootenay National Park in the province of British Columbia is unique among the other Canadian reservations. It was created originally to preserve in perpetuity the beauty of the natural landscape, the charm of native animal and plant life, and the peace and harmony of the area along the route of the Banff-Windermere Highway, the first motor road across the Central Canadian Rockies.

Egg Laying Contest

Barred rocks owned by Miss H. M. Purdy, of Balcarres, Sask., continued to lead the Manitoba Egg Laying Contest at Brandon Experimental Farm, at the end of the thirty-second week. This pen had a total of 1,409.4 points and 1,304 eggs. A pen of the same breed owned by the Sunton Poultry Farm, Welwyn, Sask., led for weekly production with 49.1 points and 57 eggs.

Rheumatic Pains

Minard's affords a sure relief, when rubbed on the affected parts. A quick, effective pain killer.

MINARD'S LINIMENT

W. N. U. 1947

An Animal Prison Camp

Sight Of Captured Beasts Is Pathetic Says Sir Percival Phillips

Fifteen miles from Singapore, on a lonely patch of treeless swamp hemmed in by jungle and an arm of the sea, is one of the strangest prisoners' camps in the world and the most pathetic, writes Sir Percival Phillips, in the London Daily Mail.

It is the place where the zoo begins. Here the wild beasts, birds, and reptiles caught in Malaya and adjacent islands begin their lifelong captivity. From this primitive clearinghouse they are consigned to hard labor in a circus or painful inactivity in a private menagerie or a public zoological garden.

It is an ill-assorted community of the jungle, bound together by ferocity and despair. I have never seen such manifestations of anguish and hate as are witnessed here whenever a human being comes within sight. All the prisoners are newly caught, and they refuse to believe that the rough timber cages are real. Their cries of rage resound hideously in the wilderness, and their desperation is pitiful to see. They sleep but little, and the night is broken by their cries.

Here, in the vast silence of the jungle, the strangely assorted captives are allowed to exhaust their fury and gradually to accept their fate. Buyers come to look them over and haggle with the Indian proprietor of the camp. All are for sale. I could have bought a crocodile or black panther at a fair price, or taken away a cobra in exchange for Straits dollars. Consignments leave every little while for Europe or America.

The Rancher Prince

His Royal Highness Doing Valuable Work In Improving Livestock In Canada

Canadians should feel a sense of satisfaction in the fact that His Royal Highness, the Prince of Wales, is increasing his investment in this country. He is adding 2,249 acres to his ranch holdings in Alberta, and is taking up also the mineral rights on this large tract of property.

There is cause for double satisfaction on the part of Canadians. In the first place, it is gratifying that the Prince is so interested in this Dominion, and thinks so well of it, that he chooses to establish here a home which he evidently intends to visit often. He has given every indication of enjoying greatly his necessarily brief stays on his famous ranch.

There is a more tangible reason, however, for appreciating His Royal Highness' entry into the life of Canada. He is spending considerable money in Alberta in the raising of thoroughbred stock. He is thus doing a valuable work in improving the strain of horses and cattle in the Dominion, and such an activity is worth while, whether it be engaged in by Prince or peasant.—Border Cities Star.

Wheat Pool Initial Payment

Payments For 1930-31 Grain Crop Are Set By Central Selling Agency

Initial payments for the 1930-31 grain crop are set by the Canadian Wheat Pool. Far down from the values set a year ago for the West's crop, the first payment on all grain delivered to the Pools, July 16, and thereafter are as follows:

Wheat: 70 cents per bushel on No. 1 Northern, Fort William.

Barley: 25 cents per bushel on No. 3 C.W.

Oats: 20 cents per bushel on No. 2 C.W.

Rye: 30 cents per bushel on No. 2 C.W.

Flax: $1.25 per bushel on No. 1 N.W.

July 15 is "cut off" date for the 1929-30 pool, so that all grain delivered after that date is credited to the 1930-31 pool. The initial prices were announced by the central board of the central selling agency of the Central Wheat Pool.

Taking No Chances

An old southern planter met one of his former negroes whom he had not seen for a long time.

"Well, well," said the planter, "what are you doing now, Uncle Amos?"

"I'se preachin' of de gospel."

"What, you preachin'?"

"Yassuh, marster, I'se a preachin'."

"Well, well, do you use notes?"

"Nossuh. At de fust I use notes, but now I demands de cash."

The first electric transmission system in the United States was at Folsom, California. The power lighted Sacramento.

Iceland's imports last year totaled nearly $18,000,000.

Descend To Great Depth

New York Scientists Go Down 1,426 Feet In Ocean

Two United States scientists working from Nonsuch Island penetrated in a steel sphere to a depth of 1,426 feet, or nearly five times as much as the previous low depth record of diving with any kind of apparatus.

Dr. William Beebe, head of the Bermuda Oceanographic Expedition of the New York Zoological Society, and Mr. Otis Barton, of the American Museum, New York, were the explorers, and were "battened down," in a steel sphere, with an internal diameter of 57 inches, and several inches thick, fitted with fused quartz observation windows, a telephone to communicate with the tug from which it was lowered, and equipment to keep the air pure—oxygen tanks for supply and a quantity of sodium to intermix with and render harmless the carbon dioxide exhaled.

When the two scientists had been made fast, the sphere was lowered at a fair speed from the deck of the tug into the water, which has a depth at this point of about 800 fathoms. A calibrated meter attached to the winch registered 1,426 feet when Mr. Barton, who was looking after the telephone, gave word to stop. A counter-check obtained by marking off the cable in 100 foot lengths showed 1,428 feet, or an experimental error of less than 0.15 per cent.

At this point the water above the sphere exerts a pressure of 652 pounds to the square inch, or over 43 atmospheres, and the actual weight of the water on the sphere would be about 3,100 tons. In spite of the extraordinary conditions, the sphere showed no sign of failing to withstand the terrific strain imposed upon it, and the men below reported that they felt no discomfort whatever.

After over an hour at this unprecedented depth, Dr. Beebe and Dr. Barton asked to be hauled up, and reached the deck of the tug 1½ hours after leaving it, and still suffered no discomfort from the pressure.

A Gruesome Luck Symbol

Parisians Are Superstitious About Bit Of Hangman's Rope

A story comes from Paris of a wealthy South American woman who has lost a piece of hangman's rope. So long, it seems, as she had the rope, luck favored her. Her husband found gold and made a fortune out of a company. She herself won a prize in a Spanish lottery. Then she moved into a magnificent flat in the Champs Elysees. The rope was lost during the removal. And the lady is inconsolable. The superstition about the luck of hangman's ropes is an old one which is most current in France, where, curiously, people are not hanged. And frequent requests are received by influential Britons to obtain through the Home Office une corde de pendu, or at least a portion of one.

Persian Balm invests every woman with subtle charm. Delicately fragrant. Cooling and healing. Dispels all roughness or chafing. Makes skin delightfully soft-textured. Every woman should use this peerless toilet requisite. Daintiness, beauty, refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm, unhesitatingly choose Persian Balm.

Turner Valley Oil

Production from the Turner Valley oil wells in May amounted to 85,640 barrels as compared with 87,278 barrels in April. Of crude oil there were 4,619 barrels, of discolored crude naphtha 22,314 barrels and of crude naphtha 43,847 delivered to the Imperial Refinery, the balance being taken by the Regal Co.

Defies Chain Letters

Madame Sigrid Undset, the famous writer and Nobel Prize winner, recently announced that she had "broken at least 20 letter chains and experienced no misfortunes—if the award of the literary Nobel Prize is not regarded as a misfortune." She added that she tore up one chain letter on the morning of the day when the Nobel Prize was awarded to her.

Lack Education

Seventy-five per cent. of the inmates of Sing Sing prison have no more education than that of a sixth grade pupil, N. J. Hennel, head teacher of the bureau of special schools in the New York state department of education, finds.

The Age Of Progress

Nearly All Important Inventions Introduced During the Past Hundred Years

If it was kept in mind just how young this modern age really is, men and women living in it might not be so cocky, taking for granted, as they do, conveniences as if they always existed. If all the main inventions of the past hundred years were suddenly destroyed and all their plans lost, it would be surprising to find what chaos would exist.

All modern means of communication date within this modern century: telegraph in 1833, telephone in 1861; and much more recently the radio and television.

Nearly all modern construction is dependent on high explosives. Guncotton and nitroglycerine were invented in 1846. Dynamite dates from 1867.

Modern transportation facilities include the gas-driven internal combustion engine, which made possible the automobile, invented in 1854, and in 1900 the alkaline storage battery, added to the feasibility of such transportation. The electric railway is only 50 years old. The airplane is well within modern memory.

Business would be sadly crippled without the typewriter, 1878, and the electric lamp, 1879.

Modern pleasure depends largely on the phonograph, 1877, the movie, 1891, and the talkie, 1913.

This list seems an effective antidote for cockiness.

For Protection Of Blind

Manitoba and Saskatchewan Appoint Expert To Look After Their Welfare

Col. H. Burritt, principal of the Pennsylvania Institute for the Blind, has been appointed by the governments of Manitoba and Saskatchewan to investigate and report on matters appertaining to the welfare of blind persons within the two provinces. This announcement was made following a meeting at Winnipeg between Premier J. T. M. Anderson, of Saskatchewan, and Acting Premier Robert A. Hoey, for Manitoba.

Appointment of the noted Pennsylvanian educator follows recommendation by a special committee of the Manitoba legislature for setting up such a commissioner. The committee received a petition asking pensions for blind persons.

Pays To Be Polite

Charitable Institution In Australia Reported To Have Lost Donation Through Discourtesy

Because a secretary was discourteous, a charitable institution in Sydney, Australia, is reported to have lost $30,000.

Charles McNess, western Australian millionaire and philanthropist, walked into the institution and asked to see the governor "on private business."

"If you can't state your business, you can't go in," replied a secretary tartly.

"Well," said McNess, "if that's the way you treat poor people I might as well tear this up."

He tore up a cheque for $30,000 and gave the secretary the fragments.

Minard's Liniment gives quick relief.

Construction Contracts

The month of June showed an increase of 16.7 per cent. in the value of construction contracts awarded throughout Canada, says "McLean Building Reports." Awards were greatest in the business buildings classification, 37.1 per cent. of all construction came in this group.

Special crossword puzzles in which the letters are "pegged" into squares on cardboard forms are made in Paris for the use of the blind.

Modern girls not only dress fit to kill (according to a cynic), but they cook the same way.

Nothing can take the place of Enameled Ware. Identify it by the SMP label of quality.

Her Three Children Troubled With Diarrhoea

Mrs. Leo Lapointe, Laurier, Man., writes:—"My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Authorities Are Puzzled

Condemned Man In Estonia Chose Of Canning Fruits and Escapes

Serge Vasilanko's stomach has literally saved his neck.

Sentenced to death, Vasilanko was given his choice between the poison cup and the noose according to Estonian law. He chose the hemlock draught, in true Socratic fashion, drained it to its bitter dregs and then refused to die. Languishing for some weeks in the hospital, his sturdy body battling the poison, Vasilanko finally rose from his bed a few days ago, fully alive.

The authorities were puzzled. There was no precedent for this. They had given the prescribed dose, but the man still lived. Courteously they offered Vasilanko the business end of a hangman's rope, but he sent regrets.

"I have complied with the law to the letter," he said. "I see no reason why the ceremony should be repeated."

And until someone finds a reason to the contrary, Vasilanko lives a free man, with a stomach to be proud of.

Warship Saves Woman's Life

Exciting Race Of Australian Warship "Anzac" In Teeth Of a Tornado

The exciting race of the Australian warship "Anzac" in the teeth of a tornado to save the life of a lighthouse keeper's wife has thrilled Australia.

When word was received that Florence Broderick, pretty 21-year-old wife of the lightkeeper of Gabo Island, was dying, the "Anzac" was ordered to sea with a surgeon. After being battered by the storm and swept from end to end by mountainous seas, the warship hove to off the barren island.

Bluejackets rowed the surgeon through the surf to the rocky shore and all that night he remained at the woman's bedside. In the morning he was able to report that the crisis had passed and the patient was out of danger.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

Alberta Development Board

Southern Section Has a Fine Record Of Achievement

"The Alberta Development Board, southern section, enters the third year of its operation with a fine record of achievement," says the Calgary Herald, "which is no less remarkable and valuable because it cannot always be reckoned in exact dollars and cents benefit to the people of the communities which it serves." The Board's work covers a wide variety of activities, all designed to make known the attractions and industrial and other opportunities of the area covered.

Remove all callouses and enlargements from your stock with Douglas' Egyptian Liniment, a wonderful remedy.

Argentina Wheat

Maintaining Lead Over United States In Shipments To Britain

Argentina is maintaining a steady lead over the United States in wheat shipments to Great Britain, England's import figures for that cereal recently made public revealed.

Shipments from Argentina reached their peak last year when the South American republic's total was 84,776,496 bushels against America's 41,563,124.

This year's figures to June 30 were, United States 12,304,152, Argentina 19,187,620, while in 1928 the figures were: Argentina, 45,545,360, and United States, 44,170,065.

Argentina Buys Canadian Apples

A demand for quality Canadian apples in Argentina, which should give an opportunity to Canadian fruit shippers, has been reported to the Department of Trade and Commerce by O. M. Armstrong, Acting Canadian Trade Commissioner at Buenos Aires. Canadian apples were favorably received last year when they were first sold in Argentina.

Little Helps For This Week

"Let every man prove his own work, and then shall he have rejoicing in himself alone, and not in another."—Galatians vi. 4.

Nor serve we only when we gird
Our hearts for special ministry;
That creature best has ministered
Which is what it was meant to be.

"I have desired," says King Alfred the Great, "to live worthily while I have lived, and after my life to leave the men that should be after me a remembrance in good works." How lofty the simple words are! Duty, not romantic achievement, is the aim of his life; not to do some "great thing," but the right things, the right thing being simply what God gave him to do. He seems to have felt in his inmost being that each man was sent into the world, not to live like some one else, but to do his own work and bear his own burden, precisely the one work which God has given him, and which can never be given to or done by another.

—Elizabeth Charles.

Terribly Weak

Strength Regained Through the Use of Dr. Williams' Pink Pills

"After the birth of my baby I was terribly weak," says Mrs. Joe Morasse, Dupuy, Que., "and could not sleep or do my housework. I was despondent and was afraid I would be a constant invalid. I began taking Dr. Williams' Pink Pills, and before long my health was restored and I could do my housework without fatigue. Since then I have used these Pills on two other occasions with splendid result."

Dr. Williams' Pink Pills enrich and purify the blood. That is why better sleep, steady nerves, improved appetite and increased vigor follow their use—all these can be yours if you start treatment today. The Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Stamps Cleverly Forged

Were Used By British Secret Service During War

A little known phase of the Secret Service in the war was revealed in an auction room in London, England, recently, when nine used German stamps were offered. They were forged by the British Government for the use of spies dropped behind the enemy's lines. Careful search by philatelists has revealed only minor flaws in the designs, and the paper, water-mark, and perforations are excellent. Two values were made, the red 10-pfennig and the grey 15-pfennig, and a block of nine of the latter was for sale.

Brazil is stopping all expenditures on public works.

Daughter Is Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkinson, Box 14, Thornloe, Ontario.

Severe abdominal pains, griping, after taking a laxative is an indication of unnatural strain that may cause serious injury.

No laxative that causes such discomfort is safe, or necessary.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, night or morning, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S FRUIT SALT

The World's Grain Exhibition

The World's Poultry Congress is now in progress at the Crystal Palace, London, England, including a representative display of birds from Canada and with prominent Canadians identified with the poultry industry in attendance. A year or two ago Canada was honored by being host to the World's Poultry Congress held in Ottawa, and which proved to be the most [illegible] congresses held up to that time. Canada received most valuable publicity as a result, while the poultry industry throughout the Dominion was decidedly benefited thereby.

Canada is again to be host to a world's exhibition and conference in 1932 when the World's Grain Exhibition and Conference will be held in the city of Regina, Saskatchewan. It will be the greatest grain exhibition and conference ever held, with over $200,000 in cash prizes, an unprecedented sum to be awarded, while grain experts from all over the world will be in attendance to participate in the conference.

Already the response of countries in every hemisphere has surpassed expectations. To date nearly [illegible] copies of the official prize list have been distributed in 84 countries. They have been placed where they will do the most good and give a maximum of advertising to Canada, and Western Canada in particular, in every corner of the civilized world.

Canada as a country dependent on agriculture, and suffering all the growing pains of the young, needs this advertising and even supposing no [illegible] Canada attended the Exhibition and Conference at Regina in 1932, the world-wide advertising already secured would be an ample return for all moneys expended to date.

But the countries of the world will be represented, not only by interesting and instructive exhibits, but by leading agricultural experts. The Government of Canada officially issued invitations to other countries to participate and today, two years before the event, eight countries have accepted. These are Peru, New Zealand, Guatemala, Poland, Czecho-Slovakia, Yugoslavia, Belgium and the Netherlands. The Governments of other countries such as the United States, Great Britain, France, the Argentine, Australia, have asked for further and more complete information, and by 1932 it is expected at least 50 countries will have accepted the invitation and be present.

The management of the World's Grain Exhibition and Conference has taken advantage of the World's Poultry Congress, in London, England, this month to further its campaign for world-wide participation at Regina in 1932 and has sent an exhibit to London, and this week are entertaining, in London, the official delegates of 56 countries. At this luncheon the managing director of the World's Grain Exhibition will address these delegates and outline to them why they should participate at Regina. Afterwards he will visit the ministries of agriculture of the countries of Europe to drive that message home.

Exhibits of the World's Grain Exhibition are also being prepared for the Canadian National Exhibition and the Royal Winter Fair at Toronto, and the International Grain Show at Chicago.

This is what is being done to bring the world to Western Canada in 1932. But, and this is important, Western Canada should put forth every effort to retain for this country the world's championship wheat trophy. Other countries are going to try and capture it; we are asking, even urging them to make the attempt. Western Canada must therefore look to its laurels. The wheat farmers of Western Canada, the best in the world,—must be alert and put forth their best efforts, individually and collectively, to retain for this Dominion the proud title of the World's Wheat King.

Now is the time to prepare for the exhibition. It cannot be put off until 1932. It must be done in 1930 [illegible].

To Cope With Cancer

War-Time Mustard Gas Now Used For This Purpose

Use of war-time mustard gas in combating cancer is described in the annual report of the grand council of the British Empire cancer campaign.

The report said, Mustard gas seems to be the first true anti-carcinogenic agent ever discovered. Action of the gases was explained as being localized to the particular area under treatment and its cure to be strictly limited in time. But none the less on that account a remarkable cure.

Baker Lake

According to the records of the Geographic Board of Canada, Baker Lake was so called in 1762 by Capt. Christopher of the ship "Churchill" who discovered the lake on ascending Chesterfield inlet from Hudson Bay in that year.

A Tall Story

Rheumatism GONE

After years of rheumatism, now in perfect health, says Mr. [illegible] ... THANKS "FRUIT-A-TIVES"

Usual Order Reversed

Cleveland Children Look On While Parents Graduate

The usual order of school commencements was reversed at Cleveland when an audience of children sat in the auditorium of John Hay High School and applauded their parents as they marched to the platform to receive high school diplomas. The occasion was the annual commencement of the Cleveland Extension High School.

Ages of the graduates ranged from 17 to well past middle age. In the class was a golf professional, an assistant sales manager, a chief auditor, a credit manager, an assistant treasurer and a field manager for a large oil company.

Have Minard's Liniment on your shelf.

World Depression In Wool Prices

New Zealand, like Australia, has been hit a severe blow by the world depression in wool prices, it was revealed recently. The gross receipt of the New Zealand wool sales this year were almost $35,000,000 below last year's yield. Wool forms by far the largest part of New Zealand's exports, the value of the wool export in 1928 being more than $80,000,000.

A beam of light travels so fast that it could make a round trip from New York to San Francisco in approximately a seventy-fifth of a second.

China plans to spend $4,000,000 in improving its government telegraph lines.

Archbishop Opposed To Death Penalty

Says It Lowers Conception Of Sanctity Of Life

The Most Rev. William Temple, Archbishop of York, is one of the few witnesses who has come so far before the Royal Commission on punishments to favor the abolition of the death penalty.

"I dissent from the view that punishment should be regarded as regulated vengeance," the Archbishop stated. "From a Christian viewpoint, vengeance is entirely illegitimate. The infliction of death or outlawry would, perhaps, be justifiable in the case of a man who was wholly evil but no person was ever that."

The main argument advanced by the archbishop from a sociological viewpoint was that the behaviour of a community as a whole was so largely imitative that the reaction to the taking of life by the state tended to a lower general conception of the sanctity of human life.

Summer Complaints Kill Little Ones

At the first sign of illness during the hot weather give the little one Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaint if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee that they are absolutely safe. They are sold by all druggists or by mail at 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

May Purchase Canadian Land

Another English Peer Interested In Farming In Dominion

The possibilities of southern Saskatchewan for ranching on a large scale were investigated recently by Lord Middleton, Yorkshire landowner, who is touring Canada with a view to purchasing land in this country. Lord Middleton specializes in breeding beef cattle on his 2,000-acre farm in the north of England. He recently made the decision to dispose of the whole of his estates, comprising some thousands of acres, driven to this step by the excessive burden of taxation to which every British landowner has been subjected since the war. It is his plan to take up land in Canada. He was an interested visitor at the Brandon Summer Fair, and in all the departments he visited, those in charge were rather amazed at the knowledge he had of farm affairs and of horticulture. He brought over to Ontario some fifty Yorkshire lads, who will be placed on [illegible].

Toothache and neuralgia are instantly relieved with Douglas' Egyptian Liniment. A quick sure remedy. Also recommended for burns, sprains, [illegible].

Father Of Many Inventions

Sir Charles Wheatstone Gave Many Scientific Ideas To World

The concertina celebrated its centenary last year. It was invented and patented by Charles, afterward Sir Charles Wheatstone, in 1829. He must have been a wonderful man, for his inventions seem to have been legion. Sir Charles invented, for example, the stereoscope, by which the appearance of solidity is obtained through the mental combination of two pictures, and the polar clock, which made it possible to tell the time by the light from the sky although the sun might be invisible. It was he who made the electric telegraph available for the public transmission of messages. And in between his scientific studies he sandwiched the invention of our little musical friend the concertina.

Wax figures for store windows in London are being made to represent Helen Wills, Princess Elizabeth, Prime Minister MacDonald and other well-known people.

Illuminated cap badges are used by the messenger boys of a wireless telegraph company in London.

Thinning Hair

To Patrol the Straits

Government Ice-Breaker Is Leaving For Northern Waters

The new government ice-breaker, the "N. B. MacLean," is to take her maiden plunge into Arctic waters early in August. The ship, which was launched at Halifax a few months ago, is named after Major MacLean, the government's chief authority on ice [illegible] ed the Hudson's Straits expedition two years ago.

The ships will take up supplies to four directional wireless stations, established by the ministry of marine on Hudson Bay and manned by wireless operators of the radio branch. These stations are located at Cape Hope's Advance, Resolution Island, Nottingham Island and Port Churchill.

The ice-breaker will patrol the straits all through the fall months and when the northern ice begins to close down will protect the shipping in Hudson's Bay and through the straits.

Pleases Britain

Franco-Italian Naval Conventions Will Help London Naval Treaty

Prime Minister MacDonald told the British House of Commons recently, that the British Government had learned with pleasure of arrangements made by the governments of France and Italy with a view of facilitating resumption of discussions on naval questions.

Mr. MacDonald said the British government hoped these Franco-Italian conversations would complete the work of the London Naval Conference and that the principles of naval limitation, as contained in part three of the London Naval Treaty, would be applied to all parties to the conference.

He said it was not necessary for the British Government to take any action in this connection regarding the British naval program of 1930 since this was purely for necessary replacements within the reduced tonnage limits imposed by the treaty.

Persian Balm — there is nothing like it for creating and preserving a lovely complexion. Cooling, caressing —it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rose leaf in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

Centenary Of the Match

France is preparing to celebrate in 1931 the centenary of the phosphorous match. It was 99 years ago that a young student, Charles Saurin, of Dole, dipped slivers of wood into liquid phosphorous and was able to light the match by striking it on a file.

Freshman: "What would you do if the girl you were calling on raved and shrieked that she never wanted to see you again?"

His Buddy: "I'd jump to my feet and leave."

"And let her fall to the floor?"

An exceptional coconut tree may produce as many as 500 nuts in a year.

Railplane Has Been Tested

Torpedo-Shaped Coach Is Driven By Two Propellers

The world's first experimental railplane system, backed by the London and Northeastern Railway, has been inaugurated at Milngavie, Scotland.

A torpedo-shaped coach driven by two aeroplane propellers, operating fore and aft, and drawing electrical power from the overhead rail to which it is suspended, flashed over an experimental stretch of track built above the main right-of-way of the London and Northeastern Railway.

It carried 25 passengers and is capable of developing a speed of 150 miles an hour on a long stretch of track, according to its designer, George Bennie, a Scottish engineer.

The railplane is England's answer to the demand of the aeroplane age for speedier transportation. The new system was inspected by delegates to the Transport Congress, which met in Glasgow. If it wins their approval, plans for a railplane system between Blackpool and Southport, a distance of 25 miles, will be carried out.

A railplane system can be built at one-third the cost of a double track railroad system, say the London and Northeastern experts.

Each railplane coach will be self-propelled and will run alone. The overhead rail will direct the course and guide rails will keep it from swinging. The car is stopped by reversing the propellers, which then act as brakes.

The aerial railway can be erected over roads, canals or as in the present instance, over railroads, without interfering with the ground traffic. Thus, in the case of railroads, a ground line could be used for [illegible] while the air line could be used for speedy passenger service and the carrying of mails.

Show Decided Increase

Progress Reported For Creameries All Over Alberta

Alberta creameries during the first four months of the year have shown an increase of 4.4 per cent. over the similar period of 1929, and 35 per cent. above the same period of 1928. Creameries in the south of the province showed an increase of 1 per cent., those in the central part a similar increase, and those in the northern zone a 10 per cent. increase.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Nanking Is Ambitious

Has Extensive Plan To Reconstruct City In Big Way

Nanking, China, proposes to reconstruct the city in a big way. Already 77 proposals of improvements have been adopted. Among them are the construction of a river port, installation of a waterworks system, opening of a metropolitan park and a Grand Metropolitan Museum, provision for three clinics, promotion of industry and the opening of factories, development of afforestation, and laying out of a beautiful residential district.

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

BAYER

Artificial Wool

Artificial Sheep Will Grow Wool Indefinitely, Say Scientists

That artificial sheep will grow real wool indefinitely is the prediction of the British Research Association for the Woollen and Worsted Industry following recent experiments in the hair growth of animals. By merely slicing off pieces of live sheepskin and placing them in vats containing a certain chemical solution, the pieces may be continuously nourished and thus produce hair year in and year out. Cowhide also might be treated in the same way, say the association's chemists.

Morning Eggs Weigh More

Tests Show Them Heavier Than Those Laid In Afternoon

Tests conducted on different chicken farms by C. Howard King, poultry supervisor of the Wisconsin Department of Agriculture and Markets, revealed that eggs laid in the forenoon weigh 24.115 ounces a dozen while those laid in the afternoon averaged only 23.520 ounces, according to a report from Madison, Wisconsin. This suggests another problem for commercial egg producers: how to make hens lay in the forenoon—and bigger eggs.

Minard's Liniment for Lumbago and Neuralgia.

Game In Canada

The physical characteristics of Canada—its innumerable lakes, extensive forests, and great open prairies—combine with its natural geographical situation to constitute a distinct faunal region within which is to be found almost every species of game native to the North American continent.

AIRWAY PLANS FROM HUDSON BAY TO BRITAIN

Vancouver, B.C.—Imperial airways spanning the Northern Atlantic Ocean and Hudson Bay may some day link Canada with the other aerial routes of the British Empire, declared Major-General J. H. MacBrien, addressing the Canadian club here.

President of the Aviation League of Canada, he told how plans are now being laid for a trial flight across the northern route via Hudson Bay to Europe in 1931. Gasoline for this trip is now, through the courtesy of the Hudson Bay Company, being placed along the route.

At the same time, General MacBrien predicted that valuable as this connection will be in the imperial scheme of things, a great portion of the air traffic between the United States and Europe may have to traverse the same route.

Plans for the linking of the British Empire were first laid at the Imperial conferences of 1923 and 1926, he explained. As a result of these, the British-India route had been established and with it a feeder line running from Cairo across Africa.

On this feeder line, as he called it, the gold of South Africa is already being taken to Europe and put into circulation weeks before it would otherwise reach great centres of population. This meant the saving of much in interest.

The speaker also pictured the trial flight of the R-100, which will soon take off for this country, as forging another link in the aerial chain around the British Empire.

"Canada's geographical position," the general said, "is a most fortunate one. We can control those routes that pass over our country, and we must control them. We must have Canadian operated services."

Second Reading Given Naval Treaty Bill

No Division In British House Of Commons

London, England.—The bill supporting the London naval treaty giving effect to the naval reduction compact signed recently passed the second reading in the House of Commons without a division.

Parliamentary Secretary G. G. Ammon explains that under the British legal system a treaty, although it might be binding and have effect on the British Government, could not be enforced in law courts against private individuals unless supporting legislation was passed.

Under the Washington treaty Britain entered into certain agreement not to build or provide by private shipbuilding certain vessels of war. The London treaty contained alterations of three agreements. To give effect to them, the Commons was asked to approve the bill.

Compelled To Cancel Official Engagement

Weather Conditions Forced Prince To Abandon Airplane Trip

London, England.—For the first time on record the Prince of Wales was forced to cancel an official engagement because of weather conditions.

Weather reports from Wales indicated flying conditions were impossible and the Prince cancelled an aeroplane flight which he had intended making from London to Carnarvon to open the Royal Welsh Agricultural Show. As it was impossible to reach Carnarvon from London by train in time for the opening, the whole engagement was abandoned.

Raps Border Patrol Bill

International Falls, Minn. — Denouncing the proposed border patrol bill before Congress as comparable to "barbed wire fences between Canada and the United States," Congressman William Pittenger, Duluth, was the principal speaker at the Border Press Association's annual meeting here.

No Passengers Killed

Ottawa, Ont.—Railway accidents in Canada during May took a toll of 41 lives and resulted in injuries to 262 persons, it was shown in a report issued by the Board of Railway Commissions. None of those killed were passengers on trains. Accidents at railway crossings resulted in 13 persons killed and 36 injured.

Peddlers of Cuba are [illegible] cheap wares on the installment [illegible].

Aviation Pioneer Dead

Glenn H. Curtiss Did Not Lose Faith When Others Became Discouraged

Buffalo, N.Y.—Glenn H. [illegible], widely known aviation pioneer, died in the General Hospital here.

Mr. Curtiss was brought to the hospital from his [illegible] port, N.Y., to undergo an operation for appendicitis. The operation was said to have been successful and he was reported recovering rapidly.

Mrs. Curtiss came here with her husband and has been almost constantly at his bedside.

Hospital authorities stated death was due to pulmonary embolus, caused by a blood clot on one of the main arteries leading out of the heart.

Glenn H. Curtiss nurtured the young science of aviation in the middle years of its development, when fainter hearts had grown discouraged.

With a tomato can for a carburetor, he built his first motor bicycle in 1902. He continued to experiment with lightweight motors and evolved his famous V-type motor, a departure in design reflected in the radial aeroplane engines of today. In 1904 he set a motor bicycle speed record at Ormond Beach, Fla., of 10 miles in eight minutes and 54 seconds, and in 1906, over the same course, travelled faster than man ever had before, a mile in 26 2-5 seconds.

His fame spread and drew the attention of the late Major Thomas Scot Baldwin, builder and operator of balloons. In 1904 the two men met in Hammondsport and installed a Curtiss motor in Baldwin's balloon. With this machine they made a circular flight of Oakland, Cal., in August, 1904, first to fly that way.

Dr. Alexander Graham Bell, inventor of the telephone, commissioned Curtiss to build a motor for a man-carrying kite. Gliders were experimented with for a time, and then the men turned their attention to power aeroplanes.

Floods In England

Two Lives Lost In Consequence Of Cloudburst In Yorkshire

Whitby, Yorkshire, England.—Two lives are already known to have been lost, and other fatalities are feared, in consequence of a flood that followed upon a cloudburst in the valley of the Esk River.

The last connection with the village of Sleights, in the centre of the flood area, was severed late today when the telephone wires broke down.

Many families throughout the area are imprisoned in the upper floors of their houses.

The train service has been dislocated over a wide area.

Spectacular rescues were effected by the life-saving crews, who did particularly effective work in Ruswarp. From one house a woman and four children, who had climbed to the roof, were hauled through the flood to safety by means of a breeches buoy brought into play by the coastguard.

From another house five [illegible] were rescued by the coastguards with life-saving apparatus at [illegible] when the water had already reached the bedroom windows.

Twelve people were rescued from the upper storey of a mill.

The town crier of Whitby patrolled the streets and warned the populace that the water supply would last for only 48 hours. The pipes from the [illegible].

Hoover Signs Naval Treaty

To Limit Fighting Vessels For Three Great Powers

Washington, D.C.—In the historic east room of the White House, President Hoover signed the London Naval Treaty.

Ratification by Great Britain and Japan and the depositing of all three signatures in London remain to be accomplished to bring into full effect the covenant limiting for the first time all categories of fighting vessels for the three great naval powers.

No Reduction In Pay

Ottawa, Ont.—Department of railways and canals in a statement recently declared that men working on the Welland Canal were not reduced in pay as a result of the application of the eight-hour day and 44-hour week. All men, the statement said, will receive the same weekly wage as they did before parliament passed the legislation at the last session.

Small Fire In Orphanage

Winnipeg.—The young inmates of St. Joseph's Orphanage here, marched out in orderly fashion and were unharmed when fire attacked the institution. Starting in a cupboard, the blaze quickly spread to the dormitory roof but quick arrival of firemen prevented extensive damage.

Scores Drowned At Coblenz

Pontoon Bridge Collapsed Under Strain Of Heavy Traffic

Coblenz, Germany.—Scores of persons were drowned in the collapse of a pontoon bridge here during celebration of the evacuation of the Rhineland in which President Von Hindenburg had taken part. About 100 people were on the bridge when it crumbled.

An enormous crowd had gathered along the banks of the Rhine during the evening at the so-called "Deutsches Eck," where the Moselle River joins the Rhine.

They stood watching the display of fireworks and the [illegible] the ancient castle of [illegible] in honor of President Von [illegible]burg's visit.

When the display was over, thousands of people tramped across the pontoon bridge, which leads to a place known as "Security Harbor."

Suddenly, while about 100 persons were on the bridge, it collapsed under the strain of the unusual traffic.

Many were killed by falling timbers, and others were swept away in the black, swirling water and drowned before help could reach them.

In the darkness, which lately had been intermittently illuminated by the fireworks across the rivers, people could be heard splashing about and crying for help.

Rescuers immediately launched boats, but many of the victims could not be located.

ADMINISTRATION OF PEACE RIVER BLOCK BY B. C.

Victoria, B.C.—British Columbia takes over the administration of the Peace River block and the railway belt on August 1, under tentative plans announced by the government. Efforts are being made now to adjust the necessary administrative details by that date.

The actual transfer will be accomplished without the disturbance of existing administrative machinery. For the time being, federal officials will carry on. As soon as possible, however, the administration will be entirely overhauled to eliminate the present duplication by federal and provincial officials, particularly in the railway belt, where two sets of machinery have operated side by side for years. In some offices the provincial officials will be able to carry on alone, possibly with addition of one or two from federal territory. In the forestry department, however, it may be necessary for forest patrol in the large areas to be transferred.

A Generous Gift

American Philanthropist Offers Ten Million Dollars For Educational Work In Britain

[illegible], England.—The Daily Herald, government organ, says that Edward Harkness, of New York, American philanthropist, has offered £2,000,000 (about $10,000,000), for the [illegible] social and educational work in Great Britain.

The gift is to be administered by a board of public men. Invitations to serve on it have been sent, among others, to former Prime Minister Stanley Baldwin, Sir Josiah Stamp, the great financial expert, and to John Buchan, novelist and member of parliament.

Presented To Rulers

London, England.—John McCormack, the Irish tenor, was presented to the King and Queen at a garden party in Buckingham Palace, July 23. Prof. Smiddy, high commissioner for the Irish Free State, introduced him.

VISITOR FROM ANTIPODES

A. R. Harris, general manager of the Radio Broadcasting Co., of New Zealand, who spent the past two weeks studying conditions in Canada.

Air Tragedy Told

Aviator Makes Heroic Attempt To Save Life Of Youthful Passenger

Edmonton, Alberta.—A story of terrific storm and of a heroic battle by Dale Atkinson, Western Canada Airways pilot, in the freezing waters of Lake Niska, Northern Saskatchewan, to save the life of his passenger, was told with the arrival of the body of the passenger Woodrow "Chuck" Eagle, 17, of The Pas, Man., brought from the north by aeroplane.

Atkinson came out with the body in an aeroplane piloted by W. E. Gilbert.

Eagle died when Atkinson, running into a terrific windstorm which had attained the proportions of a typhoon, swung about, raced to Lake Niska, landed and was pushing to shore. A cross gust of wind lifted one wing of the machine high in the air, toppled the aeroplane over on its back, and threw the occupants into the water.

Fighting his way down through the turbulent waters, which had been swept into fury by the storm, Atkinson smashed his way into the cabin of the machine, found that his passenger was not there and dived several times in an effort to find him.

Near exhaustion, Atkinson gave up the uneven battle and swam the dozen yards to shore.

The fatality occurred on July 15, and the pilot waited until the water gave up the body, July 18.

Terrified By Masked Rider

People In Hills Of Wyoming Receive Threatening Letters

Wheatlands, Wyo.—Death threats signed "The Phantom Rider" received by several Fletcher Park ranchers, has added to the uneasiness spread by the recent appearance of a masked horseman who rides the rugged Laramie peaks on a snow-white horse.

Five men and a woman are reported to have received the letter which were placed in the hands of officers seeking the "Phantom Rider" who recently rode into the yard of Charles Adams, 30, and shot the rancher through the shoulder.

Posses searched the hills following the attack but were unable to apprehend the [illegible] who is believed connected with recent cases of cattle rustling.

Children Faint At Service

Madrid, Spain.—More than 2,000 children fainted at a Communion Service here. They had risen early and fasted for the ceremony. When the hot sun came out girls and boys alike dropped unconscious. A staff of 90 nurses in attendance were inadequate to care for the sick. A total of 20,000 children were present.

Leaders Meet

Rudyard Kipling and T. B. Macaulay, president of the Sun Life Assurance Company of Canada, leaders in literature and finance, aboard the Canadian Pacific liner "Duchess of Bedford" on their arrival in England.

Beatty Issues Statement

Detailed Information On Air Service To Be Announced Later

Montreal.—In reference to the newspaper reports with respect to possible aviation developments in Canada, Mr. E. W. Beatty, chairman and president of the Canadian Pacific Railway Company, made the following statement:

"By amendments to its charter secured in 1919, the Canadian Pacific Railway Company was empowered to establish and operate services of aircraft of all kinds, and in recent years it has, through its express department, entered into contracts for express services with established Canadian air service companies. Discussions have taken place between the president of the Canadian National Railways and this company, looking to participation by both companies in the ownership of airway companies, both in eastern and western Canada, and these discussions have proceeded to the point where an agreement in principle has been reached.

"It is anticipated that each of the transcontinental railways will have an equal interest, and when negotiations have been concluded an announcement in greater detail will, no doubt, be made."

Seeking New Trade Treaty With Canada

New Zealand Official Coming To Ottawa To Discuss Matter

Wellington, N.Z.—With the view of negotiating a new trade treaty between New Zealand and Canada, Dr. Craig, comptroller of customs, will sail on August 12 for Ottawa to open discussions with the Canadian authorities and carry matters as far as possible before the opening of the Imperial Conference, in London, England.

Dr. Craig will subsequently go to London to assist in the Imperial Conference discussions on tariff and allied economic questions.

TRAIL OF DEATH FOLLOWS 'QUAKE IN SOUTH ITALY

Naples.—Amid the vineclad hills of the Appennines the simple peasant folk of southern Italy had counted their dead to the number of 678 in half a score of towns tumbled to ruins by a series of terrific earthquakes.

Government estimates placed the injured at more than a thousand, and the homeless at ten times that figure. Melfi, picturesque mountain city, perched perilously upon the crater of the extinct Monte Vulture, was an area of ghastly debris. Even the ancient cathedral whose history in its several phases goes back to the ninth century, was wrecked.

The almost inaccessible nature of some of the areas devastated made difficult the work of succor and the estimation of casualties. Most of the towns hit the hardest are off the beaten paths of tourists, with poor transportation and almost inaccessible altitude.

Several supply trains have been sent to points on the railroads in the interior from Naples, and hundreds of relief workers were penetrating the recesses of the agricultural area, offering relief to the still terror stricken victims.

The 'quake stunned all Italy. It was the worst earthshock since Messina was all but obliterated in 1908. The first shock came an hour after midnight. Its own awful nature was supplemented by a tremendous electrical storm over virtually the whole affected area.

The shaken area extended from the Tyrrhenian sea to the Adriatic, but the coast settlements suffered less in proportion than the mountain populations. Naples experienced several hours of panic with several houses and scores of casualties. Among this city's victims was the Countess De Rossi Vargas. Never in all Neapolitan history had this classic city experienced such stark-mad fright. A frenzied populace raced through the streets apparently heading nowhere.

Wrecked bridges, snapped communication wires and many other obstacles had been tossed in the path of the relief workers by the upheaval of nature. Motor cars made little progress over unaccustomed routes. The highways of the area are notoriously undeveloped and rail lines passed through many gorges into which the quake had tumbled avalanches.

Several tunnels upon the road to Melfi, where 150 persons perished, according to official figures, fell in and blocked service beyond restoration for many days.

BRITAIN MUST ADOPT BETTER TRADE METHODS

London, England.—British methods of selling in Canada are severely criticized in the report of F. W. Fields, senior British trade commissioner in Canada, which has been made public by the department of overseas trade.

Mr. Fields attacks "long distance" selling methods, the under payment of agents and the failure of British manufacturers to adapt themselves to the changing conditions in the Canadian markets.

The criticism is endorsed by the Financial Times, which says: "The plain fact of the matter seems to be that the British have neglected to cultivate the Canadian market by the adoption of efficient methods of salesmanship and have allowed their American rivals to jump their claim. It is no longer possible to sell goods by correspondence while it is often difficult to dispose of any large quantity of merchandise through agents on a commission basis.

"The Dominion has already done as much as she can reasonably be expected to do in giving British goods a preference which is estimated to mean a transference from American to British importers of £40,000,000 in trade and naturally Canadians are now looking to Britain to show appreciation of this great help in Empire unity."

Manitoba Appointments

Officials Named To Take Over Duties In Natural Resources Department

Winnipeg, Man.—The Manitoba Government has filled seven important positions in its new Department of Natural Resources. They were made necessary through the taking over of the resources from the Dominion. All seven appointees were formerly employed by the Canadian [illegible].

They are:

Col. H. J. Stevenson, provincial forester, heading the forestry branch; L. P. O. Noel, assistant director of provincial lands; John Tod, timber sales officer; W. B. McLellan, mining recorder, to be stationed at The Pas, Man.; A. J. McLaren, mining inspector and engineer, to officiate as inspector of mining claims; E. B. Patterson, engineer of water powers branch, to be stationed at Seven Sisters Falls; B. B. Hogarth, engineer of water powers branch, to be stationed at Slave Falls.

The augmented department will have a personnel of approximately 125 when the staffs are complete, it was stated. Appointments to the fisheries branch are now being considered.

U.S. Increases Population

Expect New Census To Show Population Of About 122,957,000

Washington, D.C.—A total of about 122,957,000 people—just a few thousand under 123,000,000—probably will be shown as the population of the United States for 1930, when the final count is announced here by Director W. M. Steuart, of the census.

The 1920 population was 105,710,620. Should final figures bear out the calculation, the country would show a growth of around 17,246,000 people in the ten years.

This approximate total figure has been calculated by the Associated Press on the basis of actual preliminary returns from 40 states and the District of Columbia.

Offered Life Membership

Services Of Political Leaders Is Recognized By Canadian Legion

Ottawa, Ont.—Dominion honorary life membership in the Canadian Legion is being offered the Rt. Hon. W. L. Mackenzie King and the Hon. R. B. Bennett, Sir William Clarke, high commissioner for Great Britain, and the Hon. Jean Knight, until recently the minister of France in Canada, in recognition of their outstanding services in the interests of the returned soldier body and to the legion. The first occasion of Dominion honorary life membership being awarded since the inception of the legion is announced by Lt.-Col. L. R. LaFleche, president of the Legion.

Celebrate Potato Day

Winnipeg, Man.—The city is to have a "Potato Day," either on August 6 or 7. A motorcade will visit potato plantations, speeches will be made, and housekeepers invited to co-operate in stimulating the growth of potatoes in the province. This is being done under the auspices of the Agricultural Bureau of the Board of Trade.

New Championship Golf Course

George S. Lyon, Canada's Grand Old Man of Golf, split the fairway with the first ball driven from No. 1 tee of the Royal York Golf course recently when this new championship course, built by the Canadian Pacific Railway for the benefit of guests of Canada's premier hotel, was formally opened in the presence of Their Excellencies Lord and Lady Willingdon. This 18-hole course, claimed by players to be one of the best on the continent, has a par of 72 with a length of 6,310 yards. All Toronto golf clubs were represented at the opening and prominent golfers of the Dominion came together here for the occasion. This course has been selected as the scene of the annual interprovincial team match on August 2, and many tournaments in connection with conventions, including the monster one of the Shriners, will be staged there. Lay-out shows the $100,000 Club-house of the course with a view of the Royal York Hotel.

Opera Season at Banff

Twice a week during July and August, the Light Opera Company of Alfred Heather has been engaged to play at the Banff Springs Hotel. A very wide variety of operas will be produced including Gilbert and Sullivan, eighteenth century compositions and light and ballad operas by Canadian writers and composers on Canadian subjects.

Among the artists playing are Alfred Heather, widely known as the original Filch in "The Beggars' Opera," a work which is among those to be played at Banff; Allan Burt, light baritone, formerly with the American Opera Company; Beatrice Morson, contralto, who toured with "The Beggars' Opera"; Jean Haig, lyric soprano, popular Canadian radio star; Randolph Crowe, baritone, who made a big hit in his rendering of John the Butcher, in "Hugh the Drover"; Mary Frances James, soprano, who has played with success in ballad operas produced at Canadian Pacific Festivals; Herbert Hewetson, tenor; Amy Fleming, contralto, and Enid Gray, mezzo.

Canada Has Maintained Lead In Silver Fox Ranching Industry, Which Is Steadily Growing

Canada was the first to develop the breeding of silver foxes in captivity and she has so maintained her position in this respect that she is regarded as a world-leader by all other countries, whose representatives periodically visit the Dominion in search of knowledge and advice in the conduct of similar undertakings. While silver fox ranching has been exploited here and there by individuals who have been stressing its financial possibilities, yet the industry as a whole has developed along sound and economic lines, due in the first place to the foresight of the pioneers and to the valid and conservative methods of the fox breeders of Prince Edward Island who nursed the silver fox industry through its infancy.

The Canadian National Silver Fox Breeders' Association is the largest breed society in the Dominion and registers annually a larger number of pedigreed animals than is to be found in any other species of live stock. The 70,162 silver fox pups born in 1929, and registered by this association, are descended from less than a score of silver foxes taken from the wild by the pioneer breeders. The remarkable growth of the silver fox industry is indicated by the figures of the last four years taken from Canadian Live Stock records, of silver fox pups registered by the above association 1926, 32,235, 1927, 39,767, 1928, 51,634, 1929, 70,162.

While Prince Edward Island is still the cradle and the home of the industry, silver fox ranching is being firmly established in practically every province of the Dominion, and is operating on a very large scale, more particularly in the province of Quebec. Silver fox ranching has also become established in a great number of European countries, and heavy shipments of live foxes are made annually from Canada, 2,356 having been exported from Prince Edward Island alone in 1929.

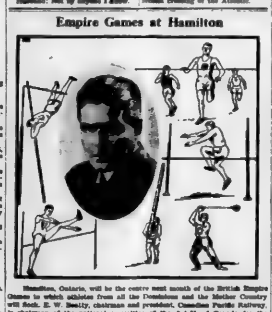
Empire Games at Hamilton



Hamilton, Ontario, will be the centre next month of the British Empire Games to which athletes from all the Dominions and the Mother Country will flock. E. W. Beatty, chairman and president, Canadian Pacific Railway, is chairman of the national committee of the A.A.U. of Canada for the Games, and promises of support have been received by the committee from Australia, New Zealand, Africa, British Crown Colonies, the Irish Free State, Northern Ireland, while a strong and representative British committee has been formed to ensure full British participation at this notable sports gathering of the British peoples. Canada will, of course, be very fully represented, practically every province sending its outstanding athletes. The Games are scheduled to be held August 16-23.

Pale Western Cutworm One Of Worst Pests With Which Farmers Have To Contend

Will Exhibit At Big Show

Belgium To Take Part In World's Grain Exhibition

According to word received at the headquarters office at Regina, Belgium has officially accepted the invitation to take part in the World's Grain Exhibition and Conference, to be held at Regina from July 25 to August 6, 1932.

Belgium of course became very well known for the part it played during the Great War. It may be interesting, however, to note that Belgium and The Netherlands are two of the smallest but most densely populated states in Europe. In area they are together not so large as the province of New Brunswick and are but one-tenth the size of Manitoba. The population of each is, however about equal to the whole of Canada. Belgium also governs the Belgian Congo in Central Africa.

Because of the density of the population in these small countries it becomes necessary to make the very best use of every resource the people possess. One Canadian writer says, "If their farmers farmed as we farm it would be impossible for so many of them to exist in such a small land, but, by their thorough methods of cultivating the land, and their industry, care and thrift, the Belgians have become a very prosperous people." According to "The Statesman's Year Book, 1930," Belgium, in 1928, produced 9,790,000 cwt. of wheat from 420,282 acres; 1,900,148 cwt. of barley from 76,172 acres, 14,668,478 cwt. of rye from 570,085 acres. In addition to these field crops, the farmers produce immense quantities of sugar beets, potatoes, flowering bulbs and dairy products. With such a record the great value of Belgium's contribution to the exhibition and conference of 1932 is assured.

Shortage In Egg Production

New Grievance Against Autos

Mystery Bus Trips a Novelty

WORLD HAPPENINGS BRIEFLY TOLD

The Rockefeller Foundation has decided to give $450,000 to the University of Sydney, Australia, for medical research.

The Irish Free State, like Great Britain, gave the European union idea cool treatment in a note responding to Foreign Minister Briand's questionnaire.

British Columbia's lumber industry is holding its export markets better than Washington and Oregon, according to H. R. MacMillan, leading exporter.

The Canadian Bank of Commerce shipped $1,000,000 in gold to Canada, from New York, the first important shipment of the yellow metal across the border since 1927.

Value of building permits issued in 61 Canadian cities during June was $17,936,476, according to a report issued by the Dominion Bureau of Statistics.

"Pure invention," was how Sir Godfrey Thomas, private secretary to the Prince of Wales, described a story that the Prince plans a United States visit and Canadian "camping holiday" this year.

Seven thousand specimens of poultry from 23 countries, including Canada and the United States, went on exhibit in the Crystal Palace, London, England, for the World's Poultry Show.

To commemorate the action of the 700 Indians who deeded to the British crown all land extending west to York, a cairn will be erected at Carrying Place, Prince Edward County, Ontario. A 20-foot plot at the main corner of the village has been chosen as the most suitable location.

The death occurred of James M. Coleman at his residence, 266 Olivier Avenue, Montreal. Mr. Coleman was a well-known figure in railway circles and was the inventor of the Coleman locking device which prevents passenger cars from telescoping in a railway collision. He was in his 70th year.

Anxious To Capture Market In Canada

Australia Makes First Shipment Of Oranges For Distribution

The first shipment of Australian oranges to enter Vancouver, 3,000 cases from Sydney, N.S.W., was unloaded recently for distribution at various points throughout the Dominion.

To capture the Canadian market for Australian orange growers is the aim of the wholesale fruit distributors organization of Sydney, which two months ago sent W. H. Pierce here to pave the way for the drive.

Claiming that the Australian fruit surpasses the best from the United States, the fruit growers of New South Wales believe that their product will quickly win a large share of the market that the United States producers now enjoy.

Banded Bird Law

Co-Operation With Proper Authorities Is Required

It is important that any person who finds a banded bird report the fact to the National Parks of Canada Branch, Department of the Interior, Ottawa, giving the species of the bird, band number, date and locality of occurrence, and information as to whether the bird was found dead, was killed, or was released alive still wearing its band. Persons reporting banded birds will be informed promptly respecting the place and time of banding.

Scotsman: "How much to press a pair of trousers?"

Agent: "One shilling."

Scotsman: "Then press one leg for six-pence—I am having my photograph taken side view."

She: "And don't you ever forget that I threw over a millionaire's son just to marry you."

He: "Yes that guy was not only born rich but lucky as well."

"Have you heard of the new medicine that's put in coffee and takes away all liking for whisky?"

"Heavens! I'll never dare drink coffee again."—Karikaturen, Oslo.

Novel Attempt To Escape From Prison

Robber Serving Sentence In Sing Sing Sewed Up In Mattress

A novel method of attempting escape from Sing Sing prison was uncovered when guards found Jack Levy within a mattress made in the prison factory. Levy, small and middle-aged robber, almost got away with it. He would now be on his way to freedom but for the curiosity of Victor Brown, keeper-chauffeur, who thought a pile of mattresses on his truck looked suspiciously lob-sided although it had been twice inspected by other guards.

Brown summoned Principal Keeper Sheehy and a search was instituted. Sheehy ripped open one misshapen mattress and discovered Levy. Levy had a razor with which to cut his way out, and a hammer. The robber will be sent to Clinton prison, Dannemora, N.Y. His attempted escape will put back his earliest possible date of release to 1952. Levy was sewed into the mattress from the outside. His accomplice has not been found.

Tuning Out Noise

Idea Of Scientist, If Carried Out, Would Be Boon To World

A person is in an office that looks out on a busy street, and traffic is roaring past making normal speech inaudible. He touches a switch and the noises fade away to nothing. The traffic is still streaming past, but one cannot hear a sound. That is the promise made by a well-known scientist, Dr. James Robinson. Dr. Robinson's idea is that sound waves might be "tuned out" in the same way as we get rid of unwanted broadcasting stations on our wireless set. Special apparatus built into the walls of a building will "trap" the sound waves and in this way we really shall get silence. Every day the mechanical world in which we live gets noisier and noisier.

Winnipeg Newspaper Union
Fashions

(By Annabelle Worthington).

The chic femininity and girlish prettiness of this yellow and green printed rayon crepe will instantly appeal to the sophisticated miss of 8, 10, 12 and 14 years.

The flaring skirt shows soft gathering at front, and slight dipping at either side. A crushed girdle marks the normal waistline and ties in youthful bow at side.

The simple bodice is sleeveless. The capelet collar of plain yellow crepe is most unusual, opened at front displaying round neckline. An applied band of the printed crepe provides smart trim.

Style No. 3360 is very effective for parties made of pale blue georgette crepe with collar finished with picot edge.

Printed batiste, dimity, voile, tub silks and printed lawn make up smartly.

Patrol Northern Highway

Mounted Policemen To Watch Traffic On Prince Albert National Park Road

Mounted Police in Saskatchewan assumed a new role when a member of the scarlet coated force headed northward from Prince Albert recently on a brand new motorcycle to inaugurate the system of patrols on the Prince Albert National Park Highway. Speedsters will have to watch their step in the future, for if they exceed thirty miles an hour the mountie may get them and then a fine up to the maximum of $200 awaits the offenders on conviction.

Other regulations to be enforced require motorists to keep on the right of an imaginary line down the centre of the highway, to make sure his vision to the rear and to each side is not obstructed and not to catch up and pass another vehicle at a blind curve.

Heavily loaded trucks with loads protruding beyond the sides of the vehicle will be required to pull well out to the side and stop if necessary to permit an approaching vehicle to pass. There are no set hours for the patrol, but it will be maintained throughout the day, and at times when traffic is particularly heavy. The mounted policeman astride his motorcycle will be seen at night slipping along the highway to check up on reckless drivers.

Recipes For This Week

(By Betty Barclay)

PEANUT BRITTLED APPLES

Six large tart apples; one-fourth teaspoon salt; three-fourths pound peanut brittle; and four tablespoons lemon juice are required. Spread thinly sliced apples over the bottom of a baking dish. Sprinkle with salt, place a layer of peanut brittle on top, and repeat until all the apples and candy are used. Pour lemon juice over top layer of apples before adding the last layer of brittle. Bake in a slow oven at 325 degrees for one hour.

PINEAPPLE ORANGE SPONGE

1 package orange flavored gelatin.
1 cup boiling water.
1 cup pineapple juice and cold water.
1 cup shredded pineapple, drained.

Dissolve gelatin in boiling water. Add pineapple juice and cold water. Chill. When slightly thickened, beat with rotary egg beater until of consistency of whipped cream. Fold in pineapple. Turn into molds. Chill until firm. Unmold. Serves 8.

Wit and Philosophy

Puns are not always properly attributed to their original author—possibly because puns have been condemned as the lowest form of wit. But some are worthy to live. Here is one which sums up whole systems of philosophy, but it was originally aimed at George Berkeley's (1685-1753) contentions regarding matter and mind: "What is mind? No matter. What is matter? Never mind."—Christian Science Monitor.

The Modern Maid

In answer to the advertisement of a Weymouth, England, boarding house keeper for a housemaid, one girl demanded a salary of $250 a year, every Sunday and three evenings a week off, and a garage for her motorcycle.

Ramsay MacDonald and Peace

Says Peace Is the Greatest Cause Before the World Today

Belief that peace is the greatest cause before the world today was expressed by Prime Minister MacDonald at the concluding sessions of the Inter-Parliamentary Union Conference in the gallery of the House of Lords.

"Until we come into personal contact, until we have looked each other in the eyes, until we have sat down side by side at a common meal, until we have discussed our national literature, science and arts, we will never be the type of citizen who understands others and has no suspicion in his heart about them," said the Prime Minister, pleading for effective international disarmament.

Mr. MacDonald expressed keenest pleasure at the action of the United States Senate in ratifying the London naval treaty, adding "If we are going to have disarmament, it can only be effected by international agreement, in carrying disarmament stage after stage until the job is finished, and very often, in the course of it, there will be disappointments."

There's a Reason

John Big Soldier, 94-year-old Indian whose people at Black River Falls, Wisconsin, depend largely on the blueberry crop to bring them a living, may be able to explain better than your favorite restaurant proprietor why the latter is not serving so many blueberry pies. "Heap damn big frost," John said.

It's easy to tell if it's a friend or a bill collector at the door. Just wait a while and if it's a bill collector he won't go away.

SUNDAY SCHOOL LESSON

AUGUST 3

NAOMI AND RUTH

Golden Text: "And He made of one every nation of men to dwell on all the face of the earth."—Acts 17. 26.

Lesson: The Book of Ruth.
Devotional Reading: Isaiah 61.1-7.

Explanations and Comments

The Beginning Of the Story, 1.1-13.—In the days of the Judges there was a famine in the land of Canaan, and to escape it a Bethlehemite, Elimelech, and his wife Naomi, and their two sons, left their home and settled in Moab across the Jordan. The Jews have a legend to the effect that Elimelech was of a princely house, a descendant of Amminadab, the father-in-law of Aaron, that he was wealthy, and left the country in the time of famine in order to preserve his wealth intact, for he was afraid of being besieged by his starving brethren.

In Moab the two sons married daughters of that alien land, Ruth and Orpah. Ten years passed, father and sons found their graves there, and Naomi, now poor, whatever she had been in Bethlehem, determined to return to her native land. Farewells seldom take place in the home in eastern lands, and Ruth and Orpah carried out the usual custom when they accompanied Naomi a short distance on her way. When Naomi thought they had gone far enough to show her fitting respect, she stopped to dismiss them. With tears and kisses she bade them return to their homes and let her go on her way alone.

Ruth's Great Decision, verses 14-18.—Though it grieved Orpah to part with her mother-in-law, she kissed her and returned as Naomi had urged her to do. Ruth, however, clung to Naomi. With all her power Naomi sought to dissuade Ruth from accompanying her. "Behold," she said, "thy sister-in-law is gone back unto her people, and unto her god (Chemosh): return thou after thy sister-in-law." In answer Ruth uttered those beautiful words which have become so famous through the ages: "Entreat me not to leave thee, and to return from following after thee: for whither thou goest I will go; and where thou lodgest, I will lodge; thy people shall be my people, and thy God my God." The ancient belief was that each people had its own god, and that in going to another land one must necessarily serve the god of that land: compare 1 Samuel 26. 19.

"Ruth was a Moabitess, of an accursed race, who according to the law of Moses was not allowed to enter the congregation of the covenant. While this story finally teaches that no such disability remains when faith in God is exercised, we must not forget the difficulty as it existed for Ruth; how the people would be likely to look at her, how she herself, as she came into contact with the religion of the Hebrew people, would realize the greatness of her distance. Again, there was nothing calculated to allure her from the standpoint of material prosperity. Those she had known of the people of Jehovah had been compelled to leave their land on account of famine. From them she knew of the perils of those who had remained in the land, and all the sadness of their condition. She came back with Naomi into poverty, and to people who in all probability were hostile to them both."—G. Campbell Morgan.

"Large is the life that lives for others' sakes;
Expends its best, its noblest effort makes;
Devotion rounds the man and makes him whole;
Love is the measure of the human soul."—James Buckham.

Captain Sherlock Has Newest Air Record

Flew Mail Plane 1,500 Miles In One Day Making Five Stops

Record achievements in the air are just part of the day's work in the north country. The newest feat, unheralded almost among the brilliant exploits of the sub-Arctic fliers, is that of Captain W. N. Sherlock, Commercial Airways pilot. In less than a day he flew the mail from Fort McMurray, in northern Alberta, to Aklavik, on the topmost rim of Canada, some 1,500 miles — making five delivery stops en route.

Son of Sir Francis and Lady Sherlock, Irton Hall, Cumberland, England, Captain Sherlock is a former member of the Royal Air Force. He has seen war and peace-time service in France, India, Egypt and Mesopotamia. Before joining the Commercial Airfleet, he was a member of the flying staff of Dominion Explorers.

On the morning of June 26, at 5.45 o'clock, Captain Sherlock took off from Fort McMurray air base, flying a Bellanca Pacemaker. Less than 21 hours later, at 2:35 o'clock the next morning, with the midnight sun casting its twilight glow, he landed the mail at Aklavik, within the Arctic circle. On his way, he made postal deliveries at Fort Resolution, Fort Simpson, Fort Norman, Fort McPherson and Arctic Red River along the rushing Mackenzie River.

Captain Sherlock's flight—just one of the records set up by fearless airmen speeding to and fro across the barrens of the northwest—was the first one-day flight from Alberta to Aklavik.

When Aviators Trespass

Judge Rules People Own Air Five Hundred Feet Up

Aviators must fly at least 500 feet high to avoid trespassing on property over which they pass, Federal Judge George P. Hahn, of Cleveland, Ohio, ruled in a precedent setting decision.

The decision was on a bill of complaint brought a year ago by two suburban property holders against the Curtiss Airport Corporation, the Ohio Air Terminals Company and the Curtiss Flying Service.

The complaint cited the ancient Roman legal principle, "Whosoever controls land controls it from the centre of the earth to the zenith," and sought an order forbidding planes to pass over the property.

Judge Hahn ruled that the "effective possession" of such property extends only 500 feet up.

On Arbitration Board

Appointment has been announced of the Rt. Hon. Mr. Justice Duff, of the Supreme Court of Canada, to act as Canadian representative on the arbitration board in connection with the "I'm Alone" proceedings. Mr. Justice Duff succeeds to the position made vacant by the death of the late Eugene Lafleur, K.C.

In acid soil, hydrangeas bear blue flowers, whereas in neutral soil they bear the "normal" pink blossoms.

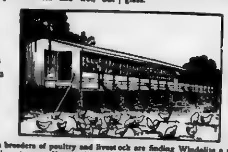
Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE
THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, and withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE



USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Wrong Use Of National Anthem

Is Sung When It Should Not Be Says Toronto Minister

The National Anthem is a prayer and should be sung as a prayer, not as a signal to people to put on their coats and go home, Rev. Dr. I. B. Gibson recently told the congregation at Cooke's Church, Toronto. Dr. Gibson declared that the National Anthem was sung on all kinds of occasions when it should not be sung.

"It is besmirching this hymn, sacred to all Britons, to sing it at prize fights, brutalizing shows and at the end of many other types of entertainment as a signal to go home," he said.

We think Dr. Gibson's criticism is well-founded. There are altogether too many people who regard "God Save the King" as a signal for them to put on their wraps or to make their exit. As soon as the first bar is struck they reach for their hats and coats and if they are not out of the building before the singing is concluded it is because the door is too far away or because some respectful citizen mars their way by determinedly standing still until the end.

We do not think the "bolters" intend to show discourtesy to either the Eternal or the earthly King. They are merely consumed by that demon speed, which, as much as anything else, prompts discourtesy. They want to beat others to the aisle and the door and be on their way a minute or two before they would if they waited decorously for the singing of the National Anthem. And as a rule they are not the least pressed for time. In fact, those who tear about have less to do and take longer to do it, than do those who find time to stand at attention while the first verse of the Anthem is sung. By the watch, it takes only a minute or two to sing that verse, and nobody's work or leisure will suffer the slightest if that minute is spent joining in the singing or at least listening respectfully.

We think, with Dr. Gibson, that the National Anthem is sung on occasions when it should not be. It is a dignified composition—a prayer, as he points out—and should only be sung when the setting is appropriate. If it were sung less frequently than it is now, it might be received with more feeling. As it is invariably the last number on the program, many people have come to regard it as an indication that the affair which they have been gracing with their presence is over and act accordingly. Wherever it is deemed necessary to sing the National Anthem we would suggest that it be sung at the beginning and not at the end of the program. There is a danger, of course, that some of the old "fire horses" may want to race away at hearing the first familiar bars, but even at that the chances are that the National Anthem would receive more attention than it generally gets now.

Value Of Average Boy

No Way Known To Estimate What He Is Worth

How much is a boy worth? A statistical wizard has figured that the economic value of a boy at birth is $9,333 and increases progressively to $28,654 by the time he is eighteen.

From now on, instead of saying that "boys will be boys," shall we conclude that boys will be statistics? Not much. How could a real boy keep still long enough to be a statistic? No "regular feller" would even try.

On the same day that the juggler of figures thought he had catalogued and evaluated the average boy, a lad in Philadelphia popped into the news to prove that it can't be done. Boys aren't average boys — they're boys. The Philadelphia one was Roy Benson, a fifteen-year-old sophomore in the Northeast High School.

A week ago he had decided to forego his life's ambition to become a great organist. He had a job working week-ends in a grocery store and was spending the money for music lessons. But the family encountered financial difficulties and he quit his lessons and turned the money over to his mother. His teacher heard about it, and was trying to see what could be done about the matter when an anonymous donor contributed funds for "lessons for life on the organ, or for as long as he wants them."

A boy worth a paltry $9,333 at birth and only $28,654 at eighteen! Away with the statisticians! Why, even a boy's freckles or his whistle or his smile are worth more than that. We dare the statistician to show his estimate to that Philadelphia mother!

Crowds See Beauties Of Famous Cathedral

Notre Dame Stands Out Under Diffused Electric Illumination

The Notre Dame of Victor Hugo which represented the darkness and mystery of the Middle Ages, passed definitely into history when electric light projectors of a million candle-power, bathed the gloomy old pile in a milk-white blaze of light and drew every grinning gargoyle from its coin of vantage.

From every quarter of Paris, crowds made their way to the Place du Parvis in front of the famous Cathedral to see if the effects of diffused lighting on it would be the same as on the Arc de Triomphe, the Madeleine and the Palais Bourbon. And they were not disappointed.

Statuary which had been hidden for centuries in the multitude of details, stood out as clearly as if they were in the Last Judgment over the central portal. The leaden spire of Viollet-le-Duc was seen in all its beauty and lightness. Even as far as the Place de la Concorde, the Cathedral loomed up against the skyline in all its virgin darkness.

From evening to midnight they crowded around the ancient site and the Ile St. Louis, viewing the effects of the projectors and listening to the tolling of the great Bourdon de Notre Dame, one of the largest bells in existence. Then as the lights went slowly out, made their way quietly home.

Roads Of Steel

Roads of steel are scheduled for the future if one such road built on the King's Road, Chelsea, proves practical. It is a continuous network of tough steel, whose interstices are filled with concrete. On the surface, however, the metal grid is directly exposed to the wheels of vehicles. It is expected to last twice as long as any other road.

"I am proud of the way my son has worked his way up."

"Is he a director now?"

"No, but he started as a shoe cleaner and is now a hair dresser."

ECZEMA

Did Not Like Reception

Paul Kruger Thought People Of Cologne Insulted Him

A correspondent recalls, apropos of confusion in national anthems, what happened when Paul Kruger arrived in Cologne after his flight to Europe in the South African War. Dr. Leyds had arranged a series of anti-British demonstrations for Oom Paul's pilgrimage. Kruger arrived in the evening at the Domhof, at Cologne, to find a great crowd which had been whiling away the time by singing the "Wacht am Rhein." Applause rose and died away as the aged pilgrim came out on the balcony lifting his ruffled silk hat. Then, with bang and crash and blare of brass, a thousand tuneful voices burst into the first item on the serenade program "Heil Dir im Siegerkranz" ("Hail to thee with the victor's crown"), which, considering he had just been chased out of South Africa, was rather pulling the old gentleman's leg, but what upset him was that the melody was identical with "God Save the King." Kruger had heard that tune before, and putting on his hat he vanished from the balcony. "Do these damned Germans want to insult me?" he cried, and not all the explanations by Dr. Leyds of the unfortunate coincidence could prevail to get him to appear again on the balcony. "God Save the King," as on numberless other occasions, closed the concert.

Leads World's Fur Trade

British Empire Captures Position With Canada In First Place

Mention of the first International Fur Exhibition at Leipzig, and the £15,000 that is being spent on the British Section of it, reminds one that London is really the centre of the world's fur trade and that that trade is becoming more and more an Empire trade each year.

Fur dealing in London began nearly 300 years ago. According to the custom of the day, the business of buying and selling took place at several of the City coffee houses, the most conspicuous in this connection being Garraway's, which was patronised by the Hudson Bay Co. Nowadays the greatest fur sales in the world take place in London in January, April and October. Under the shadow of St. Paul's tens of thousands of furs change hands during days of hectic buying. Germans, Chinese, Chileans, Frenchmen, Italians, and many others fight to obtain bargains. In five minutes furs worth thousands of pounds change hands. A slight nod of the head often indicates a bid worth a small fortune.

Before the war Siberia led the world in the export of furs; and now the British Empire has captured that position, Canada having jumped to first place. Canada today sends to London £2,800,000 worth of skins a year.

Motor Invasion Of Canada

Figures compiled by the Department of National Revenue show that 3,416,866 motor cars were admitted to Canada in 1929 for touring purposes for a period not exceeding twenty-four hours; 1,601,014 for a period up to sixty days; and 1,206 for sixty days or not more than six months.

His Worship: "You say you have known the prisoner all your life. Do you think he would be guilty of stealing this money?"

Witness: "How much was it?"

READ OF A CASE LIKE HER OWN

Decided to take Lydia E. Pinkham's Vegetable Compound

Moncton, New Brunswick—"Before my last baby was born I was very weak, nervous and discouraged. I saw an advertisement in the paper about a woman who had been like me so I bought a bottle of Lydia E. Pinkham's Vegetable Compound. I took three bottles and it carried me safely through that critical time. I have three children to care for and I feel well and strong. I have told two other women about your medicine."—Mrs. Geo. Arsenault, 83 Albert Street, Moncton, New Brunswick.

Mystery Of Name Origins

Romance and History Lie Behind Modern Surnames

There's a lot of romance and history in the name-plates on your neighbors' doors. Many of them open windows on a vanishing world.

Most people are too busy to think about the names which they have used all their lives. Yet nearly every name in use today has a very long history and a very picturesque origin, says an article in "Answers."

In the early days, when Europe was the home, not of nations, but of tribes, there were no surnames. Men embodied in their names the qualities they admired and sought.

Take the name of Mr. Baldwin, the Conservative leader, for example. It is very old, and comes from two Teutonic words, baldo, meaning "bold," and wine, meaning "friend." Hence "Bold Friend."

Surnames, properly speaking, were not common in England, even in the fourteenth century. But most men had nicknames. Many of these nicknames stuck, passed on from son to son, and are current today. Thus, Goodfellow, Hogg, Legman, Little, Dark and so on.

A quaint instance of such a surname may be found in the Nottingham Borough Record. It is "Overandever." Perhaps the first Overandever was long-winded!

Surnames proper came in when the population increased to such an extent that they were necessary to obviate confusion. Trades, crafts, locations, and eccentricities very often determined them.

The queer surnames sometimes given to foundlings can be ascribed to this source: a churlish beadle, speaking the first name that comes to his empty head, or a Mr. Bumble following an alphabetical system and giving a surname to suit the foibles of each little victim. It was in this way that Oliver Twist received his immortal name.

Ice Hockey In August

Entertainment For Delegates To British Medical Association Convention

Summertime in Winnipeg will be transformed into frigid winter to provide atmosphere for the hundreds of distinguished medical men who will gather there from all parts of the Empire for the British Medical Association convention. Ice will be laid in the amphitheatre rink for the week August 24-30 in order that the Winnipeg Skating Club and two picked teams of local star material, may give fancy skating and hockey exhibitions for the visitors.

An Indian pageant has also been arranged for entertainment of the doctors. Some 75 Crees and Assiniboine Indians will perform in horse racing and trick riding. As a mark of honor, shared by H.R.H. Prince of Wales, Lord Dawson of Penn, physician to His Majesty King George, will be inducted as a Cree chief.

American Farmers Lose Money

U.S. Government Figures Show Growing Wheat Costs Farmer $1.24 Per Bushel

The United States Government figures have disclosed that it cost farmers an average of $1.24 per bushel to produce wheat last year.

This figure included charges for the farmer's labor, that of a family, and rent on his land, so that if a farmer actually got $1.24 for his last year's crop, he would be paid for his work and interest on his investment.

The Oil Of the People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

A Clever Idea

Ingenious swindles seem to be without number. A new fountain pen swindle was exposed in London. Pens priced about $2, but worth 30 cents, were mailed to persons whose obituaries had just been printed in the newspapers. In most cases the executors of the estates thought the dead persons had ordered the pen and paid without comment.

Would Help Farmers

The Agricultural Council points out that the cup of coffee given to every German regular army man each morning has to be imported and suggests instead that the army drink milk for breakfast, thus increasing farm income.

The man who won a big pool in a horse race had his name in the papers. The papers aren't big enough to publish the names of all the losers.

Turkey expects bounteous crops this year.

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Pathlow, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Canadian Goods In British Daily Life

Always Something To Remind People Of Dominion's Products

"What the future holds for Canadian products in the United Kingdom can be judged in the light of today," said Douglas S. Cole, B.Sc., Canadian Trade Commissioner at Bristol, England, in an interview at Toronto. "The modern Englishman can rise in the morning from a Canadian-made bed on to a Canadian carpet, lather himself with a Canadian shaving brush and Canadian shaving cream, shave with a Canadian razor, come down to breakfast and eat Canadian cereals, Canadian bacon, Canadian eggs, and toast made from Canadian flour, all cooked on a Canadian gas or electric range, and kept wholesome in a Canadian refrigerator, the while he reads a newspaper printed on Canadian paper. He can drive in a Canadian car to an office equipped with Canadian furniture, dictate letters on Canadian paper, which he signs with a Canadian fountain pen. He reduces his weight by a Canadian massage roller, plays racquets in Canadian rubber shoes, tries to look graceful on Canadian skates, and drives his doctor to starvation with Canadian apples."

Dust Causes Asthma. Even a little speck too small to see will lead to agonies which no words can describe. The walls of the bronchial tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

Machine Matches Colors

Newest Invention Will Be More Exact Than Skilled Matchers

In France, wine-tasters sip wines, let their tongues tell them whether the fluid is bound for a plebian carafe or a gentleman's cellar. Were it not for whiskey-tasters England's famed blenders would be unable to produce a uniformly good product year in and year out. On equally skilled men depend the fact that all vermilion dyes are uniform, that azure satins are azure. But foibles of the color-matcher's eyes, which tire quickly, make them expensive to their employers.

A new machine, on the market, will doubtless throw scores of color matchers out of work. It will perform their function with more exactness, will cost less and, biggest advantage of all, it will not depend on daylight for its accuracy. The heart of the machine, invented by New York University's able young physicist, Dr. Harold Horton Sheldon, is a photoelectric cell.

Light reflected from two samples of the same cloth placed in the machine, passes into the cell, gives an electrical impulse which is indicated by a galvanometer. The indicator hand is then set at zero, the unknown sample is introduced. If the hand again points to zero the match is perfect. If it varies to the right the sample is too dark, to the left, too light. A variation of three-calibrated scale divisions is considered a passable match.

Obeyed Instructions

The master impressed on his pupils the need of thinking before speaking, told them to count fifty before saying anything important, and one hundred if it was very important.

Next day he was speaking, standing with his back to the fire, when he noticed several lips moving rapidly.

Suddenly the whole class shouted, "Ninety-eight, ninety-nine, a hundred. Your coat's on fire, sir!"

Perfectly Safe

When the guest was just leaving his hotel to hurry to the station, he noticed that he had forgotten something. He said to the page-boy: "Run up quickly to room 434, and just see if my umbrella is there. I think its to the left of the washstand. But hurry up!"

A minute later the boy returned and panted: "Yes, sir, the umbrella's still there, at the left of the washstand."

Minard's Liniment removes Warts, relieves Bunions.

Little Helps For This Week

"Master, what shall I do to inherit eternal life?"—Luke x. 25.

I do not ask that Thou wilt bless
With gifts of heavenly sort my day,
So much as that my hands may dress
The borders of my lowly way
With constant deeds of good and right,
Thereby reflecting heavenly light.
— Alice Cary.

Good deeds will shine as the stars in heaven.—Thomas Chalmers.

Good deeds are very fruitful, out of one good action of ours the Lord produces a thousand, the harvest whereof is perpetual.—Bishop Hall.

Miller's Worm Powders are a pleasant medicine for worm-infested children and they will take it without objection. When directions are followed it will not injure the most delicate child, as there is nothing of an injurious nature in its composition. They will speedily rid a child of worms and restore the health of the little sufferers whose vitality has become impaired by the attacks of these internal pests.

Signatures On the Roof

Copper Plates On Stockholm Town Hall Bear Name Of Donor

Ragnar Ostberg, who has just been made a Royal Academician, is probably the most famous architect in Europe. His fame rests largely on the wonderful town hall which he designed for his native Stockholm, and which has been inspected by visitors from all over the world. It cost nearly a million pounds to build and it was decorated by a remarkable team of artists, which included a prince of the Royal House. The roof is composed of copper plates, each one of which is inscribed with the name of the citizen who paid for it, and the floor of one of the magnificent halls was made by the workmen, on their own initiative, out of odd pieces of marble left over from other building operations.

Utilities Show Profit

The City of Regina utilities showed a new surplus, according to the statement of G. B. Nelles, city comptroller, of $131,674 for the first five months of 1930 after deducting administration charges of $7,063, while the Electric Light and Power Department showed a surplus revenue of $130,867, the Water Department, a profit of $11,291, and the Street Railway, a deficit of $12,140.

For all Skin Abrasions — Minard's Liniment.

A remarkable feature of the 1929 forest fire situation in Manitoba and Saskatchewan was that fires occurred and were fought in every month of the calendar year.

CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

Chas. H. Fletcher's CASTORIA

FORMER TOFIELDER FOUND DEAD IN WASHINGTON

The following extract taken from a Cashmere, Washington newspaper, will revive among Tofielders memories of the deceased man. Mr. Berry lived here for a number of years, leaving here to reside at Washington, about ten years ago.

J. H. Berry, 64 year old Mission Creek rancher who had not been seen since Wednesday was found dead at his home about four miles from Cashmere last night by A. C. Jones, a neighbor, when the latter went to Berry's house to make some arrangements about water on his ranch.

Lying near the bed where the body was found were a copy of the Daily World and the mail which Berry apparently had taken from his mail box Wednesday. In his clothes was the sum of $1.46. The kitchen light was burning said Deputy Sheriff Streval, who went to Berry's home in answer to a call by Jones.

Suspicion of foul play was dispelled when it was discovered that nothing in the home appeared disturbed, said Streval, and there is no reason to suspect suicide as it is understood that Berry's 5 acre ranch is all paid for and as far as could be gathered he had no outstanding bills in Cashmere and was in good health. Little is known in Cashmere about Berry, except that he came from Alberta about ten years ago. Letters found in the house showed that Berry has a brother living in Wichita, Kansas, and a mother at Fedora, Kansas.

The body was taken to Kuelbs undertaking parlors at Cashmere and is being held there pending word from relatives.

CANADIAN NATIONAL FIRST AID TEAMS WIN SEVEN CHAMPIONSHIPS

Four Dominion and two provincial championships as well as a championship for Eastern Canada, were won by teams of the Canadian National Railways in the Dominion Championship competition of the St. John Ambulance Association, according to announcement made by J. Cook, First Aid organizer for the Western Region.

One of the outstanding achievements was the winning, by the Edmonton team of the Canadian National, of the Sir George Burn trophy which stands for the Dominion Championship for women's first aid teams. Eight of the fourteen entries for the event were made by Canadian National offices in various parts of Canada. The Lady Drummond cup, Dominion Home Nursing Championship, was won by the National System also by a team from the Montreal general offices.

The Sherwood Police Championship of Canada Trophy was won by the Canadian National Railways Investigation Department, Stratford, Ontario.

The Pope Trophy was awarded to the Toronto Suburban Electric team from [illegible], from 25 entries. The Shaughnessy Shield for the Police Championship of Eastern Canada was won by the Stratford team, and a Winnipeg team took second place in the competition for the Western Canada Championship.

A repair track team from Transcona brought the Manitoba Championship to the Canadian National and a team from Biggar won the Saskatchewan Championship, with another Canadian National team (Melville) in second place. The Railway took second place in Alberta, second and sixth in British Columbia, third, fourth and fifth in New Brunswick, second and third in Ontario, second and fourth in Quebec.

In the senior first aid championships, for the Montizambert Trophy, Canadian National teams at Biggar, Sask., and Transcona, Man., took fourth and sixth places. A Stratford first team won second place in the Wallace Nesbitt Railway Trophy contest, and the system also took third, fourth and fifth, having 20 entries out of 30 altogether.

SPENDS SIX YEARS AMONG ESKIMOS

After spending six years as a missionary among the Eskimos along the ridge of the Arctic Circle, Father H. Pigeon, O. M. I., passed through Winnipeg recently, over Canadian National Railways, for Nominingue Lake, Quebec, and a holiday with his relatives.

As missionary to the Padlermuit tribe of Eskimos, Father Pigeon's work took him some 250 miles north of Churchhill. He spent four years at Eskimo Point and two years at Chesterfield Inlet.

"The Eskimos are very intelligent" said father Pigeon, "and when they decide to believe, they learn very quickly". When father Pigeon first visited the mission post, only two Eskimos had been baptized, when he left, this number had increased to sixty two.

Chas Gordon, Puts up good Fight

A MILLION MATCHES

(A Red Cross Article)

The Forest Service of Canada have been preaching the doctrine of fire-prevention to the tenderfoot and the novice who have yet to learn its necessity, and yet the annual toll of life and valuable timber takes place as inevitably as the collections of taxes.

It is estimated that ninety per cent of forest fires are due to nothing more or less than the carelessness of the summer camper. If reasonable care were exercised by everyone who goes a camping holiday nine out of every ten fires would never get a start at all, and there would be a saving to Canada of tens of thousands of valuable timber to say nothing of the great unnecessary human sacrifice.

Considered from an economic point of view it is ruinous to many trades when the timber is burned throughout the whole districts. Sawmills cannot be built in such places, big game do not breed midst blackened stumps. The Lumber industry means $150,000,000 a year to Canada, pulp and paper industry represents $190,000,000. Trapping turns over $20,000,000 annually, while tourist trade is estimated at $300,000,000 a year and is increasing as time goes along. Here is a grand total of wealth to the Dominion representing the huge sum of $710,00,000 per annum, every cent of which depends directly on our forests and may be said to be at the mercy of the summer camper, for weal or woe.

Parents should teach their children the sacred duties of Canadian citizenship and see that no careless child with matches can run loose in the woods, for a match may destroy a million trees, while a tree will make a million matches. Do not start little bonfires for fun and thoughtlessly go off leaving embers still warm. Teach the camping groups that every big fire was once a little one, therefore kill the fire while young. Most boys and girls love the wild creatures of the woodland, therefore appeal to their sense of fairplay and give the game a chance to feed and thrive and breed by preserving their home. Teach the family to love nature and never kill wantonly or needlessly. Fire destroys the range for cattle and burns the food for the birds and beasts. Fruit trees are ruined when fire runs through the country; in a word, be lovers of the woods and give the saplings of today a chance to be saw-logs of tomorrow.

Teach citizenship and service to your children by enrolling them as Junior Red Cross members, who are all pledged to serve their country. Write for information to 407-Civic Block, Edmonton.

TOFIELD DEFEATS RYLEY BY THE SCORE OF 5-1

On Thursday of last week before a very meagre crowd, Tofield defeated Ryley in an exhibition ball game by the score of 5-1.

Owing to Ryley arriving a little late, seven innings were played instead of the usual nine.

Tofield took the field first and with Glen Wood pitching for Tofield superb ball, soon had the side retired.

In their first time to bat Tofield went right on the offensive and collected two runs. From here on it was a close game with Ryely trying hard to overcome Tofield's lead. Ryley got their lone counter in the second inning and Tofield kept adding a counter here and there to bring their total to five.

Otto Anderson who pitched for Ryley though not as effective as Glen Wood pitched good ball.

Ryley Line Up—p., O. Anderson; c., Bud Hannan; 1st., A. Molus; 2nd., A. Oslund. s.s., D. Ewers; 3rd., Pearce; fielders, Butler.

Tofield Line Up—p., Glen Wood; c., Arthur Francis; 1st., Joe Kallal; 2nd., Harry Bowick; s.s., Willie Worton; 3rd., Ed. Hill; r.f., S. Worton; c. f., Ray Martin; l. f., Paul Thompson.

"THE FIRST KISS"

Love makes the world go round—and the head too. Here's a picture that will set your heart in a whirl. Mystery—Melodrama. See this in memory of your "first kiss".

Paramounts two most youthful screen lovers, FAY WRAY AND GARY COOPER are starring.

"THE CANARY MURDER CASE" SHOWING AUGUST 23.

HAIL INSURANCE:—
Owing to the unusual financial and weather conditions prevailing, every crop should carry some hail insurance.

AUTOMOBILE:—
Before going on your holidays or taking a long trip it would be wise to insure your car against public liabilities, collisions, property damage, fire and theft.

A. J. H. McCAULEY

Real Estate — Insurance — Notary Public
Issuer of Marriage Licenses — Branch M. O. Office

The Mixed Farmer

It is an old story—yet ever new. It is so much easier to be purely a grain farmer that many have fallen into the easy paths. But while it may be easy it certainly is not profitable, and now the pinch of economics is abroad in the land—fortunate is the man who owns a few cows.

Plan to keep the maximum number of cows your farm will support. Take care of your cream, sell your cream to the Tofield Creamery and you can put up a bold front before "Old Man Hard Times."

THE TOFIELD CREAMERY

W. HESLER, Manager

Don't Get Caught Napping

When you are a thousand (more or less) miles from home and something goes wrong with your car it is possible that your whole holiday may be spoiled. Get your car checked over and have it mechanically perfect before you start.

It is a good policy too, when you return from a long trip to have your car again inspected. Remember railroad engines are checked over by experts before and after every trip. That is why they run so well.

TOFIELD - - ALBERTA

Local and Personal

The Junior C.G.I.T. girls left for a two week's vacation at South Cooking Lake on Friday.

Miss Viola Shields of North Battleford, Sask., who has been visiting Georgina Craig for the past two weeks left for her home on Thursday.

A number of Tofielders attended the dance at Ryley on Friday.

Miss Betty Ingram, of Edmonton, who has been visiting Miss Muriel Malcolm for the past two weeks returned to her home on Saturday.

Mr. A. P. Marrold of the C. N. R. left for a months holiday at the coast on Monday morning.

Reg Beariste and Miss Alice Walters of Egremont were visitors at the Wood home over Sunday.

Mr. and Mrs. W. Chapman left on Saturday for Waterton Lakes for a two weeks holiday.

Mrs. John Herbert of Calgary is visiting Mr. and Mrs. W. C. Swift.

Miss Loret Ross is home from St. Albert and Edmonton where she spent her holidays.

Miss Hilda Nesseland is home from her holidays. She was visiting with Miss Loret Ross.

Mrs. Bruce and son Jimmie are having a months holiday at Cooking Lake.

Mrs. N. Scott suffered painful burns when the gas oven she was cooking with blew up. She is now much better.

Mr. W. O. Glover is now on his holidays.

Miss Ethel McClyment is visiting in Vegreville during her holidays.

Mrs. Pincott has returned home after spending a few days in the city.

Mr. and Mrs. Geo. Bissett left for Bashaw on Monday where they will reside. Mr. Bissett having secured the management of the elevator there.

Mr. R. W. Pincott and children are taking a short holiday at Banff.

Miss Gertrude Beariste of Egremont is visiting Miss Florence Kendall for a few days.

Rev. W. Leversedge, of Edmonton, visited Tofield and conducted morning and evening services on Sunday.

CORRECTION

The last item published in last week's Ketchamoot News, should have read:

Mrs. Peter Lee, Mrs. Roger Ray, Miss Marjorie Lee and Mr. and Mrs. James Johnson motored to Edmonton on Friday.

FLOWER SERVICE TO BE HELD IN THE ANGLICAN CHURCH ON SUNDAY EVENING

Holy Trinity Annual Flower service will be held next Sunday evening at 7:15 p.m. A short service will be held in the church where the gifts of flowers will be received. After the service those who can will leave for the Cemetery where the flowers will be placed on the graves of friends and relatives. This service is open to all who care to attend. Please bring your flowers as a memorial gift, in memory of those who have passed into the great beyond.

J. E. FRITH OF TOFIELD SUFFERS SERIOUS INJURIES TO SHOULDER

Only one person was injured to such an extent that hospital attention was required in 12 street crashes occurring in the city over the week end, according to the city police reports.

Dodging in front of a car operated by F. A. Conroy, 20 Garlepy block when the horn on the auto was blown, J. E. Frith, Tofield, Alberta, was knocked down at 82nd. ave., and 91st at 2:30 p. m., Saturday and was taken to the Misericordia hospital with injuries to his shoulder. No fractures were received.

Bardo

Bardo was pleasantly surprised by a visit from Washington friends last week. They were Gladys and Andrew Hillerud, Arthur Hillard, Alton Anderson and Ole Bartness.

Martha Anderson of Fernie, B. C. visited with relatives and friends here for the last two weeks.

Monday evening the 28th, the Bardo UFWA gave an ice cream social at the Rerom home. Selmer Johnson kindly brought his radio out for the benefit of those who were eagerly waiting election returns.

Are we thankful for the bountiful rains of the last weeks? Well I should say so.

Quite a number of Bardo people took in the festivities in Camrose last Tuesday. It was to commemorate the 900 anniversary of the coming of Christianity to Norway.

The Moen, Anderson clan had a get-together at the Hendrickson home on Wednesday afternoon. These clans comprise most of the Norwegians at Bardo.

Services will be held every evening of this week at the Salem Mennonite Church. Oscar Burkholder from the States will conduct them.

Edna Steen, a pupil of Inga Johnson, Kingman, was successful in her musical examination, passing with honors.

We are glad to welcome Mr. and Mrs. Bjornson into our midst again. They are making their home with Clarence Rude.

Sunday visitors with Mr. and Mrs. Jacobson were Mr. and Mrs. Kindley, Mr. and Mrs. Erickson, Mrs. Hagen and Martin.

SYNOPSIS OF "THE FIRST KISS"

The Talbot's were one of Maryland's first families. Now "Pap" (Malcolm Williams) is a sodden drunk; his four sons are systematic their fine old house on Chesapeake Bay to a dilapidated ruin. Three sons, William (Lane Chandler), Carol (Leslie Fenton), and Ezra Talbot (Paul Fix) are lazy, shiftless. The fourth, Mulligan (Gary Cooper), does all the work, from the oyster fishing to the cooking. The village citizenry despise the whole family.

Anna Lee, (Fay Wray), is the town's richest girl, but she loves Mulligan. She sails in his oyster boat against her father's orders. And one day Mulligan kisses her. When she flares up and cries "White trash!" he realizes the difference in their positions.

Though she apologizes, Mulligan smarts under the insult. "Pap" dies in a drunken stupor. Mulligan determines to force his family up. He thrashes William, and forces all three brothers to learn professions. He finances them. They believe he is getting the money from their rich grandfather.

Actually Mulligan gets the money from robbing ships. In six years William is a minister; Carol a lawyer; and Ezra a doctor. Despite a forced trip to Paris, Anna Lee still loves Mulligan faithfully. She reads of the brothers success and comes home. She finds Mulligan still an oysterman, still smarting under her rebukes. He has one possession, a fine schooner, a dream ship he has built for her.

The brothers demand more money. Mulligan has to sell the ship. The money meets their demands and pays back every cent he stole. But by these payments, Mulligan is detected, arrested.

At his trial, Anna Lee creates a sensation by testifying for him. "We have been engaged for six years," she lies. Then she sends for his brothers, revealing to them how Mulligan has paid for their education. They spring to his aid. The lawyer brother defends him. He is paroled in Anna Lee's charge and finds that she secretly has bought his own dream ship. In it they sail away to a greater happiness.

NOTICE TO WHEAT POOL MEMBERS

All wheat pool members are reminded that the ballots for the election of a delegate for this sub-district must be in at the central office, Calgary, by August 15th.

It is important that each member should exercise his franchise in this respect and make sure that his ballot is forwarded at once.

Lindbrook

Repeated showers, in fact some were regular deluges, have brought on the growth of the grain and hay here considerable of late, although some farms have also had a touch of hail estimating a 25 per cent loss in spots.

In one of the recent electric storms a building just outside Mr. A. Williams home was struck and was blazing away, despite the rain, when it was noticed by one of the boys. Mr. Williams and his sons managed to put out the blaze before any serious damage was done. Incidently this building, which is of logs, was the original house built by Mr. Williams when he homesteaded the quarter.

We all wish Mr. and Mrs. Leslie Rogers (nee Miss Alberta Wilson), long life, health and happiness. They were married last week in Strathcona and returned here on the Sunday, then of course on Monday the news leaked out and on Monday night a crowd turned out in cars and horseback to greet them.

Miss Wilson is a local girl known to all here and Mr Leslie Rogers who is a well known farmer here needs no introduction either, so here's wishing them all the best of luck and the rest of it, whatever that may be.

We have heard of the Tofield children who have been fortunate enough to see in the local movie the "Episodes of Tarzan", and who have been endeavoring to imitate the man of the jungles with somewhat disastrous efforts to their [illegible] really see one of our neighbors trying to imitate a hippopotamus wallowing out of the mud at one of the lake resorts here, and a very creditable imitation it was too. It seems that all the beach is not sandy some being mud of the oozy kind. Well this gentleman swam until he was in too shallow a depth to swim further, so decided to land or beach himself, this he did but on the muddy beach, from then on the performance resembled the above remarks. No names! No pack drill! but you asked for it!

A rather remarkable tribute to advertising happened here lately. Mr. Chas Kortzman who is section foreman on the C N R. here picked up a stray dog that had been hanging around the station for a few days. He fed same and kept it around. Meanwhile Mrs. Kortzman, who resides in Edmonton with the family, there being no married quarters here, noticed an ad in the Journal, re a lost dog answering to this description. Mrs. Kortzman communicated with the enquirer and the dog turned out to be his and was turned over to him, he being very pleased to get his dog again especially so when he lives at Wabamun, which is quite a long way from here.

U. F. W. A. NOTES

The next meeting of the U F.W.A is to be held at the home of Mrs. Jas. Francis on Thursday, August 14th. Roll Call will be answered by "What benefits have we received from our U. F. W. A." Mrs. T. R. Murray will read a paper on "Waste in the Kitchen".

HOLY TRINITY CHURCH (Anglican)

Morning Prayer and Sermon 1st and 3rd Sunday in the Month at 11 a. m. Evensong and Sermon every Sunday at 7.30 p. m.

Sunday School - - 11 a. m.

TOWN GOSSIP

The very latest and most popular out door game is miniature or Tom Thumb Golf. A "course" may be any size, and has nine holes, like regular golf, the object being of course, to get the ball into the nine holes with as few puts or strokes as possible. The size generally resorted to is one that will suit the lawn upon which it is to be played and obstacles or "hazzards" original and otherwise are placed on the course to make the game interesting.

* * * * * * *

On the United States Pacific Coast, these Tom Thumb Golf Courses are quite the rage, many miniature courses being quite elaborately designed. In England too, Tom Thumb Golf has already made its appearance and according to a United States radio news item, no less a person than His Royal Highness, The Prince of Wales has been enthused by it, for at some society function he played a round of Tom Thumb Golf.

* * * * * * *

All this is quite interesting to Tofielders, because A B Clutterham has put Tofield right up to date and in the front rank of the style parade by constructing a Tom Thumb golf course on his lawn. And to use his own words if Mr. and Mrs. Jones, Smith, White, Green—or anyone—wishes to play a round of miniature golf, they are cordially welcome.

* * * * * * *

Bird and Bess are genuine Tofielders. They may not have been born here, but they have earned their citizenship by the faithfulness in which they do their daily task. Bird and Bess are black and while not perhaps quite as handsome as the famous "Black Beauty" of story book fame, are not by any means "bad to look". There is nothing angular about them nor are they tall and rangy, in fact they are what you would call "Pleasingly plump" so to speak. They thrive on hard work and three squares a day and their pleasingly plump appearance is as much due to the little extra care they get as to their pleasant dispositions.

* * * * * * *

Just as an example one day last week was very hot, with a brilliant sun shining. At a particular hour there was but one spot on main street where there was any shade, a stretch of about fifteen feet, and because Bess and Bird had no work to do, it was to this one piece of shade they were led and tied.

* * * * * * *

Bess and Bird are Fred Griswold's dray horses.

* * * * * * *

The Anglican Church Lawn Social was a very pleasant affair. The clock golf competition was unique and much fun was obtained from it. But where oh where, are the champion Tofield golfers? Murray McHeffey won the clock competition with a score of 20. Mr Cory made a determined effort to lower this record but could not do so, 21 being his best. A. B. Clutterham had a try and A. E. Cary also, but they were in the also ran column, while the writer was much worse, much worse.

* * * * * * *

But it was in the "something to eat" competition that the writer shined. There was a competition in which one had to guess the weight of a cake and after "hefting" it a few times a guess was recorded and Worton was awarded the cake.

* * * * * * *

The cake was made by Mrs. C. Baptiste and was a dandy to which many will testify. Now there are two things that Mrs. Baptiste may be noted for, one, as a maker of cakes, and two as a writer of poetry.

* * * * * * *

Perhaps you did not know that Mrs. Baptiste could mix poultry raising and word weaving and make a success of them both. Well, this is quite correct, but it is a long time since the Mercury published any of Mrs. Baptiste's rhymes.

* * * * * * *

But you know we are told poets are born and not made and this being so, there is no telling when Mrs. Baptiste will favor you with a poetical literary effort again.

* * * * * * *

We hear that Dr. Morrison has been appointed assistant meat inspector at Edmonton. Congratulations Doc. It is quite a little time since Dr. Morrison came to Tofield and inserted a professional card in the Mercury. For quite a number of years he has given up vetinary surgeon practice altogether, having switched his allegiance from the horse to the automobile.

* * * * * * *

There was a time when a vetinary surgeon was a real power in the land. This was when the horse was king of transportation in this western country. "Attend to your horses teeth", was a household saying, and at times the country vet was operating surgeon and dentist, all in one.

* * * * * * *

The vet always drove a spanking driver or a team of drivers, and the buggy, rubber tired and shining, cut quite a figure.

* * * * * * *

Modernism in the shape of the automobile, along with others, edged Doc out of active practice. But then again modernism in the shape of meat packing plants and government inspections edged him into what we hope will be a lucrative position. Once again, congratulations.

Cause Of Our Economic Ills

Anything and everything that will have even the slightest effect in removing causes of friction between nations on the one hand, or of promoting goodwill on the other hand, should to an ever increasing degree receive the support of every government, every organization, every individual. There is danger as we get farther and farther away from the agony of the war years 1914-1918 and as the horrors of that grim struggle begin [illegible] become indistinct in our memories, to forget just how awful war really is.

It is well, therefore, to be occasionally reminded of what the Great War continues to mean to us today, twelve years after it passed into history. Hon. Philip Snowden, British Chancellor of the Exchequer, whose outstanding characteristics in all his public speeches is his clear incisiveness, unswayed by hysteria or [illegible] gave a radio talk recently in which he pleaded for world peace, and for the putting forth of every effort to attain that object.

Despite Mr. Snowden's well known pacific tendencies, he dealt only with the mere dollars and cents aspect of war as an agent of destruction. Taking the case of Great Britain he pointed out that it had spent some 50,000 million dollars on its part in the Great War. This was apart from the loss of the wealth-producing capacity of millions of men drawn for four years from useful employment, and, of course took no cognizance of the loss of life.

The war, as Mr. Snowden pointed out, left Great Britain with a debt of over thirty-five billions of dollars, the interest on which alone costs one and three-quarter billions a year. It all has to come out of taxation.

At the present rate of payment, Mr. Snowden added, it will take 140 [illegible]

GIANT DIRIGIBLE R-100 REACHES ST. HUBERT PORT

Montreal.—After a weary wait, Great Britain's giant threat for the supremacy of the skies, hovered over St. Hubert airport, early on Friday, August 1st. Just a little over three days after leaving Cardington, England, the R-100 reached the mooring mast, marking the end of the trans-Atlantic flight. Fabric trouble caused a delay of several hours, and cut down the speed after reaching the Gulf of St. Lawrence.

As newspapermen and ground crew awaited, the dirigible was first sighted 10 miles northeast of St. Hubert at 2.04 a.m. Eastern Daylight Saving Time, and was travelling slowly east toward the illuminated landing field. Half an hour later the huge, silvery silhouette could be seen, barely moving at an altitude of about 500 feet above the ground.

The final appearance of the sky-wanderer after many hours of waiting, was the signal for an outburst of cheering from those at the airport. Behind the high fence surrounding the field, too, were perhaps a thousand people who have braved first a scorching day, then a wind-[illegible].

It was not the first time the R-100 had experienced trouble with its fabric skin. On its first extended flight over England the fabric tore on the tail surfaces and the rear portion of the ship was rather exten-[illegible]

THE RELIEF QUESTION—

ONE OF the most pressing questions facing urban and rural councils at the present time is the one of relief to indigents.

Canada being a comparatively new country, and supposedly being blest with ample opportunity for all and sundry, there are no such things as poor houses, work houses or properly organized facilities for taking care of the poor. In fact the expression that Canada is a country where you get on or get out, is to a very large extent literally true. But, even so, while this may apply to nearly all the residents of Canada, there are alway the few who through their own fault or the fault of someone else, or perhaps through nothing else but unavoidable misfortune, find themselves in a position of penury and compelled to seek assistance from the first public body at hand.

The Municipal Act says a municipality must supply the necessities of life to indigents within its own boundaries, or within its own boundaries for a certain length of time. This would perhaps be fair enough if conditions were anything like those in the country, from which the law was evidently copied. In older countries, people, especially poor people, travel little, and it is common for people to live within a few miles radius all their lives. Therefore local bodies would have a direct responsibility to the indigents of these localities. In Alberta conditions are different. We will take the case of a man of 60, With no friends or relatives and physically unfit for daily labor, this man would come a public charge upon whatever municipality he happened to reside in long enough to fulfil the legal requirements. The fact that prior to his making formal application for relief, he might have been adroitly "jostled" from one municipality to the other, and that the one which pays him a monthly relief sum, is no more morally responsible than a half a dozen others, is not considered at all.

Municipal finance is comparitively simple if things work out according to plan. Prior to the beginning of the year a "budget" or "estimates" are made out, and these cover expected expenditures for the coming year. Remembering that the object of all councillors is to keep taxes down to the lowest ebb commensurate with proper service, the taxes are always set as low as possible. Therefore with a fixed income (all of which may or may not come in) and the money spoken for before it is collected, a few indigent claims literally throws a monkey wrench into the financial machine.

It is quite evident that in a country with a vigorous climate like ours, individuals cannot be allowed to starve or freeze, and that to those in actual need of it assistance must be given. The only question is who shall bear all of the cost. As we have said at the present time, the municipalities must, yet it is obvious to all that with our large floating population, that this is not a fair apportionment of the responsibility.

The relief [illegible] problem is getting more acute as time goes on. [illegible] are brought by governments from [illegible] of the earth to live and work here and those that fall by the wayside while travelling around should be as much a case of the provincial government as the actual municipality they finally wind up in.

A system similar to that of the Mother's Allowance Act by which half the allowance is paid by the council and half by the provincial government, would we believe be better than the present system. It does not relieve them of all their responsibility, while at the same time it does not load upon a financially harrassed council all the care of indigents who have gone as far as they could.

THE RETURN OF PRIVACY—

IMITATION OF the humble goldfish housed in a great transparent bowl, observed of every passer by, is rapidly giving way in many an American city to an older custom closely associated with a more sheltered life. The Englishman, as is well known, has always enjoyed a home surrounded by flowers and all but hidden from the busy street, where he may do as he pleases far apart from the prying eyes of the multitude. The wall or hedge row accentuates still more the sequestered little island of peace and quiet established by every man who loves a homestead he may call his own.

In America, apartment house life and the crowding of metropolitan areas has shortened the arc of privacy and [illegible] the daily routine of living under the spotlight of public observation, with the result that much of the freedom and intimacy of the past has been destroyed. City life today is too often imprisoned in a show window, seldom without a spectator or a listener.

It is gratifying to note, therefore that some of the newer houses in small towns and suburban centers are making an effort to recapture the privacy once associated with a more leisurely style of living. The old fashioned picket fence, high and white, is said to be coming back, and trees and bushes are now being employed to hide the rigid contours of the house itself, which in many instances is set at some distance from the street. The hedge and flower garden appear to be more popular today than ever, so that the modern house ceases to be an unadorned building jammed closely against some other commonplace structure, but a real home where a family may enjoy itself without restraint and without too much scrutiny on the part of the hurrying crowd.

YOUNG DEER INVADES TELEGRAPH OFFICE

A young deer with the idea possibly of following the injunction "Don't Write—Telegraph" invaded the office of the Canadian National Telegraphs at Halifax, N. S., recently, entering through the plate glass window. The Deer was being chased by a small dog and in an endeavor to get away rushed through the window making a hole in the glass four feet wide. The dog followed the Deer through the glass and considerable damage was done before the deer could be secured. The deer was badly cut by the glass but put up a terrific fight against the attempts of the staff to catch it. Eventually the animal was secured and removed in the police patrol and it was found necessary to end its career to put it out of misery.

RARE AIR FOOLS GOLFERS ON MOUNTAIN COURSE

Only three players have equalled the par of 70 on the Jasper Park Lodge Course in the five years it has been operating, though some of the world's best competed over it in the Canadian Amateur Championships last year. Apart from the layout of the course, one of the reasons for high scores is the clear atmosphere which makes players prone to misjudge distances, says Jimmy Rimmer, the club professional. The player is apt to believe himself closer to the green than he is, Rimmer adds, and also he forgets that through the light air the ball carries further with less effort. The next tournament at Jasper is for the silver totem pole in September. This trophy is now held by Gardiner White, New York broker and one of the best amateurs in United States.

CUTS FIRST WHEAT IN SASKATCHEWAN

The honor of cutting and threshing the first wheat in Saskatchewan this season goes to H. Woodley in the Pirecrest district along the Canadian National Railway southwest of Regina.

While cutting is not expected to be general for nearly three weeks, Mr. Woodley's record of cutting on July 25th and threshing on July 31st, has never been equalled in Saskatchewan before, it is believed.

The "Reward" wheat which Mr. Woodley captures the honor with, is somewhat new in the province and an earlier wheat to mature but produces with good yield to the acre. His [illegible] was sown on April 17th, was an experiment with Mr. Woodley who is [illegible] grain producer in the district [illegible] wheat of this kind.

PEONY DAY

October 1st To Be Recognized As Peony Planning Day

Tulip days, rose days, make us think of those glorious displays in some of the Pacific coast cities. In Alberta over 800 organizations are being circularized by the Town and Rural Planning Board in support of the suggestions of Mrs. P. E. Wyman, Vice President of the U. F. W. A., that October 1st of this and succeeding years should be a day on which the people of this province should plant peony roots. The Peony is one of our hardiest perennials and one of our most attractive flowers.

Circulars are being sent to the U. F.W.A. locals, Women's Institutes and to Horticultural Societies. These organizations are being requested on behalf of members interested to place early orders for peony roots with their nurseries. Already several organizations and those interested in Horticulture have expressed themselves as in greatest sympathy with the movement, states Mr. Horace L. Seymour, Director of Town Planning.

It is also hoped to interest the school children of the province on their return to school and that peony roots will be planted at each school and one or two at every home, the cost of the ordinary varieties of white, pink or red peonies being very reasonable.

Circulars in regard to planting of peony roots are being distributed and may be obtained at the office of the Director of Town Planning, Edmonton, Alberta.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

ABDOMINAL PAIN

The human body is provided with protective forces which are called into action when the need arises. Pain in itself is not protective; it is, however, a danger signal which warns, and so indirectly it protects.

As long as conditions in the abdomen are normal, we are unconscious of the movements of the bowel which propel the contents of the intestine. When an abnormal condition occurs, if any part becomes diseased, there is a change in the movements of the intestine.

If the condition becomes acute, the peristalsis, as the movements are called, is stopped. This is nature's first step towards protection. The part is put at rest. Not only are the intestines put at rest, but the abdominal muscles are contracted, and so a rigid wall is made which further protects by keeping the parts motionless.

The next thing which happens is the sensation of pain, the danger signal flashes, and the individual is thus warned that something is wrong.

The majority of persons who have a pain in the abdomen say they have a stomach ache, and they generally blame something they have eaten. Believing this to be the case they naturally conclude that the proper thing to do is to take some medicine which will act as a purgative and enable them to get rid of the offending food.

If a laxative is taken, it simply means that we are doing our best to get in motion the intestines which nature has put to rest for our protection. It means that we disregard the danger signal of pain whereby nature indicates what is the safe course for us to take.

It is true that many persons with abdominal pain have taken a laxative without serious or apparently harmful results, but it is equally true that many persons have lost their lives because they took a laxative to relieve abdominal pain.

If the pain has been caused by an inflamed appendix, the movements of the intestines set up by the laxative may cause the appendix to rupture and spread its contents, which results in peritonitis. If the pain is due to a ruptured ulcer or to an inflammation of any of the abdominal organs, movement of the intestine increases over and over the chances of the development of serious and fatal conditions.

When the abdominal pain occurs, it is well to recognize that it should not be dealt with by stimulating the movement of the intestines which nature has put at rest as a means of protection.

BANK OF MONTREAL CROP REPORT

General—With the exception of south and central Saskatchewan and southeastern Alberta, moisture is ample to carry crops to maturity. Should present favorable weather conditions continue, cutting will be general in [illegible] to fifteen days and indications point to an average yield. Some damage from rust is reported in Manitoba. In Quebec province the weather continues favorable for all crops. In Ontario, while crops are for the most part considered promising, rain is needed in some areas. In the Maritime provinces favorable weather prevails and crops generally are progressing satisfactorily. In British Columbia the weather continues hot and dry, and rain would be welcome in most districts.

Prairie Provinces

Alberta—Northeastern area. Warm weather and scattered showers have helped crops, which are now headed. Some districts have suffered severely from hail.

Southeastern area—Cutting should commence next week. The average wheat yield is estimated at not more than ten bushels, as about 35 per cent of the acreage seeded has been abandoned.

Western area—Wheat is headed out and following ample moisture, is filling out rapidly. An average crop is expected. The sugar beet crop is very satisfactory.

Saskatchewan—Northern area Crop prospects continue favorable for a good average yield. Hail damage has been heavy in several localities. Harvesting will be general in ten to fifteen days.

Southern area—Crops are maturing rapidly fair yields are expected from summerfallow but stubble crops over a substantial area have been badly burned out and in the south central portion many farmers face almost total crop failure. Harvesting will be general in ten days.

Manitoba—Wheat is ripening rapidly and cutting should be general in ten days. Damage from rust has been reported at most points and is expected effect into crops. All coarse grains are making good progress.

SHRUBS FROM SEEDS

(Experimental farms note)

Reproduction by seed is the method common to the majority of shrubs in their natural state and there seems little doubt that it is a method which produces the most healthy and vigorous plants.

Seed should be obtained, if possible from a similar climate as that in which the seeds are to be sown, as true success depends on their ability to withstand the climatic conditions to which they have been transferred.

Hard-coated seeds, many of which are enclosed in an outer covering, commonly called fruit, should have this removed when fully ripe and be thoroughly washed. These seeds should be sown at once and kept moist, or placed in a box covered with moist sand and stored in a cool place to be sown when convenient. If hard-coated seeds are allowed to dry out, it may retard their germination.

At the Dominion experimental station at Morden, where hundreds of species and varieties are being raised from seed, the beds are prepared by adding humus and sand. This is thoroughly incorporated into the soil and raked to a fine surface. Frames are constructed of 8 inch boards placed 3 feet 9 inches apart and held in position by posts driven into the ground. As it is necessary to shade shrub seedlings, covers are made of laths nailed to strips of 1x2, a lath apart, also lathes are pushed through the meshes of chicken wire and are very convenient, as they are easily rolled up for weeding and watering. Brush may be used to good effect, but is more troublesome to handle.

In sowing seed, rows are spaced 6 inches apart and depressions made in the soil by a piece of 2x4, the width of the frame. This insures better spacing of seed at an even depth. A mixture of sifted soil, humus and sand is used to cover the seed.

The majority of seeds are sown in the fall. Fine seed, such as Spiraea, Dwarf Birch, Potentilla, etc., being left until spring. These need such a light covering of soil that they require the protection of glass sash, or the heavy rains may wash them away.

Seed beds should be kept moist and shaded till good growth has been made.

A covering of leaves or similar light material is beneficial after the freeze-up, or the small plants may heave in the spring.

CEREAL CROPS FIELD DAY AT DOMINION EXPERIMENTAL STATION, LACOMBE, ALTA.

The annual Cereal crops Field Day will be held at the Dominion Experimental Station, Lacombe, on Wednesday, August 20th. This will be a day of special interest to all farmers interested in the growing of good crops, but particularly will it interest members of the Seed Growers' Association and Co-operators who are growing varieties under numbers.

The Dominion Cerealist, Mr. L. H. Newman, will be at the station on this date and will discuss all questions pertaining to varieties and crop improvement. It is possible that the date, August 20th, may be a little late for some farmers but it is the earliest date on which we could arrange for Mr. Newman to visit the Lacombe Station.

A meeting of the Alberta section of the Canadian Seed Growers' Association will be held at the close of the field meeting.

All farmers are invited to visit the Station for this field day. Bring your family and invite your friends. Coffee will be provided for lunch under the trees. Make this a day of pleasure and profit. Programme to commence at 1:30 sharp.

F. R. REED, Superintendent

Sambo: "Ah wants a cake ob soap."
Clerk: "What kind ob soap do yo' wants?"
Sambo (slowly): "Well, Ah wants a cake ob soap to wash my head wif."
Clerk (readily): "Don y' wants Ivory soap."

Jeannie: "Jock, Jock, there's a coo in the vegetable garden".
Jock: "All richt, woman, dinna stand makin' that fuss. Hurry up and milk her before she gets oot".

C. H. ROWE, Manager. TOFIELD BRANCH:

Prices Of Livestock Reveal Remarkable Strength Compared With Other Farm Products

In the price changes that have taken place in farm products, as also in other commodities, in the last 12 months, livestock food products stand up with outstanding strength. Lambs, hogs, and cattle—in that order—are now at a much higher level relative to the value of the same products a year ago than are butter, wool, wheat, and barley.

Prices for farm products in Canada have changed considerably since last summer and especially during the first half of 1930. The tendency of all classes of livestock, wheat, feed grain, butter, and wool, which are fairly representative of general farming, has been downward.

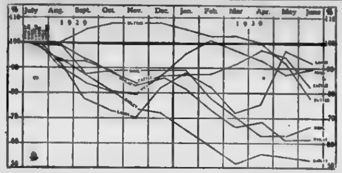
A noteworthy feature is that the price level of livestock has not dropped so much as that of [illegible] farm products and they are the [illegible] items to show seasonal strength within the last two months.

The accompanying chart shows the percentage changes in [illegible] to each other and in each [illegible]. The monthly average prices as reported officially have been [illegible] and the changes [illegible] month to [illegible] expressed as a percentage of the prices existing in July, 1929, which are taken as the base of 100. The table on this page gives both the monthly prices and the percentages that each month's price for each item forms of the base price. In the chart only the percentage changes are shown.

A glance at the right hand side of the chart will make it plain that at the end of the period three items, lambs, hogs and cattle, were well ahead butter and far above wool, wheat, and barley in comparison with prices a year ago.

For the twelve months, therefore, it is evident that these three classes of livestock have declined less in price than other farm products and other commodities. They [illegible] fluctuation [illegible] and [illegible] their general level has been better maintained than in the other items.

If a lesson had to be pointed out it would be that meat-yielding livestock is a more [illegible] farm [illegible] than it is often [illegible] sidered. This is especially so at present with the low levels reached by [illegible] and other [illegible].



Western Flour Mills

Industry Ranks First In Manufactures In Alberta and Saskatchewan

The flour and grist mill industry ranks first among the manufactures of two of the three prairie provinces. This industry comes first in both Saskatchewan and Alberta, and second in Manitoba. First position in Manitoba is held by slaughtering and meat packing, which is third in Saskatchewan and second in Alberta. Second position in Saskatchewan is occupied by butter and cheese, which is fourth in Manitoba and fourth also in Alberta. In point of production value, flour and grist mill products in Alberta, and slaughtering and meat packing in Manitoba were almost equal in 1928, the former having a value of $[illegible], and the latter of $[illegible].

National Map Of Canada

Area Of Canada Is Greater Than That Of Europe

The area of Canada is calculated to be 3,684,723 square miles, an area greater than that of Europe. Of this area only a small fraction has been adequately mapped. The Topographical Survey, Department of the Interior, is engaged in [illegible] portions of the country [illegible] as rapidly as possible sheets of the National Topographic Map of Canada. During 1926 four such [illegible] were published, nine in 1927, eleven in 1928, and seventeen in 1929.

Growing Exhibition Grain

Practical Suggestions For Preparing Grain For World's Grain Show

At the recent meeting of the Manitoba Seed Growers' Association at Brandon, Dr. McRostie, agronomist of the M.A.C., gave the following practical suggestions for the growing and preparing of grain for exhibition at the World Grain show in Regina in 1932.

Dr. McRostie stated that the first essential was to obtain good, clean seed, pure as to variety since the grain samples will naturally be thrown out. The seed should then be sown on clean land to avoid mixing from volunteer growth. Treating for both loose and covered smut would avoid loss from this source. Sulphur dusting and early seeding would overcome the shrinking due to rust damage. A satisfactory sulphur dust can be procured from F. H. Wiley, 883 Henry Avenue, Winnipeg, and a small hand duster from the Niagara Sprayer Company, Middleport, N.Y. An application at the rate of 40 pounds of dust weekly from the time when rust first appears on the plants has usually given a fair control of rust.

In harvesting select the best sections in the field, pull out all off type plants and any other grains since it is much easier to clean in the field than it is to clean later. Avoid any marginal material because it is usually later and somewhat coarser. All grain should be left to mature before it is cut. After cutting it may be as well to cure some both ways. If cured outside it should be put up in small sheaves in small stooks that are capped. If inside, it should be hung up in small bundles, in dry well-ventilated rooms. For threshing a small rubbing thresher has given good results or it may be found advisable to thresh it out by hand.

In finally preparing the grain sample it is essential to obtain one with grains of similar size and shape. This can only be accomplished through a [illegible] of painstaking work trying [illegible] cleaners, etc.—Free Press.

Creates a New Record

Crop Report For British Columbia Is Very Gratifying

British Columbia's annual crop report issued by the Department of Agriculture shows that agricultural production for the year 1929 totalled $[illegible],032,890, which is an increase of $3,905,047 over that of the previous year and creates a new record. While this increase is due to some extent to prevailing high prices, substantial increases are noted in the volume of production of livestock, poultry products, dairy products, grains, honey, wool, hops and vegetables other than potatoes.

A campaign to print all menus in English has been started in London.

Says Churchill Is Real Port

American Visitor Is Much Impressed With Possibilities Of Northern [illegible]

"Churchill has better prospects for a real port and a real city today than Chicago had when it was first started. The natural foundation for dock structures is stronger also." This was the statement of W. T. Miller, of Eldorado, Ill., veteran contractor of the northern states, made following his return from Churchill.

Mr. Miller is of the opinion the prospects for port facilities are 60 per cent. better and the cost of construction is 30 per cent. less in proportion to what it was at Chicago in the beginning of the city's history.

Mr. Miller was accompanied by John Vandyke, also of Eldorado, who has been a locomotive engineer on United States railroads for many years past. He has been in the railway service for 20 years altogether.

Mr. Vandyke says the roadbed on the Hudson Bay Railway is much better than he expected, and is of the opinion it is in excellent condition.

The two visitors said that when the Hudson Bay Railway is completed that tourists will flock to the north and that many will look over various prospects with a view of getting there.

Yolkless Eggs

Winnipeg Hen Is Responsible For Strange Freak

The exact opposite of the goose of nursery rhyme fame that laid golden eggs is being enacted by a Winnipeg hen. Mrs. Russell McLeod is displaying yolkless eggs produced by this freak member of her pen.

She discovered the eggs were worthless when she started out to fry them her favorite style—"sunny side up."

Italy's craze for sports is growing

"I'm on a diet; I hardly eat anything and only drink water."
"Well, wouldn't you like to come and have dinner at my house today?"—Pages Gales, Yverdon.

Will Employ Many Men

C.P.R. To Engage Nearly 12,000 Extra Men On Extra Work

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway's comprehensive program of construction, maintenance and improvement from coast to coast throughout the Dominion.

Construction work of all kinds is being done both directly by the company and also by contractors, the company itself employing some 8,000 men in extra gangs throughout its system.

The work itself is of a very varied nature, including branch line repairs and renovation of right-of-way, bridges, tunnels, stations, coal appliances and buildings of various classifications, including the erection of a new hotel by the Dominion Atlantic Railway at Kentville, N.S. The men in general are recruited at the closest point to the scene of work and are kept steadily employed until each job is completed, thus it may be seen that the Canadian Pacific is doing its full share towards the furnishing of employment wherever its system operates throughout the country.

Beef Grading

Doing Much To Strengthen the Demand For Better Qualities Of Beef

The beef grading policy of the Dominion Livestock Branch is not only providing a real service to the Canadian consumer and producer in clearly [illegible] in the British market. The Imperial Food Journal, a recognized authority on market conditions in the Old Country says: "The introduction of beef grading in Canada, whereby the two top grades are marked for the information and protection of the public, is doing much to strengthen the demand for the better qualities of beef. This should tend to promote the raising of better grades of cattle and the finishing of animals before they are [illegible] market." The same authority forecasts an early return to volume exports of Canadian live cattle to Britain.

Automobile Accidents

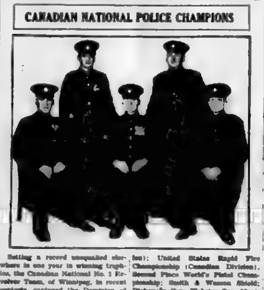
The majority of automobile accidents are directly traceable to poor health of the drivers, according to a recent report made to the French Academy of Medicine. A commission has been appointed by the Academy to probe further into the study and exert pressure on the government to include a physical examination in the requirements for a driving license.

Agricultural Short Course

Course For Departmental Judges Held Annually At Guelph

A short course for departmental judges was held recently at the Ontario Agricultural College. Over 125 were present, including judges of ploughing matches, standing field crops, heavy and light horses, beef and dairy cattle, and sheep and swine. Classes were started some 15 years ago, and are primarily to get judges together for purposes of demonstration so that a uniform standard may be maintained for judging at shows and competitions.

CANADIAN NATIONAL POLICE CHAMPIONS



Setting a record unequalled elsewhere in one year in winning trophies, the Canadian National No. 1 Revolver Team, of Winnipeg, in recent contests, captured the Dominion of Canada Open Championship (Dominion Cartridge Company Cup); Dominion of Canada Rapid Fire Championship (D.C.R.A. Shield), Dominion of Canada Police Championship (Chief Constables Cup); Provincial Police Championship (Dominion Cartridge Company Cup). The members of the team are H. Wheatley (left standing); J. W. Brune (right standing); M. Ross (left sitting); R. G. Pickrell (centre sitting), Captain; J. Garriock (right sitting).

Captain Pickrell, who holds the highest individual record in every shoot, now has to his laurels the following honors: Canadian Revolver Championship; Canadian Pistol Championship; Rapid Fire Championship (Canadian); United States Pistol Championship (Canadian Division); United States Rapid Fire Championship (Canadian Division), Second Place World's Pistol Championship; Smith & Wesson Shield; Dickenson Cup; Webster Cup, Manitoba Pistol Championship, Drewry Cup; Manitoba Revolver Championship; Sir Daniel MacMillan Cup, M.D. 10 Championship; W. A. Murphy Prize; Canadian Revolver Association's Gold Badge, Highest Aggregate; Birks Medal, Highest Individual Record; Third Place United States Aggregate; Highest Aggregate D.C.R.A. Matches; Highest Record Score Provincial Police Championships; Highest Record Score Dominion Police Championships; Highest Record Score Dominion Open Championship.

J. W. Brune holds the United States Intermediate Championship, while M. Ross, another member of the Canadian National team, holds the Novice Championship of Canada.

Creamery Butter Production In Prairie Provinces Shows Increase Over Last Year

The latest summary of conditions in the dairy industry by the Dairy and Cold Storage Branch of the Dominion Department of Agriculture affords some observations of interest.

Pasteurized butter graded during June, this year, amounted to 150,963 packages, an increase of 10,162 packages over the same period last year. For the year to date the 1930 figure at 288,311 is 8,604 packages ahead of last year.

Cheese graded during June, this year, totalled 205,175 boxes, or 17,[illegible] boxes less than last year. The total for the year to date at 31[illegible] boxes is below last year, but there is an increase in the number of boxes grading "special" this year.

There was an increase of 245.86 per cent. in the volume of creamery butter in storage in Canada as at June 1, 1930, over the amount in store last year on the same date, and an increase of 439.67 per cent in the volume of dairy butter in store. Creamery butter in store June 1, 1930, amounted to 10,798,528 pounds, dairy butter in store 341,035 pounds.

Cheese in store the same date amounted to 6,471,834 pounds, or 38.43 per cent. less than last year.

The export of cream and milk to the United States has practically ceased since the tariff of 56 cents per imperial gallon on cream came into formerly exported is now being made effect on June 18. Much of the cream into butter.

Creamery butter production in the Prairie Provinces shows a steady increase over last year. Increases during May were: Manitoba, 20.5 per cent. Saskatchewan, 7.7 per cent, and Alberta, 15.1 per cent over May of last year.

Gatineau River

First Record Of the Name Of This River Appears In Year 1783

When Champlain in his ascent of the Ottawa River in 1613, reached what is now the site of the capital of the Dominion, on June 4, he noticed a tributary coming from the north. The river was the Gatineau. Champlain gives no name to it and as far as the Geographic Board of Canada is aware the first record of any name for the river does not occur till 1783. In that year Lieut. David Jones made a report to Governor Haldimand in which he mentions coming "to the River Lettinoe (Gatineau), and from thence about a league to Theodore (Chaudiere) Falls."

Named By Franklin

Bathurst Inlet and Coronation Gulf Named In 1821

Bathurst Inlet and Coronation Gulf were so named in 1821 by the celebrated Sir John Franklin, 1786-1847, who led his first overland expedition to the Canadian Arctic in 1819-22. The gulf was so named because it was the Coronation year of His Majesty George IV. The name Bathurst Inlet commemorates Henry, third Earl of Bathurst (1762-1834), who was, at the time the name was given, Secretary for the Colonies.

Pastures and Proteins

Work Carried Out Which Will Be Of Great Interest To Dairymen

The value of pastures depends very largely on the amount of proteins green feed—available to the cattle using them. In this connection the studies of "close grazing" now being made by experts of the Dominion Department of Agriculture are of special interest. While still in the experimental stage the work already done holds much of interest for the dairyman. Briefly put, the object of close grazing is to provide an adequate and continuous supply of green fodder from succulent new herbage growth. This is done through the division of a suitable field area into four equal sections. While the herd grazes for a week on one section the new growth, rich in protein, is developing in the others. In this way a new pasture with three weeks growth of new herbage is regularly available.

British Railways Are Progressive

Railways Preparing To Gain Control Of Air Services

Having acquired control of much of the motor-coach transportation in the country, railways of England are preparing to capture control of air services. Under powers acquired last year, the railways may operate airways. As soon as the large cities are in position to provide centrally situated aerodromes the rail lines will be prepared to run their own aeroplanes for passengers, express and freight, in combination with the train and steamship services. The railways expect to have within a year at least an 85 per cent interest in all motor coaches in the country.

A [illegible] ore more closely than the eye has been invented by a New York physicist.

A substance, said to be harmless, for preserving the green color of vegetables has been discovered in England.

WORLD HAPPENINGS BRIEFLY TOLD

British Columbia's recent lumber mission to Australia will seek co-operation of the provincial government in securing a lumber tariff preference in that dominion.

The Italian council of ministers voted an appropriation of 100,000,000 lire or about $5,320,000 to rebuild the stricken earthquake area of Middle South Italy.

Mrs. Sarojini Naidu, woman leader of the Indian Nationalists is said by the Daily Herald to be willing to compromise with the government somewhat short of Mahatma Gandhi's demands for independence.

The London naval treaty passed through all its stages in the House of Lords and only needed the royal assent before becoming effective. The bill gives legal support to the part entered into at the recent London naval conference.

The visible supply of American grain at the end of July shows the following changes in bushels: Wheat increased 14,503,000; corn decreased 278,000; oats decreased 995,000; rye increased 39,000; barley increased 378,000.

Premier Ramsay MacDonald announced in the House of Commons that the government proposed to invite the leaders of the two opposition parties to nominate a representative from both Houses to participate in the round table conference on India which will be held this fall.

Great Britain's unemployment total is nearing the 2,000,000 mark, it was announced by the Ministry of Labor. The official statement said that on July 21 the number of persons out of work was 1,972,700, an increase of 32,534 in a week and 850,057 in a year.

Brandon police are looking for the person who passed an American one dollar bill off on a local hotel for $20. The bill was raised from $1 to $20 in such masterful style that the authorities are of the opinion that the country might be flooded with the bills. The work is thoroughly done and it was only when the bill had received close scrutiny at the bank that the deception was caught.

Makes First Official Test

Premier Bracken Talks Over Radio Phone From Flin Flon To Winnipeg

From the staff house of the Hudson Bay Mining and Smelting Company at Flin Flon, Mr. Bracken and Bruce Bracken, his son held a combined radio and long distance telephone talk with Mrs. Bracken, Winnipeg.

The premier's conversation marked the first official test of the new radio phone system between Flin Flon and The Pas and the results were entirely successful.

Interesting Experiment

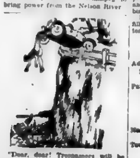
During recent experiments, Marconi has recorded air messages on a phonograph disc with perfect success. The experiment was made by the inventor while on his yacht lying near Genoa. The message was sent to Sydney, Australia, about 11,000 miles away. The recording was not only caught perfectly but was re-transmitted from Sydney by wireless to the original sender.

Prefer Silent Films

Motion-picture fans of Denmark prefer the silent film and soft music to the sound film. Especially is this apparent in Copenhagen. The principal reason is apparently the linguistic difficulties, which the partial translation of texts has failed to overcome. Few Danes understand English.

Winnipeg Hydro Developments

J. W. Sanger, of the City of Winnipeg Hydro, states that due to new developments and technical improvements that make it possible to transmit heavier voltages than in the past it is now possible for Winnipeg to bring power from the Nelson River.



"Dear, dear! Trespassers will be prosecuted, and I haven't got any money with me."—Lustige Blaetter, Leipzig.

Chinese Stowaways

Party Of Six Have Narrow Escape From Death When Vessel Is Fumigated

Efforts of six Chinese stowaways to enter Canada aboard the British freighter S.S. Beauty, failed when they reached New Westminster recently.

The sextette were fortunate to be alive after more than two weeks in a coal bunker aboard the ship and especially after fumigation operations took place. By some chance deadly cyanide gas failed to reach the hold where the Chinese were hiding.

Officers who entered the hold declared it was a marvel they survived the ocean trip as it was probably worse than the famous "Black Hole of Calcutta." It was believed that Chinese members of the ship's crew kept their compatriots provided with food on the long trip.

The ship left Yokohama on July 4.

After being arrested they were turned over to the Vancouver immigration authorities to await deportation.

Amended Grain Act

New Regulations Come Into Force On September First

By a proclamation in the current issue of the "Canada Gazette" the Grain act as amended shall come into force on September 1.

The act was re-written following recommendations made by the agricultural committee of the House of Commons, and was passed last session. A lengthy investigation of the operation of the act was conducted during the last two sessions of parliament and numerous amendments were approved. Several grades were given new definitions, clauses were inserted to prevent mixing of grades and the whole field of the act's operations was reviewed.

Australia's Wheat Harvest

The wheat harvest for Australia, including Tasmania, was officially announced as 126,477,000 bushels for 1929-1930.

OUT DOOR LIFE CALLS FOR NOURISHING FOOD

By BETTY SMITH

Well Known Domestic Science Authority

Off for a day or a month—in the car or hiking, boating, fishing—after a few hours you will find FOOD looms up as the biggest thing in the world. Scenery, yes—but such appetites!

Of course milk, and plenty of it, is essential for nourishing appetising food, and for campers or picnickers Borden's St. Charles Brand Evaporated Milk is by far the best choice, providing plenty of pure rich milk, regardless of weather conditions, rough journeys, out-of-the-way camping places and lack of ice.

Because Evaporated Milk has had half the water removed, you can rely on its extra richness, which can be utilized to take the place of eggs or butter in many kinds of cooking. For instance an old guide, famous for his fish fries, told me that in camp he always dipped the fish in undiluted Evaporated Milk before the final coating with corn meal.

When Evaporated is to be used instead of milk in any recipe it should be diluted with an equal part of water. Remember this simple rule and you will find it successful in your own recipes. To "cream" your coffee, use it undiluted.

Speaking of Fish—

a "fry pot" is used by Canadian guides for cooking large chunks. After dipping the pieces of fish in Evaporated Milk and then in cornmeal drop into the deep fat (very hot) and fry until brown. And, by the way, take this hint from seasoned camp cooks: a very little fire of the right kind in the right place (if possible sheltered from the wind) will do the job better than a face-blistering conflagration.

A savory fish chowder is always a welcome dish in camp and it's easily made with Evaporated Milk.

Fish Chowder

Cut the fish in chunks and remove as many bones as possible. Cover the bottom of an iron pot with slices of fat salt pork and fry out part of the fat. Remove part of the pork slices, then add a layer of sliced raw potatoes, some sliced onions and a layer of fish. Cover with pieces of hard tack biscuit and season each layer scanting the salt, for the pork is very salty. Repeat the process until the pot is two-thirds full. Add just enough water to cover to level of the fish. Cover the pot and simmer for one and one-half hours, or until the potatoes and fish are tender. Add one tall can of Borden's St. Charles Milk. Bring just to boiling. Serve.

Easy Hot Breads

Hot corn breads to eat with the bacon, fish, or pork and gravy, are a huge success after a day in the open—or to begin the day.

Cornmeal Flapjacks

- 1 cup cornmeal.
- 1 cup flour.
- 4 teaspoons baking powder.
- ½ teaspoon salt.
- 1 cup Borden's St. Charles Milk.
- ½ cup water.
- 2 tablespoons melted fat (bacon fat may be used).

Mix and sift the dry ingredients. Add the milk, diluted with water, and beat well. Add the fat. Bake on a hot, greased griddle or frying pan. They need a little longer cooking than wheat griddle cakes.

Camp Corn Dodgers

Put one quart cornmeal into a bowl. Make a hollow in center of meal and into this put one tablespoon lard and one teaspoon salt. Pour over this equal parts Borden's St. Charles Milk and water heated to scalding point, stirring all the time until a dough is formed which can be molded with hands. Cool slightly, form into cakes and cook slowly on a well greased griddle. (The quantity of diluted milk needed depends on the kind of cornmeal used.)

Lost Purse Is Found

Pocketbook Lost Eight Years Ago Is Recovered In Corn Field

A pocketbook containing $35 lost eight years ago, was recently recovered by the loser. Back in 1922 Jacob Slagh, a Michigan farmer, was assisting his brother-in-law, Koene Vanden Bosch, harvest hay and lost his pocket-book. Vanden Bosch while cultivating corn in the same field spied the purse, so worn it fell apart when handled. It was carefully kept together and brought to its owner who turned it over to the United States treasury department for redemption of the currency it contained.

Faster 'Planes

Commercial 'planes of the future will have to be considerably faster to suit Lieut. Alford J. Williams, American speed ace. "If 130 or 150 miles an hour were to be the top speed we could hope for in commercial aid transportation, I would suggest that the public cease to waste its time on aviation and that they hereafter look upon it as a hobby," he says.

Takes Brains To Be a Farmer

"It takes more brains to be a farmer than to be a High Court Judge," asserted J. Lockie Wilson, speaking at a gathering of Provincial fairs judges at the Dominion Experimental Farm, Ottawa, recently. "There never was a greater need for co-operation between the scientist and the farmer than today," he also stated; adding, "the most scientific business today is farming."

CANADIAN ACTRESS

Miss Rita Davies, Canadian girl of Toronto, who has signed a contract to play in a new dramatic production on the "Great White Way," going into rehearsal in about two weeks' time. Miss Davies is a former Hart House player. She attended Bryn Mawr school here.

B.C. Hydro Possibilities

Greatest Water Powers In Canada Can Be Developed At the Coast

The greatest water powers in Canada, greater even than those harnessed along the St. Lawrence, have been revealed along the coast of British Columbia, north of Vancouver, by government engineers, during the past summer, it is stated at parliament buildings, Victoria.

Preliminary reports indicate that in addition to the noted Taseko Chilko Homathko power, with a possible development of 1,300,000 horsepower, two other sources of electricity discovered bring the possible development of the coast district up to the huge figures of 3,000,000 horsepower.

The two new power sites, revealed by recent surveys, are at Tahtsa Lake and Eutsuk Lake. By turning the waters of these lakes westward to the sea instead of eastward into the Fraser, engineers believe that 1,500,000 horsepower can be harnessed. The third project calls for the diversion of the Chilko waters westward to the sea by the Homathko River.

Wheat Pool Elevators

Up to July 16, 1930, the percentage of Pool Wheat delivered to the Saskatchewan Wheat Pool and passing through Pool Country Elevators amounted to 87.12 per cent. leaving only 12.88 per cent. as having gone through Line Elevators. The corresponding percentage of grain through Pool Elevators at the same date last year was 74.60 per cent.

Chefoo consular district in China has a good roads campaign.

SUNDAY SCHOOL LESSON

AUGUST 10

HANNAH "A GODLY MOTHER"

Golden Text: "My son, hear the instruction of thy father, and forsake not the law of thy mother."—Proverbs 1.8.

Lesson: 1 Samuel 1.1-28; 2.1-11, 18, 19, 2.1-18.

Devotional Reading: Luke 1.46-55.

Explanations and Comments

Hannah's Prayer For a Son, Chapter 1.9-11. Hannah and her husband Elkanah went regularly every year to the Sanctuary at Shiloh, there to worship and offer sacrifice at one of the great religious feasts, probably "The Feast of Ingathering," or "Feast of Tabernacles," which was held after the grape and olive harvest.

As was customary, after a portion of the sacrificial victim was burnt at the altar, and another portion had been given the priests, the family partook of the rest within the sanctuary precincts. But Hannah could not eat, for sad and bitter thoughts filled her mind as she contrasted her childless lot with that of Peninnah, Elkanah's other wife, who was blessed with many children. After the meal was over she presented herself in the temple to pray to Jehovah. Her prayer was accompanied by many tears as, standing with her face towards the ark, she made her vow that if Jehovah would bless her with a boy, she would consecrate him all the days of his life to Jehovah, and he should be a Nazarite, one set apart to the Lord, of which his unshaven head would be a token. The characteristic marks of the Nazarite were the refraining from wine and all intoxicating drinks, the letting the hair grow, and the avoidance of defilement by corpses.

The Answer To Prayer, 1.19, 20.—Hannah returned to her home in Ramah. When she was made happy by the coming of a son, she named him Samuel, "Because I have asked him of the Lord." Hebrew scholars tell us that the word "Samuel" has no connection with the Hebrew word for "asked," and they connect the first part of the name with the Semitic root for "name," taking Samuel to mean "Name of God."

Hannah Gives Her Only Son To the Service Of Jehovah, verses 24-28.—When Hannah weaned her boy, he was probably three years old, she brought him to the house of the Lord in Shiloh. She brought also an offering, as the law required for the first-born: three bullocks, a bushel of meal and a bottle of wine.

Hannah made herself known to Eli the priest by recalling the time when he had seen her praying in the sanctuary, and then she presented the boy for whom she had prayed.

Ontario Grain Pool

Announcement has been made by the Ontario Grain Pool that the initial payment to members is based on 85 cents per bushel for numbers two, three and four red, white or mixed wheat, and 29 cents per bushel for number two white oats and barley at malting grade. With maximum deductions of local handling the payments net growers 80 cents and 25 cents.

Shortage Of Small Coins

French business men recently complained to the Ministry of Finance that there was an insufficiency of 50 centimes (approximately 2 cents) pieces in circulation and demanded a new stamp. The ministry estimates that there are 446,000,000 50 centime-pieces in circulation.

Feat Of Mountain Climbers

Eight Peaks Over Ten Thousand Feet High Are Negotiated

Eight peaks over 10,000 feet high, three of them unnamed, in the upper region of the Athabasca River and behind Maligne Lake, where the Canadian Alpine Club assembled at its annual camp, were reported to have been climbed for the first time with the return, after an absence of 17 days, of a party led by Dr. Max Strumia, of Philadelphia, and Dr. W. R. Hainsworth, of New York.

Accompanied by Newton Waffle, of Orange, N.J., and John F. Lehmann, of Everett, Mass., Strumia and Hainsworth first climbed Mount Christie, 10,180 feet high, from a high camp on Fryatt Creek. Later, climbing Mount Belanger, 10,200 feet in altitude, they were within 50 feet of being swept to their death by avalanches and on their descent were held for three hours on a rock ledge till the descending sun rendered snowslides improbable and their progress less hazardous.

An unnamed peak near Mount Wolley, whose altitude is placed at 10,700 feet, offered the greatest difficulty. Only by inserting "pitons," — iron spikes to which they could attach their climbing rope—into the crumbling rock, were they able to attain its summit.

Climbing from the site of the Canadian Alpine club on Maligne Lake, they made the first ascent of three peaks of Mount Maligne, all over 10,000 feet in height, and mapped for the first time the tremendous ice fields surrounding it.

Dr. Strumia, who has climbed in Switzerland, France, Italy and North America, a total of 75 peaks and made 25 first ascents, said recently that during the trip just completed through Jasper Park he experienced some of the most difficult rock and snow work he has yet encountered. The party was outfitted by "Curly" Phillips.

Humane Association Awards

Two Westerners Are Honored For Life Saving Deeds

At a meeting of the board of investigating governors of the Royal Canadian Humane Association, awards made included:

Alexander Branch Quayle, Ladysmith, Nanaimo, B.C., for the rescue of Thomas Atkinson from drowning, April 13, 1930.

Samuel Rutherford, 1533 Retallack Street, Regina, Sask., for the rescue of Harry Hine from drowning, July 11, 1929.

Latest Dodge In Paris

Launching books like ships is the latest dodge of a boulevard book store in Paris, to push sales. In the presence of friends and admirers, the author breaks a bottle of champagne over the first copy of his work to be formally placed on sale.

The Russian government has begun work on a scheme to dam the Dnieper River to obtain 350,000 horse-power.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES, LAYING PENS, DAIRY BARNS, SUNROOMS, ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Harsh, Griping Purgatives Are Dangerous!

Cheap, harsh laxatives may prove very costly. Painful rectal troubles are often aggravated by the unnatural griping condition such cathartics cause.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S FRUIT SALT

Human Race Degenerating

MacMillan Believes Peak Of Civilization Has Been Reached

Concurrence in the belief of Alfred Russell Wallace, noted anthropologist, that the human race has made no progress, physically, morally or spiritually in the last 2,000 years, but has reached the peak of its civilization and is now retrograding, was given in a recent sermon at Sydney, N.S., by Commander Donald B. McMillan before he sailed on his thirteenth voyage to the far north.

There was much disagreement as to what really constituted progress, said Commander MacMillan. "We have our great cities and modern conveniences, but I believe the man of 2,000 years ago was better physically than the man of today, and as far as morals are concerned the original Indians and the Eskimos are better than the so-called civilized races. As intelligence should govern morals, then on that count the Eskimos are ahead of most civilized races.

"All people live chiefly for food, shelter and clothing, but the Eskimo, in his struggle for existence leads a more happy life than his civilized brothers. They live to help one another and divide all they kill. If one Eskimo starves they all starve, for none goes in want so long as there is anything edible left in the village. All are working together for the common good, which is somewhat in contrast with modern civilization conditions."

The evidence was that civilization had reached a peak and was sliding back. Commander MacMillan believed the people living at the top of the world, survivors of a race recalling primitive man of 2,000 or perhaps 20,000 years ago, were fully as intelligent as their southern contemporaries.

Warning For Golfers

Game Stands Third In Regard To Frequency Of Accidents

Golf is the third most dangerous sport so far as accident frequency is concerned, according to a report recently made public by a large insurance company. "Struck by lightning" was not an uncommon accident, according to the report. "Foreign particles in the eye" took a toll of six followers of the sport of St. Andrew. Splinters, bites by insects, collisions with inanimate objects and poison from shrubs contributed their share of mishaps, but the most common accident was slipping or falling on uneven ground. Even the nineteenth hole was no haven of refuge, for twelve individuals were "cut on sharp instruments" subsequently identified as "bottles."

Home Of Blue Goose

One of the most outstanding achievements in Canadian ornithology in the year 1929 was the discovery of the breeding grounds of the Blue Goose in Baffin Island. The location of the nesting habitat of this species has baffled ornithologists for years.

Athletic People

are subject to strains and ligament displacements. Rub in a little Minard's for prompt relief.

MINARD'S "KING OF PAIN" LINIMENT

Instinct Of Forest Useless On Highway

Urge To Stop and Listen Means Death To Little Animals

His little body lay upon the hard, smooth cement of the highway, crushed, mangled, lifeless. Some who passed said thoughtlessly "A squirrel got run over." The little tragedy should have called forth more sympathy.

What a marvelous creation he was, lovely in grace, in outline, in color, instinct with vitality, with energy seemingly out of all proportion to his diminutive figure, and endowed with amazing faculty correlation, so that in a spring which hurled his body through space equal to a hundred times his height, he never missed the toe-hold and a safe landing.

Stored in his little brain were marvellous instincts, the cumulative product of thousands of generations of squirrels transmitting experiences. He knew art of lying flat-bellied upon a branch and of creeping slowly around a limb to avoid the sight of a hunter encircling the tree. He had the trick of running spirally up a tree when pursued by a dog, since through the progress of the ages, evolution had weeded out all the squirrels that ran their tree trunks straight. These and many other lessons Mother Nature had taught him to fit him to his environment.

But one of these proved his undoing. Implanted in the very depth of his being was the fundamental instinct of the wild—caution. Always he had felt the necessity in any strange surroundings to stop, to look about him, to test with eye and ear and nose.

Then he found the big highway, strange, new incomprehensible. He would scamper across it, but in the midst a sound checked him. Came the fatal impulse of caution, to stop, to look and listen. Death came with the flying wheel; the instinct of the forest had played him false.

Empire Products Used

Canadian Material Used In New Ontario Government Offices In London, England

When the new Ontario Government offices, in London, England, are opened in the autumn they will bear a touch of real practical Imperialism. When the contract for the building was awarded Mr. W. C. Noxon, the Agent-General, laid it down as one of the clauses that every inch of the material, from bell-pushes to slates and floor-coverings, should be either of Ontario or British manufacture. The stone, the marble, the wood—which is Ontario pine—were all sent over there from Canada, in some cases at considerable expense. The workmanship and such items as the electrical and heating appliances are entirely British.

German Author's Theory

Has Written Book Entitled "Thirteen Men Rule Europe"

The fate of Europe is largely determined by 13, three of whom are Sir Austin Chamberlain, former British Secretary of State for Foreign Affairs; Right Hon. Philip Snowden, Chancellor of the Exchequer in the MacDonald Cabinet, and Herbert Hoover, President of the United States. This theory is held by Dr. Fritz Klein, editor-in-chief of the Berlin Deutsche Allgemeine Zeitung, in a book just published under the title "Thirteen Men Rule Europe."

Rubber was used by the American Indians before the appearance of Europeans in the Western Hemisphere.

City men of Colombia have adopted a style of carrying small change pocketbooks.

Tuberculin Tests

Seven Municipalities Around Saskatoon Are Practically Free Of Reactors

In 34,425 head of cattle given a tuberculin test in seven municipalities around Saskatoon only 260 reactors were found by Dominion Government inspectors under the leadership of Dr. C. J. Johannes. The reactors were found in 113 of the 2,064 herds tested, and in a few herds two-thirds of the animals were condemned.

The work of testing was started on May 22 by the Dominion health of animals branch. In the most heavily infected herds, Dr. Johannes pointed out the stables were practically without light, illustrating the fact that tuberculosis spreads much faster where no sunlight can reach infected matter. Around Dundurn, a country with plenty of bluffs where cattle are out almost all year, only three reactors were found in 4,800 cattle tested. Compensations allowed in the seven municipalities amounted to about $22 a head.

After 27 Centuries

Burial Mound Of Hun Chieftain Is Discovered In Central Asia

A Russian scientific mission sent out by the Bolsheviks from Leningrad to the Altai Mountains in Central Asia, has discovered the burial-mound of a Hun chieftain of 27 centuries ago. From Asia the Huns swept into Russia. This leader of the Huns had his fortress among the high peaks of the mountains. From there he swept like a vulture on to the plains. To his eyrie he returned with his spoils. There he lived and died. Thousands of winters have passed over the burial-place. None can tell who the chief was, or what tyrannies he committed, or how he died. But Time, which has effaced his memory, has preserved his body. The cold has embalmed it in its rock tomb.

A Modern Solomon

Island Governor Solved Problem In Easy Way

On a certain island there was a garrison of marines and a garrison of bluejackets and a senior officer of each corps. The wives of each of the officers laid claim to a special pew in the little island church, and after much dispute, in which each asserted her right, an appeal was made to the governor.

The governor accorded a patient hearing of each of the claimants and gave as his decision that the pew should be occupied by the older of the two.

Ever after that the special pew remained empty.

Aviation Enthusiast

Sir Alan Cobham, famous airman, is so enthusiastic about the future of aviation that he is devoting the major portion of his time to it. He predicts that aviation will become so popular in a few years that London alone will need more than 20 airports on its outskirts to handle the amount of air traffic.

Cigar stores in Havana, Cuba, now sell lottery tickets.

Railways of South Africa are extending their motor services.

"Your Vegetable Compound is a good medicine. Anyone who is in poor health should not hesitate to try it. When I was taking the Vegetable Compound I tried the [illegible] Liver Pills I found in the package. I have taken them every night since and I can feel myself improving. I am so thankful for the good they do me that I have told several women about it."—Mrs. G. W. Poliff, 263 Huron St., Stratford, Ontario.

Canadian Women Score Again

Canadian Women Greatest Travellers In the Summer Months

Another distinction may be marked up for the women of Canada. Last year a British artist publicly declared that in his opinion Canadian women were the most beautiful of their sex in the British Empire, and of course the women throughout the Dominion did not dispute what Canadians generally consider to be such an obvious fact. Now Canadian women are credited with being greater travellers than the mere men of their country in summer. In one of the leading Canadian newspapers the following item recently appeared:—"Canadian women are great travellers in summer. When father is at home tending to his work, mowing the lawn and keeping house alone, the wife and children go off to the seaside or the country and such movements constitute the bulk of the traffic.

"One of the big railway systems of Canada furnished a few days ago a two weeks' check on the sex of passengers in the height of summer travel. It was disclosed that eighty per cent are females and twenty per cent males. This disparity, however, does not exist all the year round. A similar check taken in winter disclosed about a fifty-fifty even break between the number of men and women travellers."

Drives Asthma Like Magic. The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor, reaching the most remote passage of the affected tubes, brushes aside the trouble and opens a way for fresh air to enter. It is sold by dealers throughout the land.

Canada Owes Much To Early Missionaries

Jesuit Fathers Opened North America To Civilization

The ceremony of canonization at Rome must make a deep appeal to all Canadians who are familiar with the early history of this country, regardless of whether or not they are members of the church that thus honored its devoted sons. The eight Jesuit fathers who nearly three centuries after their heroic deaths have been canonized played a great role in the opening to civilization of the northern half of this continent. No one can have read pages of Parkman without holding their memories in reverence. The story of their exploits and of their martyrdom is one of the most moving in the whole range of human annals.

The example that they gave was followed by a large company of other "soldiers of the cross" who carried religion and all the influences that follow in its train further and further into the outlying parts of what is now the Dominion. Our debt to these pioneer missionaries is one that cannot be over-estimated.—Edmonton Journal.

Prince's Carpet Sold

A Scotch hand-woven wool carpet which covered the floor of Prince Charles Edward's bedroom at Culloden House, where he slept the night before the famous battle, brought only $150 at an auction sale in Glasgow, Scotland, recently. An ancient kail-pot, measuring 13 inches across, which was said to have been used by the Highlanders on the field of Culloden, was eagerly bid up and [illegible] for $70.

"What did they teach you today in Sunday school, son?"

"I learned how to say, 'Yes, ma'am,' and 'No, sir,' when answering questions."

"Did you, indeed!"

"Yep."

An old belief was that ringing of church bells would dispell a threatening storm.

Golf is a game wherein the ball lies badly, the player well.

They Like Canada

Earl and Countess of Stair Favorably Impressed With Dominion

Laughingly reminding reporters who met them on their arrival a month ago, the Earl and Countess of Stair were both very ready to give their impressions of Canada, when interviewed at Montreal just before sailing for home on the Canadian Pacific "Duchess of Richmond."

"You will remember," Lady Stair said, "that we were afraid you were going to ask our opinion of the Dominion on the day we landed and then let us off when we promised to give that at the end of the visit."

Both were enthusiastic about the Dominion, which they visited from coast to coast during their month's stay. "What really appealed to us more than anything," Lord Stair remarked, "was the hospitality of Canadians. By George, they don't care what it is you want, they jolly well get it done for you.

"One of our principal interests during the visit was to see the conditions under which the cattle we shipped out here are herded. And I must say that I was disappointed to see so many Holsteins and so few Scottish cattle. The Ayrshires we sent out to British Columbia last September are in remarkably fine shape."

During their visit to the coast, the Earl and Countess paid a visit to the Agricultural College at Vancouver where they were shown prize-winning cattle also from their own Scottish estates.

In Memory Of Canadian Poet

Memorial Erected To Bliss Carman In Fredericton, N.B.

The house in Fredericton, N.B., where Bliss Carman, noted Canadian poet, was born, has been memorialized. A bronze tablet on the front of the house was recently unveiled. The inscription on the tablet reads:

"In this house Bliss Carman, Canadian bard and internationally loved poet, 1861-1929. This tablet is erected by the Imperial Order, Daughters of the Empire in New Brunswick. Earth of my mother earth, spirit to Thee."

This is the first memorial erected to Bliss Carman, who died in Connecticut, June 8, 1929, and whose remains were brought to his native home by the Government of New Brunswick and buried at Forest Hill Cemetery, Fredericton, where a suitable monument will mark his grave. It is proposed to erect a statue of this famous son of New Brunswick in the capital of his native province and the city where he spent his boyhood days.

Mysterious Fossil Bones

Many Queer Catches Made By North Sea Fishermen

The barnacled tusk of a mammoth found in the nest of a Grimsby trawler is but the latest of many queer catches made by North Sea fishermen. Not a few of the fishermen's gardens along the Norfolk coast are ornamented with fossil bones of the cave bear, elk, bison, rhinoceros, and mammoth, brought up at various times by the trawls, chiefly in certain regions about fifteen miles off Grimsby, sometimes called "the graveyards" or "the silver pits." Geologists suggest that the remains come from what was in prehistoric times the valley of the Rhine.

Sores Flee Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Eclectric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

Work For Unemployed

Preliminary survey of the northern part of Saskatchewan, in connection with the provincial government scheme toward solution of unemployment, has been completed, said Hon. J. A. Merkely, Minister of Labor and Industries. The proposed camp scheme can now be inaugurated, he said, in co-operation with officials of the Prince Albert National Park. It has been decided 80 men may now be employed there cutting away dead and burned wood.

Japanese Visiting Canada

While the Canadian Chamber of Commerce is completing plans for its official [illegible] Japan, leaving Vancouver, October 16, on the liner "Empress of Russia," an important party of Japanese manufacturers and merchants arrived at Vancouver on the "Empress of Canada," for a tour of observation through Canada and the United States.

Plant life can only exist to a depth of 600 feet below sea level. Animal life can exist four miles down.

Have Minard's Liniment on your shelf.

PLEASURE

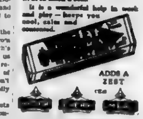
The tingling taste of fresh mint leaves is a cool treat for your sweet tooth.

WRIGLEYS

Affords people everywhere great comfort and long-lasting enjoyment.

Nothing else gives so much benefit at so small a cost.

It is a wonderful help in work and play — keeps you cool, calm and contented.



ADDS A ZEST

Little Helps For This Week

"Therefore, my beloved brethren, be ye steadfast, unmovable, always abounding in the work of the Lord, forasmuch as ye know that your labor is not in vain in the Lord."—I Corinthians xv. 58.

Though scoffers ask where is your gain,
And mocking say your work is vain,
Such scoffers die and are forgot,
Work done for God, it dieth not.

Press on! press on! nor doubt nor fear,
From age to age this voice shall cheer,
What e'er may die and be forgot,
Work done for God, it dieth not.

—Thomas Knox.

When men do anything for God, the very least thing, they never know where it will end, nor what amount of work it will do for Him. Love's secret therefore is to be always doing things for God, and not to mind because they are very little ones.

— Frederick William Faber.

Heal your horse while it works. Apply Douglas' Egyptian Liniment to sore necks and galls. A sure, speedy treatment.

The British Empire

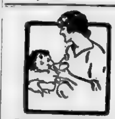
The British Empire occupies about one-quarter of the habitable surface of the earth and its population exceeds one-quarter of the estimated number of the human race.

Minard's Liniment for Lumbago and Neuralgia.

New Buildings For Saskatoon

During June, contracts were awarded for the construction of a Technical School and Deaf and Dumb Institute, at Saskatoon, each of them when equipped to cost in the neighborhood of $500,000.

A drop of ink only makes millions think they think.



TAKE NO CHANCES WITH BABY!

Cook Her Food in the "Health Ware"

Doctors recommend Enameled Ware for cooking baby's food. It is so simple to clean . . . so easy to keep sanitary and free from germs. It cannot stain. *There is no metal surface exposed to the food.* Nothing to absorb moisture, flavors nor odors.

Make sure you get McClary Enameled Ware . . . the Modern "Health Ware". Watch for the familiar McClary label.

Local and Personal

Miss Gertrude Beariste of Egremont has been visiting Florence Kendall for the past few days.

Mr. P. O. Ball was a business visitor in town for a few days last week.

Mr. and Mrs. Geo. McLaughlin and family returned from their holidays this week, which we understand were spent at Calgary.

A number of Tofielders took in the dance held in Ryley last Friday.

Miss Bertha Lee of Edmonton was a visitor at her home over the week-end.

Miss O'Brien who was the superintendent for the Tofield Chautauqua has been in town for a few days.

The editor took a business trip to Barrhead the latter part of last week.

Mr. Clifford Lee of Ryley visited at his home over Sunday.

Miss Florence Kendall is now an operator at the local telephone office. She is taking the place of Miss Annie Booth.

Mr. A. Young left for Saskatoon on a business trip last Sunday.

Mrs. W. Bowick is visiting her daughter, Mrs. H. Lewis at Egerton.

Mr. and Mrs. Galloway have returned from their holidays at Clearwater, Man. Mr. Galloway's sister Mrs. Embry an her son Graydon returned with them.

Miss Gudrun Ness, who is home on a vacation, from Lake Minnetonka ...

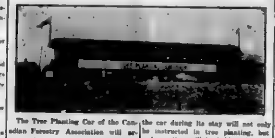
Tree Planting Car At Tofield



The Tree Planting Car of the Canadian Forestry Association will arrive in Tofield on Tuesday, August 12. Equipped to show both slides and moving pictures, and carrying not only those dealing with all phases of tree planting and kindred subjects, but some beautiful reels on the scenic beauties of Canada, its wild life, and some graphic fishing pictures, those who take the opportunity of visiting the car during its stay will not only be instructed in tree planting, but ...

A meeting will be held each evening at 8 p.m. when a very interesting radio talk by Geo. Watt will be given, illustrated by over sixty colored slides. Following this two reels of moving pictures on Tree Planting will be shown along with five other reels ending with a comedy ... will find the programme both educational and highly entertaining.

Mistakes

Glancing through a magazine recently the writer's attention was attracted by an article bearing the same title as appears at the heading of this column, Mistakes. It was a short article but two paragraphs in it stood out as important and worth while, worth passing on for the consideration of those who read this column from week to week.

After recalling mistakes made by "Great Men of Business" and the different ways in which they react to them, the article in question offered comment.

Looking back over history, it would seem that mistakes of themselves are comparatively unimportant. All men make them. The important thing is how a man acts afterwards.

There is sound philosophy in that observation. It is deserving of more than passing attention.

All people make mistakes. Not one of us is infallible. The real test is: Do we profit by them? Do we use them as stepping stones to real achievements, to the winning of success? Or are we embittered by them, discouraged, inclined to give up and resign?

When a business man makes a mistake, or perhaps even loses the savings and accumulations of a life time, and then begins to think of throwing up the sponge, contemplates suicide or some other rash act, it is a confession that he was not really a big man after all, that he is lacking in stamina, will power and true courage.

Experience is a hard taskmaster, a bitter teacher, but it is a teacher and a good one at that, because it is through experience that we do learn.

All men make mistakes, big men as well as little men. Nor is it individuals alone who make them. Governments make them, communities make them, nations make them. They must pay for their mistakes, but they can also profit from them.

One of the mistakes of the present age is to confuse bigness with greatness, to confuse quantity with quality. Next year the census of Canada will be taken and already communities are anxiously awaiting the [illegible]

Time Element In Cancer

Different Periods Of Life Have Bearing On the Trouble

A curious time element in cancer is described by Sir George Lenthal Cheatle, British cancer authority. He is chief surgeon of King's College Hospital in London, England, and is attending the British Medical Association meeting in Winnipeg.

There is one time when previously harmless stages of growths are likely to become cancer rather suddenly. This is in the same relative period of life for both men and animals.

"It suggests," Sir George said, "that either some fresh, as yet unknown factor or agent may enter the body just at the critical time and cause cancer, or that the different parts of the whole cycle for a continuous process, and one part passes naturally from one stage to the final catastrophe of cancer.

"The first stage is most prevalent from the late twenties to the thirties, the second stage takes form in the late thirties and early forties. The change into cancer occurs in the late forties and early fifties of life."

Guard Baby's Health in the Summer

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentery, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles or if they do come on suddenly to banish them. No other medicine is of such aid to mothers during hot weather as Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Operated Under Difficulties

Doctor Performs Serious Operation On Board Ship With Crude Instruments

A cook's carving knife, a pair of pliers borrowed from the carpenter, a bottle of Holland gin and a needle and linen thread, saved the life a seaman stricken with appendicitis, and as a result Dr. David R. Robbins, Los Angeles surgeon, recently was presented with a huge silver loving cup by the Planet Steamship Company.

A little more than a year ago Dr. Robbins and his wife left Los Angeles on the steamship "Noorderdyk" for Germany where the doctor was going to study for a year. He left all his surgical instruments at home, intending to buy new ones in Germany.

Three days out of Panama, the "Noorderdyk" received an S.O.S. from the steamship "Corvus" saying that Henry Lohse, 21-year-old sailor, was stricken with appendicitis.

The "Noorderdyk" steamed to the "Corvus" and when they met, Lohse was transferred to the "Noorderdyk." Dr. Robbins was asked to save the man's life.

Dr. Robbins borrowed a carving knife from the cook, made the incision and with the pliers removed the appendix. He then sewed up the incision with a needle and thread borrowed from his wife and disinfected the wound with Holland gin. A piece of rubber tubing from a shower bath was used for drainage. As a result of the operation, Lohse is hale and hearty, hauls on the main brace and lustily sings "Blow the Man Down."

Because he used such strange instruments, Dr. Robbins refused to accept any pay for the operation, stating that the operation under such strange conditions might not prove successful.

However the steamship company [illegible]

Importance Of Rubber Industry

Canadian Rubber Products Exported To Many Countries

Now-a-days the world moves on rubber, and this does not apply to automobiles alone. According to a recent return of the Canadian Government the people of Nigeria, in June, bought 300 pairs of shoes with rubber soles from Canada. Barbadoes took 2,020 pairs and Trinidad 6,555 pairs.

Although Canada is not a producer of raw rubber the rubber industry is of much importance and rubber products are exported to many countries of the world. In June the export of Canadian automobile tires exceeded $1,000,000. The largest buyers were New Zealand, British South Africa, Belgium, Argentine and Brazil.

Moslem Women Progressive

Congress Held At Damascus Asks For Reforms In Restrictions

The London Daily Herald says that women delegates from nearly every Moslem country have just concluded a congress at Damascus which represents the first concerted move by women of the Islamic faith to escape its restrictions.

The correspondent says the women adopted a resolution calling for abolition of the veil, for permitting brides and bridegrooms to see each other before marriage, for making divorce possible to women equally with men, for making 18 years the legal minimum age for marriage, and for compulsory education of children of both sexes.

NEW CABINET IS ANNOUNCED BY PREMIER

Ottawa, Ont.—The following is the list of the new cabinet in order of precedence:

Hon. R. B. Bennett, Prime Minister, President of the Privy Council, Secretary of State for External Affairs and Minister of Finance.

Sir George H. Perley, K.C.M.G., Minister without Portfolio.

Hon. E. N. Rhodes, Minister of Fisheries.

Senator Gideon Robertson, Minister of Labor.

Hon. H. H. Stevens, Minister of Trade and Commerce.

Hon. Hugh Guthrie, Minister of Justice and Attorney-General.

Hon. R. J. Manion, Minister of Railways and Canals.

Hon. E. B. Ryckman, Minister of National Revenue.

Hon. J. A. MacDonald, Minister without Portfolio.

Hon. Arthur Sauve, Postmaster-General.

Hon. Col. Murray MacLaren, Minister of Pensions and National Health.

Hon. H. A. Stewart, Minister of Public Works.

Hon. C. H. Cahan, Secretary of State.

Hon. D. M. Sutherland, Minister of National Defence.

Hon. Alfred Duranleau, Minister of Marine.

Hon. Thomas G. Murphy, Minister of Interior, and Superintendent-General of Indian Affairs.

Hon. Maurice Dupre, Solicitor-General.

Hon. W. A. Gordon, Minister of Immigration and Colonization, and Minister of Mines.

Hon. Robert Weir, Minister of Agriculture.

In announcing the personnel of the new cabinet, Premier R. B. Bennett made the following statement.

"I will administer the department of finance until such time as arrangements I have made for a successor can be completed, which will not be until after the short session. That session will be called at the earliest date legally possible.

"The Hon. Gideon Robertson, at my urgent request, becomes Minister of Labor." Senator Robertson administered the department during the serious unemployment of 1920 and 1921.

Lack Of Moisture Detrimental To Crops

[illegible]

Ottawa, Ont.—"Although the [illegible] crop is generally well advanced in the [illegible] there is still much uncertainty as to the probable yield," states the crop report issued by the Dominion Bureau of Statistics.

Lack of moisture in Saskatchewan and southern Alberta and damage from rust in Manitoba and south-eastern Saskatchewan are features of last week's reports. Alberta crops alone have registered an improvement in the past [illegible] weeks, the large contribution being again benefited at the [illegible] by good rains.

Cutting of early wheat and barley is [illegible] in all three provinces, with indications that harvest will be general in a week or ten days.

The weather has again been hot and dry, with central Saskatchewan points registering over 100 degrees on the last day of the month. Effective precipitation fell only in central Alberta.

Rust infection varies greatly with date of maturity, variety, and [illegible] of the crops. Although future weather conditions will have an important effect there is every indication that the damage will be light on early maturing, light crops. But heavy on the good crops maturing later. The telegraphic report from the Dominion rust research laboratory at Winnipeg for this week reads as follows:

"In Manitoba hot dry weather of past week has hastened maturity of all cereal crops. Cutting of early fields of wheat and barley is now general in central and northern part of province. Losses from stem rust will be heavy in about sixty per cent. of fields of common wheat in area included within radius of sixty miles from Winnipeg.

[illegible] stem rust has not increased rapidly in Saskatchewan but has spread northward to [illegible] and southwest to Shaunavon. Severity of infection about twenty per cent on common wheat in eastern Saskatchewan. Durums have only traces of stem rust. No stem rust reported in Alberta."

Lost Prospectors Found

Discovered After Spending Twenty One Days In Northland

The Pas, Man.—Harry [illegible], prospector, of Baker's Narrows, and his 15-year-old son, who were lost 21 days in the northland wilds, were found safe and well last Thursday. They arrived here in the cockpit of a Vickers Vedette 'plane, piloted by Sergt. Tourgis, R.C.A.F.

The long search is over, a search that called upon the best brains of the wilderness to map out and carry through a search that even veterans of the trail found baffling for days and which terminated eight miles from the copper claims camp of the prospectors.

For 21 days father and son tramped the burnt-over country, [illegible]

Plans To Visit Argentina

Prince Of Wales May Pay Visit To South America Next Year

London, England.—The Prince of Wales who, among his many other roles, has been called the British Empire's "best travelling salesman," plans to visit Argentina and Brazil next year, it became known recently.

The visit of the Prince to Buenos Aires will be for the particular purpose of opening the British trade exposition.

The first official announcement came from Buenos Aires when Ambassador Ronald MacLeay informed President Irigoyen that the Prince of Wales would make the visit.

It has been announced that the British heir will extend his visit to Brazil, but it was not known whether he would visit other Latin-American states.

Reports that the Prince would visit the United States next year have [illegible]

Eight Judges and 126 Lawyers Sail From England

Southampton, Eng.—Eight judges and 126 lawyers who comprise the party of British representatives to attend the forthcoming conference of the Canadian and American Bar Associations at Toronto and Chicago sailed recently for Canada aboard the steamer "Duchess of Atholl." Viscount Dunedin heads the judicial party. Attorney-General Sir William Jowitt and Sir John Simon, who headed the Indian Statutory Reform Commission, are among the lawyers.

Heavy Wheat Carry Over

Vancouver Port Has 7,051,765 Bushels Of Last Season's Crop

Vancouver.—The new crop year of 1930-31, for the port of Vancouver starts off with 7,051,765 bushels of wheat in store, a carryover from last season's crop, according to the weekly report of the Vancouver Board of Harbor Commissioners.

Since August 1 to date, exports from Vancouver total 701,185 bushels.

The railways report 367,000 bushels of old-crop wheat moving towards Vancouver.

BUREAU TO AID IN KEEPING TRADE MORE STABILIZED

Montreal.—The gravity of the business depression with consequent unemployment and lack of consumer demand confronts Canadian business with the necessity of establishing a research and administrative bureau composed of representatives of the [illegible]

[illegible] employment in certain commercial enterprises, thus sustaining employment and consumer demand.

Explanations are not lacking for the reduced volume of business during the last six months, said Mr. Crowder. He cited the excess amount of wheat held over from last year, the stock market crash, over-production, the natural business cycle and the increase of unemployment.

"Unfortunately," said the president, "business is influenced by mob psychology. When one group ceases buying from forced economy, the disastrous effect of such custom is easily seen."

While admitting the influence of world conditions upon Canadian business, yet generally speaking, so long as our farmers do a reasonable good job of farming, and factories do an equally good job of manufacturing and transportation [illegible] the same, each taking advantage of modern methods, inventions and facilities, it is difficult to understand with the amount of money in the country remaining reasonably constant why such things as hard times or trade depressions should overwhelm us with such distressing regularity, said Mr. Crowder.

"Today," he continued, "we actually have farmers producing more foodstuffs than they can sell and factories producing more goods than they can sell, each in actual want of the other."

WILL APPEAR IN MOVIES

This is the most recent portrait of Kathleen Greenwood, daughter of Right Hon. Arthur Greenwood, Minister of Health, in the MacDonald Government, and one time head of the Department of Economics at Huddersfield Technical College. Miss Greenwood is adopting the movies as a career.

Tragedy At Royal Regatta

Racing Yacht Is Sunk In Collision and One Life Is Lost

Cowes, Isle of Wight.—A steward was drowned and a racing yacht, the "Lucilla," owned by J. Lauriston Lewis, was sunk in collision at the start of the royal regatta events. The King, aboard the "Britannia," witnessed the tragedy.

The "Lucilla," manoeuvring with the 12 metre boats for the getaway, [illegible]

Will Recover Plane

To Bring Back 'Plane Abandoned By MacAlpine Party Last Year

Edmonton.—Off to bring one of the super-Fokker aeroplanes abandoned at Cambridge Bay, in the Arctic, last September by the ill-fated MacAlpine party to this city, Pilot W. J. Buchanan, of the Western Canada Airways, Limited, left here in another of the firm's big machines on Wednesday afternoon, August 6. He is accompanied by T. Gilmour, mechanic.

Pilot Buchanan expects that the trip will take about three weeks, but this depends upon the condition of the machine. In case it has been damaged during the long spell in the north, it will be given temporary repairs and then flown to Winnipeg. On the other hand, if it is found to be in working order it will be brought to Edmonton.

Heavy Gold Imports

Montreal, Que.—Total gold imports to this country from New York since the movement started about two weeks ago, reached $14,500,000, recently with the arrival of $2,000,000 in gold consigned to the Canadian Bank of Commerce and the Imperial Bank of Canada, in equal amounts.

Impressive Sky Line

[illegible] picture of Toronto's evergrowing waterfront showing prominently the Royal York Hotel and the Bank of Commerce building. Other structures easily noticed are the Temple and Robert Simpson buildings, Sterling Towers, old and the new Union Stations, Northern Ontario, Canada Trusts, Metropolitan, Dominion Bank, C.P.R. buildings, the Bank of Hamilton and the heating and power plant of the Union Station.

Destitute Britishers Returning

Hundreds Who Went To U.S. Now Anxious To Get Back To Homeland

London, England.—The police at all British ports have been informed by the New York authorities that hundreds of destitute Britishers are hiding there waiting for a chance to stow away on homebound liners, according to the London Daily Herald.

Announcement was made in open court at Southampton to this effect and at all ports where trans-Atlantic ships call special vigilance measures are being taken to arrest stowaways while all ships out of New York are being searched for them.

The stowaway wave is due to the unemployment situation in the United States, whither thousands of Britishers went when wages were high and prospects good in that country. Now the only anxiety of these Britishers seems to be to get back to their homeland again.

Many thousands are spending the little money they managed to save in the United States in returning by cargo steamers, others are working their way across. Some of the returning workers have savings in Britain but the majority will be dependent on relatives.

Nine stowaways were arrested on an Anchor liner when she reached Glasgow last week-end. Seven were found on the "Mauretania" and "Plymouth," while last week four were discovered on the "Minnewaska" during the voyage to Britain.

BANKS FINANCE BALANCE OF THE 1929 WHEAT CROP

Toronto, Ont.—The statement that the Canadian banks had promised to carry the unsold balance of the 1929 wheat crop and that the arrangements were entirely satisfactory were made by Premier John Bracken, of Manitoba, at the conclusion of the conference between eight managers of leading banks and three premiers of Manitoba, Alberta, and Saskatchewan.

Since the guarantee of the three prairie provinces to the banks for subsidizing the Wheat Pool expired August 1, Premier Bracken was asked whether the western provinces would again renew the guarantee to the banks.

"There has been no request made for guarantees for the new crop and it is not anticipated that a guarantee will be required," he replied.

"The guarantees were to cover the whole crop," he explained, "and the only difficulty arose through a small portion of it not having been delivered at the end of the crop year, July 31. It is concerning that portion that we have been having conferences with the banks."

"Has the whole matter been satisfactorily adjusted?" Premier Bracken was asked.

"Yes," he replied, "the banks and pools are carrying on with respect to the balance of the 1929 crop exactly as they did prior to July 31."

"Has the pool lost much money on the 1929 crop?" was the next question that the premier consented to answer.

"That question cannot be answered till the balance of the crop is sold," he said. "If the price goes much lower, there probably will be a loss, but if the price goes higher, there should be no loss."

"Are the reports true that you are going to have a bumper crop in the west this year?"

"It will be a bigger crop than last year," Premier Bracken replied, "but smaller than 1928. The estimates run all the way from 325,000,000 bushels to 400,000,000 bushels. It is too early yet to make an accurate forecast, but the total will probably be nearer the smaller figure."

The premier intimated that there were more hopeful signs already for the marketing of this new big harvest, so that it would not be an added embarrassment to the Pool.

"The increase in the price of wheat by 9 cents in the last two or three days," he said, "is due partly to the reports of severe drouth in the middle western states and marketing conditions in France and to an extent to the dry weather in the west."

"The initial payment of the Pool used to be $1 a bushel," Premier Bracken was asked. "Now that wheat is below a dollar what will the payment be?"

"That's a matter which comes altogether under the jurisdiction of the Pool, and the banks from whom the Pool borrows," he said.

"The initial payment during the past few weeks has been 70 cents for No. 1 Northern, with lower figures for lower grades."

WRITS ISSUED FOR FEDERAL BY-ELECTIONS

Ottawa, Ont.—Writs for by-elections necessitated by appointments to the new Conservative cabinet have been issued.

Nomination day in all instances except in the case of Premier E. N. Rhodes, of Nova Scotia, will be on August 26. Polling day is named for September 2 in 10 constituencies and for September 9 in five ridings where under the Dominion Elections Act two weeks must intervene between nomination and polling days.

Announcement of the issue of the writs was made by Premier R. B. Bennett. The statement came from the new prime minister following the first meeting of his cabinet after taking office earlier in the day. A preliminary discussion engaged the balance of the 90 minutes initial sitting of the newly-appointed cabinet. In political circles no opposition is expected in any constituency and in this eventuality writs for the by-elections of the ministers may be returned immediately after nomination day. The aim of the administration is to hold the special session "at the earliest date legally possible"—in the words of the premier. The impression is that parliament may convene on September 2.

There is no indication in regard to the constituency Premier Rhodes will represent. It is understood, though, that steps are being taken in this matter.

Hon. H. H. Stevens who was defeated in Vancouver Centre will be a candidate in East Kootenay. M. D. McLean, elected as a Conservative in the constituency, has resigned to make way for Mr. Stevens.

The five constituencies in which a lapse of two weeks must intervene between nomination and polling day—in case of a contest—are East Kootenay (Hon. H. H. Stevens), Fort William (Hon. R. J. Manion), Neepawa, Man. (Hon. T. G. Murphy), South Timiskaming (Hon. W. A. Gordon), and Melfort, Sask. (Major Robert Weir).

Ministers without portfolio receive no extra emolument from the Crown and consequently Sir George Perley and Hon. John A. Macdonald will not have to seek re-election. Senator Robertson will continue to occupy a seat in the Senate. As soon as arrangements are made for the constituency for which Premier Rhodes, of Nova Scotia, will sit in the Commons, the elected member will resign and writs for a by-election in that riding will be issued to bring about the entry of Mr. Rhodes into the Commons.

Will Be Of No Benefit

Lumbermen See No Benefit In Washington Tariff Ruling

Ottawa, Ont.—Lumber merchants in British Columbia and the Ottawa Valley express the opinion that the announcement from Washington that all sawed lumber and timber, if not further manufactured than planed or dressed on one side, will be admitted free into the United States will have little effect on Canadian trade. The view of leading lumbermen is that the Washington ruling is only a clarification of the tariff which carries with it no particular benefit to the industry from a Canadian standpoint.

Population Of United States

Census Figures Show That Inhabitants Now Number 122,728,873

Washington.—The first complete preliminary census figures showed continental United States to number 122,728,873 inhabitants.

The total figure contains an estimate for one Pennsylvania township, returns from which are not complete.

Outlying possessions add 14,772,000, making a grand total of 137,501,[illegible]

The total population increase of the 48 states and the District of Columbia was 17,018,253.

Given Good-Will Sword

Ottawa, Ont.—Emblematic of goodwill and friendship, a 300-year-old Samurai sword was presented to His Excellency Viscount Willingdon, recently, by Senji Suzuki, one of the party of seven prominent Japanese business men now on a tour of Canada and the United States. The ceremony took place at Rideau Hall, the vice-regal residence.

Technical education in Saskatchewan will be promoted by a new technical college at Saskatoon which will afford accommodation for 1,000 students.

THE CAUSE—

SINCE JULY twenty eighth when the conservatives swept into power and the liberals were swept out, writers from the Atlantic to the Pacific have been explaining in their own way, how and why it all happened.

At first of course the dailies had the floor so to speak, then the weeklies, and now the monthlies are telling the people why. None of the writers tell exactly the same story though of course there is a similarity between even the few which we have read. It is rather late in the day to be giving space to an election held nearly a month ago, and we would not do so, were it not that a certain note—a false note—appears in some of the articles we have read. Some while not going to the extent of blaming the Hon. McKenzie King, liberal leader do comment upon his leadership, in what we believe to be an unintentionally unfair manner. Mr. King did not do this or should have done that, falls readily from writers pens now the story is told and the chapter ended.

We are of the opinion very little criticism or blame can be honestly levelled at the former premier. He is a Canadian gentleman, talented and generous, who has given many years of service in statesmanship to his country. That he met defeat simply means, that under the circumstances victory was unatainable—and he or any other politician could not alter the circumstances.

It is the natural order of events that governments rise and fall. Under our present system of two party government, which if not perfect has many advantages over anything tried heretofore, it is not in the country's best interests that one party stays in power indefinitely. Consequently the liberal government having been in power nine years and the cycle of economics having turned in that time from bad to good and good to bad, the time for a change of government had arrived and to blame or criticise Mr. King for the turnover is as sensible as blaming King Canute for not stopping the waves on old England's shores centuries ago.

Many people believe good and bad times are caused by governments and their policies. This is only partly true, but it is wholly true governments are made and unmade by economic condition. Then to the period of depression through which we were and are passing can be added the spectacular leadership of Mr. Bennett. Actually, Mr. King was beaten before he started, and in the closing stages of the campaign especially put up a game, if losing fight. To now level criticism at him does not seem quite the thing to do.

BIG THINGS EXPECTED—

MR. BENNETT goes into power upon an exceptionally high tide of public favor, and unlike Mr. King he will not have to beg votes from any of those groups who are wandering through the wilderness. Within reason, what the Conservative party wishes to do it can do, and in this respect we are quite pleased.

Losing no time in getting to work, the premier has already chosen his cabinet and it is expected his special session of parliament to consider unemployment will be called shortly—probably as soon as the holiday season is over. The premier made quite a large number of promises, the chief among which was to improve economic conditions in Canada. This everyone hopes will be possible, but they can rest assured if this can be done by government intervention, the present Conservative government will do it.

A NEW BATTERY FOR LOCOMOTIVES—

A NEW type of electric storage battery has been invented in the Irish Free State. According to its promoters, who include the Government, it may revolutionize transport. It has been tested on trains with success, driving an engine at a speed of forty miles an hour. Not the least of its advantages is the fact that it can be charged in from eight minutes to one hour, which to the stranded automobilist who has suffered the inconvenience of a run down storage battery will come as welcome news. In time it will doubtless be used on trucks and various kinds of passenger cars. But above all it is hoped by means of the new battery to electrify the railways in the Irish Free State.

This is a notable departure from the accepted method of electrifying lines which customarily has been to draw the power from a central station. Wayside points would be utilized for charging the batteries. This new electrical project has not been entered upon lightly. The battery has been severely tested before eminent engineers. The Free State Government has backed its devlopment to the extent of £5000, and has proceeded to patent it in various countries. Electrification of the railways should give a great impetus to the River Shannon development. So far the Shannon project has meant much to the Free State, having cut the cost of electricity practically in half, provided cheap power for factories and low cost light and heat for shops and dwellings, but it should mean more, once the new battery is put into general use.

With the aid of the Drumm battery, as it has come to be known, the Shannon scheme should in time provide better and cheaper transportation, and should give the world concrete evidence of the progress achieved in the electrical field by the Irish Free State. —Christian Science Monitor

A BUSHEL OF WHEAT

What part does the hard working farmer play in growing a bushel of wheat? Important as he and the officials of farm co-operatives may think it, the part of more man in the making of a wheat crop may sometimes be over-estimated.

At Ottawa they have recently found that in the making of a bushel of wheat, thirty-one tons of water are required. In western Canada this water is supplied almost wholly from natural sources without use of pumps or other equipment for artificial irrigation. It comes in clouds carried by the winds and descends in the form of rain or snow or dew.

The sun on high plays his part in making the wheat, warming the seed bed, giving the heat to make the young seeds germinate, sprout and mature. Old man frost plays his part also.

To make the good black dirt of Western Canada in which the wheat may grow, a combination of great natural forces has wrought for a million years.

Man may plant, may cultivate, may reap a plot of wheat but after all, man in all his glory, with all his tools of production and his laboratories cannot create a single grain of wheat that will grow. The toiling farmer can help produce a bushel of wheat can contribute to the production of more and better wheat, but, they claim too much when they accept full credit for making the wheat harvest.

ENGLISH BOY SCOUTS TO VISIT JASPER

With three "billy cans" and two sauce pans, home made tents and rubber ground sheets, and only two blankets apiece, 16 members of the 9th troop of Boy Scouts, Leeds, England, passed through Winnipeg recently over the lines of the Canadian National railways for Jasper National Park where they will spend six weeks in "roughing it" over the trails of this famous game sanctuary. The boys, who are in charge of Dr G. F. Norton headmaster of the school who arrived in Canada on the SS Megantic. After visiting Ottawa, they took train for the west and, enroute, have cooked their own meals, used their own blankets and made up their own berths.

When the boys arrive in Jasper, they will leave the main roads and hike into the back country, carrying their food on their backs. Tentative trips have been planned to the Maligne Lake district and to the famous Columbia Ice Fields. Possibly a climb of Mount Edith Cavell may be attempted as there are a number of enthusiastic alpinists in the party, and, although the main object of the visit is to explore the districts not generally visited by tourists, a day or so may be set aside for the ascent.

JUDGES FOR C.N.R. COMMUNITY PROGRESS COMPETITIONS

Outstanding men and women, conversant with conditions throughout the prairie provinces, have been selected by the Canadian National Railways to judge competitions among rural communities in the three prairie provinces, which are of European origin, to be held annually for a period of five years, with three substantial prizes of $1000.00, $500.00, and $250 respectively, to be awarded each year in each of these provinces.

The judges are: Manitoba—Dr. John MacKay, Principal, Manitoba College; Brother Joseph Fink, Principal, Provencher School, St. Boniface and Mrs. David Watt, Birtle, who has long been prominent in women's institutes. Saskatchewan—Dr. W. C. Murray, President, University of Saskatchewan; Dr. W. J. Rose, Department of Sociology, Dartmouth College, Hanover, N. H., and Mrs. Violet McNaughton, organizer and former president of the Women's Grain Growers' organization in Saskatchewan and editor of the Women's section, Western Producer, Saskatoon. Alberta—Dr. R. C. Wallace, President Alberta University; Dr. W. H. Fairfield, Superintendent, Experimental Farm Lethbridge and Mrs. R. B. Gunn, Lloydminister, prominent in the Women's Section of the Grain Growers.

The community which through the co-operative action of its people, shows the best schools, the most regular attendance of pupils, the largest percentage of children going on for secondary or university training, and takes the keenest interest in matters of public health, social welfare, music, arts and handicrafts, and enthusiastically supports community organizations such as agricultural societies, co-operative marketing pools, women's institutes and home makers' clubs, libraries, etc., or which evinces the greatest interest and reveals the greatest progress in the improvement of agricultural methods, will be the winner of these substantial prizes.

Here and There

[illegible] Alsatian [illegible] background [illegible] Kennels Toronto [illegible] trip from Toronto to Yokohama by Canadian Pacific Express and Empress of Asia to the order of a Japanese merchant of the latter city. During his long journey the dog is in charge of Canadian Pacific officials.

Twenty New Zealand athletes and twenty athletes from Australia have already arrived at Hamilton for the Empire Games under the chairmanship of E. W. Beatty, chairman and president of the Canadian Pacific Railway. There will be representatives from Great Britain, South Africa and nearly every province of Canada at the Games which are scheduled to be held in the Ontario city next month.

Doubling the population of Cobourg for the day a force of more than six thousand members of the Canadian Pacific Recreation clubs of Toronto and Trenton set a new record for picnic attendance when the annual function was held there recently. The freedom of the city was conferred on the visitors for the day and the high spot of the sports, the Grant Cup, trophy of the softball match between the Toronto and Trenton clubs, was won for the fourth year in succession by Trenton.

With an aggregate of 173 years of unbroken service, three Canadian Pacific engineers from the Ontario district retired on pension recently. They are John Douglass, Thomas Bennett and John G. Moore and all have unblemished records. Bennett's service goes back to 1882 while Douglass and Moore go back to 1885 and 1889 respectively.

The Toronto Industrial Commission announces that between January 1 and June 30, 15 new industrial firms have come to Toronto with which the commission has co-operated. Of these, 11 had their origin in the United States and 4 originated in other parts of Canada. The list of these new industries includes a number of outstanding companies whose entrance into the assembling and manufacturing field in Toronto means an important growth and development in the city's industrial life.

SAFETY—at *ANY* speed

With the new Firestone Heavy Duty Gum-Dipped Balloon Tires you have a wide margin of safety at ANY speed. Built in advance of today's car requirements, they withstand rougher usage than any car on any road at any speed, can give them.

Firestone Heavy Duty Balloons are made of Gum-Dipped cord construction—the strongest and safest method known. They have a deeper safety tread, extra side-wall thickness and two extra plies of Gum-Dipped cords laid beneath the tread to absorb road shocks. They are the strongest, safest, toughest tires that Firestone has ever built.

Make your car safer for travel. Equip it with a set of new Firestone Heavy Duty Balloons. See your nearest Firestone Dealer today.

Western Homesteads Can Be Beautified by Planting Flowering Shrubs About House and Yard

Far too many homesteads lack the finished effect that may be obtained by planting a few flowering shrubs about the house and yard. Without shrubs there is nothing to fill the angles formed by paths or fences, or to screen unsightly objects; nothing to soften the abrupt angles formed by the corners of the building or where the foundation meets the ground, nothing to take away the bare [illegible] of the house and to give it an air of permanency and coziness.

The majority of people [illegible] the beauty of shrubbery, [illegible] how much improvement can be brought [illegible] its use, but for various reasons many fail to do any planting. The chief reasons for this neglect are probably the cost of planting material and a lack of knowledge as to what to plant. If all the [illegible] material is bought at one [illegible], the cost is in many cases prohibitive, and, if the work is to be [illegible] the labor involved will be [illegible]. For this reason it is never wise to attempt to do a great deal in any one year. A little planting done each year and [illegible] will bring surprising results in a short time. The cost of many beautiful [illegible] shrubs is small; and everyone can afford to [illegible] at least one or two each year. Some cannot be propagated easily by the amateur and therefore have to be purchased from a nurseryman. Others are very [illegible] propagated, and, when one [illegible] has been bought, it may [illegible] be increased to supply all of [illegible] species that will be required.

Many rules for the arrangement of planting material have been given by experts from time to time. These frequently involve a large outlay and considerable study, but, while they may lead to wonderful results, they also have the effect of discouraging those who are able to do only a small amount of planting. This should not deter anyone from making a [illegible]. The greatest amount of pleasure will be found in arranging the shrubs to suit one's individual taste. If, after a time one sees where an improvement could be made, the shrubs may easily be transplanted and rearranged.

There are a few simple rules which may help one to avoid common mistakes. Do not plant the shrubs too [illegible] the foundation of the [illegible] but [illegible] them as they may be too [illegible] after planting, and allow them [illegible] of room to develop a symmetrical shape. If the earth is poor and consists chiefly of subsoil thrown out from the cellar, dig a hole about three feet in diameter and about twenty inches deep, fill it with good earth from the garden or yard, work in some well-rotted manure as the clay is filled in, and pack the clay firmly while filling. Then plant the shrub in the centre being careful not to have manure coming in direct contact with the roots. Cultivate the surface occasionally for at least the first two or three years, or till the shrub is firmly established and has made considerable growth. When planting shrubs in a shady position, be careful to choose species that will do well in the shade. Whenever possible visit the nearest Experimental Station during the growing season. This will assist in making a choice of varieties. Send for the nurseryman's catalogues and study them. They contain many valuable suggestions.

Sheriff Is Appointed

Louis J. Houle is the new sheriff of Manitoba's eastern judicial district. Former deputy secretary for the province, his appointment to succeed the late Col. Rupert Isbister was announced recently.

Scientists have now produced an artificial silk from water and carbon dioxide gas.

"I hate going home, my wife never does anything in the house."
"I mustn't grumble. I've a fine wife. She makes my bed, cleans my boots—and even turns out my pockets."—Moustique, Charleroi.

Canadian Sugar Industry

Wages Paid By Eight Sugar Refineries Total $2,748,996

The total amount of wages paid by the eight sugar refineries of Canada last year was $2,748,996, a slight increase over 1928, according to a return issued by the Dominion Bureau of Statistics. Capital invested amounted to $42,534,112, a decrease from $46,628,212 in 1928.

The Canadian refineries employ 2,326 persons, of whom 2,019 draw wages and 307 are salaried.

The value of the products amounted in 1929 to $47,151,980, which [illegible] a decrease from $52,085,155 in [illegible]. (In 1925 the gross value of the sugar products of the eight refineries was $66,445,279.)

Last year 32,856 acres were [illegible] to sugar beets, with a yield of 7.28 tons per acre and a total yield of 235,466 tons. The average price [illegible] ton was $6.84, giving the total [illegible] of $2,088,996.

Food Preservative

Scientists Isolate Natural Agent In Milk Which Prevents *Growth* Of Micro-Organisms

A successful, non-poisonous food preservative may be obtained from cow's milk as a result of recent investigations reported by Drs. F. S. Jones and H. S. Simms of the Rockefeller Institute for Medical Research.

These scientists were able to isolate the natural agent in milk which prevents the growth of micro-organisms. It is found in the whey after the routine separation of the butter-fat and casein. It can be obtained in pure form in a powder which [illegible] for several months. One grain of the powder added to a gallon of the ordinary medium on which germs [illegible] will [illegible] their growth, it is reported.

Problems For the Farmer

Low Wheat Prices Create a Difficult Situation For the Grain Grower

With another wheat crop [illegible] along and a large surplus [illegible] on hand from the previous crop, the situation is far from cheerful. [illegible] body in an agricultural [illegible] such as Canada has a stake in the state of the farming industry, yet it will be conceded that the problem [illegible] more heavily on the shoulders of the actual producer than on anyone else.

Difficulty is met in predicting the probable curve of wheat prices for the [illegible] that a year of small yields over any large section of the world's wheat growing areas would be almost certain to lead to an advance in price that would make wheat [illegible] look like a remunerative business to the producers who happened to [illegible] wheat for sale. At the same [illegible] there is a fairly widespread [illegible] that wheat prices are likely to remain at a lower level than has been the case during the last seven or eight [illegible]. This would indicate that the world is producing all the wheat that the world can afford to buy and that the surpluses are responsible for the [illegible] break in prices.

Will it benefit Canadian farmers to grow less wheat under the circumstances? If the wheat acreage is reduced, what is to take its place? Is there any guarantee that the other wheat growing countries in the world will reduce their acreage? Can the lands of Western Canada be [illegible] to some other form of [illegible] that will be profitable? Can a change in farm methods make it possible for the Western Canadian farmer to grow wheat at a profit even when the price is low?

In the last analysis it [illegible] to be the job of the farmer to suggest means for solving his own problem. If he is the victim of exploitation this [illegible] be made known. If his methods are wrong they should be possible for correction. We have many successful farmers in Western Canada who should be able to throw some light on the problems that confront the country's basic industry.—Regina Leader-Post.

Mining In British Columbia

Increases Quantity Production In the Aggregate Of Metals

Despite world-wide depression in the mining industry, following the drop in metal prices, mining in British Columbia during the first half of the year has shown encouraging progress, according to the semi-annual summary of the British Columbia Department of Mines.

There was increased quantity production in the aggregate of mineral and metals, but owing to low metal [illegible] the gross value dropped from $34,172,723 in the first half of 1929 to the estimated $29,960,457 for the first half of 1930, a decline of more than 12 per cent. Among the unfavorable features are included the rather uncertain outlook for any material movement in silver and zinc prices for some time to come, which may cause certain hitherto productive mines in British Columbia to remain closed indefinitely. Coal production also fell away 18 per cent.

Trade With Japan

Howard Marler, son of the Canadian Minister to Japan, made a statement, while passing through Winnipeg recently, to the effect that there is a splendid opening for Canadian manufacturers in Japan. Although trade is rapidly developing, he pointed out, there is still a great need for manufacturers to appoint representatives in the Far East.

Girls are now forbidden to powder their noses in Roumania. They will be a shining example to the rest of the world.

Watering the Garden

Use Of Watering Can Largely Wasted Effort, Says Expert

The use of the watering can in the garden is largely a waste of effort, [illegible] W. D. Albright, superintendent of the experimental station of the [illegible] of Agriculture, at Beaverlodge, Alberta. If the same effort is spent on keeping weeds out of the garden it will result in more soil moisture being conserved for the growing plants than it is possible to give them through the use of the watering can, he states.

It requires at least one half-inch of rainfall to moisten a dry soil deeply enough to reach many of the feeding roots on the average plant. And, even with such a rainfall, much of the moisture is lost through evaporation before the plant roots are reached. The [illegible] from a watering can is small [illegible] in volume and under many conditions it is much more subject to rapid evaporation loss.

Half an inch of rainfall provides moisture equivalent to a pailful of water to every square yard of garden, 30 pailfuls to a square rod, or 2,400 pailfuls for a garden eight rods by ten rods. From this it will be readily apparent that watering the garden adequately once a week becomes a man-sized job.

Weeds are the greatest menace to garden crops, particularly because of the extent to which they rob the soil of moisture needed by garden plants. If the same amount of time spent by the average gardener in the use of the watering can was expended in applying the hoe to keep weeds under control it would insure the conservation of more moisture to the growing plants than can be provided in the same length of time through the use of the watering can.

The most effective way of watering the garden is to dig a trench with a hoe near the plants or to punch holes and pour water into these. This brings the water more directly in contact with the feeding roots and prevents evaporation. Not only is much water lost when applied with the watering can but it frequently impairs the physical condition of the soil by puddling the surface.

Population Increasing

Canada's Population Estimated At 9,934,500 By Ottawa Bureau

Canada's population on June 1, has been estimated at 9,934,500 by the Dominion Bureau of Statistics. This represented an increase of 137,700 over 1929 estimate.

In a report recently issued, the bureau gave the following figures as the estimated population of each province and territory: Prince Edward Island, 86,300; Nova Scotia, 553,900; New Brunswick, 422,400; Quebec, 2,734,000; Ontario, 3,313,000; Manitoba, 671,500; Saskatchewan, 932,000; Alberta, 686,000; British Columbia, 597,000; Yukon, 3,700; and the North West Territories, 9,800.

The following figures show the growth of Canada's population during the past decade: 1921, 8,788,483; 1922, 8,908,000; 1923, 9,028,000; 1924, 9,151,000; 1925, 9,269,000; 1926, 9,390,000; 1927, 9,519,000; 1928, 9,656,000 and 1929, 9,796,800.

Bounty On Coyotes

Payment of a [illegible] on coyotes, [illegible] which the farmers of British Columbia, especially the [illegible] man, have been agitating since the bounty was abolished last year, will be resumed under a recent order-in-council. The Department of Agriculture will pay the bounty at the former rate, viz. $7.50 for coyotes, $15 on wolves, and $40 on cougars. Trained [illegible] may also be used to kill off [illegible] animals when necessary.

"ROUND A CANADIAN CAMP FIRE"

On the terrace of the Banff Springs Hotel recently the above-named ballad opera was presented by the Alfred Heather Light Opera Company, now giving a two-month season of Canadian and Old English ballad operas at the hotel. Tepee, log fire, cordwood seats and even a portable organ were among the props and hundreds of guests were shown what an evening camp and sing-song are like. The Opera Company was assisted by Trail Riders of the Canadian Rockies seen clustered around the fire. The scene will live long in the memories of those who witnessed it.

Surplus Of Wheat Is A World Condition And Not Restricted To Canada Alone

Successful Field Day

Manitoba Wheat Pool Sponsors Gathering At Brandon Experimental Farm

About 300 people from thirty-three points adjacent were represented at the successful field day arranged by the Manitoba wheat pool and held at the Experimental Farm at Brandon. E. J. Watson, local field man for the wheat pool, had charge of the arrangements.

The horticultural work being done at the farm under the direction of J. H. Cooper, was viewed by the visitors. Guided by S. J. Sigfusson, they then inspected the cereal plots where Mr. Sigfusson drew attention to the treatment of summerfallow, comparing plowing summerfallow with the use of the cultivator only. They also visited the cereal breeding plots.

The advantage of plowing under sweet clover as a means of soil enrichment instead of plowing under grasses was evident when the party [illegible] Dr. Buckley to view plots where crops were flourishing where land had been so treated. Prof. Harrison explained how to select wheat for seed plots for registered [illegible] or exhibition work. Adjournment was made to the tent where these problems were discussed further.

Mr. Mahoney, of the Wheat Pool, acted as chairman.

[illegible] the men were touring the grain plots the women were shown the results of poultry feeding tests with cod liver oil and grain mixtures. R. M. Hopper gave a demonstration of the best ways to cull poultry.

Wealth From Forests

Canada Is the Chief Source Of the World's Paper Supply

The forests of Canada continue to be the chief source of the world's paper supply. During the past month Canadian paper has been exported to 33 countries, ranging through the alphabet right from Australia to Uruguay. Without the forests and paper mills of Canada the business of supplying the world's news to the public would be seriously restricted. Canada is becoming as famous for her paper as for her wheat.

Paper and wheat are more closely related than appears on the surface. Much of Canada's forested area is potentially good farming country, and as the forests are removed for the manufacture of paper the land goes under the plough and is devoted to agricultural production. Forests, in such cases, are a source of income to the new settler, who receives cash for his pulpwood while clearing it off his land.

While Canada's principal export of paper is for printing purposes there is an interesting variety of other paper products. Wrapping paper, writing paper and wall paper are exported to many countries, and in June more than a million pounds of paper wall boards for building purposes were exported to the United Kingdom alone.

Alberta Resources

Natural Resources To Be Handed Over To Province On October First

Alberta's natural resources will be formally handed over to the province on the first day of October, it was announced by the Provincial Government. An agreement providing for the formal transfer of the resources has been reached between the provincial and Federal Governments, and has been signed in their behalf by Premier Brownlee and Hon. Charles Stewart, respectively. The effect of the agreement is merely to fix the cut-off date, having no relation to other terms of settlement.

Airplane Extension Course

New York University has announced an aeroplane extension course which will be inaugurated this fall. The project calls for the transportation by air of professors of the university at intervals to a number of towns in New York and neighboring states where instructions in aviation will be given in grade schools, high schools and others.

More Workers Employed

In a report issued recently, the Dominion Bureau of Statistics, in analyzing the employment situation in Canada, said there were 21,296 more persons earning wages in Canada on July 1 last, than on June 1. From reports sent in by 7,283 firms, it was computed that 1,043,232 workers were employed in Canada.

A man in love gives; a woman in love forgives.

Many people these days are disposed to criticise the Canadian Wheat Pool for the large quantity of wheat that will be carried over in this country into the new crop year, says the Monetary Times. Fair-minded people, however, will temper their criticisms somewhat when they become conversant with the fact that the surplus of wheat is a world condition and not restricted to Canada alone. Some weeks ago attention was directed in these columns to the fact [illegible] in the U[illegible] was recognized as so important [illegible] the Department of Agriculture at Washington, got out a survey of of the world situation, and suggested that a reduction of acreage by the [illegible] wheat farmer in conjunction [illegible] a study of his costs would be the desirable course. [illegible] the United States Government takes such action recalls in a measure the uproar which was caused by the British policy of rubber plant restriction [illegible] or two ago.

In the years since the war the [illegible] sown to wheat has shown a [illegible] increase all over the world and [illegible] supplies increasing at a rate faster than the consumption it was inevitable that a surplus should be created. Just how this is to be absorbed in the next few years, short of a total crop failure, constitutes a problem.

The Orient is generally indicated as the most likely part of the world to increase its consumption of wheat. The rice-eating people of the East are gradually becoming wheat consumers to a greater extent. This has been due, no doubt to a variety of reasons, one of which may doubtless be traced to the large numbers of Chinese laborers employed during the great war in France. Many who saw service in France will remember the Chinese labor battalions eating their midday meal by the roadside boiling what looked like big dumplings of dough made from wheat flour. Moreover, as has been noted previously, experiments with school children in Japan and the Philippines have demonstrated the advantage of adding wheat to the diet.

However in the meantime new areas of the Canadian West have been opened up from year to year and more land brought under the plow while South America and Australia have also tended in the same direction and supply has increased faster than demand. Whatever fault may be found with the Pool for its method of trading, they are not altogether to blame for the fact that Canada will have a large wheat surplus.

Central Heating Plan

Central Heating Plants In Winnipeg Are Being Extended

In Winnipeg "central heating" does not mean a furnace in the basement of each house. It means a large central plant from which the heat is piped to many blocks of business buildings and residences. This principle of heating is not a new thing in Winnipeg, where it was first established in 1924. The municipal steam-electric plant which was required as a stand-by for electric power was utilized to provide heat which was piped through a certain area of the down-town part of the city. Electric boilers were installed and power developed on the Winnipeg River was used for the production of heat when not required for other purposes. The scheme proved a success and has since been extended. A private company is now entering the field with a $2,000,000 steam-heating plant in another section of the city.

Manitoba Phone Surplus

Surplus of $1,212,916 in the operation of the Manitoba Government Telephone System for the seven month period ended June 30 last is reported. Revenue for the period totalled $2,244,740.

The secretary of the Dixon, Illinois, club, says: "Even a tombstone has a good word for a man when he is down."

Wife: "That man always wears his medal for bravery."
Husband: "Well, what about it? I always wear my wedding ring."—Hummel, Hamburg.

Summer COLDS

Almost everybody knows how Aspirin tablets break up a cold—but why not prevent it? Take a tablet or two when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions in every package for headaches, pain, etc.

BAYER

WORLD HAPPENINGS BRIEFLY TOLD

In a recent month 12 tons of freight were carried by air from the Netherlands to London, England.

Victoria, largest dry spot on the beer map of British Columbia, may vote again shortly on the question of beer parlors.

With labor unrest spreading throughout northern France a general strike of textile workers in Roubaix and Halluin was called, affecting nearly 100,000.

The gross earnings of the Canadian National Railways for the ten-day period ending July 21 were $4,519,804 as compared with $4,224,904 for the corresponding period of 1929, a decrease of $1,705,090.

Because he finds England more inspirational to poetry Conrad Aiken, well known United States poet, has sailed for England, possibly to remain the rest of his life. He won the 1930 Pulitzer award for the best American verse of the year.

Mr. Marquisten has appeared in the British House of Commons in a suit of Shantung silk, courageously giving a lead to drably dressed politicians, says a writer in The Guardian. In 18th century Parliaments, the attire of members must have made the House a feast of color.

Plans for production of an all European news reel include talkies made in the Arctic regions. A German-Swedish company will use dog-sleds and a specially fitted steamship in carrying the first sound-film cameras ever to penetrate the Arctic Circle.

In the presence of thousands of citizens and visitors, Sudbury recently celebrated its entry into cityhood. Decorated floats paraded for an hour through the streets. Hon. Charles McRea, Minister of Mines for Ontario, presented the charter bearing the seal of incorporation.

The German aviators, Hirth and Weller, who reached Iceland on an attempted flight from Germany to the United States, have abandoned their project and Hirth sailed for Montreal with their small monoplane. His companion will take the next ship back to Germany.

Nationalize Coal Mines

Drastic Steps In British Coal Mining Industry Are Planned

Rt. Hon. William Graham, President of the Board of Trade, in a speech at Durham, England, said the recently passed coal bill was a Parliamentary step along the road which the British Government intended to follow until the great collieries were the property of the people. His audience, composed largely of farmers, welcomed the sentiments expressed. "We are pledged as a Government to nationalize the mining royalties, and we hope the time will be found in the next session for that bill," Mr. Graham said.

Must Wear Home Products

A new law has been passed in Persia, similar to certain laws passed in England a few centuries ago, compelling every government official from the highest to the lowest to wear clothes made of Persian manufacture only. Severe penalties are to be meted out for every infringement of this law.

"You paid for your dinner yesterday, sir, but you forgot the waiter."
"Oh, should I have eaten him?"—Buen Humor, Madrid.

Interesting Exhibits

Floating Museum Of Byrd's Antarctic Expedition

The City of New York, flagship of Rear-Admiral Byrd's Antarctic expedition, is to go on tour as a floating museum of the Antarctic. Admission will be charged to the public in an effort to overcome the expedition's deficit of more than $100,000, which continues to mount because of the expense involved in assembling the scientific material brought back by the expedition.

Announcement of the move came from Captain Ashley C. McKinley, in charge of the expedition's affairs in the absence of Admiral Byrd. The ship will go on exhibition at the Ninety-sixth Street pier in the North River and will be open to the public from 10 a.m. to 10 p.m. On leaving New York it will go to Boston and other New England cities and will then proceed south along the Atlantic seaboard.

More than a month has been spent in assembling the models and exhibits built by the expedition members during the Antarctic night. Captain McKinley said: "When open to the public the ship will contain the most complete exhibition of Antarctic specimens ever gathered, as well as hundreds of other souvenirs of the expedition."

On view will be a model of Little America, constructed to scale by the American Museum of National History, models of the Floyd Bennett, the airplane used in flying over the South Pole, models of other expedition 'planes, a model of the City of New York and a replica of a camping scene showing one of the exploration parties.

Winnipeg Newspaper Union Fashion

(By Annebelle Worthington).

2574

A printed crepe silk shows how smart it can be in straight silhouette with low-flared fulness.

The pointed outline of the hip yoke and the circular skirt flounce, produce a particularly slenderizing effect.

The neckline is interesting in cool open V-shape. The rolled collar and jabot of plain crepe match the background of the print.

The short sleeves with elbow flare are very smart.

Style No. 2574 can be had in sizes 14, 16, 18 years, 36, 38, 40 and 42 inches bust.

It's very pretty in printed chiffon voile that will give such excellent service.

Shantung, flat crepe silk, pastel sheer linen and printed batiste are fashionable fabrics for its development.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Aviators Have Trying Trip

Combat Engine Trouble While Flying North Of Fort Churchill

After combating engine trouble away north of Churchill, making emergency repairs and carrying out their mission two Royal Canadian Air Force pilots are back at their base at Cormorant Lake, Mile 42, Hudson Bay Railway. The officers are E. Hickson, flying a Fairchild, and H. B. Barclay, flying a Bellanca. They conveyed A. E. Porsild, Federal Government official, to the far north to collect data on reindeer pasture.

According to reports from Churchill, the officers were flying about 180 miles north of Eskimo Point on Hudson Bay and about 80 miles south of Chesterfield Inlet when a cylinder locked on the Fairchild. They dropped down in the sea.

The sloop "York," plying northern waters, was nearby. The captain offered assistance but the pilots found they could make repairs. They managed to get off the water and limped through the air, finally coming down at Vavane, a small trading post, and base of operations of Dominion Explorers. Vavane is about 160 miles from Eskimo Point. Their destination was in the "barrens" about 150 miles west of Vavane. At Vavane they met Alex Nicholson in charge of Dominion Explorers' base. He helped them with spare parts and they flew out into the barrens.

Long Telephone Call

Radiophone Conversation Between South America and Australia

Advices received at New York from Buenos Aires describe a radiophone conversation between Captain Lewis Yancey in an aeroplane and Sydney, Australia.

The connection, which was made from the 'plane, 5,000 feet above the Buenos Aires airport, established a distance record for telephoning from an aeroplane in flight. It spanned 14,000 miles.

The call was relayed from the radio station at Buenos Aires to Madrid, Spain, thence over land lines to the French side of the English Channel, where submarine cables carried it to England. At Rugby the beam wireless picked it up for wireless transmission to Sydney.

Accepts Vice-Presidency

Lady Willingdon Takes Interest In Canadian Branch Of Dr. Barnardo's Homes

Her excellency, Lady Willingdon, has accepted the honorary vice-presidency of the Canadian branch of Dr. Barnardo's Homes, it was announced by the Canadian headquarters of the organization.

Lady Willingdon is a daughter of the late Lord Brassey, the latter being president of the Barnardo's Homes organization in England at the time of her birth, and a great personal friend of the late Dr. Thomas John Barnardo. Her father took a keen interest in the migration of boys and girls to Canada.

Recipes For This Week

(By Betty Barclay)

SNOW-TOPPED SALAD

On a bed of crisp lettuce leaves arrange a mound of fruits of various kinds, cut in small pieces. Oranges, pineapples, apples, grapes and peaches are excellent. Berries in season, or small cubes of watermelon or cantaloupe, may also be utilized. Top this with a liberal serving of stiffly-beaten, sweetened whipped cream. Immediately before serving sprinkle the fruits and lettuce base, liberally with a syrup made by dissolving four teaspoons of sugar in the juice of two oranges and one lemon.

SWEDISH SPRITZ COOKIE

1 cupful sugar.
1 cupful butter.
2 eggs.
4 cupfuls flour.
½ teaspoonful baking powder.
¼ cup sweet almonds.

Mix all ingredients together in bowl, sifting baking powder with flour. Mix with the hands until ingredients are blended, being careful not to work too long. Push through pastry gun. Shape in rings or S shapes. Bake in a quick oven.

Dog's Name In Phone Directory

Pussy Willow Thornton, an aristocratic bulldog, has a telephone listed in her own name, it was revealed in Chicago. A few lines above Pussy Willow's name will be found the name of Mrs. B. Thornton, the dog's mistress. Mrs. Thornton's theory is that animals are as human as people and therefore have a right to be listed in the telephone directory.

It's strange that a motorist never remembers he used to be a pedestrian.

Claims Matter Is Weightless

Scientist Gives New Definition Of Weight and Force Of Energy

After delving into philosophical questions as a hobby from a very early age, W. Donald Mitchell, under the nom de plume of "Logus Philius," has published "The Great Light of Relativity."

In his work, Mr. Mitchell, who was born in Pembroke, Ontario, of Scottish parentage, claims to reveal that, "the earth does not weigh so much as one ounce, that matter is weightless," and gives a new definition of weight, and also of the force of energy. He claims to reverse Newton's equation of attraction, and Einstein's space-time-energy theory. He gives other concepts of philosophy in axiomatic form, chief of which seems to be his statement that, "knowledge, or intelligence, is the relative, transient, personal and material reflex from objects and elements of external reality, partially retained in memory—in or on the negative plates or cells of the brain."

The author of this remarkable work believes himself to have made the most remarkable discoveries in recent generations, and thereby set a new standard for philosophy, metaphysics, psychology, and thus also education. "It promises to affect the entire scientific thought of the age," he says. He makes no declaration dogmatically, but states: "I shall be delighted to receive, either personally or otherwise, any criticism for or against any statement, axiom or definition, appearing herein, for the spirit of progress is formed in criticism and unbiased investigation."

The Peking Man

Canadian Scientist Has New Theory Regarding Discovery In China

The "Peking Man" was really an adolescent girl, who lived possibly 1,000,000 years ago, Dr. Davidson Black, Canadian scientist, said, in announcing the discovery of a second ancient skull.

The noted paleontologist, who dug up the skull of the "Peking Man" some months ago, said he had found the second cranium embedded in the rock of the same cave in which he found the first skull.

The second is that of an adolescent male, Dr. Black said, and the measurements rather indicated the first skull was that of a girl.

Grape Juice Duty

Special Tariff Item Designed To Meet Foreign Competition

A special issue of the Canada Gazette announces that an order-in-council has been passed bringing into effect the special tariff item designed to meet foreign competition in concentrated grape juice. Grape juice previously was all under one duty. The new duty provides a tariff of 25 cents a gallon with an addition of three cents a gallon for each .01 increase in specific gravity above 1.074. It comes into immediate effect.

Place any man where he has no installment payments, no taxes, no stock losses and still he'll saw the bars to get out.

SUNDAY SCHOOL LESSON

AUGUST 17

SAUL, "A MAN OF GREAT POSSIBILITIES WHO FAILED"

Golden Text: "Wherefore let him that thinketh he standeth take heed lest he fall." 1 Corinthians 10:12.

Lesson: 1 Samuel, Chapters 8 to 11, 13; 15, 16:14-23, 19:9-12; 28; 31.

Devotional Reading: Psalm 1.

Explanations and Comments

God's Will Regarding Saul Revealed To Samuel, 1 Samuel 9:15-17.—In the Hebrew the verb "revealed," as the margin of the Bible explains, means literally "uncovered the ear of," and signified the divine Spirit's announcement to the human spirit. "The revelation which Samuel received the day before Saul's arrival, that a man of the tribe of Benjamin would come to him, whom he was to appoint king over Israel, was psychologically based on his constant prayerful, expectant reflection as to how God would establish the monarchy." When Samuel saw Saul he asked himself whether Saul were the Benjamite of whom he had been told, and felt assured that Saul was the man chosen of God to be the leader of His people.

"God's voice is of the heart—I do not say
All voices therefore of the heart are God's,
And to discern the Voice amidst the voices
Is that hard task that we are born to."

The Meeting Of Saul and Samuel, 9:18-26. In search of his father's asses (9:1-17), Saul sought the aid of Samuel. He found him on his way to the "high place" where he was to offer sacrifice. Samuel at once set the young man's mind at rest regarding the lost animals, telling him they were found, and then awakened great expectations in Saul's heart by adding: "For whom is all that is desirable in Israel? Is it not for thee and for thy father's house?"

In astonishment Saul answered: "Am I not a Benjamite, of the smallest of the tribes of Israel, and my family the least of all the families of Israel? Wherefore then speakest thou to me after this manner?" This extravagant expression of humility was in accordance with Eastern custom, but, as Alexander Whyte thinks, it seems to be the language of a man whose heart is really touched for the time being with divine grace. It is real humility.

The Anointing Of Saul, 9:27 to 10:1. As they were leaving the city's precincts, Samuel bade Saul send his servant on ahead. Then Samuel poured oil upon Saul's head and kissed him. Before this, priests had been anointed by their office, and when Saul was consecrated as king by anointing, "the monarchy was inaugurated as a divine institution standing on a par with the priesthood."

"Is it not that Jehovah hath anointed thee to be prince over his inheritance?" questioned Samuel. Thus he impressed Saul with the fact that it was God who had chosen him to rule, and to God, therefore, he was responsible for the way he ruled.

Survey Of Wood Waste

The Vancouver Forest Products Laboratory, conducted by the Forest service of the Department of the Interior, is engaged on a survey of wood waste in British Columbia sawmills with a view to assisting the industry in devising methods of profitable utilization of wood now wasted.

We think we're a smart people but it took half a century for salesmen to learn not to ask the woman customer what size shoe.

No Loss From Pool Guarantees

Wheat Pool Did Not Have To Call On Government For Funds

A special despatch to the Toronto Mail and Empire from Ottawa says:

"From no less a person than the chief statistician of the Canadian Wheat Pool's selling headquarters in Winnipeg, government authorities in Ottawa have received the cheering information that the prairie provinces have incurred no loss from their guarantees of the Wheat Pool's operations.

"Early in the year, when it became apparent that Canada was not going to be able to market her whole crop and that the market price had suffered a severe slump, the three prairie governments put their credit behind the Wheat Pool to the extent of guaranteeing the banks against loss through the advances made to the pool.

"According to information supplied to the Dominion government, there has been no loss. The pool's crop year ended July 15. Everything transacted from July 16 onward is part of the 1930 pool. Compilation of the final returns of the 1929 pool is under way, and has progressed far enough to reveal that the pool sold enough wheat above the dollar price to at least compensate for the quantity which had to be sold below that mark—leaving the provincial guarantees unsullied.

"Andrew Cairns, statistician for the pool, was in Ottawa several days ago securing passports and making preparation for a trip to Russia. He has now departed for that country for the purpose of surveying at first hand the state of wheat growing in the land of the Soviets and determining to what extent Russia is looming as a serious factor in European export wheat supply. Mr. Cairns informed the government of the situation in regard to the guarantees, which, he said, would now expire."

Mediterranean Service

Inauguration Of a New Monthly Service From Canada

Inaugurating the new monthly service from eastern Canadian ports to Gibraltar, Malta, and other Mediterranean ports, the "David Livingstone" will sail from Montreal on or about September 10. This will be followed about October 10 by the S.S. Benguela.

The new service, according to the Department of Trade and Commerce, will consist of special motorships, equipped for cargo and accommodation for 10 or 12 passengers. Owing to the absence of a direct steamship service between these ports, and Montreal or Halifax, Canada has not been able to share in these markets to any extent in the past.

New York now has four airplanes for its police patrol, which will watch out for law-breaking from the vantage point of the air.

The pimento tree, a Jamaica native, is the source of allspice.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES, LAYING PENS, DAIRY BARNS, SUNROOMS, ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Radio Traffic Cop

U.S. Official Will Round Up Transgressors Of Radio Laws

The master radio traffic cop will begin covering his ethereal "beat" shortly and in a way that augurs trouble for transgressors of the radio law.

For this radio police chief — the new constant frequency monitoring station, located at Grand Island, Neb., in the exact geographic centre of the United States, will make a daily check and report of the operations of all radio stations that are violating the technical regulations and thereby causing interference. Preliminary arrangements for this daily system of checking, notably of broadcasting stations, have been worked out by the federal radio authorities.

Vastly improved reception for listeners should result, once the master traffic cop becomes acquainted with its "beat." When a broadcasting station is detected operating off its assigned frequency it will be reported, via naval radio, to the federal radio commissioner at Washington, which has authority to take appropriate punitive action.

The apparatus installed at the Grand Island monitor station is more than two hundred times as sensitive as the ordinary home receiving set. The station is under the immediate supervision of the radio division of the Department of Commerce, which is the federal radio police agency. Its equipment has a range enabling it to check the operations of stations over the entire radio spectrum, thus making it world-wide. It will serve all types of transmitting stations, such as television, photoradio, trans-oceanic and trans-continental point to point, amateur, aircraft radio, broadcasting and experimental.

Somewhat Ungrateful

Man Rescues Woman From Drowning and Receives No Thanks

To jump into the cold waters of Lake Ontario fully dressed, risk his life in rescuing a woman bather and to receive no word of thanks from the rescued party was the experience of Alex Taylor, of Toronto, recently.

When Taylor saw the woman, whose name was not secured, floundering about helplessly off Kew Beach, he plunged into the lake immediately and rescued her. He brought her safely to shore, and the woman, after resting on the beach a few moments, is alleged to have got up and walked away without even saying "thank you."

"Oh, well, I guess it is all in a day's work," said Taylor as he walked slowly down the beach attempting to wring the water out of his wet clothes.

Baker Lake

According to the records of the Geographic Board of Canada, Baker Lake was so called in 1762 by Capt. Christopher, of the ship "Churchill," who discovered the lake on ascending Chesterfield Inlet from Hudson Bay in that year.

Fur seals are taken for their fur pelts almost entirely in June and July.

USES PINKHAM MEDICINES

Praises Vegetable Compound, Blood Medicine and Liver Pills

Birchtown, Quebec—"I live 13 miles from town on a farm, with all my home duties and chores to attend to. At the Change of Life, I became nervous and rundown. The Vegetable Compound helped my whole system. My nerves are better, my appetite is good and I am able to do my work. I have also taken the Blood Medicine and the Liver Pills and they helped me. I will answer letters from women asking about your medicines."—Mrs. RICHARD CHARLTON, Birchtown, Quebec.

British Columbia Game Exhibit

Defeated the Entire World At Leipzig Exhibition Of Game Trophies

British Columbia defeated the entire world at the Leipzig exhibition of game trophies, according to cable advices received by Hon. R. H. Pooley, attorney-general of British Columbia. Exhibits prepared by G. L. Pop, Vancouver taxidermist, in co-operation with Bryan Williams, B.C. game commissioner, were successful against entries from all the leading countries of the world, Mr. Pooley's advices stated.

A mountain goat head sent by Mr. Williams took first prize among all exhibits.

The United States spent between $30,000 and $40,000 on its great exhibit, and sent five men to supervise it at Leipzig. British Columbia's exhibit, prepared at an expense of $1,600, was considered finer than those prepared by the United States, and other large nations.

"Many papers in Great Britain and on the continent of Europe have spoken favorably of our exhibits," Mr. Pooley said. "And it should be the means of bringing many big game hunters and tourists to this province. Unquestionably the exhibit is of very great value for publicity purposes, and Mr. Pop, who prepared it, in co-operation with Mr. Williams, is to be congratulated on his skill and on his success."

The British Columbia exhibit caused such wide interest in Europe, that President Hindenburg, of Germany, went especially to the exhibition to see it, and expressed admiration for the game of this province.

The exhibit included giant moose, deer, wapiti, sheep and goat heads, also skins of fur bearing animals. They are arranged against a background of British Columbia scenery, and included many large colored photographs.

"This is the most remarkable triumph for British Columbia game we ever witnessed," Mr. Williams said.

Wealth Of Canada

Equal Division Of Wealth Would Give Each Person $2,906

If all the wealth in the Dominion of Canada were equally divided every citizen would have $2,906. This figure is the per capita wealth of Canada, according to figures compiled by the Bureau of Statistics for the year 1928, which places the aggregate wealth of the Dominion, exclusive of undeveloped natural resources, at $28,940,000,000, an increase of $1,272,000,000 over the 1927 estimate of $27,668,000,000.

Individually, the people of British Columbia are the wealthiest people in Canada, although Ontario ranks first among the provinces in total wealth. The per capita wealth of British Columbia is $4,230. Alberta comes second with $3,717, Saskatchewan third with $3,612, Ontario fourth with $3,063, Manitoba fifth with $2,996, and Quebec sixth with $2,750. Nova Scotia had the lowest figure, $1,569, while Prince Edward Island had $1,730, and New Brunswick $1,877.

Farm property and farm products were the largest single item in Canada's national wealth, amounting to $8,052,531,000, or 27.82 per cent. of the total. The second largest item was urban real property, estimated at $7,562,754,000, or 62.3 per cent. of the total.

To North Pole By Submarine

Sir George Hubert Wilkins, who plans to cruise by submarine toward the North Pole, arrived at the Philadelphia navy yard recently and looked over the craft on which he expected to make the journey. "The trip itself from Spitzbergen to open water in Behring Sea will require about 60 days, including a stay of some length at the Pole itself," Sir Hubert said.

Cancer Prevention

Plans to assemble 1,000 physicians in the largest post-graduate cancer class ever held, were announced at Johns Hopkins University. The course, designed to meet new conditions in cancer prevention, will be held September 15, 16 and 17.

The highest and lowest point in the United States are within 100 miles of each other in southeastern California. Death Valley is 276 feet below sea level and Mt. Whitney is 14,502 feet above.

Would Curtail Land and Air Forces

Viscount Robert Cecil In Favor Of Further Disarmament

Holding that the London naval treaty does not insure world peace, Viscount Robert Cecil, in a radio speech from London, broadcast in the United States, urged an immediate discussion of land and air force curtailment.

He also pleaded for understanding between France and Italy.

"Without a general limitation of armaments by international agreement, disarmament for short, there can be no secure guarantee of peace," he said. "No amount of treaties, renunciation of war or of arbitration, however carefully drawn or widely expressed, can be relied on to prevent war so long as the nations continue to have and exercise the unrestricted right of arming themselves against one another."

The British statesman said that armies and air forces are "ten times worse" than fleets, for a "fleet cannot actually invade another country, and it is the cry of invasion that creates the most dangerous panics."

Referring to failure of negotiations between France and Italy, Viscount Cecil said: "I refuse to believe that the two continental powers will not have the wisdom to agree, and in the second place I am confident that now that the three other powers have definitely accepted limitation they will never be so foolish as to revert to the old and archaic system."

British Memorials In France

Four Memorials Are Unveiled On Sixteenth Anniversary Of Outbreak Of War

On the sixteenth anniversary of Great Britain's declaration of war against Germany, four memorials were unveiled in the erstwhile battlefields of France to the 50,000 men of the British forces whose fate was shrouded in the one word "Missing." With the dedication of these four, there are eight shrines in France to the memory of those buried in the graves of the unknown.

General Sir Walter Braithwaite unveiled the memorial in Artois cemetery and General Sir Nevil Macready officiated at a similar ceremony at "Dud Corner," Loos. It was at Loos that Rudyard Kipling, the noted writer, lost a son, and Mr. Kipling was present at the ceremony. General Sir Horace Smith-Dorrien performed an unveiling at Poieres cemetery. Lieut.-Gen. Sir Louis Vaughan led in the commemorative cemetery at Louverval cemetery.

Radium Paint On Roads

To keep motorists on her highways it has been suggested the trees bordering France's main roads should be painted with radium, or some phosphorescent material. In some parts of France the trees at crossroads are whitewashed to make them stand out during the night, but now the motorists are asking for illuminated radium-painted routes.

Mrs. Fish: "And does your new nurse-girl take care of the dog?"

Mrs. Simp: "No, indeed; she is too inexperienced. She only looks after the children."

Bicycles in many colors are appearing in London.

Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always Castoria! Harmless as the recipe on the wrapper; mild and bland as it tastes. But its gentle action soothes a youngster more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is need. In cases of colic, diarrhea or similar disturbance, it is invaluable. A coated tongue calls for just a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed.

Millions For Charity

Fortune In New York Real Estate To Be Given To the Poor

A fortune in real estate estimated at upwards of $100,000,000, which three generations of Wendels have spent their lives amassing, is to go to charity when a frail little old lady, last of the Wendel line, dies.

The will of Mrs. Rebecca Wendel Swope, who died July 29, was filed in New York and provides for that disposition of the Wendel holdings after the death of her sister, Miss Ella, now 80.

The Wendel family for years has been an enigma to the rest of New York. Living in an old brownstone mansion at Fifth Avenue and 39th Street, they resisted all progress, lived in almost monastic simplicity and refused to sell any of their real estate holdings.

The family fortune was founded in the 19th century by John Wendel, a fur trader and contemporary of the first Astors. With the turn of the present century there remained only seven grandchildren, six sisters and one brother. The brother, who also bore the Christian name John, forbade his sisters to marry, saying that no man was good enough for them. Mrs. Swope is the only one who married.

One, Georgiana, tiring of the restricted life, fled to Europe and showed herself publicly in hotels and other public places. On her return her brother had her declared insane, and she was committed to an asylum. She finally won her freedom and sued her brother for $50,000, but dropped the suit and returned to the old Fifth Avenue home, there to live out her life behind closed shutters. She died in 1929.

One by one the sisters passed away, until now only Miss Ella is left. As did her sisters, she dressed only in black satin, cut in the mode of 40 years ago, and sewed by her own hands. She never leaves the house, so far as is known, except to walk her aged, fat poodle in the yard behind the house, known as the million dollar dog-run because of the value of the property and the fact that it is used for no other purpose.

Would Control Grain Prices

Central European States Consider Problems Of Markets

Negotiations for regulation of grain prices resulting in Poland's suggestion that Latvia, Estonia, Bulgaria, Jugo-Slavia, Hungary, Roumania and Czecho-Slovakia join her in an agreement were viewed at Berlin as of wide European significance rather than of world wide importance.

The problem of the markets concerned is especially with surplus rye stocks. The Danube region crops were described as promising good yield for 1930 and the Roumanian wheat crop was reported some 700,000 tons larger than last year. In Jugo-Slavia, however, the crop was expected to be some 600,000 tons less, although both Hungary and Bulgaria predicted increases of about 300,000 tons each.

Sinking In the Sea

Ireland In Danger Of Disappearing Say Scientists

The Royal Irish Academy, Ireland's most learned body, has been debating the suggestion that Ireland is gradually sinking into the sea.

The marine erosion especially on the East coast has become serious. A learned engineer pointed out that during the past winter at many points there has been a marked lowering of the beach level.

The director of the State's geological survey said this coast depression was not merely local, but part of a depression affecting Western Europe. The land is sinking at present because, while both land and sea are rising, the sea is rising the more rapidly. The sinking is a few centimeters per century.

Will Destroy Porpoises

Porpoises have become such pests in the Gulf of St. Lawrence that the Canadian Government recently expended $5,000 for the purchase of an aeroplane, bombs, and the hiring of a pilot to kill off these fish. The porpoises were destroying all marine life in the gulf.

A giant tower with swinging side arms designed to launch and land airplanes and to pick up mail and freight in flight has been invented.

For all Skin Abrasions—Minard's Liniment.

Italy and Volcanoes

Italian Peninsula Subject To Frequent Seismic Disturbances

Another earthquake has visited Southern Italy, destroying towns and leaving several hundred dead in its wake. The disaster is not so severe as others which have occurred in this area, but it is none the less a blow to those whose homes have been destroyed, or who have been bereft of kin and friends.

The lower portion of the Italian peninsula is of volcanic origin and subject to frequent seismic disturbances, but no part of the country is exempt. Last year the City of Bologna, in the north, experienced twenty-two earthquakes in a single month. Rome was badly shaken about two and a half years ago. No serious damage resulted in these instances but in March, 1928, a number lost their lives in a disturbance of unusual violence in Lombardy. No recent earthquake, however, compares with that of Dec. 28, 1908, which virtually destroyed the important City of Messina and many towns in Sicily and Calabria (the toe of the Italian boot). The number of lives lost in that disaster was officially estimated at over 77,000. Only the Japanese earthquake of 1923, which resulted in approximately 100,000 deaths, compares with it in destructiveness.—New York World.

Will Preserve Historic Objects

Dinosaur Tracks Are Found In Canyon Of Peace River Country

The remains of British Columbia's earliest inhabitants, who died several hundred thousand years ago, are to be preserved by official decree. Under an order-in-council the government declares dinosaur tracks and fossil bones of ichtyosaurus found in the canyon of the Peace River last year to be historic objects. To remove or deface them in any way is a serious offence. These relics discovered by railway engineers during a survey last summer are regarded by scientists as highly important since they show the prehistoric monsters of the prairies had penetrated into British Columbia by following the course of the Peace River. No such remains had been found in British Columbia before, though the Alberta foothills are rich in such material.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

An Elaborate Clock

One Of the Largest Clocks In the World To Be Built In Sicily

The immense and beautiful cathedral at Messina (Sicily), now under construction, is to have one of the largest and most elaborate clocks in the world in its bell tower. This clock will have an illuminated dial which will show the time for great distances both day and night and is to be equipped with other mechanism which will show the positions of the celestial bodies and their phases. Other devices will indicate the ebb and flow of the tides and changes in wind weather and temperature. A chanticleer upon the summit of the tower will crow at dawn and sunset, and at noon a lion will emerge from a lofty recess and roar.

Chimes will mark the passing of each quarter, and an infant, a youth, a soldier and a septuagenarian will appear successively each 15 minutes. Bronze figures of Sicilian heroines will strike the hours, and other symbolical figures, also of bronze, will mark the season and the month. The clock is said to be the most intricate and inspiring work of man yet devised and will be one of the chief wonders of a world long accustomed to the marvellous.—Il Gazzettino, Venice.

"Say, looky hyeh, Rastus, yo know what you're doin'? You is goin' away fo' a week and they ain't a stick of wood cut fo' de house."

"Well, what you all whinin' about, woman? I ain't takin' de axe wid me, is I?"

Work will start immediately upon a new grain storage elevator at Port Arthur, Ontario, to accommodate 3,500,000 bushels.

There are lots of wise men until you get next to them.

UNIVERSITY OF MANITOBA

WINNIPEG

Offers, among others, the following Courses:

Through its FACULTY OF ARTS AND SCIENCE courses leading to the degrees of B.A. and M.A., B.Sc. including B.Sc. (Phar.) and M.Sc.

Through its FACULTY OF ENGINEERING AND ARCHITECTURE courses leading to the degrees of B.Sc. (C.E.), B.Sc. (E.E.), M.Sc. and B.Arch.

Through its FACULTY OF MEDICINE courses leading to the degrees of M.D. and C.M.

Through its FACULTY OF AGRICULTURE AND HOME ECONOMICS courses leading to the degrees of B.S.A. and B.Sc. (H.E.).

Through MANITOBA LAW SCHOOL, an affiliated institution, a course leading to the degree of LL.B.

Little Helps For This Week

"For He hath said, I will never leave thee nor forsake thee." Heb. xiii. 5.

O Love Divine, whose constant beam
Shines on the eyes that will not see,
And waits to bless us while we dream
Thou leavest us, because we turn
from Thee!
Nor bounds, nor climes, nor creed
Thou knowest;
Wide as our need Thy favors fall.
The white wings of the Holy Ghost
Stoop, seen or unseen, o'er the heads
of all.
—John Greenleaf Whittier.

The only thing that can really darken the soul is something coming between it and God, but that is impossible so long as the soul remembers His presence. He touches us on every side with His loving, compassionate care.—Henry Van Dyke.

Homing Pigeon Had Stamina

Although Badly Wounded Makes Epic Flight To Home Loft

Making a tough flight from Moose Lake to Cormorant Lake, base of the Royal Canadian Air Force, Mile 42, Hudson Bay Railway, a homing pigeon badly chewed to pieces managed to get to home loft before it collapsed. The bird, along with two others, was in a hamper aboard one of the patrol 'planes which stopped at Moose Lake. The hamper was removed for a moment, and some husky dogs made a raid on it. They killed two birds and bit through the neck of the third one, which managed to get away. It reached the loft 24 hours afterwards, a flight that should normally take less than an hour. Frank Bradley, pigeoneer of the Air Force, sewed up the wounds. The carrier will live.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

London Health Records

London expects 1930 to be one of its healthiest years ever known. In the first four months deaths numbered 20,336, a decrease of 12,000 from the same period of 1929. Deaths from influenza decreased from 2,862 to 206. The exceptionally mild winter is given credit for the improvement.

Need Protection

"I never could understand why a fellow should not be allowed to have more than one wife."

"Well, after you are married you'll realize that the law protects those who are incapable of protecting themselves."

Four Doses Relieved Bad Attack of Cholera

DR. FOWLER'S EXT. OF WILD STRAWBERRY

Mr. W. J. Cooper, Maughan, Alta., writes:—"A year ago last spring I arrived in Canada with my family, and one of my boys, aged six, was suffering very much with cholera. When we arrived I had a few hours to wait, and told one of the attendants at the station about it, and he asked me if I had ever tried Dr. Fowler's Extract of Wild Strawberry. I had never heard of it in England, so he told me I could get it in Winnipeg. I am pleased to say I had only to give the child four doses and he got well and was quite cheerful by the next morning."

H. B. ROGERS

Municipal District of Beaver Lake, the secretary was instructed to state that, in their opinion, this district was within easy access to two hospitals, apart from the Edmonton hospitals, therefore it would not be any advantage to them in forming a municipal hospital.

The secretary was instructed to write Mr. John Campbell, solicitor of Lamont, Alta., acting for the Lamont public hospital, to the effect that Municipal District of Cornhill did not receive registered notice re Martin Nesbit's Hospitalization, therefore said district cannot accept any responsibility at this date.

Reeve Thompson stated that he would not be able to accept Mr Leslie McIntire's offer of $150 this year re building road on west side of his place and running south for 1½ miles because of him not having the funds.

Upon motion of Councillor Curlet, the offer of $150 for lot in North Cooking Lake was accepted.

bearing interest at seven per cent per annum and maturing Sept. 1st 1931. Above settlement to be made upon said market road receiving approval of engineer representing the Department of Public Works.

A number of accounts were presented, passed and ordered paid.

The meeting adjourned at 6 p. m.

Here and There

Changes in operating organization on Canadian Pacific western lines are announced as follows: J. H. Brown, superintendent of Saskatchewan southern lines, transferred from Regina to Edmonton. J. M. MacArthur, superintendent Medicine Hat division, transferred to Regina. These transfers are made in accordance with the company's policy of enabling its officers to broaden their experience in railway matters.

American golfers beat British players because they are more interested in the scientific angles of the game and generally speaking try harder according to the University of Oregon wizard interviewed at Vancouver travelling Canadian Pacific from the western Open at Chicago and the American Open tournaments at Minneapolis. He described English golfers as the best sportsmen he had ever encountered.

Seven hundred Americans about two thirds women toured Nova Scotia recently by Dominion Atlantic Railway.

Principal, Mr. J. T. Bullock.

POPULAR YOUNG COUPLE WED

On Saturday, August 16th, at seven p.m. Miss Annie Lillian Booth, youngest daughter of Mr. and Mrs. A. N. Booth, and Mr. Herbert A. Swift, second son of Mr. and Mrs. Herbert Swift of Montreal were united in bonds of holy matrimony, the officiating clergyman being Rev. Gordon, of Tofield.

The ceremony took place at the bride's home and the bride was given away by her father, and attended by Miss Mildred Booth as bridesmaid. The bridegroom was supported by Mr. Freeman Hill as best man.

The bride was attired in a dress of navy crepe back satin with contrasts of white and carried a bouquet of carnations, sweet peas and maiden hair fern. The bridesmaid, Miss Mildred Booth was attired in Blue Georgette with contrasting color of sand. The room was prettily decorated with sweet peas and other foliage. After the ceremony a buffet luncheon was served and the happy couple left for Edmonton where they entrained for Pacific coast points to spend their honeymoon.

Upon their return they will take up residence in Tofield, where Mr Swift is employed with the firm of Swift and Emery.

There were 27 guests present at the ceremony, those from a distance being, Mr. and Mrs. Bert Wallis of Edmonton, and Mr. Gordon and Miss Dorothy Ferguson of Rosalind, Alta.

The presents were both numerous and beautiful.

BERT JOHNSTON'S COMPANY GIVES SPLENDID ENTERTAINMENT

With Chautauqua in progress at both Camrose and Bruderheim, the Bert Johnston Company gave three splendid entertainments at Outlook, on Thursday, Friday, and Saturday nights of last week, and were greeted with good audiences each night.

WORST HAIL STORM ON RECORD FLATTENS CROPS IN WIDE AREA, VEGREVILLE TO BIRCH LAKE

Storm Cuts Swath 60 Miles Long By Three Miles Wide

WINDOWS SMASHED

Leaving devastation in its wake, the worst hail storm in the history of the district, cut a swath three miles wide and over 60 miles long from a point south of Vegreville to Birch Lake, northeast of Ranfurly, in the early hours of Monday morning.

TOWN GOSSIP

Well, well, Bert Swift has joined the benedicts. Here's hoping that the vehicle on wedded bliss and married life will purr along smoothly, that there will be no tire trouble or motor trouble and that the body will stand up to sixty or more years of constant use. Congratulations!

* * * * * * * *

By the way, did you know that car washing is now all the rage.

One young blood just felt that his car needed all the water there was in the country and drove it to Beaver Lake. There the always dormant spirit of the sea that lies in all persons born in the British Isles awoke, and thought he, this is a good car, I'll have a Canadian Navy and make a submarine of this. He backed up his decision by action and striking an admiral pose headed for deep water.

* * * * * * * *

Unfortunately his craft grounded in shallow water and he could neither go for'ard or aft. There being no coast guard service on Beaver Lake shore, land lubber assistance was sought. Dr. Law, who is a very present help in time of need in more ways than one, and besides being a good sport is as strong and handsome as Tillie the Toilers best beau, came to the rescue. Throwing a line round the windlass he manoeuvred his car into position, but he too went aground in shallow water. "Got stuck" I think you call it.

* * * * * * * *

"Dad" Harris' car also ran on the rocks in a rescue act, the finish of the story being a team of Alberta horses hauling all three cars to "hard bottom."

* * * * * * * *

The originator of all this now says he is going to join the cavalry.

* * * * * * * *

Gun for sale. A dandy for getting ...

* * * * * * * *

Well, I am not quite sure the gun is for sale. Bert Calvert was seen cleaning and oiling his and was asked what he was going to do with it just now. He replied, he might sell it.

* * * * * * * *

And hunting season almost here.

'Fresh from the gardens'

The Russian Menace

Soviet Russia presents a menace to Great Britain, Canada, the United States, in fact, to all countries which depend for their prosperity upon a world export trade. The Russian menace of today is not one of impending war fought by armies and navies, rifles, cannon, tanks, bombs and aircraft, but of a [illegible] for world trade, and of the countries most likely to be seriously affected by such a struggle the British Commonwealth of Nations and the United States come first.

Prior to the Great War it was frequently contended that wars between nations were brought about by armament manufacturers and captains of industry seeking territory within which they might enjoy more or less exclusive right of trading. The Great War itself was in the final analysis caused by Germany's ambition to secure larger world markets and a greater colonial empire. The German navy was created for the express purpose of challenging the British navy, with this very object in view. Germany failed, but in the Great War the [illegible] Russia of the Czars disappeared, and in its place there has arisen the Soviet Republics dominated by the communist workers.

The Soviet leaders are absolutely ruthless in their methods, inspired by [illegible] and [illegible] by a belief that their ideas of government are the only right [illegible] leading to freedom of the masses as opposed [illegible] under the control [illegible] the Soviet leaders all methods are right and fair if they serve [illegible] their purpose. Hence the nature of the [illegible] the world.

Having seized the property of all the landed and capitalist classes of Russia, having declared it a crime for any person in Russia to hold views contrary to those of the Soviet authorities and having imposed ultra-communistic ideas upon the whole of Russia, the Soviet leaders are now utilizing all working [illegible], seized, or stolen properties with what is to all intents and purposes [illegible] labor. And if there is any shortage of such labor [illegible] readily available by trumped-up charges of treason [illegible] the Soviet and without trial are thrown into [illegible].

[illegible] agricultural products, notably wheat, produced under such conditions at a cost against which the producers of no other country [illegible] are now beginning to be thrown into the markets of the world. Some [illegible] thousands of tons of Russian coal have been shipped to Canada [illegible] shiploads of Russian pulpwood are being sent [illegible] United States to enter into competition with Canadian pulpwood, pulp and paper. Russian wheat is going to England where it displaces hard Canadian wheat as it [illegible] of the same hard variety.

And this is only the beginning. The Russian Soviet Government has expended hundreds of millions of dollars within the last few years in the purchase of the most up-to-date agricultural machinery. It has granted [illegible] Henry Ford to establish a great plant for the manufacture of tractors in that country, it has engaged the services of the most noted railway and agricultural experts to direct operations in Russia; it has sent commissions [illegible] experts to foreign lands and more particularly to Canada and the United States to study methods of transportation and marketing [illegible] with a view to making an aggressive bid for the trade of the world [illegible] methods and costs of production with which other countries with their greater liberty of the individual and higher standards of living cannot hope to compete.

Such [illegible] nature of the menace to Canadian and [illegible] in the Russian situation. United States labor and United States industrialists are strongly battling the unfair Russian competition. [illegible] must do likewise, for while a country may be willing to face the [illegible] of other countries both at home and abroad, upon equal terms [illegible] can compete with conditions such as those now prevailing in Russia and survive. It is apparent that Russia, having failed in its [illegible] to sovietize the world, has now embarked upon an economic conquest.

Under these circumstances the approaching Imperial Economic Conference in London, England, is fraught with greater importance than any previous [illegible] Conference. Hon. C. A. Dunning announced that his budget was [illegible] of the spirit in which the King Government intended [illegible] that Conference, but the King Government has been defeated [illegible] now rests with Premier Bennett in collaboration with Premier [illegible] MacDonald and the other Dominion Premiers, to work out [illegible] policy for the Empire which will enable all its [illegible] the Russian menace and at the same time [illegible] trade to its fullest possible extent. Every [illegible] Mr. Bennett well in his important task.

Deceiving the Customer

These Berry Boxes Were Worse Than the Standard False Bottoms

In the museum of the Dominion Fruit Branch at Ottawa is a [illegible] of [illegible] a full tray of twelve blueberry boxes, each box [illegible] filled with [illegible] vengeance.

[illegible] Tower [illegible] Chrysler Building [illegible] New York.

[illegible]

Crosses Canada On Bicycle

Young French-Canadian Wins Wager Of $1,000 On Reaching Vancouver

Noel Marcil, young French-Canadian from Halifax, wheeled his battered bicycle into Vancouver on August 5th, and won a wager of $1,000.

Marcil left the Atlantic coast April 15 with $15 in his pocket and a supply of food on the crossbars of his bicycle. He was to reach the Pacific before midnight August 15.

Notwithstanding the fact that he wheeled his machine into a ditch near [illegible] and spent two weeks in a deserted shack with an injured back and leg, the wiry little Canuck reached his goal one week ahead of time.

Have Minard's Liniment on your shelf.

Production Of Cordage

According to a report by the Dominion Bureau of Statistics, the total value of production in the cordage, rope and twine industry in 1929 was $11,799,165. This compares with $10,839,961 in 1928, the increases in value being $959,204 or 8.84 per cent.

An honest man is one who says, "I don't know," instead of saying "Look it up yourself, son, and you'll remember it better."

A good home is worth all you put into it in time, money and effort.

ZAM-BUK Clears The Skin Of ECZEMA & RASH

Agricultural Wealth Of Canada

Gross Agricultural Wealth Of Dominion Nearly Eight Billion Dollars

The gross agricultural wealth of Canada for 1929 is estimated at approximately $7,979,633,000 in a summary published recently by the National Revenue Department.

Last year the total revenue from agriculture was $1,667,213,000, of which Ontario accounted for $509,434,000; Quebec, $329,422,000; Saskatchewan, $309,306,000; Alberta, $228,549,000; Manitoba, $134,095,000; British Columbia, $55,233,000; Nova Scotia, $43,558,000; New Brunswick, $39,854,000; and Prince Edward Island, $26,723,000.

The two principal items which go to make up the total of agricultural revenue are field crops, valued at $979,750,000, and dairy products with an estimated value of $290,000,000. Farm animals are third with a value of $210,437,000, and poultry and eggs fourth with a value of $100,346,000.

Was Run Down Now Well Again

Takes Pleasure In Recommending Dr Williams' Pink Pills

To the woman in the home illness is almost a calamity. Many a woman keeps on with her household duties when she is feeling ready to drop. Her head aches, she is easily tired, is depressed and nervous and has no appetite. In a word she is anaemic and badly needs help, the health-help that only Dr. Williams' Pink Pills can give her. These pills make rich, red blood which brings new strength and energy to weak, despondent sufferers. Concerning them, Mrs. Paul Rail, Coin du Banc, Que., says: "I was badly run-down, slept poorly, and awoke as tired as when I went to bed. My appetite was poor and I felt miserable. I took six boxes of Dr. Williams' Pink Pills and they completely renewed my health."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Remarkable Invention

Teletypesetter Designed To Speed Up Newspaper Production

Successful use of the teletypesetter, one of the newest inventions designed to facilitate newspaper making, was announced by West Chester County Publishers, Inc., White Plains, N.Y., headed by J. Noel Macy.

Seven newspapers in the country are using the instrument, by which news stories are sent out on telegraphic impulses and almost simultaneously translated into type, ready for publication.

Readers of the Yonkers Statesman, Mount Vernon Daily Argus, New Rochelle Standard-Star, Port Chester Daily Item, Tarrytown Daily News, Ossining Citizen-Sentinel and White Plains Daily Press thus are enabled to peruse more late news "breaks" than heretofore has been possible. Speed, ever an essential in journalism, is vastly increased.

The instrument was invented by Walter W. Morey and developed by the collaboration of Edward E. Kleinschmidt, Frank E. Gannett and others.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

British General Election

Mrs. David Lloyd George, speaking at a garden party in Wales, prophesied that there would be a general election in the coming autumn. Her hearers were much intrigued by the statement, in view of the key position occupied by the speaker's husband, Liberal opponent in Parliament of the Labor Government.

A letter carrier invented the first screw-propeller for steamships; an undertaker invented the slot-machine telephone; and a barber first thought of fire-escape.

Air Pilot: "By Jove, I forgot to give you a parachute."

Ginsberg: "S all right. It ain't goin' to rain."

The Handy Bottle

Minard's is the sure relief in the Handy Bottle. For strains, burns, bruises, boils and blisters.

MINARD'S "KING OF PAIN" LINIMENT

SHAMROCK V.

Sir Thomas Lipton's yacht "Shamrock V." reported from Horta, Azores Islands, missing five days by steam yacht "Erin," which was escorting it to Newport, U.S.A., for America's Cup race, and lost sight of in rain squall, but now safe.

Abolish Tariff Advisory Board

New Body To Be Constituted Under Authority Of Act Of Parliament

The Tariff Advisory Board has been abolished and will be replaced by a new body to be constituted under authority of an act of parliament. Announcement to this effect was made by Premier R. B. Bennett.

The board now existent was constituted by an order-in-council, and not through statutory legislation, in April, 1926. This order-in-council has been cancelled by the new government, and the body to be created will function under authority granted to it by both the House of Commons and the Senate. Legislation for the establishment of the new board will be drafted shortly, and will likely be introduced at the next session of parliament.

The abolished board began its work early in May, of 1926, with Senator Geo. P. Graham as chairman, and Alfred Lambert, Montreal, with D. G. McKenzie, now a member of the Manitoba government, as associate members. Following the resignation of Senator Graham, W. H. Moore became chairman of the board, and Mr. Lambert and Mr. McKenzie, who resigned, were replaced by Hector Racine, Montreal, and Frank Jacobs, De Winton, Alberta. Mr. Moore resigned on the eve of the general election to contest the constituency of Ontario, in which he was elected as Liberal Candidate. The chairman of the board was in receipt of a salary of $10,000 per annum, and his colleagues $4,000 yearly.

Relief From Asthma. Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened choking air tubes! It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

Empire Preference

London County Council Gives Preference To Empire Products

There is special interest for Canadian farmers in a communication received by the Dominion Department of Agriculture from a London, England, buyer of foodstuffs. "The London County Council has laid down for some time past now that preference shall be given to Empire foods. In furtherance of this policy it has given permission to those responsible for buying foods to pay up to 10 per cent more for an Empire article than for a similar quality foreign product," he states. The London County Council provides food supplies to over 80 large hospitals and 70 institutions of various kinds.

For all Skin Abrasions—Minard's [illegible]

B.C. Industrial Conditions

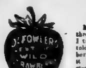
The industrial payroll of British Columbia, for 1929, is estimated at $192,092,249, a new high record, in the annual report of the provincial department of labor, the most accurate thermometer of industrial conditions in the province, as issued recently. The total is an increase of $8,904,462 over the 1928 figure.

A thousand American chefs have chosen petit marmite, poitrine de volaille, pommes-de-terre olivette, bombe surprise, and Mocha filtre for their annual banquet.

In other words, soup, fried chicken and hashed potatoes, icecream and coffee!

Seedy (reading) — Say, Hank, what's er haberdasher?

Hank—What, don't yer know wot er haberdasher is? Didn't yer ever have no learnin'? A haberdasher is er man wid' a habit of dashin' about.



Her Three Children Troubled With Diarrhoea

Mrs. Leo Lapointe, Laurier, Man., writes:—"My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Live Stock Sales

New System Of Reporting Sales and Prices Has Been Applied

A new system of reporting live stock sales and prices has been put into effect in the Stock Yard and Market Reporting Services of the Dominion Live Stock Branch. The purpose of the new system is to afford a more adequate indication of sales and prices in relation to beef cattle coming on the market. The principal change brings to the top of the list the section of beef cattle in greatest demand, providing a clear indication of the volume and price range of the popular light cattle, and providing the producer [illegible] adequate indication of grade and price than was possible under the old system.

Earthquake Area Extended

Heavy Loss Of Life Reported On Shores Of Caspian Sea

A terrific earthquake killed 500 persons and injured 4,000 others on the northeast shores of the Caspian Sea, a Riga dispatch to the London Morning Post states.

The towns of Tchapaevo and Vritzky were reported destroyed.

The bodies of 30 children were recovered from the ruins. A children's home at Tchapaevo was destroyed by the shocks, the Morning Post report said.

The dispatch said 200 houses at Tchapaevo were razed, and the church destroyed by the quake.

The Ural River was reported to have flooded the town.

Keep Douglas' Egyptian Liniment [illegible] always in the stable, ready for immediate use. Removes proud flesh and inflammation. Thrush or Hoof Rot, and infection of cow's teat.

Says Theatres Are Doomed

George Bernard Shaw Sees Talking Pictures Usurping Legitimate Stage

The doom of the theatre has been sealed, George Bernard Shaw said recently upon signing his first talking picture film contract calling for the filming of his play, How He Lied To Her Husband.

"I am afraid the poor old theatre is done for," Shaw said. "The theatre may survive as a place where people are taught to act; but, apart from that there will be nothing but the talkies.

"All my plays will be made into talkies before long. I signed the contract today because I wanted some money."

Shaw said "Arms and the Man" probably would be filmed next. It is one of his more famous comedies.

Halibut Being Depleted

Warning Is Issued Regarding Situation In the North Pacific

Warning that the great halibut resources in the north Pacific were rapidly being depleted, was conveyed to Canada and the United States in a special bulletin issued by the international halibut commission and released at Victoria by Chairman John P. Babcock.

The report states that immediate cessation does not seem imminent but that it is no longer possible to believe that the yield is permanent because it has been maintained until the present time.

A Year's Work

A year's work in the division of chemistry of the Department of Agriculture, at Ottawa, included the examination of 4,383 samples of soils, manures and fertilizers, forage plants, fodders and feeding stuffs, waters, samples of meat and canned foods, and miscellaneous subjects, including dairy products and insecticides.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

Dairy Trade With Orient

Following recent experimental shipments of certified milk from Vancouver to Shanghai and other Oriental points, a regular service has been established, shipments being carried in refrigerator space and being eagerly sought by European citizens across the Pacific.

HOW ONE WOMAN LOST 47 POUNDS OF FAT

"I have been taking Kruschen Salts for nearly 3 months. I have continued taking one teaspoonful in warm water every morning. I then weighed 217 pounds, was always bothered with pains in my back and lower part of abdomen and sides.

"Now I am glad to say I am a well woman, feel much stronger, years younger and my weight is 170 pounds. I do not only feel better but I look better, so all my friends say.

"I shall never be without Kruschen Salts, will never cease taking my daily dose and more than glad to highly recommend it for the great good that is in it."—Mrs. S. A. Solomon.

"P.S.—You may think I am exaggerating by writing such a long letter but truly I feel so indebted to you for putting out such wonderful salts that I cannot say enough."

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

A Challenge To Canada To Put British Empire In Forefront Of Airship Transportation

A challenge to Canada to take the next step in putting the British Empire in the forefront of airship transportation through the inauguration of a trans-Atlantic service between Great Britain and Canada before the service between Germany and the United States, being planned by Dr. Hugo Eckener, gets under way, was voiced recently by Sir Dennistoun Burney, designer of the dirigible R-100. Sir Dennistoun spoke before the Canadian Club, of Ottawa.

The sponsor of the first Great Britain-to-Canada airship flight asked for the formation of a committee of prominent Canadian business men to investigate the situation and decide whether the Canadian Government and business interests were prepared to back a trans-Atlantic airship service. With the views of such a committee before him, he would be able to lay a concrete proposition before the British Government on his return to London, England.

He was prepared, he said, to undertake at once the construction of an airship with a cruising speed of 85 miles per hour, carrying fuel for a 6,000-mile flight together with 100 passengers and 10 tons of mail. With a fleet of such vessels a regular service between Canada and Great Britain could be maintained, taking 2½ days for the westward crossing and two days for the eastward. He named $1,000 as the initial passenger fare but predicted a gradual reduction until it would compare favorably with steamship fares.

It was time to take a bold forward step, Sir Dennistoun asserted. If the British Empire was to be knit together culturally, economically and politically, a rapid means of communication had to be provided. A service to Canada offered better immediate prospects of success than the proposed eastward service to India and Australia.

Before the proposal could be put in effect, he said, there were financial and political handicaps to be overcome. Referring to the presence of Mr. Bennett and Mr. King, he said with the co-operation of both parties the political difficulties would disappear. On the political side, he mentioned the necessity of long-term mail contracts and building loans at reasonable interest rates. On the financial side, all that was required was money, and if the business men of Canada got behind the scheme there would be no difficulty. There were no technical difficulties.

Dr. Hugo Eckener, designer of the Graf Zeppelin, Sir Dennistoun said, was organizing a German-American company to operate a service between Germany and the United States. If Canada would co-operate the Canadian service would be in operation before the German.

"We could promise regularity of service by establishing an emergency base some hundreds of miles south of Montreal," said Sir Dennistoun. "Would it not be a great thing for Canada, if, during the winter months, mails and passengers could leave Toronto or Montreal and arrive in London, England, in 48 hours? Now that the R-100 has flown to Canada, you can see it for yourselves. The commercial interests of Canada and the Canadian government have some solid basis on which to form their judgment."

"I want a revolver—for my husband."

"Did your husband say what make of revolver?"

"No, but I don't think that matters. He doesn't even know I'm going to shoot him."

Hurricanes in the West Indies sometimes bring to some of the small islands birds never before found there.

Frozen-egg plants in Shanghai, China, are operating at capacity.

"I could have had a fine job; £36 a month with a fortnight's holiday with pay."

"And what came of it?"

"Nothing. I wanted the holidays before beginning."—Pages Gaies, Yverdon.

For Airship Travellers

Shower Baths Will Be One Of the Comforts To Be Installed

Shower baths are seen as one of many comforts for airship travellers of the future by Sir Dennistoun Burney, who addressed the Advertising Club of Montreal recently.

On her flight to Canada, the R-100 gathered 4.4 tons additional water from rain and cloud moisture. This involved a saving of $12,820.50 worth of hydrogen gas, since ordinarily the captain is forced to release hydrogen to compensate for the loss in weight of gasoline fuel as it is consumed.

Helium, a non-inflammable lifting gas, is preferable to hydrogen for use in airships, according to airship experts. Canadian [illegible] say that geological formations in the neighborhood of Hudson's Bay and Labrador indicate strong possibilities of producing helium, which is extremely favorable to any airship service between Europe and Canada.

Shaw's Early Literary Effort

Nearly One-Seventh Of Canada Lies Being Published For First Time

George Bernard Shaw, who began his literary career as a novelist a half century ago before turning to playwriting, is to appear again in the role of a fictionist. The dramatist's first novel, written 41 years ago, but laid aside when a publisher could not be found for it, is to appear in September, it was disclosed by William H. Wise, New York publisher.

This early work will be included in a collected set of Shaw's writings, the first five volumes of which will appear simultaneously in London and New York. The author was 23 years old when he penned "Immaturity," which was refused, Mr. Wise said, by some 60 British and United States publishers.

Winnipeg Newspaper Union Fashion

(By Annabelle Worthington).

2549

This little capelet frock may be for playtime or for "dress-up" occasions, according to the fabric chosen for its development.

It's very French! It closes at [illegible] 'neath the perky bows.

The scallops provide effective trim. It is butter-cup yellow organdie. The scallops are accented by bias organdie in soft cocoa brown shade. The bows of taffeta ribbon match the binding.

It's very quaint and pretty in tiny checked gingham in orchid and white with scallops bound in plain orchid. The bows are omitted and replaced with two decorative ball-shaped pearl buttons at either shoulder.

Style No. 2549 is designed for wee maids of 2, 4 and 6 years.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Experiment With Reindeer

To Supply Natural Source Of Food For Eskimos Of Northern Canada

The re-stocking of the Canadian Arctic to supply a natural source of food for the Eskimos, is engaging the attention of the North West Territories and Yukon Branch of the Department of the Interior.

A. E. Porsild, who investigated the possibilities of the Western Arctic as a home for reindeer, has left for the west coast of Hudson's Bay, on a similar mission.

Mr. Porsild and his brother, R. T. Porsild, were commissioned by the Government, some years ago, to carry out an investigation in the western Arctic, to ascertain whether the country produced enough moss, lichen and other reindeer fodder, to support these animals in any number. The brothers reported favorably, and the Government bought 3,000 head from Lomen Brothers, of Alaska. These reindeer are now on the long trek round the northern corner of the continent, bound for Kittigazuit, at the mouth of the MacKenzie River.

The Canadian Government saved the buffalo [illegible] extinction from North America by similar [illegible] years ago, and now has so many buffalo that they are being distributed all over the North West. It is hoped that the [illegible] success will attend the reindeer experiment, and that the natural increase of the Kittigazuit herd will enable the stocking of the territory west of Hudson Bay. The latter problem depends on the herbage of the area north of the so-called barren lands.

Eskimos Play Golf

Ancient Scottish Game Introduced To Natives North Of Churchill

Eskimos play golf—not a variation of the game like "African golf," but the real thing as practiced in Scotland.

Rev. Donald Marsh, graduate of Emmanuel Theological College, Saskatoon, who has already spent three years as a missionary to the Eskimos, has gone north again after a holiday.

Rev. Mr. Marsh introduced the game at Eskimo Point, 200 miles north of Churchill, last year. This time he took a stock of golf clubs, balls and tees with him.

Goes To Japan

Miss Beatrice Shand, Of Montreal, To Be In Charge Of Tokio School

Miss Beatrice Shand, of Montreal and Toronto, has been chosen principal of the international school for children of foreign residents at Tokio, Japan. Miss Shand will take up her duties upon the opening of the fall term, September 15.

Miss Shand is a graduate of Acadia College, Wolfville, N.S., and has taken post-graduate courses at McGill University, Montreal. She is also a graduate of Miss Hunter's school for kindergarten training of New York.

To Inspect Fisheries

Hon. D. G. McKenzie, Minister of Natural Resources, for Manitoba, is travelling north to inspect fisheries of the province. His visit will touch stations, properties and fish ladders along the shores of lakes Winnipeg, Manitoba, and Winnipegosis, and adjacent waterways.

You are no longer young if you still desire to read a book after somebody tells you it is instructive.

Judges For Community Program Competitions

Competitions Among Rural Communities In the Three Prairie Provinces

Outstanding men and women, conversant with conditions throughout the prairie provinces, have been selected by the Canadian National Railways to judge competitions among rural communities in the three prairie provinces, which are of European origin, to be held annually for a period of five years, with three substantial prizes of $1,000, $500, and $250, respectively, to be awarded each year in each of these provinces.

The judges are: Manitoba, Dr. John Mackay, Principal, Manitoba College; Brother Joseph Fink, Principal, Provencher School, St. Boniface, and Mrs. David Watt, Birtle, who has long been prominent in women's institutes. Saskatchewan: Dr. W. C. Murray, President, University of Saskatchewan; Dr. W. J. Rose, Department of Sociology, Dartmouth College, Hanover, N.H., and Mrs. Violet McNaughton, organizer and former president of the Women's Grain Growers' Organization in Saskatchewan, and editor of the women's section, Western Producer, Saskatoon. Alberta: Dr. R. C. Wallace, President, Alberta University; Dr. W. H. Fairchild, Superintendent, Experimental Farm, Lethbridge, and Mrs. R. B. Gunn, Lloydminster, prominent in the women's section of the Grain Growers.

The community which, through the co-operative action of its people, shows the best schools, the most regular attendance of pupils, the largest percentage of children going on for secondary or university training, and takes the keenest interest in matters of public health, social welfare, music, arts and handicrafts, and enthusiastically supports community organizations such as agricultural societies, co-operative marketing pools, women's institutes and home makers' clubs, libraries, etc., or which evinces the greatest interest and reveals the greatest progress in the improvement of agricultural methods, will be the winner of these substantial prizes.

Saskatchewan Fur Farms

Now 222 Registered Fur Farms In [illegible]

Rapid increase in the number of fur farms in Saskatchewan is indicated in a recent statement issued by the provincial game branch. There are now 222 registered fur farms being operated in the province, 101 of which are fox farms. Under provisions of the Game Act, such farms must operate under a government permit.

The number of farms of each species of fur-bearers follow: Fox, 101; badger, 64; mink, 50; muskrat, 41; raccoon, 13; coyote, 13; rabbit, 8; fisher, 3; beaver, 3; skunk, 3; martin, 3; weasel, 3; bear, 2. In addition, four fur farm leases are being operated, while 20 are pending.

The Interpreter

"Do you believe in dhrames, Riley?"

"Oi do," was Riley's reply.

"Phwat's it a sign of if a married man dhrames he's a bachelor?"

"It's a sign that he's going to meet wid a great disappointment when he wakes up."

Carlsbad Caverns are no longer a National Monument but are a National Park.

The average income of people of the Philippines is $35 a year.

TEE OFF WITH BOW AND ARROW

The [illegible] the golf ball to the cup in a [illegible] recently on the Banff Springs Hotel Golf Course, when Yed-Wah Mones (Lone Walker), and Umbiskn Wah-Khee (Lone Eagle), lined up in a foursome against William Thomson, professional of the course, and his daughter Mrs. Peggy Dalgleish, former Alberta Lady Champion, over nine holes. The Indians used bow and arrow while the golfers played with the usual clubs and ball. On the green the Indians shot at a four-inch disc set upright on the cup. Both sides were even at the eighth, and then the Indians won on the ninth. The unique contest excited much interest and enthusiasm among the hotel guests, who formed a large gallery following the play.

Canada's Claim To Arctic Area Between Mainland and Pole, Will Be Jealously Guarded

Canada will watch with a "jealous eye" anything resembling a design on the part of a foreign power to establish itself within the zone lying between her mainland and the North Pole, P. E. Corbett, dean of the law school of McGill University, said before the Institute of Politics.

Dean Corbett, who addressed the conference on "Problems of Sovereignty in the Arctic and Antarctic," stated that Canada claims all discovered land lying between her mainland and the North Pole, and will probably assert a claim to any land that may subsequently be discovered there.

"Where occupation is not yet possible the Canadian claim is justified by principles of territorial proximity and possible strategic importance," he said. "These principles have never hardened into rules of international law, but they have been urged from time to time as moral and political, if not legal, grounds for the appropriation of unattached lands.

"At the present time, the main interest in the Arctic is in its position as the possible future highway of inter-hemisphere air traffic. The shortest way between Great Britain and the western part of Canada is across these northern latitudes, and the same is true for the northwestern United States and northern Europe. Landing and refuelling stations along the route will be a prime necessity and if such stations in our northern hinterlands are to be within control of any one power that control ought to be Canadian."

Dean Corbett stated that the question of internationalizing the polar regions may arise if expected development in aerial navigation takes place, but that the United States has hitherto displayed slight enthusiasm for such a project and without her it would be foolish to think of any such regime in polar regions.

"In the meantime," he said in conclusion, "Canada, which has what may be regarded as a legitimate expectation of graduating within the next half century into the ranks of the first-class powers, will be bound to pay careful attention to developments in the Arctic, watching with a jealous eye anything resembling a design on the part of a foreign power to establish itself within a zone which we regard as belonging by right to us."

Registered and Certified Seed

New Regulations Are To Apply At Royal Winter Fair

An important forward step to promote the commercial production and distribution of registered and certified seeds in Canada has been taken by the Royal Winter Fair, to be held in Toronto, November 19 to 27. A new [illegible] has [illegible] added to the Royal program for seed growers of wheat, oats and barley, confined to competi[illegible] growing crops have been inspected in the field under the provision of the Dominion Seeds Act and who have not less than 50 bushels of registered and certified [illegible] grain for sale in a [illegible] way. The actual exhibit will consist of one-half bushel sample and may be taken from the current crop or that of the previous harvest.

By the new conditions the prize winning half bushels must come [illegible] a 50 bushel bulk of the same quality and must be entered in the unbroken package sealed by an accredited inspector at the time he inspects and seals the bags or other containers of the main commercial crop. Briefly this means it will be possible for farmers to buy seed grains by sample with official assurance that the bulk will equal sample. Prize winning in the past did not give this guarantee, because entrants could hand pick the best half bushel from a large quantity of mixed grain. Over 60 prizes are offered. The spring wheat classes include the Marquis group, Garnet, Reward, Huron and Mindum. Those varieties of winter wheat, oats and barley approved for registration are eligible. Barley may be six-rowed or two-rowed. The 1930 dates for the Royal Winter Fair are November 19 to 27.

Raspberries Yield Well

Grows In Wild State From Coast To Coast In Canada

Horticultural experts of the Dominion Department of Agriculture are authority for the statement that the raspberry is easily the most important bush fruit grown in Canada, and among the small fruits it ranks second to the strawberry. The annual production amounts to some 2,600,000 quarts, having a selling value of roughly $500,000. This does not take into consideration the production from city lots and back gardens which is very considerable in volume. At a production rate of 1,500 quarts per acre it would take at least 1,200 acres to produce this crop, and including new plantations the area planted to raspberries is close on to 2,500 acres. British Columbia is the leading raspberry producer, with Ontario a close second. The raspberry is not a commercial crop in Nova Scotia or the Prairie Provinces, but it is cultivated to a profitable extent in every Province of the Dominion, and grows wild from coast to coast and as far north as the delta of the Mackenzie River.

How We Spend Our Time

Estimated That a Man Of Seventy Has Spent Two Years Of His Life Shaving Himself

A Frenchman with a liking for curious figures has been counting up the time that a man ordinarily devotes to common occupations of life. He finds that a man of seventy has usually spent about nineteen years working, twenty-three years in bed, nine years amusing himself or being amused, one year in church, and two years shaving himself. This last portion of time he seems to consider as one of the great wastes of life. But, trying to imagine what we would look like if we all had beards, we are not inclined to agree with him. Even if we did all save some time from shaving there isn't any real guarantee that we would put that time to any better uses.—New Outlook.

Nothing To Fuss About

During the hearing of a case a man began clattering about in the back of the court room, pushing over chairs and generally upsetting things.

"Young man," said the judge, who had a reputation for ironic wit, "you are making a great deal of noise."

"I have lost my overcoat, your worship," said the agitated young man.

"Well, well," retorted the judge, "people often lose whole suits here without half as much disturbance."

Czecho-Slovakia is developing its air express service.

Roanoke, Va., has the largest rayon plant in the world.

Value Of the American Hen

Poultry Industry Supplies About 10 Per Cent. Of the Total Income

The cow, the sow and the hen are greater farm-income producers, according to United States official rating, than wheat, about which we hear so much nowadays. The poultry industry, that "mere sideline" which so many farmers neglect, supplied about 10 per cent. of the total income of American farms during 1928. The egg sales were estimated at $717,000,000 and the sales of chickens brought in $458,000,000, a total for the poultry industry of $1,175,000,000 as compared with a total farm income for the nation of $11,827,000,000. These figures do not include the value of chickens and eggs consumed on the farms—an item which doubtless would itself run into seven figures.

Of Special Interest

The research work of the Health of Animals Branch of the Dominion Department of Agriculture is attracting international attention, particularly in relation to the control and eradication of Tuberculosis, and the control of Bang's Disease. When the members of the British Medical Association visit Canada this summer their itinerary includes a day to be spent in the new laboratories of the Animal Diseases Research Institute at Hull, P.Q.

Belgium is considering a tax-reduction program.

Oxford University, in England, has a wrestling crane.

John A. Embry, formerly assistant commercial attache at Vienna, Austria, has taken up his duties as United States trade commissioner for the prairie provinces, at Winnipeg. He succeeds Charles E. Brookhardt, transferred to Washington.

E. W. Sheets, of Washington, chief of animal husbandry, United States Department of Agriculture, said recently that the drought has resulted in so much livestock being thrown on the market for slaughter that the American dollar buys more meat now than at any time during the past 12 years.

Make Good Soap

Soviets Make Toilet Soap From Rats, Mice and Other Things

Who would have thought before the days of the Soviet that dead rats, mice and marmots would provide Moscow with a popular toilet soap called "My Grandmother's Bouquet"? That is what the corpses of those creatures are now destined for.

Soap must be made, says the Soviet, from cats and dogs, too. One cat, boiled down, gives five ounces of fat, one dog more than a pound.

The dead pets and slain pests of the community in general will yield, it is estimated, 5,000 tons of fat for soap.

Saskatchewan's Exhibit

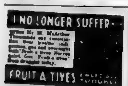
Saskatchewan's contribution to the Canadian live bird exhibit at the World's Poultry Congress, in London England, is made up of 23 fowl and five turkeys according to F. Hedley Auld, Deputy Minister of Agriculture. The exhibit was assembled at the University of Saskatchewan.

Canada Telephones

Latest statistics issued by the Bell Telephone Company show Canada has the fourth largest number of telephones among the countries of the world. There are 1,334,534 telephones in use throughout the Dominion, or 13.7 for each 100 of population.

One hundred and sixty-one peaks in the Canadian Rocky Mountains rise above 10,000 feet.

It is better to meet a bill than the collector later.



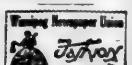
Mining Men Gather At the Pas

Annual Western Meeting To Be Held In Northern City

Mining men from east and west will renew old acquaintances on September 2nd, when members of the Canadian Institute of Mining and Metallurgy will gather at The Pas, on the occasion of the annual western meeting which is being held this summer in the first city of the North.

Headquarters for the visiting men will be a Canadian National Railways train which will provide sleeping accommodation together with dining facilities while the conference lasts. Side trips to Sherridon and Flin Flon will be made, and the Sherritt-Gordon and the Hudson Bay Mining and Smelting Company mine inspected.

Among those who have intimated their intentions of attending the meeting are L. L. Boulton, M.A., B.Sc., Assistant Deputy Minister of Mines for Canada; C. H. Attwood, Deputy Minister of Mines and Natural Resources for Manitoba; John McLeish, B.A., F.S.S., director, Mines Branch; A. W. G. Wilson, chief Division of Mineral Resources, Mines Branch; A. Buisson, engineer, Mines Branch; Prof. T. L. Walker, University of Toronto; R. C. Rowe, editor, Canadian Mining Journal; J. McEachern, superintendent Bank of Montreal, Winnipeg; J. D. Flock, New York; F. V. Siebert, superintendent, Manitoba and Saskatchewan, Department of Natural Resources, Canadian National Railways; J. S. Morrey, Winnipeg; T. W. Edgar, Winnipeg; C. G. Young, F.R.G.S., Canadian National Railways, Toronto; J. W. Holmes, Montreal, and F. H. Ed[illegible]



(By Annebelle Worthington).

Here's a charming wearable frock of tub silk in green and white.

It will give young daughter a big thrill to make it, for it isn't half as intricate as it appears.

It is a straight one-piece affair lengthened with a circular flounce. The white organdie frill at neckline and sleeves may be bought all pleated by the yard.

The belt is adjustable and may be worn as best suits the wearer. If daughter is very slim, the higher waistline is extremely smart.

Style No. 2548 may be had in sizes 12, 14, 16, 18 and 20 years.

Shantung, linen and printed dimity are other lovely ideas.

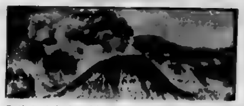
VESUVIUS ON RAMPAGE



Residents at the foot of Mt. Vesuvius are alarmed as the volcano's activity increases after renewing its eruptions.

The eruptions are scarcely more than are customary during the spring activity at the most severe periods but the memory of the recent earthquake added to the dread of the natives.

The volcano presented a spectacular picture at night, as occasional tongues of flame rose to the sky.

Hope For the Blind

Work Of Royal Commission May Prove Of Great Help To Sightless

The blind people of Manitoba and Saskatchewan are looking with much eagerness to the recommendations of the royal commission now investigating their situation, said D. Baxter Lawley, worker among the blind and without vision himself, who testified before the commission on assistance given to blind people in the British Isles.

Mr. Lawley, who comes from near Manchester, is a notable example of a man who has mastered the disadvantages and sorrow that followed the losing of his vision, and now is an enthusiastic and capable [illegible] in the interest of those who are handicapped by blindness in the fight for existence.

In December, 1913, he was blinded in a dynamite explosion in a gold mine at Hedley, B.C. Sensitive of his weakness, overcome, almost despairing of the future, Mr. Lawley [illegible] Winnipeg during June, 1914, on his way to the Old Country. He tells how, unable to find his way around, afraid to grope in [illegible] which he had suddenly been plunged, he travelled for six days and seven nights on a diet of sardines and crackers.

Seeking the aid of specialists on his arrival in England, he studied Braille in hospital, and learned to read classic Greek in Braille. In 1915 he gained a realization of the plight of blind people, and he threw himself vigorously into an effort to improve their sad lot. He became associated with the late Sir Arthur Pearson, Bart., and was successful as a financial organizer and lecturer.

Later he became an official and later president for two years of the National League of the Blind, in Great Britain and Ireland, and was one of the leaders of the famous march to London, in April, 1920, of 250 blind men from Manchester, Leeds and Newport. They interviewed the leaders of the then coalition cabinet, and were successful eventually in securing substantial relief for blind people.

In 1922 he met Philip Layton, Montreal, a noted blind philanthropist, founder of the Canadian National Institute for the Blind and of the Montreal school for the blind, with whom he carried on a correspondence for a number of years which eventually led to an invitation from Mr. Layton to come to Canada to engage in relief effort for the blind people of the Dominion. His home is now in Toronto. He is in Winnipeg assisting A. B. Howe, a local colleague, in connection with the investigations of the joint commission that is investigating the status of the blind in Manitoba and Saskatchewan.

Discussing the work of the commission, Mr. Lawley said he had been much impressed with its progress thus far, and was convinced that it could not have been undertaken at a better time. Its findings would have an effect on every province in Canada, and eventually would influence the Federal Government. He predicted an improvement in the lot of the blind as a result.—Free Press.

Isolates Goitre Germ

American Physician Makes Important Announcement To Paris Gathering

The theory that goitre is a germ disease and not caused by deficiency of iodine, as claimed by physicians during the past 50 years, was advanced by Dr. E. O. Houba, of Tacoma, Wash., in a speech before the first International Microbiology Congress at Paris.

Dr. Houba said he had succeeded in isolating the goitre germ during experiments conducted over a period of five years, and that he had proved that it was possible to cure cases with vaccine if caught in their early stages.

Fifty microbiologists representing 30 countries were present at the session of the congress; at which Prof. Jules Bordet, director of the Pasteur Institute, of Belgium, presided.

Recipes For This Week

(By Betty Barclay)

DUCK AND ORANGE SALAD

(Serves 6-8)

- 2 cups cold duck cut in small pieces.
- 4 oranges.
- ⅓ cup salad oil.
- 1 tablespoon lemon juice.
- ½ teaspoon salt.
- ⅛ teaspoon pepper.
- ⅛ teaspoon paprika.
- Lettuce.

Cut the duck into small dice. Peel the oranges and slice very thin. Mix oil, lemon juice and seasonings until well blended. Pour this dressing over the duck and oranges and allow to stand for a few minutes. Serve on lettuce with additional dressing of any desired kind, if necessary.

LORGNETTE PUDDING SAUCE

- 2 eggs.
- 2½ tablespoons sugar.
- Juice ½ lemon.
- 1 tablespoon [illegible]
- Grated rind ½ lemon.

Beat yolks of eggs until thick and lemon-colored, beat in one and one-half tablespoons sugar, add lemon juice and rind and boiling water, and cook in double boiler, stirring constantly, until thick and creamy. Beat whites of eggs until light, then beat in gradually the remaining sugar. Combine mixtures; cook one minute, stir occasionally until cool; use on cottage pudding, or serve as a dessert in small glasses, lined with lady fingers or thin slices of sponge cake.

Thomas W. May, veteran civil engineer, who, as a young student at Edinburgh University, was a classmate of Robert Louis Stevenson, died recently at Charlottetown, P.E.I., at the age of 86 years. He had been employed for nearly 60 years with the Island Railway and the provincial government. A native of the Channel Islands, Mr. May came to Prince Edward Island as a young man and was one of the first surveyors of the Prince Edward Island Railway.

Johnny, what are you doing in the pantry?

Johnny—Oh, just putting a few things away.

SUNDAY SCHOOL LESSON

AUGUST 24

JONATHAN AND DAVID—A NOBLE FRIENDSHIP

Golden Text: "He that maketh many friends, doeth it to his own destruction; But there is a Friend that sticketh closer than a brother."—Proverbs 18.24.

Lesson: 1 Samuel 18.1-4; 19.1-7; Chapter 20; 2 Samuel 1.17-27.

Devotional Reading: I Corinthians 13.4-13.

Explanations and Comments

The First Meeting Of the Two Friends, 1 Samuel 18.1-4. — David's victory over Goliath not only brought about the defeat of the Philistines, but gained for him a position at court and the devoted friendship of Jonathan, Saul's son. Abner, the captain of the army, brought the victorious champion into the king's presence and Saul would not let him return to his father's house. Jonathan was present at David's coming, and at once a beautiful friendship [illegible] up between the two. They [illegible] a covenant, exchanging presents. Nothing was too good for his new-found friend, Jonathan thought, for he loved David as his own soul. [illegible] ping off his own robe he gave [illegible] and all his apparel, even to [illegible] sword, bow and girdle, to David. It was to David's interest to [illegible] Jonathan, but far from Jonathan's interest to love David. Yet Jonathan, as George Matheson says, was an absolute spendthrift for the sake of love. "From beginning to end, the love of Jonathan for David was a disrobing, a divestiture. In every act of friendship, in every deed of devotion, in every outstretching of a protective hand, he was stripping himself of a royal garment."

"The prime gain of friendship is just the knowledge of a noble soul. That was what Jonathan felt David was. Jonathan's heart on the day when he stood revealed in all the riches of his regal nature, [illegible] day when Goliath was slain. David [illegible] proved to be the grandest [illegible] Israel, fullest of patriotism and beauty, courage and skill, and all his qualities were adorned and set off by his humility. As you read the subsequent history of that friendship you are very apt to think that David was the gainer, for Jonathan was a perfect miracle of tenderness, and was never weary of sacrificing himself for the interests of his friend; yet I conceive that that would be false judgment. I am certain of this, [illegible] Jonathan would not have agreed to it. David was by far the more splendid nature, and I believe that is what determines which is the gainer in a friendship. It is the man who has most in himself to give who gives most, not the man who has most of what is external to give." James Stalker.

Will Muddle Through

Great Britain Will Overcome Present Era Of Depression

It is not the first time Great Britain has been forced to overcome a depression and, as in the past, the mother country will overcome the present era of industrial and labor depression, said Walter Citrine, general secretary of the British Trades Union Congress, who was tendered a civic reception and dinner in Toronto.

Great Britain has retained a full share of world trade throughout the period of depression, he stated, and because of labor resiliency, has actually fared better than many other nations.

Celtic graves 2,000 years old have been found at Pecs, Hungary.

Mammoth Seaplane

Consolidated Aircraft Corporation Has Plans For 'Plane To Carry 100 Persons

Construction of a seaplane, large enough to carry 100 persons across the Atlantic ocean, will be started at Buffalo shortly, it was announced by Major R. H. Fleet, president of the Consolidated Aircraft Corporation.

The 'plane, powered by 10 [illegible] Conqueror motors, will be equipped with sufficient storage tanks to carry twice as much fuel as would be needed for the ocean flight.

Passengers will be able to enjoy a 200-foot stroll along a [illegible] on the ship, Major Fleet said, and there will be 63 staterooms with specially constructed walls to keep out the roar of the motors.

Fine Organ In Nova Scotia Hotel

Magnificent Instrument Is Installed In New C.N.R. Hotel At Halifax

One of the most magnificent organs in Canada is a feature of the new Canadian National Railways' hotel at Halifax, the Nova Scotian. It was built by Casavant Freres, St. Hyacinthe, Quebec, and is playable from a separate cabinet made by the Aeolian Company, with which Duo Art records reproduce the playing of noteworthy organists. The organ has three manuals with a range of thirty stops for the great, swell, pedal and choir. The action is electro-pneumatic.

Fine Paper Made From Rope

Paper of the most delicate kind can be made from old tarred ropes. It is used in the potteries for transferring the various patterns to the earthenware, and is so strong that a sheet twisted by hand will support a weight of one hundred pounds or more.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

THREE DELEGATES APPOINTED FOR LEAGUE MEETING

Ottawa, Canada will be represented at the next meeting of the assembly of the League of Nations by Sir [illegible] Borden, Senator Thomas Chapais and Hon. Mrs. Mary Irene Parlby, it was announced here recently. The assembly meets in Geneva early in September, and before that there will be a meeting of the council of the league. Canada's [illegible] sentative on the council will be Sir Robert Borden as leader of the Canadian delegation.

Sir Robert Borden, Canada's wartime premier, has [illegible] been a staunch advocate of the league. He was one of the original [illegible] of the League of Nations [illegible] in 1919, [illegible] which grew the league assembly and the council.

Senator Chapais, who resides in Quebec, has won distinction by his historical writings. He is the author of a number of books. He was for some time professor of history in Laval University. He was a minister without portfolio in the Taillon government, in Quebec, and leader of the government in the legislative council back in 1893. He became a senator in 1919.

Hon. Mrs. Mary Irene Parlby is minister without portfolio in the Alberta Provincial Government. She represents Lacombe in the legislature. She was provincial president of the United Farm Women of Alberta for four years. For two years she was a member of the board of governors of Alberta University. In the last two provincial general elections she has been returned as a candidate of the United Farmers of Alberta.

Canadian Butter For China

First Test Shipment Of Dairy Butter Will Go Forward On Sept. 4th

Victoria, B.C.—Close on the heels of a successful trial shipment of B.C. fresh milk to the Orient comes word of a special order for the shipment of prime dairy butter to Hong Kong, now being arranged through the Department of Agriculture.

On September 4, the first test shipment of butter within the knowledge of the department will cross the Pacific for the Far East. If the shipment is successful it will be followed by the opening of a considerable market for B.C. butter. The prospect of landing fresh dairy products from this coast has attracted wide attention in the Orient and will be developed on a most extensive scale if the results warrant it.

The butter will be shipped to Hong Kong in care of the Canadian trade commissioner at that point.

Calgary Cadets Win Trophy

High School Cadets Capture United Empire Trophy at Ottawa

Connaught Ranges, Ottawa, Ont.—Calgary [illegible] school cadets won the United Empire trophy, open to the cadet team making the highest aggregate score in the Tyro MacDougall, bankers and cadet matches at the Dominion of Canada Rifle Association meet here. The Calgarians scored a total of 972 points, as against 966 for Hamilton, Ont., Central Collegiate "A" team, and 963 by Winnipeg Highland Collegiate.

Infantile Paralysis In East

Oshawa, Ont.—Two deaths from infantile paralysis were reported by the health authorities here recently. The victims were Eddie Curtin, 10, and Albert W. Ferguson, the same age. No new cases have been reported by medical officials, and the number now remains at 12. There has been no change in the situation in East Whitby township.

Adopt Rotary Plan

Windsor, Ont.—With the object of providing at least some employment for its members, and to tide them over the present period of depression, the local bricklayers' union is attempting to introduce a "rotary" system of employment on construction work in the border cities. Thus, each man would work one week and be idle the next.

Motion Picture Operator Killed

Edmonton, Alberta.—V. A. Crawford, Westlock, Alberta, photographer and motion picture operator, was killed instantly when his car swerved off the roadway a mile from Riviere Qui Barre, and upset in the ditch. According to Alberta provincial police reports, Mrs. Crawford escaped serious injury.

Tribal Unrest Spreading

British Forces In India, However, Appear To Be Handling Situation

Peshawar, India.—The spirit of tribal unrest appears to be spreading on the northwestern frontier, with British forces tightening the defence by increasing aerial bombing operations and rushing fresh troops northward.

Most of the Afridis who have been besieging this strategic city for a week have withdrawn under constant bombing, but meager reports from the countryside indicate that they have spread in all directions and that all branches of the tribe have taken up arms.

An indeterminate number of Durranis have joined the Afridis, a party identified as Mamonds attacked Badama Post, and the Chamkannis were on the war path until the air force informed them that their own villages would be bombed unless they ceased their depredations.

Peshawar itself was quiet, and apparently most of the assailants have withdrawn under heavy bombing. One party attacked the cantonments, however, inflicting a scattering rifle fire that did no damage. They withdrew at dawn.

Meanwhile, fresh troops arrived on an armored train from Lahore. The city gates were opened for it, but ordinary trains must stop at Nowshera and the passengers continue [illegible] taxicab.

The six squadrons of army airplanes on duty in the sector are credited with a breaking up the plans for a mass attack on Peshawar. In one day these machines dropped 4,000 small bombs, and they have made daily attacks on various groups. As [illegible] instance they spotted the 1,500 Mamonds who attacked Badama Post, and wounded 20 of them.

Will Oppose Stevens

Independent Labor Candidate Announces His Intention Of Running In East Kootenay

Cranbrook, B.C.—Opposition to Hon. H. H. Stevens in the by-election in East Kootenay, where the Minister of Trade and Commerce, will seek election shortly, cropped up here. William Robson, dismissed from the Provincial Labor Bureau on Monday, announced he will oppose Mr. Stevens at the by-election as an Independent Labor candidate.

Mr. Robson has been identified with Labor interests since 1889, and was formerly of Nanaimo. He has been employed with the Labor Bureau for the past seven years. Action of district Liberals will be determined at a meeting to be called within a few days.

M. McLean, of Fernie, Conservative, won the East Kootenay seat in the recent election, and resigned to make way for Hon. H. H. Stevens, defeated in Vancouver and given a portfolio in the Bennett administration.

Massey Interviews Premier

Ottawa, Ont.—Following a three-quarter hour conference between Premier R. B. Bennett and Hon. Vincent Massey, in the prime minister's office in the East Block, Mr. Bennett stated, "I asked Mr. Massey to see me and we had a very satisfactory talk." The prime minister went no further than that, and Mr. Massey, when leaving, declined to discuss the visit.

Wins Scholarship

Lloydminster, Sask. — Delbert Clarke, of Lloydminster district, graduate from the University of Saskatchewan with high honors in history and economics, has been awarded a $500 scholarship for 1930-31, from the Canadian Pioneer Problems committee. The award was made from Queen's University, Kingston. He will study history under Prof. A. S. Morton, of the University of Saskatchewan.

Across Continent In 12 Hours

Valley Stream, N.Y.—Beating by more than two hours the transcontinental air record Col. and Mrs. Charles A. Lindbergh took from him last April, Capt. Frank M. Hawks flew from Glendale, Cal., to Curtiss Field recently, in 12 hours, 25 minutes and three seconds.

B.C. Miners Entombed

Merritt, B.C.—One man was killed and 20 are entombed as the result of an explosion in the Coalmont Colliery, Coalmont, near Princeton. Word reached here of the disaster, and plans are being considered to send men to help free the entombed miners.

'Plane Saves Life

Burlington, Vt.—Anthrax antitoxin, sped here recently from Montreal by aeroplane, and dropped by parachute, saved the life of a bush-factory employee suddenly stricken with the deadly, fast working disease.

Alberta Protests

Claim That Foreign Immigrants Are Being Dumped In Province

Edmonton, Alberta.—Capt. E. M. Johnson, superintendent of the Soldier Settlement Board here, has been asked by the Department of Labor, at Ottawa, to investigate charges that 200 German immigrants were "dumped" in Alberta last week. The inquiry has been requested as the result of a telegram of protest sent to Premier R. B. Bennett by Hon. George Hoadley, acting premier of Alberta.

Denial of the allegations has been made by the steamship company concerned, and by the editor of "Der Herald," German newspaper here, but Walter Widmer, secretary of the association of German-speaking workers, insists the charges [illegible] are well-founded.

UNEMPLOYMENT SURVEY IS MADE BY GOVERNMENT

Ottawa, Ont.—Hon. G. D. Robertson, Minister of Labor, announced recently, that the government is making a quick survey of unemployment conditions in Canada, and that the employment service council has been called to meet here on August 21 to consider information which will have been gathered by that time.

After the council has discussed the situation disclosed, recommendations will be made for consideration of the government and will form a basis for unemployment relief measures to be submitted to parliament at the special session early next [illegible]

In the last day or two, the [illegible] ter stated, the Department of [illegible] has communicated with all the [illegible] inces and with the mayors of municipalities with population of 10,000 or more, asking them to advise the department as near as possible the extent of unemployment and to estimate what the situation will be this coming winter. They have been asked to send the information in within 10 days, so that the department will be able to sift the data and have it ready for the meetings of the unemployment service council.

Wheat Exports Increase

Nearly 900,000 Bushels Exported From Vancouver In One Week

Vancouver, B.C.—Nearly 900,000 bushels of wheat were exported during the past seven days, according to the weekly report of the Vancouver [illegible] of Harbor Commissioners.

The actual total for the past week was 869,100 bushels.

The export this season to date is 1,570,285 bushels, as compared with 431,008 bushels at the corresponding date last year. The elevators had in stock at 8 a.m., a total of 6,649,527 bushels, and the railways had 1,114,300 bushels on British Columbia divisions, or in terminals here. There are ships in port for 170,136 bushels.

Injured In Car Collision

London, Ont.—Hon. Donald Sutherland, Minister of National Defence, Franklin Smoke, M.P. for Brant, and J. L. Stansell, defeated candidate in Norfolk-Elgin, were slightly injured when their automobile struck a truck and overturned in a ditch.

GLOBE CIRCLING FLIGHT ENDS IN CRASH

John Henry Mears, of New York, who took off from Roosevelt Field in globe-circling flight in an attempt to beat Graf Zeppelin time for the same trip but crashed at Harbor Grace, Newfoundland. His plane was wrecked.

Meeting Of C.M.A. Tariff Section

Understood That Organization Is Opposed To High Duties

Toronto, Ont. — Manufacturers representing every branch of industry in Canada, were represented at the meeting of the tariff section of the Canadian Manufacturers' Association held here.

Officials of the organization decline to give out anything for publication regarding the meeting, which was the regular gathering of the section and holds all its meetings in camera.

It is understood the question of advanced duties on boots and shoes, leather goods, automobiles and automobile accessories and other items [illegible]

The tone of the meeting is said to have been against high duties generally with a moderate increase on some Canadian lines being advocated as a help to Canadian trade and the reduction of unemployment.

The matters dealt with at the meeting will be submitted to the executive council meeting of the association, to be held after the regular meetings of the transportation, commercial intelligence, and industrial relations committees within a short time.

Liquor Restrictions

New Brunswick Regulations Aimed To Prevent Excessive Drinking

Fredericton, N.B. — Addition restriction calculated to reduce drunkenness under the operation of the New Brunswick Liquor Control Act, has been authorized by the provincial cabinet.

The regulation states that "after conviction of selling or keeping liquor for sale, or of drunkenness, or for being found drunk twice within 12 months, a person shall not be entitled to purchase liquor for three months after conviction.

Compulsory Military Training

Wellington, N.Z.—A bill for temporary suspension of compulsory military training has been introduced in the House of Representatives by the government. It is intended as a measure of economy.

JAP PARTY TOURS CANADA

Leading business men of Japan arriving at Vancouver recently from the Far East, aboard the Canadian Pacific liner "Empress of Canada," received an official welcome from Mayor W. H. Malkin, and representative Canadian business men during their two-day stay in the Canadian west coast port. The Japanese party is headed across Canada on a national tour of inspection, then going on to New York to visit principal cities of the United States, returning to Victoria, B.C., September 4th, by way of San Francisco and Seattle. The party includes prominent merchants, department store owners, Soichiro Sato, chief engineer of the Japan Artificial Ice Company, and Shigetaro Matsui, advisor to the Hiroshima overseas development association. While in Canada and the United States they will make close studies of the industries and commercial ventures in which they are interested.

Fire Destroys Quebec Village

Property Damage Is Estimated At $200,000

Masson, Que.—Between 800 and 900 persons are homeless, and nearly 80 houses destroyed—such is an estimate by Rev. Monsignor Routhier, parish priest of Masson, of the conflagration which swept this little town recently.

Mme. Joseph Lafamme died during the afternoon and although not injured in the fire, it is believed the shock hastened her death. Property damage was estimated at $200,000. No [illegible] killed [illegible] no one received serious injuries in the blaze.

This well-ordered community on the banks of the Lievre River 21 miles from Ottawa, was bewailing a devastation, of a character difficult to [illegible]. An area of over a quarter of a mile square which this morning housed nearly 120 families was simply a heap of smouldering embers. Red tongues of flame licking up from piles of charred debris spoke eloquently of the disaster which had befallen Masson.

Restrict Immigration

Dominion Government May Take Steps To Regulate Entries

Ottawa, Ont.—Indications are that steps will be taken by the Dominion Government to restrict immigration to Canada. While no official announcement was made at the conclusion of a meeting of the cabinet, it is understood that the matter of immigration was under discussion.

Any action taken, it is believed, would be aimed at the restriction of newcomers from European countries so as not to add to the unemployed. It is rumored that the so-called railway agreements respecting immigration will not likely be renewed, especially under present provisions. A statement on the subject of immigration may be issued shortly.

SAYS JUSTICE TO ALWAYS GOVERN ADMINISTRATION

Ottawa, Ont.—Hon. Arthur Sauve, postmaster-general, in a [illegible] declared that "justice, honesty and economy" would be his policy in administrating the post office department.

The text of the statement of the postmaster reads:

Justice, honesty, economy, such shall be my policy in the administration of the post office department. The law which governs us shall be respected with discrimination and the regulations shall be observed with the greatest discretion.

Racial, religious or political fanaticism shall never prevail with me. I shall continue to consider them as the most dangerous enemies of the country.

I shall follow to the letter the policy of an honest man and a good Canadian, directed by the head of the government; a policy of peace, concord and of sound protection which will permit the rational development and utilization of all the desirable resources of our country.

"The employees who have, without reserve, conformed to the law, understood their duty in their observance of impartiality and who have impartially shown the respect due to the political authorities or their accredited representatives have nothing to fear from me.

"I shall make a distinction between the latter and those who have constituted themselves the active agents of their party or the carriers of lies and infamous calumnies. It would be unjust and cruel, for instance, to put out on the street, without reason, a good father of a family who has been in office for a number of years and who might find it difficult to work [illegible]

"It is, I believe in the post office department that certain classes of employees are the most exposed to indulge in political partisanship.

A careful inquiry will be made in regard to everything concerning my department, in order to avoid, as far as possible, injustices and errors. I am not infallible but if I should commit an error, I shall do my best to repair it.

"The assurances given to me by the deputy minister, whom I have known for a long time, as well as by the heads of other branches, justify my belief that I shall be able to carry out, with success, the administration of my department.

"I also greatly appreciated the act of courtesy and deference of my predecessor, Hon. Mr. Veniot, who came loyally to call upon me and to give me appropriately certain important information."

IS SATISFIED WITH RESULTS OF WHEAT PARLEY

Toronto, Ont.—Expressing complete satisfaction with the result of the conference of western premiers and the final conference at Ottawa, when officers of the wheat pool, the provincial premiers and Prime Minister Bennett discussed the financing of Canada's grain, Hon. J. T. M. Anderson, premier of Saskatchewan left for Regina.

"A fine time" was his first word. "I'm perfectly satisfied with the result of our visit in the east. No, I have nothing further to say about the wheat situation. It has been pretty thoroughly done up the past two days.

But in our last conversation you will recall I spoke of some new plans. First is the establishment of a correspondence high school course whereby children of settlers and farmers in remote areas — any child more than four miles from a high school — may take the courses by mail and write off the examinations each year at the nearest examination point.

"We hope by this that many more will be able to avail themselves of higher education than is possible at present. Along the same line we are instituting this fall the course in elementary prospecting for farmers and farmers' sons so they will be able to assist in mining development in the north.

"This falls in line with our assumption, this October first, of our own natural resources. We are planning to develop our resources to the best of our ability and will leave nothing undone which we believe should be done."

Red Menace In China

Communists Advancing Against Nanking and Other Important Points

Nanking, China — Communists were reported advancing against this Nationalist government capital and the sister cities of Hankow, Hanyang and Wuchang, 600 miles up the Yangtze River from the sea.

This city was virtually defenceless and appeared doomed should the Reds continue their threatened attack. Few defenders remained within the 22 mile wall circling the capital, practically all troops having been drawn to fronts on which the government and northern rebels are fighting for supremacy in China.

Uneasiness was rife here as peasants turned Communists and appeared in surrounding towns armed with rifles.

Many suspected Communists were summarily executed at Hankow. Thousands of terrified Chinese poured into the city, frightened from their outlying homes by the [illegible]

Eskimos Bound For Cuba

Make Journey By Dog Sled and Canoe From Arctic Circle To Southern Clime

Burlington, Iowa.—Three Eskimos and their Canadian guide who left the Arctic Circle last year and hoped to reach Cuba next, resumed their journey by canoe today, after an overnight stop at Burlington.

The Eskimos, Charles Plainitshek and his two sons, led by Frank O'Grady, said they left The Pas, Manitoba, March 21, 1929, went to the Arctic Circle, returned to The Pas, and then set off for the south last winter by dog sled.

They continued by sled, they said, until the ice broke up. At Granite Falls, Minn., they launched their 18 foot canoe, and have travelled by that mode since. They expect to reach Havana early in 1931.

Makes Altitude Record

Regina, Sask.—Creating what is believed to be a record for western Canada, and breaking the Regina altitude flying record, P. B. Keffer, of the Regina Flying Club, climbed to an altitude of 18,200 feet over the city Tuesday afternoon, August 12. As Regina is about 1,900 feet above the sea level, Pilot Keffer actually reached the height of more than 20,000 feet.

Nebraska Tourists See West

Winnipeg, Man.—On their way to the Pacific Coast, 175 "corn huskers" from Nebraska, invaded Winnipeg en route to Vancouver. Travelling over the lines of the Canadian National Railways the "corn huskers," who are gathered from the rural population of their native state, are seeing for themselves the glories of Western Canada.

EMPIRE FREE TRADE—

AT THE PRESENT moment there is a strong feeling among many Britishers in the old land that the best interests of that country would be served by bringing about a policy of empire free trade, and imposing duties on products including food products imported from other countries.

The movement is headed by Lord Beaverbrook and much sponsored by his newspaper the Daily Express.

On July 30th Lord Beaverbrook addressed a large meeting at the Finsbury Town Hall at which he stated Great Britain was now crying for a lead. Some of the "high lights" of his speech were:

> **In a few months, perhaps earlier, this country will be asked to elect another parliament. Make no mistake about it; when that election comes to pass the fate, not only of ourselves but of our children and their children, will be thrown into the scales. * * * * ***
>
> **I am not a Conservative. I am an Empire Free Trader.**
>
> **If the Conservative Party rejects the policy of Empire Free Trade—if that party fails us now, not only will it be broken and divided, but it will have failed the country in its dire hour of need. * * * * ***
>
> **If the Conservative wish for unity they should persuade Mr. Baldwin to adopt the policy of Empire Free Trade with duties on foreign foodstuffs. That policy meets with the approval of their party. * * * * ***
>
> **If necessary, let us turn to finance and say to the bankers, "Give us your most brilliant men." Let us ask the farmers for their outstanding men—and believe me, British agriculture is rich in ability. Let us require from the trade unions their independent leaders of modern opinion. Let us demand of industry their men of vision and their men of experience. * * * * ***
>
> **I am told that I want office.**
>
> **I want no office. I want nothing. But I do want to see Pitt's work done again.**

The first and most bitterly fought obstacle to be overcome before the policy of Empire Free Trade is adopted will most likely be furnished by the people of Britain. Long used to Free Trade many will look with disfavor upon any policy which includes the taxing of foodstuffs. Many a fierce political battle has been fought on this issue before, and many can still remember the animated political parades in which the "little loaf" and the "big loaf" carried above the head on sticks were the illustrating features. Of course time has passed by and with its passing changing sentiments occur, but it is still safe to say that the working classes of Great Britain will take considerable wooing away from the policy of no tax on foodstuffs no matter from where they come.

Thepolicy of Empire Free Trade is of course to make a complete economic unit. British men of affairs view with alarm the inroads the United States have made into world markets, these inroads into world markets having frequently been made at the expense of Great Britain. As for example in 1913 Great Britain enjoyed 17 per cent of the entire import trade of China and the United States 6 per cent, today Great Britain's share is 9½ per cent and the United States 17 per cent. Climatically and geographically the United States is a little world unto itself, in one compact piece. The British Empire while not compact, has more territory and enjoys equally diversified geographical and climatic differences, and it too, can be described as a little world unto itself. The real difference is a political difference. The United States have one Federal government, the British Empire has several, and after the people of Great Britain have been educated to accept this policy, there is still the governments of the various dominions to convince that it is a good thing for them.

Our own government was elected partly on the theory of Canada first. Premier Bennett believes the welfare of the empire is best served by each dominion being self supporting and a virile part of the whole. We cannot imagine the present Canadian government dispensing with all tariffs against manufactured articles, even though imported from Great Britain, especially when we remember how wide a range of manufactured articles Great Britain has and how great an exporter of manufactured articles Great Britain is.

Upon reading a part of the text of Lord Beaverbrook's speech at Finsbury, one gathers the impression that the policy of Empire Free Trade is to be the solution of Great Britain's economic ills. There is no mention as to what benefits the dominions will procure through such a policy. These perhaps will be made clear with further intensified study, and may even become of major importance—the disposal of our wheat for instance—but in essence the plan is launched to help Great Britain's millions. In other words Lord Beaverbrook as a British Statesman is working zealously for Great Britain, therefore it is only reasonable to assume that dominion statesmen will work just as zealously for their respective dominions.

"Trade follows the flag" is quite true, but it is equally true "that there is no sentiment in business." The structure of international business is built upon the foundations of price and quality, supply and demand. The western Canadian wheat grower found this to be true during the past year.

SILOS FOR THE WEST

(Experimental Farms Note.)

The silo is a valuable means for storing food for winter use or to supplement the pastures in spring and fall. By properly packing it, particularly at the edges, when filling, and by removing six inches per day, a succulent nutritious food is available for all classes of stock at all seasons of the year, with very little waste.

Silage has certain laxative properties which keep the digestive organs of animals in good condition. Animals receiving some kind of succulent food have keener appetites, softer and more pliable skins, and a more thrifty, more healthy appearance than those fed exclusively on dry rations.

Each year is marked by the erection of a few more silos in the Prairie Provinces but unfortunately the number is not as large as is warranted by the success which attends their use. At the Dominion Experimental Station, Lacombe, Alberta, three general types of silos, the above-ground, the pit and the trench, have been used for a number of years with such excellent results, that we have no hesitation in recommending them to anyone keeping a number of live stock.

The above-ground wood stave silo gives satisfaction as far as it can be given in this climate of cold winters. Freezing is the great drawback.

Where it is built in the open excessive freezing can be prevented by blowing a straw stack around it at threshing time and the straw can be used for bedding in the spring and summer. A silo 16 feet in diameter by 36 feet high holds about 150 tons of feed.

In sections where the water line is far below the surface of the soil pit silos may be used. They are no easier to fill and more difficult to get the ensilage out of, since a hoist must be used, but they have the advantage of being easier to construct since the farmer's main outlay will be in the form of labour and the ensilage does [illegible].

One of the desirable features of the trench silo is its low cost. Any farmer can make one with practically no cash outlay. A few days with a team and scraper will excavate a trench the required length and depth and some old straw will do as a cover. During filling, the ensilage should be kept spread evenly and well tramped.

The usual depth of the trench silo is 8 feet. A width of 14 feet at the top and 10 feet at the bottom is the usual width. A herd of 15 cows will require a silo 50 feet long.

A trench silo should be located only after careful consideration of the drainage, soil, and feeding convenience.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

OUR BODIES

The human body is made up of millions of cells. These cells are so small that we require a microscope in order to see them, and so they are called microscopic. Each cell is complete in itself. It is composed of protoplasm and is provided with an outer wall. The cells reproduce themselves by the simple process of division.

There are different kinds of cells. One type is the muscle cell and when we have a number of muscle cells, we have a muscular tissue. Each organ of the body is made up of several tissues, and each exists for some special purpose. The heart, for example, is an organ which serves to pump the blood.

The body is frequently compared to an engine. An engine requires fuel, and so does the body. The body receives fuel in the form of food, water and air. An engine provides energy and so does the body. Body energy is seen when we use our muscles, and we are constantly using this energy to keep our hearts pumping and to provide the heat necessary to keep our bodies warm.

An engine wears out and so does the body. The rate of wear and the point at which it occurs depend largely upon the care that is given.

The body differs from an engine in some important points. The most important difference is that the body is built up of living cells and that it is not just a fine piece of mechanism, in as much as it has a mental quality which allows it to feel and to think, and to direct its activities.

Because the body is composed of living cells, it is enabled to grow, and new cells can replace worn ones up to a certain point. Unlike the engine because the body is living, it cannot be shut down for repairs, nor can new parts be installed as can be done in an engine.

There are persons who live as if they thought they could secure a new body any day for the asking. They throw all kinds of needless burdens on their bodies, they overwork and overload them without giving them time for recuperation. This leads inevitably to an early wearing out of the tissues.

Those who understand how their bodies are built and how they operate pay attention to the reasonable demands made by the body to enable it to remain in good running order and not wear out quickly. The ability of the body to stand up, for a time, under abuse is no reason for permitting it to do so, because abuse of this type brings its train of harmful effects.

LOS ANGELES, CALIFORNIA—Definite dates for the celebration of the World Olympic Games in this city in 1932, will be from Saturday, July 30th, to Sunday, August 14th, according to an official announcement from the Organizing Committee, following the return of its representatives from the recent Olympic Congress in Berlin.

The program, which will continue for 16 days and nights, will consist of 135 distinct events, including athletics, gymnastics, boxing, wrestling, fencing, rowing, swimming, equestrian sports, modern Pentathlon, road cycling, weight lifting, yachting, polo, field hockey, water polo, shooting at 50 meters, and Olympic fine arts.

At the Berlin meeting of the International Olympic Committee, the organizing Committee made its report, which showed that nearly all facilities are already available for the celebration of games of the tenth Olympiad. The greatly reduced costs for participating nations, shown in the report, resulted in enthusiastic responses from the European Committees and assurances of fully representatives teams from the Olympic countries.

In Olympic park in Los Angeles are the Olympic Stadium, the fencing pavilion, the Olympic Fine Arts Museum and an excellent exercising field. The Olympic Swim Stadium will be built here. Close by are 15 training fields for visiting teams. Near Olympic park are Olympic Auditorium for the wrestling, boxing and weight lifting events, polo fields, the equestrian field, the yachting course, rowing stadium and the cycling and marathon courses.

Representatives of the organizing Committee, who attended the Olympic Congress in Berlin, are enthusiastic over the reception of their report and plans, and predict an overwhelming success for the Games at Los Angeles.

British East Africa

Britain Plans To Create a Vast Colony For Negroes

The greatest charter for the Negro race handed down by man since the abolition of slavery, has been proposed, recently, by the Labor Government of Great Britain, in a "white paper," dealing with the future government of British East Africa, a territory one-quarter the size of the United States. The scheme is nothing less than to set aside forever for the native tribes, tremendous areas of tillable land and to make them inalienable, so that other races cannot take the soil away for their own purposes.

Thus once again, a British Government, troubled with the mighty cares of Empire, shows that the British know how to learn from the crimes, the mistakes and the failures that are written down in history. The Government is trying to write a new chapter in the story of the relations of the white man with those he found in possession of territories into which he has intruded. It has not always been so pleasant a story.

The United States set aside reservations for the Indians, but under the pressure of the ever-expanding white race, vast areas were taken back again and ultimately became states. In Africa, very dark chapters have been written. In the last century the whole world was horrified by an expose of the manner in which the blacks in the rubber regions of Belgian Congo were mishandled and even maimed by cruel task masters. In the German colonies, before the Great War it was repeatedly charged that the native rebellions so sternly suppressed, were largely caused by the cruelty of the [illegible]. In the French Congo, as lately as a couple of years ago, a French writer openly charged that the natives were forced to labor in rubber collection by reason of tyrannical fines and sentences of imprisonment inflicted without rhyme or reason.

In the vast territory collectively known as British East Africa, the authorities are anxious to write a new story. The domain is made up of Kenya and Uganda, which are British possessions, and Tanganyika, the mandate for which was assumed by Great Britain when this former German possession was wrested from Germany.

Taking that long view, the British Government desires to make of this territory something like one united crown colony, the ultimate and distant object being to make of it a great self-governing dominion. For this purpose, the Government proposes to name a High Commissioner. He will supervise Kenya, Uganda, and Tanganyika. He will have two-fold duties. He will be the chief adviser to the Secretary for the Colonies on all native questions. He will administer and legislate on such subjects as railways, posts, harbors, customs, defences, ports, telegraphs and telephones. To perform the latter duties, he will have a council consisting of three officers of his staff, and 21 other members, each of the colonies being represented by seven, but all being named by him. In doing so, he will as far as possible, name some who will represent the various races. This means that, in addition to white men on the commission, there will probably be native Africans, Indians, and Arabs.

Turning to the native question, the Government backs up a "white paper," issued in 1923, which said that Kenya was primarily an African territory, and that the interests of the African native must be paramount. If and when those interests clash with those of immigrant races, the former should prevail. The Government does not think the African natives are yet ripe for voting and other things that go with modern forms of government. But they should be encouraged in the development of their own social and political institutions. A desire should be fostered in them to take an increasing share in their tribal affairs and in the land reserved for tribal use, and, ultimately, in the governance of the territory in which they live. The Government will help them by schools and by medical attention.

In the economic sphere, the Government will encourage the natives to make the most efficient use of their own resources for purposes of production, full regard being had to the principle that the natives should in fact, be effectively free to work. It is set forth that the native's freedom to choose his form of work can be real only if land is practically, as well as theoretically, available [illegible]

Have Narrow Escape

Northern Trapper and Two Sons Battle For Life In Treacherous Rapids

Thrown into the water when their canoe upset recently in a dangerous stretch of rapids on the Burntwood River, Jimmy Clee, well-known northern trapper, and his two sons had a narrow escape from death. Word of the accident reached The Pas from the trading post of Nelson House, on the Burntwood stream.

Mr Clee was formerly a prominent curler in Western Canada. Before going into the hinterland some years ago, he was well-known in bonspiel circles in Winnipeg and other cities, and was a member of several winning rinks.

The trapper and his sons were en route from Mile 137, on the Hudson Bay Railway, to Nelson House, and were going north with supplies and equipment for the trapping season. They were travelling in a large freight canoe which was being towed by another craft powered with an outboard motor.

It was while negotiating a stretch of "white water" about a day and a half out of Nelson House that the mishap occurred. The canoe with the engine slackened speed for a few seconds in the churning water, causing Mr Clee's canoe to run loose on the tow line. The speed with which the engine picked up momentum jerked the tow rope so hard that the second canoe was whirled about and capsized.

Battling in the stream amid the knapsacks and the parcels which had been thrown from the canoe, Mr. Clee noticed his elder son swimming nearby, but could not see the younger lad. With difficulty, the father dived under the capsized craft, but could not find any trace of the boy. When he rose to the surface, however, he was delighted to see the lad perched on top of the canoe.

After some manoeuvring the [illegible]

SCIATICA?

Here is a never-failing form of relief from sciatic pain:

Take Aspirin tablets and you'll avoid needless suffering from sciatica—lumbago—and similar excruciating pains. They do relieve, they don't do any harm. Just make sure it is genuine.

ASPIRIN

New Northern Air Route

From Scotland To Winnipeg By Air Seems a Possibility

The leader of the British Arctic Air Route Expedition, H G Watkins, makes out a good case for air travel from Scotland to Winnipeg by way of Greenland. On the line lie the Faroe Islands and Iceland, and nowhere are there more than three hundred miles of water to be flown. There are, of course, the handicaps of fog and the Greenland ice cap with its menace to aviators. The Air Ministry is making a survey of flying conditions between the Faroes and Iceland. The expedition will winter in Greenland, spending their time on the highest part for meteorological research. Canada will be expected to supply details about the crossing of Davis Strait and Baffin Land, and the feasibility of a route thence to Southampton Island, Hudson Bay, down to Fort Churchill and thence to Winnipeg. Mr Watkins predicts that they will do "novel and exciting work" in Greenland. And if the famous ice cap presents no serious obstacle to aviators, the prospects [illegible]

English Boy Scouts To Visit Jasper

Will Spend Six Weeks In Roughing It Over Mountain Trails

With three "billy cans" and two [illegible], home made tents and rubber ground sheets, and only two blankets apiece, 16 members of the 9th troop of Boy Scouts, Leeds, England, passed through Winnipeg recently over the lines of the Canadian National Railways for Jasper National Park, where they will spend six weeks in "roughing it" over the trails of this famous game sanctuary. The boys, who are all pupils of the Leeds Modern Grammar School, are in charge of Dr. G. F. Norton, headmaster of the school, and arrived in Canada on the S.S. Megantic. After visiting Ottawa, they took train for the west and, enroute, have cooked their own meals, used their own blankets and made up their own berths.

When the boys arrive in Jasper they will leave the main roads and hike into the back country, carrying their food on their backs. Tentative trips have been planned to the Maligne Lake district and to the famous Columbia Ice Fields. Possibly a climb of Mount Edith Cavell may be attempted, as there are a number of enthusiastic alpinists in the party and, although the main object of the visit is to explore the districts not generally visited by tourists, a day or so may be set aside for the ascent.

On leaving Winnipeg, the boys were eagerly looking forward to a period of "real roughing it" in the Canadian Rockies.

Rub It In For Lame Back.—A brisk rubbing with Dr Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in the pain comes out and there are ample grounds for saying that it is an excellent article.

Little Helps For This Week

"Lead us not into temptation." — Matthew vi. 13.

Ah! He who prayed the prayer of all mankind
Summed in these few, brief, words the mightiest plea
For erring souls before the courts of heaven,—
Save us from being tempted—lest we fall.

—Oliver Wendell Holmes.

The petition of "Lead us not into temptation" is the prayer of Christian humility, conscious of its own weakness. If this prayer is truly offered it may supersede the necessity of temptation. If we are already conscious of our weakness, we may not need the trial which is sent to show us our weakness.

—James Freeman Clarke.

BANK OF MONTREAL CROP REPORT

General—The weather generally in the three Prairie Provinces is hot and dry, and all grains are ripening rapidly. Harvesting is now general in Manitoba and should be in full swing in Alberta and Saskatchewan in a few days. Rust has reduced grades in Manitoba and is taking toll in Eastern and Northeastern Saskatchewan. In Quebec the weather [illegible] favourable, and a [illegible] crop of barley and oats is expected. In Ontario while some sections are suffering severely from drought, the weather has been favourable for harvesting, which is well advanced. In the Maritime provinces indications are that the crop of oats will be above the average. In British Columbia unusually hot weather prevails, but crops generally are expected to come up to previous estimates.

Alberta—Northeastern area, crops are ripening rapidly and harvesting will be general in about a week. The estimated yield is 10 to 25 bushels.

Southeastern area. About 35 per cent of the wheat cutting is completed and first threshing returns indicate an average yield of 10 bushels which is slightly better than was expected.

Western area. Harvesting has commenced and will be general in seven days. The estimated yield is from 8 to 25 bushels. Some further regional hail damage is reported. The sugar beet crop is satisfactory.

Saskatchewan—Northern area, rapid ripening conditions have continued and cutting is now well under way, with prospects generally for a fair to average yield.

Southern area. Harvesting is now general. Some fair yields are expected from summerfallow crops, but from particularly all others the yield will be very poor.

Manitoba—Hot, dry weather has prevented proper filling and has ripened crops too quickly. Yields and grades will be lowered and, while somewhat better than an average crop is expected, it is too early to make an accurate estimate. Rust continues to make inroads and together with extreme heat has caused irreparable damage, especially to late grains. Cool weather and general rain in the past few days have alleviated the situation to some extent, and while too late to benefit most crops, late grains will be improved. Cutting is general.

BRANDRAM-HENDERSON AUGMENTS TECHNICAL STAFF

In a recent interview with Mr. Geo. Henderson he announced that the technical staff of the company had been augmentd by the appointment of V. C. Bidlack, B. Sc., to the position of Chemical Superintendent. Mr. Bidlack who has achieved a high reputation as a successful paint, varnish and lacquer technologist and formulator, will be located at the Montreal factories.

Successful Canadian exhibitors in the International Grain and Hay Show to be held at Chicago, November 29-December 6, will be awarded liberal bonuses in addition to the regular premiums offered in the prize list now being distributed. The provincial governments of Quebec, Ontario, Alberta, Saskatchewan and British Columbia, the Calgary Board of Trade and the Canadian Pacific Railway have also announced offers of special awards for Canadian exhibitors.

That elk are attracted by music seems to be established by the actions of two fine specimens of that animal which stroll out of the bush when dancing begins at the Banff Springs Hotel every evening. Under the ballroom windows they begin to shake their heads and prance, cavort and caper while the music lasts, not even stopping to eat until the orchestra has ceased playing.

Canadian poultry are rapidly being recognized throughout the world as reaching unusually high standards and recently the S.S. Empress of Canada, clearing from Vancouver to China, Japan and the Philippines, carried 60 head of registered white leghorns consigned to Manila to be used in building up the poultry industry of the islands. The birds came from a poultry farm near Vancouver.

Captain R. W. McMurray, for the past five years marine superintendent of the Canadian Pacific's British Columbia coast steamship service at Vancouver and prior to that a commander with the Canadian Pacific trans-Atlantic fleet, has been gazetted in the London Times of July 16 captain in the Royal Naval Reserve, promoted from the rank of commander, R.N.R. Captain McMurray, whose rank is equivalent to the army rank of brigadier-general, is one of the few living Canadians holding such a high position in the [illegible]

MAJOR STRANGE AND HIS NEW POST

There is considerable cause for gratification in the appointment of Major H.G.L. Strange, of Fenn, Alberta, to the position of head of the educational department of the Searle Grain Company. It will, it goes without saying, be gratifying to the former wheat champion himself to find the fruit of his life work thus substantially recognized. It will be a source of satisfaction to the company to be able to place their department, a contribution, in the first instance, to better farming, in hands which are not only capable but internationally recognized as being capable. It will be reassuring to the great farming population of Canada and especially Western Canada to know that so great a world authority and withal one of their own number who has shared their fortunes and learned their problems should then be put into a position where he will be able to render them still more assistance and give them benefit from his rich experience in the farmer's craft.

BY-LAW 41

PUBLIC NOTICE is hereby given that there has been introduced in the council of the Municipal District of Cornhill, No. 467, a By-Law of which the following is a short synopsis:—

"ALL domestic animals are hereby prohibited from running at large at all times, within the west half of section 18, Township 51, Range 21, West of the fourth Meridian, including therein the unsubdivided portion known as Lakeview, Limited, summer resort."

And that a copy of the same may be seen in each of the following places:—

Secretary-Treasurer's Office, Tofield.
Main Entrance to Lakeview, Limited.
Main Entrance to Pavillion.
S. E. Corner of the West Half of Section 18-51-21-W4M.

AND, FURTHER that unless within thirty days from the publication of this NOTICE at least FIVE resident electors of the municipality, petition the council to submit such by-law to the vote of the resident electors of the municipality, the Council will proceed to pass the same.

J. O. A. LETOURNEAU,

Ketchamoot Items

The regular monthly meeting of the M.A.S. will be held next Wednesday, Sept 3rd, at the home of Mr. W. A. Mitchell. A hearty invitation is extended to all.

Mr. W. Allison our former school teacher motored down from Edmonton Monday. He is teaching this year in an Edmonton school.

Margaret Mitchell, Torvel Nomeland and Charley Sears successfully passed their public school exams, which speaks well of their teacher Mr. Allison as they practically had only six months teaching.

Mr. A. F. Schultz was an Edmonton visitor the first of last week.

Mr. and Mrs. C. Coombes and family., Mrs. E. McMullen were Sunday visitors of Mr. and Mrs. Archie Brown of near Bawlf.

Mr. and Mrs. John McGinitie, Mr. and Mrs. Henry McGinitie returned home Monday morning after two days blue berry picking near Seba Beach.

Mr. Jack Younie returned to his home in Edmonton Saturday after a month stay at the Henderson and W. A. Mitchell home.

Misses Eileen Sterritt and Maude Wildman are enjoying a week's vacation at the Appleby home.

Mrs. Campbell returned home Sunday evening after visiting a week in Edmonton with relatives. Mr. Campbell was a passenger to the city Saturday evening returning home Sunday.

The school board Messrs. A. F. Schultz, W. A. Mitchell and G. W. Sears held a meeting at the Schultz home to select a teacher out of 125 applications. Miss Violet Putnee of Kitscoty was selected. 'Phone calls and wires were also received as far east as Wainwright and west as Vancouver, also personal calls.

Mrs. Bishop and Miss Mabel Lawson spent a few days at Jasper Park last week.

Mrs. Bishop returned to her home at Barrie, Ontario on Friday. She was accompanied as far as Camrose by her sisters Mrs. Roy Flemings, Mrs. Sam Sterritt and Mrs. H. Lawson.

Mr. C. A. Ingram had the misfortune to lose a horse one night last week, presumably to have been picked or shot by some unknown person.

Miss Joyce Payzant returned to her home at Edmonton Saturday after two weeks at the J. H. Ingram home.

Mr. Howard Lee has returned home after spending the summer months playing ball.

A dance was held at the Barnes home Friday in honor of Miss Payzant, a fairly large crowd was present and all reported a good time.

BERT JOHNSTON

Whose company appeared at Tofield Monday and Tuesday and will appear in a final programme tonight.

WEDDING
Hayne—Carter

The marriage of Marion Ava, youngest daughter of Mr. and Mrs. J. William Carter, 10040, 102 street, Edmonton, to Walter Henry, eldest son of Mr. and Mrs. George A. Hayne Carseland, Alberta, was solemnized on Saturday evening, August 16th, at nine o'clock at the Pro-Cathedral of the Redeemer, Calgary, Rev. J. M. Roe Officiated.

The bride choose a French frock of monet blue georgette featuring a flowing long skirt and smart caped jaquette. Kid shoes in harmonizing color tone and a chic Gainsborough beret completed the ensemble. Her flowers were a sheaf of bridal roses, blue delphinium and Maiden-hair fern. Miss Florence M. Martin of Calgary, a former school chum, was the bridesmaid and selected for the occasion a becoming costume of navy and beige. She wore a small panne velvet hat and blonde shoes and carried a bouquet of pink roses and gypsophelia. Ross C. Hugh of Standard, Alberta, supported the groom.

Following the ceremony, supper was served at the Tea Kettle Inn where covers were laid for eight.

On Sunday a reception was held at the home of the groom's parents when guests numbering thirty-five extended their best wishes and congratulations.

Mr. and Mrs. Hayne left the same evening on a motor trip to Waterton lakes where the honeymoon will be spent. They will reside at Craigmyle, Alberta, where Mr. Hayne is a member of the Royal Bank of Canada staff.

Mrs. Hayne will be remembered by many Tofielders, having had her schooling here. Later she was with the Tofield Mercury, going from here to the Camrose Canadian, a position which she held for four years, leaving that paper immediately prior to her marriage.

The W.M.S. of the United Church will hold a silver tea and sale of home cooking in the Institute Rooms on Saturday afternoon, September 6th. At six o'clock, also, a business men's lunch, consisting of the following menu, will be served:

Potato Salad	Chicken Salad
Baked Beans	Bread and Butter
Pie. Cake.	Tea or Coffee

ADVANCE ON SATURDAY'S PICTURE

Adapted from Elinor Glyn's sensational, romantic story, with Warner Baxter and Catherine Dale Owen in the leading roles, "Such men are Dangerous," will be next Saturday night's feature at the Variety Theatre.

"Such Men Are Dangerous" is heralded as one of the best pictures made and embraces all the required elements of solid entertainment, suspense, thrills, drama and comedy with more intriguing twists than Miss Glyn has heretofore offered.

Not since his splendid performance in "In Old Arizona" in which he portrayed the character of the "Cisco Kid", has Baxter been more delightfully cast. Catherine Dale Owen, acclaimed the most beautiful blonde of the films, recently supported John Gilbert in "His Glorious Night".

The cast includes such notables as Hedda Hopper, Albert Conti, Claude Allister and Bela Lugosi. It was directed by Kenneth Hawks.

AERIAL ARMADA AT EDMONTON ON WEDNESDAY SEPTEMBER 17th

Roaring aeroplanes!
Famous Pilots!
Thousands of people!

Such will be the scene on Wednesday, September 17, when fifty aeroplanes racing for the Ford Reliability trophy arrive at Edmonton.

Captain Frank Hawks in his famous "mystery" aeroplane will be there. Last week, he made a record breaking flight from Los Angeles to New York. The other famous fliers will include Forrest O'Brien and Dale Jackson, world record endurance airmen, and George Haldeman, who flew Ruth Elder across the Atlantic.

This is the sixth annual tour, which is looked upon as the major aviation event of the year. In the competition will be planes of various types ranging from tiny open cockpits to giant tri-motors. Thus, an opportunity is given thousands to view the latest development in aviation at close range.

The program at Edmonton will include the arrival of these eastern machines and an air show which will be staged at the municipal flying field. This is being arranged by the Edmonton and district Aero Club.

Sensational stunts will be seen when the famous airmen put their machines into action. Here the "daredevils of the air" will flirt with danger and prove triumphant.

BERT JOHNSTON AND COMPANY VERSATILE ENTERTAINERS TO CONCLUDE WITH DANCE

Bert Johnston and his Company, versatile entertainers appeared here on Monday and Tuesday and gave very good programmes to rather poor houses.

Mr. Johnston is a magician of international fame and all of his company, including Mrs. Johnston and daughter are quite talented.

The stage equipment is exceptionally complete and their entertainment is clean and received hearty applause from the small houses on Monday and Tuesday.

They make a final appearance at Tofield tonight (Wednesday) and those who enjoy a good versatile programme should not fail to attend.

Their visit here will conclude with a dance. The company has a splendid orchestra.

WOODLAWN SCHOOL REPORT

The following pupils of the Woodlawn School passed the departmental examinations in grade eight.

Hans Hanson, Ralph Hutson, Kathleen Lougheed and Pearl Lougheed.

In grade nine Stanley Dunham, passed in Algebra, Composition, Geometry, French, Literature and History.

In grade eleven Eric Hanson passed with an average of 81 per cent. He has passed all his high school units with honors and intends to go to normal in September.

(Teacher, Mrs. McGowan)

TOWN GOSSIP

It was a big night for Charlie, and like all "big events" in men's lives, had its touches of joy and sorrow. Charlie had read the posters telling of the visit of Bert Johnston and his company and along with his sister had been given the necessary quarter of a dollar for admission.

• • • • • • • •

"Now let me hold the money" said sister, but Charlie being a man, and standing up for his rights said no, he would carry the money.

• • • • • • • •

Then came the disaster! Like many a man who has turned down the offer of his closest girl friend to hold the money he lost it down a crack in the sidewalk. No quarter no magic show.

• • • • • • • •

But Charlie was a resourceful man. Quickly finding a crow bar and an adult to help him, the board was taken up where the quarter was supposed to be—but it was not there. Then came the tears. No quarter no magic show.

• • • • • • • •

Quarters have a habit of rolling when dropped so another board was taken up and with the aid of a flashlight borrowed from the Service Station the quarter was found.

• • • • • • • •

The came the smile—for the quarter gave open sesame to the magic show.

• • • • • • • •

"Here sister, you hold the money," said Charlie as he hurriedly took the flash light back. Wise boy, Charlie.

• • • • • • • •

Inside, Bert Johnston called Charlie to the stage to help him with his tricks. Charlie is still wondering how the wrist watch changed to candy kisses in his pocket, but is forgetting his wonder in the gladness of having Bert Johnston give him a free ticket for Tuesday nights show.

• • • • • • • •

It was a big night for Charlie Giffin.

• • • • • • • •

I believe it was Joseph Chamberlain, but not quite sure, who rarely, if ever, entered the British House of Parliament without a boquet in his buttonhole. Anyway it was one of the great statesmen of a past era.

• • • • • • • •

We were reminded of this the other day when we met our friend Mr Malcolm on the street, groomed to perfection, and with a bouquet in his buttonhole. Mr Malcolm appeared, what is it you call it? oh yes, quite debonair.

• • • • • • • •

Mr. Malcolm is "mine host" at the Royal Alexandra Hotel and the house and its management has earned the appreciation of travellers from all parts of the Dominion and elsewhere. Jim Hannan was a hard man to follow in the management of a hotel as the compliments received by him were both numerous and genuine.

• • • • • • • •

But Mr. Malcolm is a worthy successor, as Bert Johnston whose company is playing here this week, publicly announced on Monday night. Later in private conversation Mr and Mrs. Johnston spoke very highly of the cuisine and efficient yet homelike atmosphere of the hotel. As Mr and Mrs. Johnston have been travelling for years and can number the hotels they have stopped at by the hundred, the compliment is worth noting.

• • • • • • • •

Oh boys while you were making a nice slippery toboggan slide of the skating rink roof a little surprise has been kept in store for you. If you go into the drug store on a table at the rear of the store, Mr Beirnes has prepared, with thoughtful solicitude for your welfare a big pile of new scribblers.

• • • • • • • •

And piled up somewhere in the store are arithmetic books, geographies, histories and all those sweet meat tit-bits of school attendance. Yes next Tuesday is the day—not so tough at that. All you have to do is pay attention and up a grade you go next year. Just as easy as falling off the skating rink roof.

• • • • • • • •

The old skating rink comes in for a lot of abuse. Standing as it does partly isolated from town, proves quite an attraction for boys especially as regards climbing on the roof. Much petty damage is done in this way. Boards torn away, shingles and rubberoid broken, which in the aggregate mean much more added expenditure.

• • • • • • • •

It might be well to tell the boys that when they damage the rink they are damaging their own property. When the rink gets to the point where the council cannot afford to repair it it is quite possible there will be no skating or hockey. Don't kill your own fun boys.

• • • • • • • •

Speaking of the rink recall's some of the difficulties the rink management has experienced in past years, the most important perhaps being the lack of water for frequent flooding. Now is the time to attend to these matters and not wait until everything is frozen up.

• • • • • • • •

In past years the water for the initial flooding has been brought from the lake at considerable cost of labor and money. Seventy five to one hundred dollars is the cost of laying the initial sheet. Bill Stutzman recently constructed a cistern 12 feet deep that holds 200 barrels of water at a cost of approximately one hundred dollars. It would appear to be good business on the part of the council to have a similar cistern made and conserve the water off the rink roof. This with a few other improvements would make flooding easier.

"SALADA" TEA
'Fresh from the gardens'

Planning, Saving, Investing

To have AND to hold - when applied to money, does not seem to be an easy accomplishment for us to learn. The word 'save' is stressed in season. During the recent stock market slump there have been millions who have decided to do the holding. They have emerged as heroes. They have displayed the true characteristics of investment sense and attention from their regular occupations and interests in a field of activity about which they know next to nothing. So we have learned that most of us need to concentrate more on the 'holding' part of our financial jobs.

So writes Leroy D. Putney, president of the well known Bennett's Statistical Organization who, from an income-producing point of view divides the average individual's life into roughly three parts The first from about age twenty-five to thirty might be called the period of preparation and getting settled. The second, from thirty to the late fifties, is the period of accumulation. The third, from the late fifties on, is the age of retirement. I assume all of us

will retire how much time and money may be expended during the intervening years between preparing young people for their life work, they can never say. Mr Putney by independent during the last period of life unless they have made good use of those twenty-five or more years of the second part of their period. It is during this period of accumulation that one's surplus must be built up and gradually invested if one hopes to be independent the rest of his days. His suggestions should be Plan, Save and Invest

Planning means the making and using of a budget The budget is the floor plan of your financial structure Fit it to your own situation and then stick to it instead of shelving it after a couple of trials. Of what good are those prints if the structure does not grow up in accordance with those specifications? And one of these specifications will be the proportion of your investment income that is to be set aside for savings. Another specification will be the determination to have a home of your own

Saving means that systematically will be free and clear. Because it is free of mortgages or other claims it will stand between your family and distress in emergencies and their small investments of all kinds. Saving is increasing

The second investment theory has been brought to the consciousness of the people of this generation by many years of educational effort. It has been advocated by hundreds of thousands of Canadians as evidenced by vacillating values in good offers and banks. It was given a great impetus during the war when, through the urge of patriotism and in response to the call to sacrifice to 'win the war' thousands of people who never before had invested in a bond bought Victory Bonds, and thus learned the lesson of how easy and safe it is to accumulate and multiply itself through interest and dividends. But the lesson of learning is one that must be taught to each succeeding generation and this generation must be no slackening in the effort. It is a task which parent should set their children learn early in life and train them to do until the investing habit is formed

Where investment is involving you have the choice between investing in a commonplace commodity, power of compound interest when hammered to earning power of the individual and the other putting the money into a commercial enterprise I remember once you made the statement that the power of compound interest is both timeless and automatic. In the second instance that is not automatic or certain, and one of the most serious mistakes made by investors is to assume that it is automatically certain. Only that certainly you can surely obtain from your own labors.

You will want to have among your investments some good sound bonds and you will find if your available funds permit, some of the best stocks. The latter should be bought outright and never on a shoestring margin. Remember this too. It is wise to keep a part of your funds in liquid form, that is in cash or such short-term securities as can quickly be converted into cash. Then you will be prepared for emergencies. You might need this money for a personal emergency or for some special investment bargain in the market that had escaped your attention

The point is to put each dollar to work, twenty-four hours a day and each day in the year earning more income for you. Your dollars, again these dollars that made a proportion will lead to a surprising increase in your earning power. That is your ability to save You will be able to say with your own eyes the rising structure of financial independence that is going to stand you in good stead later in life But in order that your future income may be free when you need it, start to build that income now.

The word 'investment' should be broadly interpreted to include not only bank accounts and securities, but insurance policies, your own home, real estate mortgages, and other forms of capital Life insurance is indeed important It not only helps people to save, but it is a protection as well as an investment Every person should carry life insurance, but, on the other hand it is not the part of wisdom to place all your savings in life insurance Follow instead the practice of diversifying your investments - part in a savings account, part in life insurance, and part in sound securities

However this advice about investing is almost valueless if it is to be only a temporary effort If you allow your investments to be frittered away through carelessness or the greed for more Rather turn to the fundamentals, earning and saving

And above all turn your hard work initiative and perseverance, as the right means of accumulating sufficient funds for your needs, rather than the purely speculative methods of trying in the hope of getting something for nothing Lastly carry out the principle that 'gladness with contentment is great gain' in your business and action in the rest of your life

Wheat Pool Membership

The Canadian Wheat Pool now has a membership of 142,000, the number of members having been increased by more than 2,000 within the year according to Gillis Purcell, of the Canadian Wheat

Huge Power Projects

Millions To Be Spent In Next Three Years On Hydro Development

More than $100,000,000 will be spent in each of the next three years on power projects now under development in Canada. Although there are other plans for important building projects, none will have a more intimate bearing upon the industrial development of Canada than those now contemplated by the power industry

The present turbine installation in the Dominion averages 325 horsepower per thousand of population, a figure which places Canada among the leading countries of the world in per capita utilization of water power The total installation now amounts to over 3,700,000 horsepower and an additional installation of over 3,000,000 horse-power will probably be made within the next five years Quebec has the largest installations with an average of nearly one horse-power per person Ontario has a total installation of nearly two million horse-power and in 1930, the power companies in that province generated over six billion kilowatt hours or more than one-third of the total produced in the Dominion Manitoba has an installation of over 300,000 horse-power, and Alberta, 76,000 horse-power On the Pacific coast, large resources are available and turbines with a capacity of 500,000 horse-power have been installed in

Is Baby Teething?

Teething time is a time of worry for mothers. Baby is fretful, nervous, restless, feverish. His little gums are swollen and tender. Constipation, colic and sometimes convulsions add to the worry of mother can soon

These troubles can be quickly banished however through the use of Baby's Own Tablets concerning which Mrs Louis Grubb, Tweedsmuir Park, Vancouver, writes "I have found them all my babies who teething and have never been disappointed with

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr Williams' Medicine Co., Brockville, Ont

Russian Laws On Religion

Trapping Of Religion In Schools Is A Punishable Offence

Extracts from the Russian laws on religion compiled by the British embassy at Moscow, were issued in an official government "white paper

The publication was in fulfillment of a promise given in the Conservative by the Labor Government last April, when groups in Great Britain and other nations were protesting against alleged religious persecution in Russia.

The 'white paper' cites a provision of the Soviet constitution providing for the separation of church and state, and schools from church, while equally guaranteeing liberty of religious belief and freedom of anti-religious propaganda.

It also quotes a provision of the criminal code by which the teaching of religious beliefs in schools to young children and persons under age is punishable by a year of compulsory labor

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator It is a standard remedy, and years of use have enhanced its reputation

Cobourg, Ontario—"Years ago when I had a sick father and a baby to care for, I got all run down and I took Dr. Pinkham's Vegetable Compound and felt like a new woman. I recommend it to my women who is at the age when she needs building up."—Mrs. H. Bannister, R.R. 4, Cobourg, Ontario.

Good News For Students

Would Curtail Housework and Examinations For Vancouver High School

Curtailment of home work and abolition of examinations for Vancouver high schools is being considered by educationalists here this summer with a view to lightening school work for children and, at the same time, increase the efficiency of study

With the inauguration of the new four year high school matriculation course at the commencement of the fall term, home work will be cut in half it is declared by principals of several high schools

Resentment against home work which has been sweeping the country in the past few weeks is shortly increasing, both among parents and teachers who declare that the old fashioned idea of giving children enough work to keep them out of mischief is not running the standard of education. With science investigating every branch of life for the purpose of simplifying living conditions, education, it is claimed, has not almost still in spite of the efforts of psychology experts.

Recipes For This Week

(By Betty Barclay)

GINGER BREAD

3 cups sugar.
1 cup butter.
1 cup molasses.
3 cups flour.
1½ quarts flour.
1½ tablespoons soda.
1 tablespoonful ginger.
1 tablespoonful cinnamon.
1 cups sour milk.
1 teaspoonful salt.

Cream butter and sugar; add salt and spices and molasses. Sift dry ingredients together and add alternately with milk Bake in layer cake pans about 25 minutes. Makes about 225 degrees Fahrenheit. Cut squares and serve with whipped cream

ORANGE CARAMEL

6 oranges.
½ cup sugar
½ cup water.
½ cup cream.
Pistachio nuts.

Pare oranges, removing membrane with peel, and cut crosswise, in slices. Put sugar and water in a small saucepan, and boil quickly until syrup is a golden brown. Arrange layer of orange slices in glass dish. Sprinkle with sugar pour over enough of the syrup to form a thin coating over the oranges, and another layer of orange and syrup, repeat until oranges is used. Heat cream until hot, pile lightly on the oranges, and sprinkle with chopped pistachio nuts

Many infants are infested by worms which cause great suffering and if not promptly dealt with may cause confirmation which is difficult to remedy Miller's Worm Powders will clear the stomach and bowels of worms and will an act upon the system like a tonic and the occurrence of the trouble And not only this, but they will regain the ability to the organs that worms cause and restore them to

Military Promotion

Members Officers Appointed To Command Of Regina and Calgary Regiments

Promotion of Major E. R. Knight to the rank of Lieutenant-Colonel, and to command the Calgary, Alberta, regiment, was announced recently at the Department of National Defence It was also made known Lieut.-Col J. McArs has been appointed to command the Third Battalion of the Regina Rifle Regiment.

Both officers have had long service in the Canadian Militia. Lieut.-Col Knight proceeded to England with the 56th Battalion, C.E.F., in March, 1916. He served in France with the same unit. Major McArs, went overseas with the 20th Battalion, in May of 1915. His service also was in France and Belgium.

Pioneer Member Dies

Peter O'Hare, 77, pioneer mounted policeman of the west, died recently at Maple Creek Since the earliest days of the police in Saskatchewan Mr O'Hare was associated with all activities, taking part in the Riel rebellion engagement. His service extended over 40 years.

Crude Oil Consumption

At present only about 3% per cent. of crude oil consumption is produced in Canada.

Trans-Atlantic telephone service has been extended to Sweden, so that it is possible to talk to people within the Arctic Circle.

Mussolini's Lieutenant removes Words, reforms Business.

Report On Gas Fields

Member Of Geological Survey Of Canada To Make Report On Saskatchewan

Dr G. S. Hume, of the Geological Survey, of Canada, will make an intensive survey from all available data, of the prospects of finding gas in Saskatchewan, in suitable quantities within the province

He will not make any actual investigation in the field at the present time, but having visited each city to forecast in gas development, and gathered material from other sources will make a report covering all geological information already obtained by various companies.

This report, framed as it affects the various cities interested, will be submitted to the Dominion Government, which in turn will forward it to the provincial government. The joint committee, representative of four cities of Saskatchewan interested in the gas development, then be put in possession of all the facts obtained

This was the outcome of a conference held at the parliament buildings, at Regina, when Dr Hume met five members of the Saskatchewan Government and also of the four-cities gas committee.

Soft corns and warts are ugly, painful and irritating Remove them quickly and surely with Dodgins' Egyptian Liniment.

Encourage Sheep Industry

Economic Survey Of Sheep Sections Of Western Provinces To Be Made

An economic survey of sheep ranching in Saskatchewan, Alberta and British Columbia, is being undertaken by the Dominion Department of Agriculture, under the direction of the agricultural economics branch of Agriculture with the Dominion Experimental Farms This is the beginning of a programme of research work in agricultural economics on behalf of the livestock industry.

The Yungas Railway, of Bolivia, is erecting steel telegraph poles.

No Cause For Alarm

Says Bennie Will Not Be Factor in Wheat Exportation For Some Time

Thomas D. Campbell, of Hardin, Mont., who has been called the world's largest wheat grower, returned recently from a trip to Russia that Secretary Coolidge, of the Soviet, and announced that it would be longer than generally thought before Russia was a factor in any export field.

At the country's five-year program progresses, he said, the needs of the country also increase. The more she grows the more she consumes. It will be at least three years before the Soviet government is a factor in the export of grain or any other commodity. Very soon the internal needs of the country will call for 1,000,000,000 bushels of wheat annually, just as an example

A Corrector Of Pulmonary Troubles. Many testimonials could be presented showing the great efficacy of Dr Thomas' Eclectric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from those disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes

Honey has become so popular in the British Isles that while 1,100 tons were produced there in the last 12 months, fully 3,500 tons, valued at $2,000,000, were imported

The United States exported 35,707,864 sets of false teeth last year.

Plan For Wholesale Emigration From Britain As Solution Of The Unemployment Problem

Wholesale emigration under the direction of public utilities, which would be given special consideration for buying or leasing large tracts of cement land which would be developed with the aid of the British and Dominion governments, is Lodge's suggested solution of the solution of the unemployment problem which is costing Great Britain $700 per minute.

Stevens Greaves's "by word, young man," would become "go west or die" for the plan embraces all parts of the Empire. The idea will be brought up at the forthcoming Imperial Conference, in London, England, with the hope that the Dominions will approve the scheme and agree to a partnership with the Labor Government in finding a place for the more than 2,000,000 persons unable to find work in Britain.

Immigration, guarantees, assistance of the plan is a new approach on the old government food line of the old system of homesteads and other pieces of land presented to people were wholly unattractive under present conditions and that the Dominions were also opposed to any haphazard they would only swell the ranks of unskilled labor of British whose their unemployed.

The scheme is therefore a protective plan to find a place for all present unemployed and not wanted. The children would be given an opportunity in acquiring forest and the development of virgin territories would be left to the Empire. The British and Dominion governments would aid in the transportation, but reserve plan to settle the new territory and emigrants would be further encouraged by the markets needed to establish a new economic frontier

The government is pushing the practical new type of pioneer and the unemployment problem of the government has taken to a solution of Dominion as well unless the government will be open to the overtures there as well as England. It also claims that Australia are willing to have immediately, but the immediately of unemployment holds them in England for their debt.

It is understood that one Dominion has already endorsed the scheme "There is no antagonism of Britain or among the proponents trouble in finding investors in in the event the plan is adopted.

To Relieve Unemployed

Nearly 12,000 Extra Men Engaged By C.P.R. On Improvements From Coast To Coast

Nearly 12,000 extra men are finding employment in the construction programme of the Canadian Pacific Railway's programme of construction, maintenance and improvement, from coast to coast Chairman Beatty of all kinds is being done both directly by the company and also by contractors, the company itself employing some 8,000 men in "extra gangs" throughout its system. The varied programme includes the laying of branch lines; repairing and renovation of right-of-way, bridges, tunnels, stations, and other buildings. The men, in general, are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

Increase Wheat Duty

An increase in the duty on wheat imported into Italy put into effect recently in order to safeguard the farmers of Italy from cheap wheat. Italian prices has been reported by J. B. Matthews, Italian trade commissioner, in Milan, to the Department of Trade and Commerce. There is an official estimate of a crop of about 1,800,000 tons of wheat in this country's harvest.

A motion picture screen which permits showing pictures outdoors and in lighted halls has been invented by two French engineers.

"I have lost my biggest creditor." "So he died?"
"No, there was no help but to pay him."—Bum Humor, Madrid.

HEADS FOR NORTH MEN

One of the outstanding features of the ice fun meet at Sunnitho Beach, Pasquash Lake, recently, was the driving of Ald. Winston Stewart, of Montreal. Cost, who put away with the bowl race in three straight heats. The younger man, but stepped on up into the open competition of Class "C" cost and had little to a good field of high-class and experienced drivers. Up and around Pasquash Lake Ald. Stewart is affectionately known as "Ol' Bill." He drives a real racing sea fan craft, and is not only a superb rough water driver, but he seems the happy to be a winner and is not afraid to show right into the turmoil of a big field. His work at the steels draw cheers every time he comes up for the flag

Canada Holding Trade Position

Statistician Places Annual Loading Trading Countries Of The World

Ottawa, Ont.—Canada maintained her position among the leading trading countries of the world in the fiscal year ending March 31, 1930, despite a slump in exports in agricultural and a slight falling off in import trade. This is disclosed in the condensed preliminary report on the trade of Canada, 1930, issued recently by the Dominion Bureau of Statistics.

The year was marked by an unfavorable balance of trade of $163,228,413 compared with a favorable balance in the three-year-old, and 9 in the two-year-old class. Twenty-seven of the records were made on two milkings a day.

Asbestos in Manitoba

Valuable Mineral Located At Two Points In Northern Part Of Province

The reported discovery of asbestos on the north shore of Manitoba lake may broaden the range of Manitoba's mineral wealth, but cannot affect the national leadership in asbestos production, which is already assured to the Province of Canada. Canada produced about 74 per cent. of the world's supply of asbestos. Rhodesia about nine per cent., Russia about six per cent., and South African about six per cent. The remaining production being distributed in small quantities among other countries.

Asbestos, although a mineral, consists of silicate of magnesium and lime, and woven much as a textile is. On account of its fire-proof quality it is much used in building. Additional Railways, who has just returned of Iron England, where he attended the export agreement of Mary Chester, as coach in charge of the Canadian boys' rowing team which participated in the International judging contest at Henley.

During his trip, Mr. Walsh also attended the world's poultry congress in one of the Canadian delegates, and made a special trip to the continent to study phases of agricultural development there

Summerfallow Tests

Found To Be No Advantage In Plowing Deeper Than Four Inches

How deep should summerfallow be plowed? The answer to this important question in respect to prairie farming is provided by the Dominion Experimental Station, at Scott, Sask which for another years of practical investigation, it has been found that there is no advantage in plowing summerfallow deeper than four inches, where a good job can be done at this depth. Not only is this sufficient for the proper retention of moisture, but a considerable saving in time and labor is possible, and it permits the work of cultivation for weed control. Plowing at depths ranging from three to eight inches was studied throughout the period of the test.

Poultry For Profit

Importance of Carefully Culling Flocks Before the Laying Season

The ten-year average of the cost of feeding laying hens at the Lacombe Experimental Station, of the Dominion Department of Agriculture is $2.43 per bird. This means that with eggs selling at an average of 28 cents per dozen, it takes $71 dozen, or 41 eggs, to pay for the keep of the laying hen only the eggs laid in excess of that number can count as profit. This demonstrates the importance of carefully culling poultry flocks before the laying season begins. It is the hens that lay from 180 to 200 eggs a year that pay.

Good Road Making Material

Most With Success In Extraction Of Tar From Sands in Northern Alberta

Success in the extraction of tar from bituminous sands in the Mc-Murray area of Northern Alberta is said to have crowned ten years of effort on the part of D. B. A. Clark, of the University of Alberta. It is reported that 95 per cent. pure tar was taken from the sands in recent experiments and it is believed that thousands of dollars may be saved in road-building and other developments as a result of the availability of this material

Valuable Resources Going To Waste As Vast Quantities Of Natural Gas Are Burned In Air

Free Correspondence Courses

Educational Opportunity For Every Boy and Girl in Saskatchewan

Educational opportunity for every boy and girl in Saskatchewan is the ideal towards the attainment of which the provincial Department of Education is steadily working Not understanding the rapidly growing system of secondary education in high schools, collegiate institutes and in elementary schools, these schools do not meet the situation fully To supplement the work thus held done, provisions have been made by means of correspondence courses, to give a degree of instruction to several hundred boys and girls who, for various reasons, have been unable to attend the public or elementary schools. The next step to the inauguration of correspondence instruction in high school courses. These courses are for the benefit of pupils who have no high school facilities, or who have physical disability to attend. Present their walking to school.

Farm Boys and Girls

Canadian Juvenile Club Work Is Instituting Among the Nations Of Europe

"Canada stands second only to the United States in all the world, in the work she is doing for her farm boys and girls. Our juvenile club work is outstanding among the nations," declared F. W. Walsh, superintendent of agriculture for the Canadian National Railways, who has just returned from England, where he attended the annual meeting of the Royal Agricultural Show of Great Britain.

Compared with coal, enough gas goes to waste in Turner Valley every day's equal more than loads of 10 grade coal, each train being of 50 cars, and each car containing 40 tons Thus fast equal to 18,000 tons of coal goes to waste Multiply that by 365 for the total wasted each year and the figure looks like light years in connection with a star or the universe of the universe, 6,750 000 tons a year to be exact The daily waste, at 4th wasted, 18,000 tons, until August, 1930, amounted to 300,000, and from August to April this average of only 20,000,000 cubic feet per day was used.

If these train loads of heat had to be shipped out of Alberta just as they are provided by the Dominion Experimental Station, at Scott, Sask which for another years of practical investigation, it has been found that there is no advantage in plowing summerfallow deeper than four inches, where a good job can be done at this depth. Not only is this sufficient for the proper retention of moisture, but a considerable saving in time and labor is possible, and it permits the work of cultivation for weed control. Plowing at depths ranging from three to eight inches was studied throughout the period of the test.

Canada Grows Fine Tobacco

Canadian Grown Tobacco Of Better Quality Than the Imported Leaf

Canadian farmers consequent upon research work done by the Dominion Department of Agriculture are now producing practically all the fine tobacco leaf, which Canadian manufacturers, observes Dr E. S. Archibald, Dominion Experimental Farms, who adds that the quality is better than that of the imported leaf

"Do you know what to look out for when fishing, sonny?"
"Of course I do — the policeman."—Humanet, Hamburg

Memorial To Ben Eielson

Alaska To Pay Fitting Tribute To Her Pioneer Aviator

Alaska's memorial to her pioneer aviator, Col. Ben Eielson, will be a $100,000 aeronautical engineering building at the Alaska Agricultural College and School of Mines, the farthest north college in the world.

The campaign to raise the fund for its erection is being sponsored by the American Legion posts of Alaska, under the leadership of Dorman Baker Post No. 11 of Fairbanks, Alaska whose flag Eielson carried on his flight with Sir Hubert Wilkins across the top of the world from Point Barrow to Spitsbergen.

Since the finding last February of the bodies of Eielson and his mechanic, Earl Borland, who were instantly killed in the crash of their plane on the way to rescue passengers and cargo from the ice-trapped ship Nanuk, there has been a growing sentiment in Alaska to establish an appropriate monument to Eielson's memory.

Western Fish Hatcheries

Distribution Of Fry For 1930 Season 20 Per cent. Higher Than In 1929

Distribution of whitefish fry from the Prairie Provinces' hatcheries of the fish culture division of the Dominion Department of Fisheries for the 1930 season, has been over 20 per cent larger than the 1929 output, being 217,114,000. The fry have been distributed in the free swimming stage, in the waters of Manitoba, Saskatchewan and Alberta. The four western hatcheries handling whitefish are at Gull Harbor, Man.; Winnipegosis, Man.; Fort Qu'Appelle, Sask. and Lesser Slave Lake, Alberta.

Winnipeg Newspaper Union

(By Annebelle Worthington)

A printed linen bolero frock favors sailor blue and white tones.

It's just the thing for summer sports.

The bodice is white handkerchief linen. It appears again in the cape collar and cuffs that are banded in plain blue linen of the heavier weight. A belt of blue linen marks the natural waistline.

It has box plaits across the front of the skirt that Paris is featuring in her most exclusive models.

It offers a smart definite change when worn without the bolero jacket, illustrated in miniature front view.

Style No. 2557 is designed in sizes 14, 16, 18 and 20 years.

Printed or plain tub silk, shantung, printed pique and cotton tweed are chic.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

JUDGES FOR CANADIAN NATIONAL COMMUNITY PROGRESS COMPETITIONS

Outstanding men and women, conversant with conditions throughout the prairie provinces, who have been selected by the Canadian National Railways to judge competitions among rural communities in the three prairie provinces, which are of European origin, to be held annually for a period of five years, with three substantial prizes of $1,000.00, $500.00, and $250.00 respectively, to be awarded each year in each of these provinces.

SUNDAY SCHOOL LESSON

AUGUST 31

AMOS—A HERDSMAN CALLED OF GOD TO BE A PROPHET

Golden Text: "I heard the voice of the Lord, saying, 'Whom shall I send, and who will go for us?' Then I said, 'Here am I, send me.'"—Isaiah 6:8.

Lesson: The Book of Amos.

Devotional Reading: Isaiah 55:1-7.

Explanations and Comments

The Time Of Amos' Prophecy, 1:1.—Amos was a herdsman of Tekoa (a small village of Judah), who lived in the eighth century B.C., in the reign of Uzziah, king of Judah, and Jeroboam II., king of Israel. Uzziah reigned forty-five years in Judah (782-737 B.C.), and somewhere in that reign occurred an earthquake so startling and devastating that the Judeans dated events from it, just as they often dated them from the deliverance from Egypt. It was probably 755 B.C., "two years before the earthquake," that Amos wrote his book, the first of all the prophetical books, wherefore he is called "the father of written prophecy."

"Two years before the earthquake! What an ominous beginning. But no words could better introduce the stern book of Amos. The world into which it ushers us is a world crowded with wrong of every kind — of false worship and social injustice. Such a world needed to be shaken and Amos knew that it would be. That, indeed, is the burden of his message, and already in the opening words the rumbling of the coming shock is heard. Sharp ears, however, were needed to detect it. To the average man of those days, society must have seemed stable enough, for the brilliant reign of Jeroboam the second had been marked by peace and prosperity. But not far beneath the shining surface the clear eyes of Amos saw the symptoms of rottenness and inevitable decay; and the words of his first recorded message are that Jehovah, the God of this easy-going people, would roar from His temple in Jerusalem, like a lion just before he makes his spring. The implication is that Jehovah will soon spring upon His people, to tear them in pieces, and Amos' message we might describe as the Gospel of the Lion's Roar."—J. E. McFadyen.

The Prophet Must Be Jehovah's Agent, 3:7, 8. Amos proclaims his message because he must: God had revealed to him His secret of Israel's doom, and as every one fears when a lion roars, so when Jehovah speaks, as He had spoken to the soul of Amos, how could the prophet help delivering his message? "Amos himself is in the grasp of that great law which explains and runs through all the phenomena of the universe, or rather of that great Person who is behind all phenomena. The great Course which explains the prophet's appearance and justifies his message is Almighty God Himself."

The death penalty for crime has been abolished in Denmark.

Develop Clay Industry

Pamphlet Shows the Advantages Of Brick Construction

In an effort to aid the clay working industry in Saskatchewan, the provincial Department of Railways, Labor and Industries, has issued three pamphlets setting forth the advantages of brick construction and showing comparisons of the costs of building brick or frame dwellings. Copies of the pamphlets, whose titles follow, may be obtained on application:

No. 1—The Advantages of Brick Construction.

No. 2—The Economy of Brick.

No. 3—Hollow Tile Farm Buildings.

The Wheat Stem Sawfly

By Major H. G. L. Strange, Director Agricultural Research Department, Searle Grain Company, Limited

This insect, which up till 1914 had only been the cause of a comparatively small amount of damage in Western Canada, and that in Manitoba alone, has since that date rapidly spread over Saskatchewan and Alberta, and is now damaging crops almost up to the Rockies.

Entomologists who have given the sawfly a great deal of investigation and study are of the opinion that the sawfly is with the wheat grower to stay and that the control or partial control of sawflies will have to be one of the operations of the wheat grower that will rank in importance with any other farm operation.

The wheat stem sawfly normally lives in the prairie grasses, but of late years has developed a liking for wheat, and is damaging crops and causing direct money loss to farmers more and more each year, until today the losses due to the sawfly are estimated to run into millions of bushels per annum in each of the Provinces of Manitoba, Saskatchewan, and Alberta.

Neglect of any attempt to control the sawfly has resulted in some years in from seventy to one hundred per cent. loss in certain districts in the West.

Fortunately, however, in the majority of wheat growing districts at the present moment, the wheat stem sawfly only operates and damages wheat around the edges of the fields, particularly around the edges of those fields that are growing a crop on stubble.

Entomologists who have given particular study to the sawfly are of the opinion, from the result of their careful investigations and experiments, that no cultural methods are really very effective in the control of this insect pest.

They have found, however, that there is a certain and definite way to minimize the damage to wheat, and in time avoid any damage whatever.

This is by the seeding of what is called a "trap crop" around the edges of the fields, and in addition around the edges of any sloughs or watercourses inside the fields where the native grasses can grow, because it is in these native grasses that the insect usually lives over during the winter.

Oats make a very good "trap crop." The sawfly lays its eggs in the oats and eventually becomes drowned out in the stem. The oats, however, must be seeded before the wheat.

By far the best "trap crop," however, is brome grass, and it has been found that if a permanent crop of brome grass is maintained completely around the edge of a field, the brome grass strip to be from eight to ten feet wide, then the field will be almost certainly protected from sawfly damage. The brome grass can be cut for hay or can be allowed to mature and cut for seed.

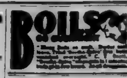
Unless some effort is made along the lines indicated, the entomologists assure us that the losses from sawfly damage will steadily increase.

Sometimes a crop that is known to be affected with sawflies can be saved by cutting on the green side before the wheat stem has been cut by the sawfly. This, however, is only a temporary method, because the grade of the threshed grain is usually reduced.

A permanent trap of brome grass is the only sure method advised.

Wheat growers should note carefully those fields which are damaged this fall and take means to combat the trouble for next year.

Universities, Dominion Experimental Farms and Government Departments of Agriculture will gladly supply further details of this damaging pest.



An Amazing Exploit

Two Young Boys Set Out To Sea In A Stolen Yacht

An amazing exploit by two London, England, boys, aged twelve and thirteen, who set out to sea in a yacht, was revealed recently.

The boys, who lived at Hornsey, filled two suitcases with bread, meat and bottles of water, and travelled to Southend. They waited until darkness fell, and then crept over the mud to the racing yacht "Nomad," which was moored off Leigh. On board the yacht, they lay down to sleep until the tide rose.

When the "Nomad" was afloat, they cast off the moorings, hoisted the mainsail a few feet, and with the tiller lashed, began their adventure.

Neither of them knew anything about sailing, but they determined to go to Dover and return, so that their school mates would acclaim them as heroes.

But the plan miscarried. The yacht drifted helplessly about the Thames estuary, all through the night. Liners constantly passed her, and the boys several times narrowly escaped being run down.

Then, in the morning, the yacht was seen drifting towards the harbor at Sheerness. Boatmen put out and were able to save her from crashing into the harbor wall. The boys were lying, helpless and frightened, in the cabin.

A waterman sailed the yacht back to Southend. On the way, the yacht was seen by the owner, Major W. J. Edwards, of the Essex Yacht Club, and he intercepted her in a motor launch.

Guard Against Thefts

The London Daily Herald reports that it was understood extra precautions were being taken to guard against further thefts of priceless art treasures from Buckingham Palace. Several such thefts have occurred recently, with America declared to be the chief market for stolen pictures.

Some of the southwestern cacti bear fruit even after three years of extreme drought.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES, LAYING PENS, DAIRY BARNS, SUNROOMS, ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

ARMY OF MEN OUT OF WORK EAST AND WEST

Ottawa, Ont.—In 84 centres which have replied to the query of Hon. G. D. Robertson, Minister of Labor, on unemployment figures there are 112,894 people out of work in Canada, and it is estimated this number will increase to 150,000 during the winter. Mr. Robertson gave these figures to the Employment Service Council, of Canada, at the opening of the annual meeting.

The figures, he pointed out, did not include 14 or 15 centres which had not reported, or the number who were out of work in numerous small centres throughout the country, and in rural areas.

Senator Robertson said he considered the figures received a conservative estimate. It was not unreasonable to say, he added, that there were now 200,000 people out of work in Canada. Figures compiled on August 15, he stated, showed that out of 205,887 union men in Canada, 28,794, or 10.9 per cent., were out of work.

The Government of Canada does not propose to adopt paternalism as a policy in dealing with unemployment but it does propose to help the people to help themselves, Senator Robertson declared.

"I do not for one moment suggest," he said, "that the present unemployment is due to any government or lack of governmental activity. Unemployment is not a purely Canadian problem. It is world wide. But it is not the business of the government of Canada to look after the world as a whole. It seems to me the problem first to be faced is for the government to look after the people of Canada and assist them to look after themselves.

"A proposal has just been made to me that if the federal grant to technical education were restored it would be a great boon to the unemployed. I do not know what the government will do because the matter has not been considered. But I do know it would at least enable the unemployed man to improve his skill during the time he is out of work."

"I feel, however, that if the technical education plan as inaugurated some years ago had been carried out to the full there would not be so much unemployment today."

To the cause of unemployment the minister referred development of labor-saving machinery, particularly in the west. Then there was the question of immigration. Feeling that it was its duty to see that the people of Canada had employment before inviting others to come in the government had taken steps to restrict immigration.

A special session of parliament was being called to deal with the situation. The government proposed to pass legislation enabling it to invite the co-operation of the provincial and municipal authorities and the co-operation of employers of labor with a view to providing all the employment possible as quickly as it could be done.

Daughter Born To Duchess

Birth Of Daughter To Duchess Of York At Glamis Castle

Glamis, Scotland.—The birth of a daughter to the Duchess of York was announced at Glamis Castle, the home of her parents.

The royal mother and the little princess are making highly satisfactory progress, according to an official bulletin from the gray old castle.

News of the birth was immediately flashed by telegraph to King George and Queen Mary, who are staying at their Norfolk estate of Sandringham.

The baby is the fourth grandchild of the King and Queen. The others are Princess Elizabeth and the two sons of Princess Mary, Countess of Harewood.

John R. Clynes, home secretary of the Labor Government, officially attested the royal birth. He and H. R. Boyd, ceremonial secretary to the home office, were both at the castle to attest the birth.

Nurse Beevors, who attended the Duchess and Princess Elizabeth, was with Her Highness. Dr. David Miles, who with Sir Henry Simson, noted London obstetrician, assisted at the birth, has attended the Duchess since her childhood.

New Gold Discovery

Hudson, Ont.—A new gold discovery is reported from the district 40 miles west of Red Lake, and near the Manitoba boundary, and a mining expert has left for the locality to investigate.

Salvage Abandoned Planes

Two Planes Of McAlpine Party Are Recovered After Enduring Storms Of Last Winter

Edmonton, Alberta.—Beating the Arctic again, Canadian fliers and airplanes have triumphed in a far northern test.

The test constituted a drama in three acts. The first when the McAlpine party was forced to abandon two monoplanes, forced down by fuel shortage, on lonely Dease Point on the Arctic coast, late last autumn. The second act was while the machines remained through an Arctic winter, enduring storms of whose magnitude none can tell. The final act, just completed, was continued in the salvaging of the machines.

One of the monoplanes was the property of Dominion Explorers, Limited. A little over a week ago supplies of gasoline and oil were taken to the scene of the forced landing. The machine was "gassed up" and flown to Coppermine River, where, without overhaul it was placed in service.

On Thursday evening last, August 14, the second machine, the property of Western Canada Airways, was reached by Pilot Buchanan and his mechanic, and on Monday evening August 18, the machine landed at McMurray.

So far as can be seen, the machines suffered no damage through their long stay in the Arctic. Their motors started without difficulty once fuel and oil were provided and there were no visible evidences of deterioration.

The Western Canada Airways machine will undergo a thorough examination at McMurray to determine if a complete overhaul is necessary.

Canadian Beef For Britain

British Market Offers Great Opportunity For Canada

Montreal.—Canadian beef will re-enter the British market for the first time since 1926 with the shipment from Montreal this week of 128 head of grade Hereford and Shorthorn steers, bred in Ontario and now consigned to a firm of importers in Manchester.

The majority of the steers were raised on the farms of P. J. Henry, of Ricetown, Ont., and M. J. Campbell, of Dutton, Ont.

Shippers of livestock believe that the British market, dead for the past few years so far as Canada was concerned, once more offers remarkable opportunities to Canadian breeders, according to Donald Munroe, president of D. Munroe and Sons. One hundred and sixty thousand pounds of dressed beef were shipped from Canada to the United States last year, but for the future such trade is severely hampered by the unfavorable American tariff.

Much of the traffic could, he believes, be diverted to Great Britain. The only competition in the highest grade of beef in the British market comes from the Irish breeders, but it is only seasonal competition and could be met with ease by concentration on the part of Canadian breeders and exporters.

Control Of Immigration

Report Of Royal Saskatchewan Commission On Immigration Has Been Submitted

Saskatoon, Sask.—Main outline of the report of the Royal Saskatchewan Commission on Immigration and Settlement has already been submitted to Premier J. T. M. Anderson, of Saskatchewan, and the full report will be printed immediately on completion, Dr. W. W. Swanson, chairman, announced here.

Findings and recommendations of the commission are expected to be unanimous, the chairman indicated. The commissioners have reached unanimity on all major issues. In view of the urgency of the question, both in Ottawa and at Regina, and because of changes already made in immigration laws, everything possible will be done to have the report printed immediately so that it may be made available, through the courtesy of the provincial government for the information of members of parliament at Ottawa and Regina.

The investigation has been a thorough one. Hearings have been conducted in all parts of the province. Since the commission was appointed last fall about 475 witnesses have been heard and personal investigations have been made by the commissioners.

Plan Relief Work

Toronto, Ont.—Announcement has been made by Hon. William Finlayson, Ontario Minister of Lands and Forests, the government is completing a scheme of relief work in Northern Ontario to take care of many of the unemployed lumbermen and mill workers who are faced with destitution during the coming winter.

Proposed Health Insurance

Compulsory Form Of State Health Insurance Mooted For B.C.

Victoria, B.C.—Legislation calling for a compulsory form of state health insurance will be placed before the B.C. legislature at its next session, according to reports current at the parliament buildings.

Although the royal commission on state health and maternity benefits has not yet completed its labors, which have taken its members to all parts of the province, it is expected that hearings will conclude and a final report will be ready before the session opens. The report will contain comprehensive recommendations to the legislature on which to frame legislation.

To Celebrate Victory

Six Premiers To Attend Conservative Dinner In Toronto

Toronto, Ont.—Six premiers are expected to attend a dinner here in connection with the annual meeting of the Ontario Conservative Association, November 20 and 21.

Hon. R. B. Bennett, Prime Minister of Canada, and Provincial Premiers F. S. Tolmie, British Columbia; J. T. M. Anderson, Saskatchewan; G. S. Harrington, Nova Scotia; J. B. M. Baxter, New Brunswick; and G. Howard Ferguson, Ontario, will be present at what is planned to be a celebration of the party's victory at the recent Dominion election.

SETTLEMENT OF DISPUTES UNDER A WORLD COURT

New York.—Despatches from Geneva to the New York Times report that the British Labor Government is envisaging announcement at the League of Nations assembly session, in September, of its acceptance of the general act for compulsory peaceful settlement of all disputes under the world court.

This step is the outgrowth of signature by all the British dominions of the so-called "optional clause," binding them to accept compulsory jurisdiction of the court. Australia's instrument of ratification to the optional clause, the last of the dominions to do so, was deposited recently.

Rt. Hon. Arthur T. Henderson, foreign secretary, is said already to have opened consultations with the dominions for simultaneous signature of the general act in September, in the same way that they signed the optional clause last year.

Thirty states, or more than half the league's membership, have now signed the optional clause, but only three have bound themselves by the general act. These are Belgium, Denmark and Norway. The French Chamber of Deputies approved it in June, but the senate has not yet acted.

PROMINENT MARKSMAN

Major Fred Richardson, president of the D.C.R.A., who did some sensational shooting at the rifle meet held at Long Branch, Ont. He was the only man to score a possible on the 900-yard range, winning the lieutenant-governor's match with 118 points.

Airplane Fatality

Pilot Is Killed Through Falling Into Propeller Blades

Owen Sound, Ont.—Climbing up on top of the 'plane to adjust the motor, George P. Parsons, 32, Toronto, was instantly killed when he fell into the whirling blades of the propeller. Prominent airmen believe it is the first fatality of its kind in the history of Dominion aviation.

Parsons, a member of the Toronto Flying Club, and a pilot in the Great War, had flown an amphibian biplane to Wasaga Beach recently. The machine was the only one of its kind in the Dominion, it is claimed. The engine and propeller are situated overhead.

After considerable tinkering Parsons was able to start the engine, but in getting down he slipped and fell into the whirling blades of the propeller.

Montreal Bank Robbed

Montreal, Que.—A daring and spectacular hold-up was staged here when two armed bandits held up the four employees of the Banque Provincial, at 4137 St. Catherine Street, East, and a customer, and escaped with $2,970 of the bank's funds by commandeering a passing taxicab. In their hurry, however, the bandits overlooked $9,000 which was on a shelf in the teller's booth.

Elevator Destroyed By Fire

Winnipeg, Man.—Damage estimated at $73,000 resulted when fire razed the Assiniboine Grain Company elevator in St. Boniface across the Red River from Winnipeg. The structure was valued at about $40,000 and it contained 50,000 bushels of barley, property of Wiley, Low and Company, grain merchants. Insurance covers the damage, it is stated.

THE KING'S DOCTOR

Lord Dawson, of Penn, physician to His Majesty King George V., as sketched by Miss Kathleen Shackleton, on board the Canadian Pacific liner "Empress of Australia." Lord Dawson is reputed to have the finest doctor's hands in England, and has the fine features and eyes sometimes recognizable in great artists.

He is looking forward to his first sight of the Rockies and later is going to disappear and take a real holiday out West. A ranch is his ultimate destination.

Yacht Wrecked Off English Coast

Commodore King and Five Others Lose Lives When Vessel Goes Ashore

Fowey, Cornwall, Eng.—The 22-ton yacht "Islander," wrecked upon the jagged rocks of Lantivet Bay in a violent storm which pounded the English south coast, carried Commodore Henry Douglas King, a prominent member of parliament, and five other men to death.

Those with Commodore King who had chartered the "Islander" August 9, for a vacation cruise, were Commander Searle of Berwick-on-Tweed, Surgeon Captain A. R. Bradley, Dunmow, Essex, Captain Glasebrook of Bishop, Stortford, Harry Lucas, captain of the yacht, and his 17-year-old brother, Walter.

The yacht, which was owned by Lieutenant-Colonel John N. Diggle, had been participating in regattas of the Royal Yacht Squadron along the English south coast. When the boat reached Lantivet Bay it encountered the storm and piled up on the numerous rocks of the bay.

Great waves punished the craft as it perched on the jagged boulders and it soon went to pieces.

Half a Million For Roads

Quebec, Que.—The sum of $500,000 was voted by a special order-in-council by the Quebec government at a cabinet meeting for the use of road construction. This sum was added to the regular highway budget of $12,000,000 and will be used in road building throughout the province where the unemployment situation is most serious.

Victory Over Reds

Hankow, China.—Chinese press despatches said Kiangsi provincial troops scored a crushing victory over Communists in the western part of that province, killing 4,000 Reds and capturing 2,000 rifles.

DRIVE ON LABOR PARTY STARTED BY CHURCHILL

Minster, Kent, Eng.—A plea for unification of the Conservative party in an effort to arouse the party's supporters and oust what he called "this wretched Socialist Government" was made by Hon. Winston Churchill addressing a meeting here. His speech seemed likely to be taken as the opening gun of a predicted Tory drive to defeat the Labor regime.

Personal and sectional aims should be put aside "to avert the decline and fall of the British Empire," the fortunes of which the former chancellor of the exchequer declared he never would have believed could decline so rapidly as they have done of late.

Mr. Churchill devoted much of his ammunition to an attack upon the way the MacDonald Government has been handling the Indian situation, particularly the way in which the Patan tribesmen had come down out of the mountains and were "molesting and insulting a famous city" with a large garrison of British and Indian troops.

"Such a lamentable spectacle would have been impossible in former times," he exclaimed. "It would almost seem that the same spirit of defeatism in high places which is so rapidly throwing India into chaos, has paralyzed military action at Peshawar."

The former chancellor who referred to Mahatma Gandhi as "this malevolent fanatic," declared that no proposal of dominion status for India would pass even the present House of Commons. While saying this, he re-affirmed the "inflexible resolve of Great Britain to aid the Indian people to fit themselves increasingly for the duties of self-government."

He deplored the exclusion of Sir John Simon, who served on the recent parliamentary commission to India, as chairman for the coming round table conference and expressed the conviction that the result of this conference would be "confusion worse confounded."

The former chancellor who has engaged in many wordy duels with Rt. Hon. Philip Snowden, the Laborite holder of Great Britain's purse strings, said that he was unhappy about bad trade and unemployment. He put his views of the Conservative program briefly, asserting that the fall of the Labor Government would restore confidence in Britain and would spread from Britain around the world.

"Industry will be stimulated by a tariff," he said. "Agriculture will be aided by a guarantee. The dole will be purged from abuse and imposture and we shall bear out our part in the general revival of national and Imperial strength."

NEW ZEALAND RULING DISTURBS AUTO INDUSTRY

Ottawa, Ont.—No official comment is available on the announced decision of New Zealand to place Canadian motor vehicles and accessories on the general tariff list. The matter, it is understood, however, will shortly receive the consideration of the government.

Canada's automobile trade with New Zealand is fairly extensive and has been growing. The exports of Canadian cars to New Zealand during the fiscal year ended March 31 last reached a total of 10,349 with a valuation of $5,506,791. During the same period parts to the value of $441,... went from Canada to New Zealand. The value of automobiles exported by Canada to New Zealand during the preceding fiscal year was $4,787,...4 and parts $368,473.

With a view to ascertaining just what general tariff it is proposed to apply to Canada the Department of Trade and Commerce is now communicating with New Zealand. The New Zealand Government has recently changed its tariff, the general rate on foreign cars being increased from ... per cent. to 36 ... per cent. up to $1,000 in value and from 42½ per cent. to 48¾ per cent. over $1,000. There is some uncertainty as to whether the old or new general rate is applicable to Canadian exports.

Under the former rate, which applied to Canadian motor cars, the tariff inclusive of "body duty" was 20 per cent. for the first $1,000 and 15 per cent. on the value over that amount. On July 22 however this rate was increased to 21¼ per cent. up to $1,000, and 16¼ per cent. on the remainder of the value if any.

The whole question of Canada's trade relations with New Zealand will, it is expected, be canvassed by the government with a view to the negotiation later on of a new direct trade agreement to replace the one which will lapse in October.

Grow Grain At Churchill

Wheat, Oats and Barley Can Be Successfully Grown At Northern Port

The Pas, Man.—Wheat, oats and barley will be successfully grown at Churchill within four or five years. That was the prediction made here recently by D. A. Brown, of the Federal Government Experimental Farm at Brandon, Man., who has just returned from a trip on the Hudson Bay Railway.

Mr. Brown, who is supervisor of demonstration farms in western Canada, declares that Hudson Bay climate is not adverse to grain growing. With proper cultivation and good soil, grain will mature well at the seaboard, he believes.

The official inspected the first plot of grains to be grown at the Hudson Bay port. They did not fare very well, partly due to late sowing and lack of good soil, but Mr. Brown states that the experiment was well worth while. Reward and Garnet wheat attained a height of 18 inches, but it isn't expected to ripen because it was sown late. Alaska oats has made a fair showing, while Trebi barley has a good chance of ripening.

However garden produce such as radishes and lettuce, were raised successfully at Churchill this season. Potatoes did not fare well.

W. Wood, of the railway construction department of the C.N.R., was responsible for the grain-growing experiment at the Hudson Bay port.

Grains have matured well at several points along the Bay Railway this year, Mr. Brown reports.

Disease Is Spreading

Infantile Paralysis Causing Considerable Alarm In Ontario Centres

Toronto, Ont.—Infantile paralysis, the dread disease now spreading through Ontario, is to be one of the chief topics of discussion at the British Medical Association convention to be held in Winnipeg, Dr. Scott Stevenson, representing the British Medical Journal, stated here.

That the disease is slowly spreading is shown in latest reports from various medical officers of health from different parts of the province. A new case has developed at Brantford, making a total of 16 there. A young boy, Joe Wightman, Bowmanville, succumbed from the effects of the disease, and there are still four cases in that town.

In this city 32 were reported up to today, and although all appeared of the mild type, warnings have been issued to citizens to watch closely for symptoms in their children.

WORKERS ALL—

(Canadian National Railways Magazine)

The Labor Day celebration will soon take place in our city. Carpenters, moulders, bricklayers and the various other trades will march in procession. It should be an inspiring spectacle. Carlyle has paid his glowing tribute to the hard hands and bent backs and the vicarious character of manual toil, and to this eulogy ever thoughtful person will subscribe. These men are proud of their job, as well they might, for every producer of useful things is a benefactor of the race. Moreover, labor is not only the lot of man but the necessity as well, physical, moral and social. Parasitism is a crime in whatever rank it is found. All honor and every recognition to the men who form these parades but there is a tendency—and it seems evident—for these manual workers to forget the other contributors to the common weal.

A little reflection, however, will show that there are numberless others who never parade but are laying humanity under a heavy obligation. And first regarding the production of wealth—I speak as a layman and not as a skilled economist—I understand that four-fifths of the wealth of the world is produced not by manual workers but by invention and the labor of the brain through this without the co-operation of the manual worker would be useless. Most of the unimaginative people follow where others lead and do what more expert minds direct.

Were it not for inventive genius we would still be using the homely ox, or horse for transportation instead of the railway train, or employing the canoe gouged out of a log with which to cross the water. The mind that discovered and harnessed the electric current has done a wonderful service to the world and, incidently, opened a field of activity and profit to hundreds of thousands; likewise, the inventor of that marvellous instrument—the internal combustion engine has not only revolutionized travel but has given employment to millions of men throughout the world. "Better fifty years of Europe than a cycle of Cathay" but what has it done? Men of genius who can turn that genius to practical purposes.

There is another worker, however, who will not be in the procession—the farmer, (and we must not forget his wife and children) and surely it would be difficult to find a more assiduous worker or a more basal producer of those things without which we would starve. I do not know how much the product of the farm amounted to in Canada last year, but it must have run into the billions of dollars and is the greatest factor in production is the ignored farmer.

But wealth that may be computed in figures is not the only kind. There is a wealth of things intangible, which is of the most vital importance. It is the wealth of human life, the wealth of ideas and ideals, and those who produce this kind of wealth cannot and will not be ignored by any sane society.

I will not see the physician in that demonstration, yet who has contributed more to the world than he? Every life he saves has a value beyond estimable; every year he adds to life he is adding something to the assets of humanity that is not reducible to figures. We know that the span of human life has been very greatly lengthened and this has been done by those self sacrificing and indefatigable worker—the physicians who in the large place and small have given themselves without stint, or reserve, and often without neither hope nor expectation of material gain. They will not be in the procession, nor the nurses, that noble band of women who, since the days of Florence Nightingale, have done such heroic service, who work patiently, unobtrusively 12 hours in the day alleviating human suffering, ministering their help and good cheer.

The scientist will not be seen, he who in the obscurity of the laboratory is working out problems that have to do with health and wealth, who for the sake of humanity takes his life in his hands, burning in the tropics or freezing in the arctics. Who can tell what scientific has done for enrichment of human life? None; it simply cannot be told.

The educationist will not be there. Yet to quote Carlyle again, who speaking of a member of this class, "Of all the people so tourtied and lodged in the bowels of Europe none is worthier of the board he has?" We may scan and scan in vain but it is true, often accounting his contribution in our crude way, namely by dollars, of less importance than the man who sweeps our streets.

And the moral leader will be absent; he who seeks to inculcate and promote those virtues of honesty and integrity, without which our civilization would not hold together for a generation.

The parade will be good, only it will not be big enough, for every man and woman whether he, or she, works with hand, or brain, whether they trudge to their work, or go in a high powered automobile, whoever is a producer of thoughts, or things must be included in any roll of labor. They are all needed and each is needed for all, and the man who sings our songs and the man who digs our ditches, the man who moulds iron and the man who moulds character, the man who grows our wheat, and the man who bakes our bread, the man who collects the garbage and the man who gives motivation to our purposes. Every producer should be there, else it is not a true labor day. All hail to labor!

AMES CREEK

(Omitted from last issue)

Sixteen cars all loaded with jolly people turned in the gate to E. El ley's home on Sunday evening, August 10th, to surprise Ruby Ley in her birthday. Over sixty people were present. A happy evening was spent until midnight when Miss Bladine was chosen to present Miss Ley with a purse of money and expressions of esteem and good will from the many friends gathered there. A tempting lunch was served before the gathering dispersed.

Mrs. Sellend from Elk Point has been visiting with friends, here during the past week.

Pearl Patterson underwent an operation for appendicitis recently at the Royal Alexandra Hospital. She returned home last Saturday.

Several of the young people from this district were pursuing at the Elk Island Park last Sunday.

Gunvald Flaaten was a guest at the R. Nese home last Sunday.

Ruby Ley accepted a position at the A. M. Matheson real estate office at Edmonton. She commenced her work last week.

Gladys and Andrew Hillerud and Arthur Hillerud left for their home in Bellingham, Washington, last week

Mr. and Mrs. E. A. Moen and family were guests at the W. Anderson home north of Tofield last Sunday.

A quilting bee was held at Mrs. E. A. Moen's home last Thursday when several of the ladies were there and sewed a quilt for the lad ies' aid.

H. Hillerud and his three brothers were busy cutting hay on the Ley position last week, returning Friday even ing.

Some hail fell north of the railroad track last Sunday. The damage was varied.

THE LONGEST TRAIN

Which is believed to be the longest freight train on record passed through Fort Rouge (Winnipeg) yards, of the Canadian National a few days ago. Drawn by one of those heavy engines of the Mountain type, added to the locomotive power but one of control of 125 cars. Travelling westward, it carried many consignments of merchandise to western terminals and some empties returning to the elevators. It was what is known as a "single header", and although long, was approximately one mile and a quarter long. Up till one year ago, 50 cars was considered the maximum load in mixed freight or grain trains between Saskatchewan and the Head of the Lakes.

CONSUMPTION BOTHERS, RAILWAY BENEFITS

Communications, disclosing incidents grave and gay, from remorseful persons making restitution for having cheated the railway have been received by the Canadian National Railways.

A glance at the various letters display various acute angles of the mystery termed "human nature". They are pathetic, almost breathing of sleepless nights over the sin committed, which long brooding has assumed distorted proportions in the minds of the sufferers. It is the experience of officers, that conscience stricken persons who have imposed upon the railway are not in the least chary of giving their names. When conscience money is received, a check is purchased by the passenger department, which turns the amount at issue into passenger traffic receipts. From the traffic passenger department, common writer courteously to the offending person, thanking him or her for the consideration extended and politely closing the incident.

SOWING VEGETABLES IN THE FALL

(Experimental Farms Note)

Vegetables are regarded as a necessity. Everybody likes them. They are demanded all year. Fresh Vegetables are in greatest demand. Any convenient method which will provide visibly vegetables earlier than the usual way will be universally welcome. This is the reason behind the sowing certain vegetable seeds in the fall.

This procedure can be used in the village, city or farm garden. Most of our summer vegetables in garden have space at a premium. Less area is required for fall sown vegetables. Consequently the idea should meet with popular approval from that standpoint.

Of course all vegetable seeds cannot be sown in the fall and it is usually planned to seed only a small portion this way. It has been found that a general assortment of staple vegetables can be grown in this way. These include beets, cabbages, carrots, lettuce, onions, parsnips, spinach, radishes and turnips. Northern or home grown seed must be used in every case.

Prairie winters and springs vary so widely that certain vegetables will respond accordingly each spring. Spinach usually takes a commanding lead for providing fresh greens. Lettuce is usually well ahead of spring sowings. In some years cabbage progresses at an alarming rate.

Fall sowing requires some experimentation. Seeding should be done late enough so that no growth takes place until next spring. Experience shows that just when freeze-up starts is the best time. The ideal method is to brush the light frozen crust on the soil surface at this time and seed as usual. One third less distance between the rows than spring seeding can be used. Another cultural practice used in this connection is to gently stir the soil surface as soon as the land is workable in the spring. The aeration and warmth provided in this way speeds up the growth.

Moisture deficiency is our greatest single factor affecting vegetable production on the prairies. Fall sown vegetables can make use of soil moisture provided by melted snow. Such and advantage provides more rapid growth with accompanying high quality.

Beginning with the fall of 1922 staple vegetable seeds have been sown in the Dominion Experimental Station, Scott, just before freeze-up and the same vegetables were sown the following spring for comparison. Records have been kept concerning germination, rate of growth, ready for use, yield and quality. For the most part the germination has not been so uniform in the case of fall seeding, which has meant a slightly higher yield. Fall sown vegetables are invariably earlier and the quality is equal to or better than spring seedings. Vegetables found satisfactory for fall sowing have already been tested. Covering has now been over a period, fall sown vegetables could not be considered successful on two occasions.

An early spreading of spring fall sown vegetable seed together is usually disastrous for fall sown vegetables, but about most seasons, are favourable, it is an easy method of having home grown vegetables of good quality at an earlier date than is possible by the usual spring cultivar seedings.

In some parts of the prairie provinces fall seeding has not been found satisfactory. Consequently it is a small scale at first to determine if results are good where you live.

SERVICE IN UNITED CHURCH ON SUNDAY

Rev. Alex Stewart will preach in the United church next Sunday evening, August 31st, at 7:30 p.m.

The United Church Sunday School will re-open on Sunday next, August 31st. A full attendance of scholars and teachers is desired. Usual hour in the morning.

He Grew Prodigious

Henry Ford Says That Mass Production Is Not Responsible for Standardized Goods

Modern industry gives the individual worker a better chance than he has ever had before, and there is no probability that mass production of commodities will ever mean a possibility to commons. Henry Ford declared in an interview at West Orange, N.J.

Mr. Ford is a member of the advisory board of the Thomas A. Edison scholarship competition, and was present at the welcoming ceremony to the scholarship candidates, at the Edison plant. Mr. Ford expressed his views on a wide range of subjects while he sat on a board room table in the Edison laboratories and fussed himself with a straw hat.

"American business and educational systems could be very much improved, Mr. Ford held, and changes often lead to better conditions because of the experience they involve even if they are not good or are too high-priced."

Harvey Firestone, who sat next Mr. Ford on the fence, agreed with his views on the subject of over-production, and said that the demand for rubber would keep pace with production.

In the case of wheat and cotton, Mr. Ford added, "We've got to find new uses" for them.

"We are experimenting now up at Dearborn, trying to find new uses for wheat straw, and various other things," he continued.

Declaring that industry and culture must go hand in hand, Mr. Ford said that "industry itself is a part of culture".

"The fact that a man knows a lot about industry, does not prevent his using good grammar, standing straight and appearing well," he said in reply to a question as to his personal appearance. "We need beauty in everything, and culture should be a thing of practice, not something apart. Every article should be a thing of beauty, well made and well thought out, and then there will be a market for it."

Mr. Ford said the schools do not teach enough things and not enough about each thing.

School Teachers Stranded

May Be Forced To Remain On Island For Year On Account Of Sinking Of Liner "Tabit"

Two Seattle school teachers may be forced to remain for a year on the island of Saratanga as a result of the sinking of the liner "Tabit."

The teachers, Miss Jean Lane and Mrs Irene Lansing, planned to return to the United States on the "Tabit." The liner stopped at Saratanga once a year and was the only trans-Pacific ship calling there She sank while approaching the island.

Miss Lane and Mrs. Lansing talked relatives of their predicament. The Saratanga natives decided to provide special transportation for the teachers.

Capture French Raiders

Two State lottery officials are waging a war on French bloodsucking insects in Irish waters. Three French crews have been captured in the last five months. The last raid resulted in the capture of three vessels, the captains being fined and their nets held. Inspector Irish fishermen then stood near Dublin 200 lobster pots left by the French raiders.

Fly Across Russia

John Henry Mears, globe girdler, one time pilot, Henry J Brown, of Cleveland, will shortly fly in a machine across Russia and Siberia, surveying for a proposed round-the-world flight in the summer of 1931 Mears and Brown returned to New York from Harbor Grace, N.S., where their plane crashed up on August 3.

HER FAT IS MELTING FAST AWAY

All over the world Kruschen Salts is getting the credit for bringing trim figures to the attractive, fun-loving girls. Kruschen Salts is the most successful reducer.

Here's the recipe that banishes fat and brings the happiness of health and vivacious energy:

Every morning take one half teaspoonful of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for "It's the daily dose that takes off the fat." Then raise a moderate amount of daily amount that every particle of fat is melted away and healthful vitality and gaiety are expelled from the system.

All the worn out tissues, flabby kidneys and bowels are toned up and the pure, rich blood circulates. Nature's all-day-long aim is control to every organ, nerve and tissue of the body, and this is followed by that Kruschen feeling of energy, health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

LUMBAGO?

A pain in the lower part of your back can torture you. But one thing, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, sciatica, headache, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, Insist!

Will Sail For India

R-100 To Leave On Voyage Earlier Than Was Expected

The new airship, R-101, sister ship of the R-100, which recently completed her successful trial trip, will leave for India nearly a month earlier than had been originally expected.

She will take the air again on September 15, and a few days later will start on her first voyage to India, on route to Lonadia, which is 10 miles from Cardington.

The date for the voyage has been advanced with the idea that it might be possible to make the trip in the middle of the Indian people from some of the disturbances on the eve of the proposed round table conference. Earlier arrangements serve also to avoid the heat of the monsoon season in the future of the airship commerce. In official circles, the voyage of the R-100 is regarded as an entirely successful experiment.

Already the mechanics and scientists have left Cardington for London.

The R-101 differs in several respects from her predecessor. She is 732 feet long which is 42 feet more than the R-100, and has several additional reservoirs provided for safety on the voyage and comfort of the passengers.

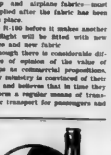
One of the features will be a smoking compartment, provided with small windows where passengers may keep matches, tobacco and cigars. On the R-100 smoking was absolutely forbidden, mainly because of the possible danger from gasoline fumes, a danger that will hardly exist on the R-101, which is fitted with crude oil engines.

On the Indian voyage, she will be commanded by Flight-Lieutenant Irwin, and Major Scott will again be on board.

One lesson learned from the Atlantic flight, is that a new coating or "dope" to the special varnish used for airship and aeroplane wings may be applied after the fabric has been put in place.

The R-100 before it makes another trip flight will be fitted with new engines and new fabric

Although there is considerable difference of opinion as to the value of airships as commercial propositions, the fact that they are capable of their utility and between that in time they will form a regular means of transatlantic transport for passengers and mails.



If baby has COLIC

A CRY in the night; Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can be given to the baby in arms from birth to 10 or 15 years of age. Whether it's colic, flatulency, constipation, sour stomach, diarrhoea, or diarrhoea. When they complain, you'll know by the breath in bad, Whatever there's a case of gastric regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a mere liquid dose of Castoria is always better for gassy children than strong medicine meant only for adult use.

THE CENTAUR COMPANY

CASTORIA

Advertising England

No Country in the World That Offers Greater Attractions

Sir Herbert Austin, on flying east of Lord Roberts, "doesn't advertise." Sir James Parr, late high commissioner for New Zealand, has been talking advertising men. In London, that Englishmen are too reticent."

Why, he asks, should it be "bad form" to talk about themselves and their country, especially when, as he says it, no other can compare with it in point of "human interest."

"What country has such wealth of historical places, such cathedrals, such homes both great and small?" he wants to know. And so for England's countryside no apologies, he says, "there's nothing on earth to equal its beauty."

Yet somehow England and its former town, in spite of a lack of capacity for advertising, seem to be fairly well-known abroad. Consider London, for example.

It was packed with distinguished visitors. They ranged from the King of Spain, Prince Dismarck, of Bismarck, to Prince Daudo, of Montenegro, to the newspaper men of the Empire with the latest tennis celebrity and the latest prizefighter on the map. Everybody wanted to see the sights of the earth. The secret of it, of course, is that nowhere can you find such a wealth of entertainment, collected and concentrated packed into a few square miles as you find in Britain during the season."

You can have everything from grand opera to Shakespeare at the Royal Academy to a military tattoo, from a cricket match at Lords to a golf championship, from a rowing race on a Henley course to a hardly a day when some function or colorful event does not help to fill the calendar.

Naturally, it costs a great deal to live in these delights. Tea and sandwiches ranged from $50 to $150 a day at a luxury hotel in London. And if you have a fashionable flat to rent in the centre of things you can hand out $5,000 a week to your landlord and still think he is obtaining only his due.

Should you be in the millionaire class, you can live even more expensively. You can take a furnished house in the West End. It will be the last word in labor saving devices and ready to walk into. A thousand dollars a week is not considered at all unreasonable for such a temporary shelter.

Active At Old Age

Sandspeed Cahman Is Still Pursuing Occupation At the Age Of 80

When should a man retire from active life, and how should he do it? A Budapest cahman thought that question for a good age at which to stop work, but determined to do it with a flourish." He drove his cab all over the continent, and then spent a good deal of attention by calling at the Ritz Hotel Paris-currently—the best horse cab in Europe. Then, on his return, he presented the cab to the Budapest Museum. But he wasn't allowed to retire. The municipal authorities were so impressed by his meticulous sprint that they presented him with a fine motor cab and now though he is over 80, he is touring Europe once more—this time in the cab. Old men are proverbially slow at carpetering then "greybeards" used to be the favourite epithet to apply—alas in those adventurous sidecars.

Oriental Poppy

New Bloom Is Developed By Residents Of Buenos, B.C.

An Oriental poppy, developed from a seedling by C. Reed, of Quesnel, B.C., has been given an award of merit by the Royal Horticultural Society, and assigned the name "Quesnel Jem" after the district in which it originated. The large blossoms vary from 10 to 11 inches across on stalks over 4 feet 6 inches in height and of a flower in dark red. The seedling appeared voluntarily in Mr. Reed's garden, and he named it.

U.S. Cost Of Living

The United States Department of Labor through the bureau of labor statistics, has issued a report on changes in the cost of living in the United States in recent years. It shows a decrease of 2.1 per cent between May 15, 1929, and June, 1930. The information given is based on actual prices obtained from merchants and dealers in 32 representative cities.

Radio as for appears to be a future in India. Atmospheric conditions and lack of interest of a large portion of the people are two reasons, but the principal one is said to be the tax on receiving sets.

New South Wales, Australia, has banned all curb gasoline pumps.

Minard's Liniment for Lumbago and Neuralgia.

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its tendency is to become chronic.

Mrs. E. F. Stewart, Flindlater, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

Do the same for the past 69 years; put up only by The T. Milburn Co. Ltd., Toronto, Ont.

Explores Arctic With Submarine

Sir Hubert Wilkins To Cross Polar Regions By Undersea Passage

Sir Hubert Wilkins, arriving in New York on the North German Lloyd liner "Bremen," announced that he had virtually completed plans for his undersea passage to the North Polar regions, which he will undertake next summer in an electric submarine, which will be placed at his disposal by the Navy Department.

He has gone to Philadelphia to examine the discarded submarine O-12, which he plans to refashion for "Nautilus." In this out-of-date craft, Sir Hubert, with several other scientists and a crew of 14, will explore beneath the ice-choked waters for a period of about 90 days.

Sir Hubert expects to cover some 2,500 miles during this period. The submarine will be equipped with an ice-cutting device that will bore a hole upward, when the underwater super-structure is close to the bottom of the ice floes. He will then be able to send men to the surface of the water through the hole to conduct experiments and make observations.

The submarine will attain the speed of between three and four knots, when submerged He expects to leave New York next May in the submarine and proceed to Spitzbergen. From there he will then begin his undersea studies of currents, etc., and will pass under the North Pole emerging in the ice floes of the Behring Sea.

During the passage beneath the surface of the northern waters, Sir Hubert plans to broadcast daily with a special radio set. The submarine is 175 feet in length. Among those who will accompany the explorer on his Polar voyage will be Dr. B. V. Bwerdrup, who conducted Amundsen on several explorations, and Dr. Burnsig Motodon.

A Valuable Stamp

One Cent Stamp Issued Many Years Ago Now Worth $40,000

Probably the most elusive example of the economic law that controls treasure value is on exhibition in Boston Mass a one cent stamp worth $40,000

It is the property of Arthur Hind, Utica N Y., manufacturer of textiles. Owner and philatelist whose gigantic collection of stamps compiled over a considerable length of time about half of the National Philatelic exhibition of 1930, which was opened at Horticultural Hall in Boston Mass.

The story of the stamp goes back to 1856 and to Britain Guiana. The postmaster of that then isolated colony had run short supply of stamps enhanced—In the emergency a local printer was called into conference, and, with the aid of a pot of a ship he owned from a local newspaper and a hand-set inscription the stamp was turned out

It was in use for the regular supply arrived and the makeshifts were destroyed. Many years later, the stamp had become one of the possession of Hind for $2,500, and today collectors say it is worth at least $40,000

Little Helps For This Week

"Let thine heart keep my commandments."—Proverbs iii 1

Rabbi Isch-shalom had the old custom of reading a text of God's will; And doing that, though for a space the heart-beat long may wait a pace As full of grandeur and of grace As pillars of a market house

—James Russell Lowell.

God would have us live; if we live we cannot but believe, while all the knowledge in the universe cannot make us live. Obedience is the road to all things. It is the only way to grow able to trust Him. Love and faith and obedience are sides of the same prism.—George MacDonald.

Nitzie Cattle Doer

The Chicago Critical Institute Makes Interesting Discovery

The Chicago Critical Institute experiment, excavating at Alsobar, has discovered a large Nitzie cattle door with remarkably well preserved representing door The door has been removed to the Nitzie Museum.

Road builders in Krakowva recently uncovered a Stamford stone, which aroused the curiosity of a highway engineer. He continued the digging and found Byzantine vases and pieces of money, apparently deliberately buried beneath the path, which may mark a treasure trove

Peruvian Rain ... the one hotel required for the dainty woman. Dignified by the best of service and hospitality. Conducted by the tiresome Hospitality ... Imperia a revelry service. Tones up the skin. Soothes and nerves all day ... Soak roughness or chafing caused by wind and other weather ... Gives complexion soft and white ... Creates an elusive, essential freshness charm. Perusa Balm is indispensable to women of refinement.

Historical note When Lincoln was elected to Congress from Illinois his campaign expenses, paid by his party, were 75 cents.

Tarantae is to have a seamless tube mill costing $2 000 000

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids Each bottle contains full directions—any druggists

A Cheerful Message

Predictions of forthcoming markets and events always have a degree of uncertainty. Therefore it is hoped all those who are predicting a lean period for farmers are wrong. Just the same it would be better to play safe and milk more cows. The dairy industry is the silver lining to the agricultural cloud at present hanging over us.

Weekly Review Of Western Markets

CATTLE

BEEF—Trading at Calgary during the past week has been fairly active on the good quality offerings. Prices have held about steady. Choice heavy steers made from $5.25 @ $5.50; choice light $5.25 @ $5.75, with odd ones slightly higher; good $5@5.25; medium, $4.75@$5, and common $4 @$4.50. Choice heifers brought from $5.25 @ $5.50, with a few at $5.75, and the good kinds at $5 @ $5.25. Choice cows made from $4.25@$4.50; good, $4@4.25; medium $3.50@$3.75 and common from $2.75@$3. Canners and cutters went over the scales at $1@$2. Choice bulls brought from $2.50@$3, with odd ones at $3.25, medium $2@$2.50, and canners from $1.50 up. Choice light calves sold at $7 @ $7.50 for the bulk, with common kinds at $4 @ $6. FEEDERS-STOCKERS—A few stocker sales have been noticeable this week, but trading on the whole is not active. Feeder Steers made from $4@$4.50; stock steers $3@$3.50; stock heifers $3.50@$4, and stock cows $3@$3.50.

BEEF—A better tone has been noticeable on the Edmonton market this week. Buyers are keener and trading fairly active. Market slightly firmer. Choice heavy steers sold at $5.50@$5.75; choice light from $5.75@$6; good $5.50@$5.75; medium 4.50@$5, and common from $3.50 @$4.25. Choice heifers brought $5.75@$6, and good kinds $5.25@ $5.50. Choice cows went over the scales $4.75@$5; good $4.25@$4.75; medium $3.50@$4; common $2.50@ $3.50; canners and cutters from $1@ $2. Choice bulls brought from $3@ $3.25; medium $2 @ $2.50 and canners from $1 up. Choice light calves made from $8@$9 with the common kinds selling at $5 @$7. FEEDERS STOCKERS—Trading in this market has been good and salesmen have cleaned up offerings readily. Feeder steers made from $4@$5, stock steers $2.50@$5, stock heifers $3.50 @$4.50, and stock cows from $2.50@ $4.

HOGS

Market at Calgary showed strength this week. Monday bacons brought $10.20, while today (Thursday) they were bringing from $10.75@$10.85, with selects selling at $11.24@$11.35, and the butchers at $10.40@$10.50, off cars.

Market at Edmonton also higher bacon being quoted at $9.85; selects $10.35, and butchers $9.50, on a fed and water basis.

GRAIN

Meagre export business over night weakness at Liverpool, favourable European weather and favourable prospects for the Australian crop, caused the Winnipeg wheat market to drop on Wednesday. At the opening liquidations were heavy and this resulted in October touching a new low for the season at 89⅛c. This is also the lowest point this month has hit since 1915. Before the close the market worked up to a point 3-4c under previous close.

BUTTERFAT — BUTTER — MILK

BUTTERFAT—Slight decrease in receipts noticeable, but only seasonal decline. Prices holding steady at: Special 25c@27c; first 23c@25c, second 20c@22c at country points and centralizers. CREAMERY BUTTER—Make holding up well, market firmer, and one cent advance scored on Monday: No. 1 cartons now 23c; No. 2 cartons, 21c; No. 1 prints, 22c; and No. 2, 20c. Shipments being made to coast. Storing in progress. Sales in province holding up very well. DAIRY BUTTER—Less fresh made stocks being offered now that harvesting is in full swing. Large supplies still on hand. Demand good for fancy table; other grades slower. Fancy table bringing 24c; No.1, 17 @18c and No. 2, 13c. MILK—Receipts easing up, but still large surplus. Price steady at $2.20 per 100 lbs., basis 3.6.

POULTRY — EGGS

POULTRY—Offerings fairly liberal and bulk of supplies are chicken, although quite a few fowl also arriving. Demand reported as fair, but purely local. Prices steady: No.1 fowl, over 4 lbs., 10c; under 4 lbs., 8c; roosters, 5c and broilers, 12c. EGGS—Market moved higher this week by 1c. Extras, 23c; firsts, 21c and seconds 17c. Supplies in most cases have eased off. Large percentage of hot weather stocks coming. Demand moderately active.

HAY — OATS

HAY—Harvesting operations holding back deliveries. Demand only limited. Crop of very good quality; prices steady. Upland bringing $12 and timothy $17 per ton at country points. Upland quoted at $14 per ton on loose hay market. FEED OATS—Market easier, with quotation of 28@30c prevailing. Receipts light, but are sufficient for demand. Believe stocks in country are fairly heavy.

—The Market Examiner

Local and Personal

On Saturday the weather changed to a cold blustery day. There were threats of snow, but luckily in this district no snow fell, though a little snow fell farther north. Saturday, Sunday, and Monday nights were quite cool and slight frosts were registered each night. The weather is now warming up again and we are all looking forward to good harvest weather.

Miss Rita Burnett left for Montreal on Tuesday.

Miss Margaret McCauley left for Lennoxville, Que., on Tuesday. Margaret will finish her high school course there.

The Misses Winnie Worton and Patricia Burnett visited a week with Mrs. Geo. Strange of Edmonton, returning on Wednesday

Mrs. C. J. Bain and baby daughter of Rochester, Min., are visiting at the Secord home.

Miss Jean Secord has returned to Wainwright to resume her duties as teacher in the Wainwright high school.

Mr. and Mrs. Noland and Miss Thelma Noland, left on Saturday for Iowa, U.S.A. They entrained as far as Winnipeg, from which point they will motor to the homes of relatives

Mr. B. C. Lovel, at one time a resident of Tofield passed away at Calgary, last week. Mr. Lovel has been ill for several years. He was a brother of Mr. Bert Lovel, of Tofield.

Miss Helen McCauley left this morning (Wednesday) for Camrose, where she will attend normal school.

The Misses Mary Burnett and Edythe Barden visited the city for a week, being guests at Edythe's aunt.

Tofield friends of Mr and Mrs. Wm. Burchell, of Tawatinaw, Alberta, will be interested to learn of the marriage in Edmonton, on August 12th, of their eldest daughter, Marjorie Phyllis to Mr. Floyd Bunker, of Tawatinaw.

Mrs. Bruce and son Jimmy, returned from Cooking Lake this week end.

School opened on Tuesday, the teaching staff for the year being. Principal, Mr. Bullock; Mr. McIntyre; the Misses Bell, Wingrave, and Forster.

Mr. and Mrs. Cary returned from their vacation of two weeks duration, over the week end.

THE STORY OF SATURDAY NIGHT'S PICTURE

Maurice Chevalier, a Parisian junk dealer, jumps into the river to save little David Durand, but fails to rescue David's mother from the suicide she had planned to share with her son's fate.

Maurice takes him to his grandfather, Russel Simpson. He falls in love with the child's aunt, whom he meets at Simpson's home, but Simpson bitterly opposes the match.

From the streets of the Flea Market, where he sings, Maurice attracts the attention of John Miljan, theatre manager, and his wife Margaret Livingston. They give him a tryout in their show and he makes good.

Sylvia, broken hearted, watches chorus girls caressing Maurice at a dress rehearsal. She tries to get him to give up the stage. He will not heed her. Simpson learns of his daughter's love for Maurice and is furious. He starts for the theatre, pistol in hand, the opening night.

Sylvia realizes the danger to Maurice and telephones him to meet her. When they meet she fires a pistol and has him arrested for attempted murder. Maurice convinces the police that he should be allowed to return to the theatre. Sylvia then breaks down and admits that her plot was to protect Maurice from the danger of her irate father.

Maurice goes to the theatre where he appears, not as the "Mysterious Prince"—the role he had been billed for—but as himself, in his junkman's clothes. "I am not a prince, but a junkman," he tells the audience as he sings for the last time in a theatre.

Triumphant, he has renounced his career for his love for Sylvia.

Lindbrook

Cutting is general here now, that is between the wet days which have hindered haying and harvest work considerably of late.

An old time picnic was held last Sunday week at Elliss' beach, Hastings Lake, several old familiar faces were missed and a few new ones added.

Mrs. C. J. Kortsman was called suddenly to the Alexandra Hospital Edmonton last Sunday night, her father had undergone a serious operation and his life was despaired of. He passed away shortly after her arrival. The funeral was held at Kingman and many friends from here attended same.

Congratulations to the grade eight pupils of Lindbrook school on passing their exams, there being only one failure.

Mr Harry Orilla of the C.N.R. section gang here, you all know him, the lad who puts your mail on the train etc., is leaving this week on a three months leave of absence to visit his home in Europe.

Mr. Alan Silverside has been in the Military Hospital Edmonton for the last three weeks taking a course of treatment for complaints caused by war service.

Mr and Mrs. A. K. Hicks were visitors to the city last week.

Miss Elizabeth Clarke is away on a visit to Mr. and Mrs. L. Huggins of Edmonton.

Mr. John Swift of Tofield, spent a few weeks of his vacation at the home of Mr and Mrs. W. Hooper at Lindbrook, and John reports that rural life is the thing that suits him fine.

Mr. and Mrs D. Dyer and Mr. Norman Dyer and Miss Joy Dyer visited friends in Lindbrook on Sunday. Mr. Dyer being a former resident of this place.

The road gang is moving to Lindbrook we hear. Now where shall the detour be? or in other words, "Where do we go from here"?

"PACKAGE MEAT" IS NEW STUNT OF PACKERS

Officials of the Dominion livestock branch are watching with interest the progress of the new system of marketing meat known as the "package meat" or "rapid freezing" method. It has already been successfully introduced in the larger retail distribution centres in the U. S., and bids fair to revolutionize meat retailing methods in the British market.

By the new process, cuts of beef mutton, lamb, pork, and veal are dressed at the packing plant, packed in individual cellophane wrappers, and subjected to rapid freezing at very low temperatures.

It is found that by "snap" freezing only tiny ice crystals are formed in the flesh of the meat, preserving all its food qualities quite unimpaired. The new system provides a serious threat to the future of that old familiar institution, the butcher shop.

The Market Examiner

NEW BUTCHER SHOP

A new butcher shop for Tofield is announced. Mr. Hallet, of Hardisty, was in town last week and we understand made arrangements to occupy the building formerly occupied by the Tofield Farmers' Supply Co. Mr. Hallet is a fully experienced butcher and meat cutter.

THE HOLY TRINITY CHURCH

TOWN GOSSIP

A lady who has seen sixty or more summers come and go, was sitting in the Variety Theatre on Saturday night enjoying the showing of "Such Men Are Dangerous"—an appropriate title.

* * * * * * *

A young gentleman hurriedly came in and sitting down beside the lady, took her hand and said, "I'm so glad you are here dear". The lady was too dumbfounded to answer, but just then the reel ended and the lights came up and she managed to say, "I think you have made a mistake", to which the gentleman replied, "By gosh, I have", and hurriedly left

* * * * * * *

The attendance at the Joe Marks, Bert Johnston show on Wednesday was not much better than the preceding nights. The programs were good, the sleight of hand work of Mr Johnston was quite good, in fact the best part of the entertainment

* * * * * * *

Good sleight of hand work is only done well after much practice, and when done in view of the audience is interesting to watch. At least I hope I will never become so old and crabbed as not to enjoy the look of wonder and delight on juvenile faces when rabbits and doves appear apparently from nowhere.

* * * * * * *

The hand tapping, ball floating, handkerchief bobbing tricks did not receive the hearty applause the straight sleight of hand work did. Probably because most of them present had an idea how the hand tapping business was done. If they do not, they should, for it has all been explained and demonstrated to them.

* * * * * * *

Perhaps they were too polite to say anything to Bert about it—hated to spoil his fun so to speak.

* * * * * * *

The programs were somewhat marred by the verbal jabs at the deadness of Tofield. Those present could not be responsible for the non attendance of others and consequently should not have been made the target of so many "slams" regarding the town in which they live

* * * * * * *

Mr. and Mrs. Johnston are good sports. Bert, a showman from head to toe, generous, loquacious and with an intense pride in his ability to entertain, amuse and harmlessly "fool" the people. Mrs. Johnston is quiet, reserved and as unlike a show person as one could imagine. It is easier to associate Mrs. Johnston with a [illegible] and a flower garden than a show stage. Yet she does a real good "magic" turn; probably the only silent magic turn in existence.

* * * * * * *

"Mr. Editor", said Mr. Johnston shortly after the first performance "if you know of any one who cannot really afford to come to the show just let me know and I will give you passes. Especially kids."

* * * * * * *

You can if you like, contrast this with the plea of Chautauqua, at its first performance here, through the local president when he said that if there were any families in need, it would be nice if those present would buy them a ticket.

* * * * * * *

The Johnston Marks show did very well at Ryley

* * * * * * *

There was a time when a ride in an automobile was an outstanding event. Some friend more wealthy than yourself invited you to go for a ride in one of the early cars. You climbed in, and after a roar, the engine settled down, and away you went. Seated comfortably and with a beautific smile on your face watched the country roll by and said to yourself—this is the life

* * * * * * *

Later the novelty was not so great, even so it was not without expressions of wonder that one observed members of the Mennonite group bringing cream cans full of cream into town in McLaughlin saxes.

* * * * * * *

This however has been topped, for on Monday evening, a farmer brought a calf to town in a sedan or coach.

* * * * * * *

Quite classy travelling for the calf even if it did not know where it was going, but only that it was on its way.

* * * * * * *

To be "Champion Athlete of the World" would be no small achievement to-day, nor was it some number of years ago, when Mr Johnston enjoyed the distinction. Quite recently I had an opportunity of perusing the press book of Mr Johnston. It contained press clippings, copies of advertisements, posters, programs, etc., of events as far back as 1882.

Mr Johnston in the general athletic line took them as they came. The high finance with sport nowadays had not been discovered, as a wrestling match between an Irishman and Johnston who was Scotch-Canadian proved. This match advertised as a world championship event, was for a prize of one hundred dollars.

* * * * * * *

What would a world champion do today for one [illegible]? Not very much

Tea is a minor expense why not drink the finest
"SALADA" TEA
'Fresh from the gardens'

Getting Back To Nature

Summer vacation days are practically over and boys and girls, youths and maidens are getting back to their school books and studies while father returns to his office or store and mother to her varied household activities. If these vacation days have been sanely and sensibly spent the result is that those who have enjoyed them go back to their studies or work refreshed in mind and body, physically strengthened, more alert mentally, and in every way better fitted for the duties that lie ahead, with stored up energy from the life-giving rays of the sun to carry them through the shorter winter days.

A well spent vacation, however, means more than this, especially for the young. There is no period, no one month or day throughout life when our education is complete, when we are not learning something, absorbing some new and possibly lasting impressions, storing up additional information, gaining in knowledge. Because for a few weeks or months we abandon the school room and text books for a camp in the woods, or a motor trip, or a sojourn in the mountains or by the sea, does not imply that during such time our education comes to a full stop. Quite the reverse is true.

Instead, living for a few weeks in a summer cottage by one of our lovely western prairie lakes, boating, bathing, fishing, rambling through the woods by day, watching the glorious sunsets and beautiful dawns, lazily contemplating the star-sprinkled sky at night, living the simple life both in food and dress, one is inclined seriously to question whether in this intense, highly organized mechanical age we are not beginning to lose some of the best things in life and to substitute the artificial for the natural.

For example, are not those responsible for our educational system, the training of our boys and girls for their life work, not missing something very vital and important in their programme of studies? Nowadays we take a boy or girl at the age of six or seven and introduce him and her to the great realm of books. Thus early in life we open up a new world to them, and from that time onward the tendency is for them to turn only to books, or to their teachers using text books, as the source of all information. Boys and girls may thus become great students of books, but they lose the greater pleasures, the romance, the fine inspiration which comes from the study and observation of nature itself and the wonderful works of nature.

The writer confesses that he always liked the ideas and ideals and programme back of the Boy Scouts and Girl Guides movements, the training of youth in the art of close observation, of learning by doing. We like the idea of our Canadian boys and girls obtaining a knowledge of our flowers and trees, our birds and beetles and flies, yes, even our weeds, from nature ...

No Reciprocity

British War Veterans Will Have To Pay $10 Visa Fee

Eighteen British war veterans, coming to the United States for a [illegible] will be required to pay the usual $10 visa fee each, despite Great Britain's courtesy a few years ago in admitting several hundred American Legionnaires without charge.

Sir Ronald Lindsay, British ambassador, was informed in a note made public recently that the State Department regretted its inability to comply with his request for a blanket visa, but that the law gave it no alternative. A formal reciprocal agreement would be necessary, the State Department informed Sir Ronald.

Bright Eyes, Rosy Cheeks

The Birthright Of Every Girl

Dull eyes mean misery and weakness, a sure sign of a bloodless condition. Anaemic girls and women have dull, heavy eyes with dark lines underneath. The bright eyed girl or woman is always happy and well.

There is one way to make the eyes bright, to bring the glow of health to pale cheeks: that is to invigorate the body with new blood, rich, red health-giving blood. Dr. Williams' Pink Pills do this and they do it well. Concerning them Mrs. Robert Devitt, Brougham, Ont., says: "My daughter became so ill and nervous we had to take her out of school. She was pale and thin, her eyes were dull and the least exertion upset her. I began giving her Dr. Williams' Pink Pills and in less than six months you would not know her. She gained in weight and strength and is now the picture of health."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Wonderful Man

Sir Wilfred Grenfell "Father" Of Labrador Is Well Named

That wonderful man, Sir Wilfred Thomason Grenfell, K.C.M.G., "father of Labrador, will shortly be visiting London, when a Mansion House meeting will be held in his honor.

A doctor by profession, he has a passionate love for the sea, and has done much for the benefit of North Sea Fishermen.

In 1892 he went to Labrador, where he built five hospitals, seven nursing stations, two orphanages, two large schools, several co-operative stores, in addition to setting on foot much industrial work. In short, he has completely revolutionized Labrador.

Although 65, he still takes an annual cruise in one of his hospital steamers along the Northern Newfoundland and Labrador coasts. His work in Labrador is carried on under four committees, one British, one Canadian, one Newfoundland, and one American.

He is an Oxford man, and played for the university in the Rugby football team. In 1929 he became Lord Rector of St. Andrews University.

British Rule In India

What England Has Done and Can Do For People Of That Country

"Doncaster" writes as follows to the Canadian Churchman: The achievements of England in India during the last century, I think I may safely say constitute one of the brightest pages in the history of our race and Empire. Like all human records, it is not of course without its blots. But I think it has on the whole fully justified Macaulay's closing words in his celebrated essay on the character and work of Lord Clive. "If in India the yoke of foreign masters, [illegible] the heaviest of all yokes, has been found lighter than that of any native dynasty, if that gang of public robbers that once spread terror through the whole plain of Bengal has been succeeded by a body of functionaries not more highly distinguished by ability and diligence than by integrity, disinterestedness and public spirit, if we see men like Munro, Elphinstone and Metcalfe, after leading victorious armies and deposing kings, return proud of their honorable poverty, the praise is in no small measure due to Clive." But to me, and I believe to the great majority of Britons throughout the Empire, England's [illegible] in this connection will be the gradual fitting of the inhabitants of the Indian peninsula for self-government [illegible]

Test Dirigible Possibilities

Series Of Flights Between England and Egypt This Winter

Commercial possibilities of British dirigibles will be tested in a series of flights between England and Egypt this winter, according to Sir John F. A. Higgins, of the British Air Ministry, who was in Ottawa, recently.

The durability of the R-100 was amply demonstrated in its trip to Canada, he said, but data on costs of operating a regular service must be obtained.

Weak After Operation

"I was very weak after an operation. My nerves were so bad I would sit down and cry and my husband would not go out and leave me alone. Now my nerves are much better, thanks to a booklet that was left under the door. Lydia E. Pinkham's Vegetable Compound surely put me on my feet. I have taken eight bottles. My friends tell me I look fine. My sister has taken this medicine too."—Mrs. Annie Walton, 67 Stanley St., Kingston, Ontario.

Lydia E. Pinkham's Vegetable Compound

A Belated Message

Message Sent By Arctic Explorer 28 Years Ago Has Been Found

A cork flask containing a message written in 1902, by Evelyn Briggs Baldwin, leader of a United States exploring expedition to Franz Joseph Land, was found by a member of the Soviet Arctic expedition to the same northern country. The message, discovered 28 years late, asks that shipment be rushed of fuel, sleds, dogs and food.

PARLIAMENT TO OPEN ON MONDAY, SEPTEMBER 8

Ottawa, Ont. — Parliament will open on Monday, September 8. Official announcement of the date of the opening was made by Sir George Perley, acting prime minister and war-time Canadian high commissioner in London, England.

The hour set for the opening, Sir George Perley stated, is 12 o'clock noon, although the more formal procedure will not take place until 3 o'clock in the afternoon. This arrangement will permit the House of Commons to get right down to business on the first day of the special session to deal with unemployment relief, and doubtless take some action on the tariff. This procedure, in view of the nature of the coming session, will be somewhat different from the usual opening.

Members of parliament will assemble in the House of Commons at the noon hour, with Arthur Beauchesne, clerk of the House, presiding. After assembling, the members will proceed to the senate chamber, where the deputy governor-general will be present and upon the direction of His Excellency will return to the Commons to elect a Speaker. Adjournment will then be made until 3 o'clock, when, with the pomp and ceremony of tradition attendant upon the opening of parliament, Viscount Willingdon will arrive from Rideau Hall and proceed to the Upper Chamber. His Excellency the Governor-General will read the Speech from the Throne.

The address in reply to the Speech from the Throne will then be moved by the mover and seconder. Former Premier Mackenzie King will then speak, followed by Premier R. B. Bennett in his initial address on the floor of the House as Prime Minister. In all probability, Robert Gardiner, U.F.A. leader, will continue the discussion and the debate will have the right-of-way until its termination.

Has Faith In Canada

Premier Brownlee Is Optimistic Over Future Of Dominion

Simcoe, Ont.—Speaking before the Simcoe Rotary Club, Hon. John E. Brownlee, premier of Alberta, and distinguished son of Norfolk, commented on the subject of immigration and unemployment in the province of Alberta.

Referring to the continued influx of immigrants to the West, he said: "They have been coming into the Peace River country at a great rate in the last couple of years. You cannot continue to pour people into any country like that without experiencing a set back. The country again cannot assimilate them and it becomes a serious problem when an era of low prices and falling markets sets in. Many easterners have been unable to understand why Alberta wanted the bars up against immigration. The present situation affords the answer."

At the same time Premier Brownlee took occasion to refute newspaper reports of Red activities in Alberta. "You will find more Reds in the city of Toronto or the city of Hamilton in one day," he declared, "than you would find in our province in a year."

He defended the policy of the western Wheat Pool in connection with marketing the wheat crop, asserting that the pool had always been exporting its just share. "It is just one of those cycles," he believed, "when there is an over production in the basic commodities of life and the country suffers a temporary depression."

Premier Brownlee declared himself to be an optimist about the future. "It may be one month, two months, a year, or maybe more before conditions right themselves, but of the future of this country we can have no doubt."

Proposed Changes In Homesteading Policies

Will Be Presented To Government By Saskatchewan Commission

Saskatoon, Sask.—Findings of the Royal Saskatchewan Commission on ...

INITIAL PAYMENT OF POOL IS SET AT SIXTY CENTS

Winnipeg, Man.—Days of anxious waiting are over and now the 134,000 western farmers, members of the prairie wheat pools, know what the initial payment is to be on the 1930 crop.

It will be the lowest in the seven-year history of the pools: 60 cents a bushel on wheat, oats, No. 2 C.W., 30 cents; barley, No. 3 C.W., 25 cents, rye, No. 2 C.W., 35 cents, and flax, No. 1 N.W., $1.25. The 60 cent payment on wheat will be made on the basis of No. 1 Northern Grade at Fort William.

Along with the official [illegible] ment from A. J. McPhail, [illegible] of the Canadian Co-operative Wheat Producers Limited, the central selling agency of the pools, and from Premier John Bracken, of Manitoba, came a plea to the creditors of the western agriculturists to be lenient. The same plea was made in Regina, at a conference of wheat growers, business men, and members of the Saskatchewan Government, under the leadership of Premier J. T. M. Anderson.

Both Mr. McPhail and Mr. Bracken drew attention to the serious situation facing the prairie farmers, who, for the second year in succession, in face of depressed world grain values, are now harvesting a crop below the average in yield.

"The government of Manitoba," said Premier Bracken, "believes that in the present emergency industrial and financial interests should refrain from unduly pressing collections from farmer debtors. It is in the interests of all Canada that our farmers should not be embarrassed by too energetic attempts by competing creditors to collect larger payments than farmers are able to pay." Sale of the prairie crops "under pressure" would depress values, with serious consequences to the agricultural and business interests ...

NEW CABINET MINISTER

Dr. Murray MacLaren, new minister of pensions and national health in the Bennett cabinet, who is a native of New Brunswick, with a very distinguished career.

Government Steamer Nearing Winter Harbor

"Beothic" Battling Ice and Fog In Arctic Sea

Ottawa, Ont.—After a continuous battle with ice and fog, the Canadian Government Arctic patrol steamer "Beothic" is approaching winter harbor on Melville Island, it was announced by officials of the North West Territories branch of the Department of the Interior.

The ship is carrying the 1930 Arctic expedition which will spend some time among the Canadian Archipelago. Its immediate purpose is to re-provision the cache on Melville Island established there in 1908 by Capt. J. E. Bernier, of the C.G.S. Arctic and which has played a most important part in the exploration and the policing of Canada's northern empire.

Preserving Wild Life

Climbers Conquer Mount Robson

Members Of Mount Everest Expedition Reach Summit

Mount Robson, B.C.—Mount Robson, after many attempts has been climbed for the first time this season. A party, composed of N. E. Odell and C. G. Crawford, of London, England, both members of the Mount Everest expedition, and Terris Moore, of Haddonfield, N.Y., successfully gained the summit.

It was in a lone attempt to climb Mount Robson, 12,972 feet high, the highest peak in the Canadian Rockies, that Newman D. Waffl, of Orange, N.J., lost his life recently.

Still Holding By-Elections

No Immediate Possibility Of Law Being Amended

Ottawa, Ont.—Political observers here see no immediate possibility of amending the elections law to obviate the necessity of cabinet ministers going before their electors at by-elections when they assume office.

Two or three years ago a resolution was read in the House of Commons recommending that by-elections for cabinet ministers be dispensed with. The government of the day promised to give consideration to it and no vote was taken. Ontario is one province that has eliminated by-elections for its ministers.

TARIFF ACTION TO PROTECT THE FRUIT GROWERS

Ottawa, Ont.—The dumping of fruits and vegetables from the United States into the markets of Canada, which has been the cause of strenuous protest for some time past, has resulted in definite action by the government. Hon. E. B. Ryckman, Minister of National Revenue, has ...

ROAD TO LONG LIFE IS SHOWN BY MEDICAL MEN

Winnipeg, Man.—"Long life and good health!" Out of the bowl of the world's medical knowledge, a toast was drunk by delegates to the 98th annual meeting of the British Medical Association. Dr. Robert Hutchison, F.R.C.P., London, [illegible] health [illegible] battered image right lustily. Jovially, but firmly the British expert harked back to the good old days [illegible] when, he said, children were probably healthier and happier than the weighed, pampered, dieted, psycho-analyzed infants of today. He laughed at calory-counters and vitamin victims, and held up as ideal the easy-going individual who merely meanders to health.

Inability of the state to permit birth control in England was deplored by Sir James Purves-Stewart, K.C.M.G., F.R.C.P., in outlining the ways to a lengthy life. He considered heredity by far the most important factor in producing longevity but regretted that lack of birth control permitted reproduction of far from perfect specimens of the human species, closing one doorway to longer living. The other two routes, he thought, were by the aid of the public hospital system and the family doctor.

Highlight of the day-time sessions was the expression of opinion on the use of radium on treatment of cancer. Dr. Malcolm Donaldson, of London, forecast the entire abolition of surgical extirpation treatment for cancer due to radium development. Concurring, Prof. W. W. Chipman, Montreal, believed that radium has already proved superior to surgical treatment of cancer ...

Noted Actor Dead

BANK OF MONTREAL CROP REPORT

General—Favorable weather in the Prairie Provinces has permitted rapid progress in cutting although there have been some delays on account of rain and some severe hail losses in sections of Alberta. Wheat yields generally have so far been somewhat better than was expected. Quebec Warm dry weather is good for harvesting operations. In Ontario recent rains have benefited pasturage and corn, roots, tobacco and fruit crops. In the Maritime provinces weather conditions are satisfactory except in Nova Scotia where rain is still needed. In British Columbia reports from the interior are good, owing to recent rains, while in the Fraser Valley and on Vancouver Island rain is needed for roots and pasturage. Details follow.

Prairie Provinces

ALBERTA. Northeastern area. Harvesting is well advanced despite interruptions by heavy rains, regional hail storms have done serious damage. Wheat yields are [illegible] to 25 bushels grading 1 to [illegible] Northern.

Southeastern area. [illegible] per cent of cutting is completed with average yield 10 bushels grading 1 to 2 Northern.

Western area. Harvesting is well advanced, estimated yields run from 4 to 25 bushels. Some damage by hail, while not widespread, has been reported. An unusually heavy sugar beet yield is expected.

SASKATCHEWAN. Northern area. Harvesting is well advanced, cutting is 65 per cent completed and threshing will be general by the end of the month. Early threshing returns indicate yields [illegible] breaking and summerfallow of [illegible] 25 bushels and on stubble [illegible] bushels grading 1 to 4 Northern.

Southern area. Cutting is [illegible] per cent completed, wheat yield is reported varying from [illegible] to 15 bushels grading 2 and [illegible]

MANITOBA. Cutting of wheat is practically finished, that of other grains with the exception of flax, is nearing completion. Threshing of wheat is general. Yields vary greatly owing to rust damage. It is impossible to form an accurate estimate now, but present indications are for an average of 15 to 20 bushels grading No. 3.

ASKS FOR LOYALTY OF WHEAT POOL MEMBERS

The Alberta Wheat Pool, along with the Pools of the two other prairie provinces, is making an appeal to its members to give the organization full hearted support during these times of stress. The pools are being put through a test which requires all the courage [illegible] and intelligence of Pool farmers to withstand. With the co-operation of the members and if every [illegible] interest in the country [illegible] there is every reason to believe the darkest hour in the Pools' [illegible] will be followed by [illegible] of renewed prosperity and [illegible] co-operative stabilization.

Many rumors have been circulated that members of the wheat pool will seek to evade their contracts this fall but there is no actual [illegible] that the loyalty of the great [illegible] of the members to their own organization has been impaired to a [illegible] extent. Far thinking [illegible] in all walks of life realize that the [illegible] strong and developing of the wheat pool movement will best serve the industry of agriculture in Western Canada. Nothing can be gained by turning back.

Alberta Wheat Pool directors have announced that all members will be required to live up to their contracts and deliver their wheat to the pool. There exists no alternative as the contracts are between the members and not as between the head office and the membership. This contract is a solemn obligation and has been proven legally water-tight in the courts but it is not alone the legality of the contract upon which the wheat pool [illegible] its case. It is [illegible] the will and the determination of the responsible and far-seeing wheat growers who are members of this organization.

It is generally realized that the price of wheat is now well below the cost of production. The initial payment is low but the financial stability of the pool would be imperilled if the amount were fixed at any higher figure. The ultimate welfare of the members makes it necessary that no steps be taken to endanger the safety of their organization.

WILL NOT OPERATE THIS YEAR ALBERTA COARSE GRAIN POOL

Farmers who are members of the coarse grain pool in Alberta can market their oats, barley, rye or flax on the open market as a result of the decision of directors to suspend operations for the current year.

Following is the official announcement:

"The board of directors of the Alberta Wheat Pool have decided to suspend the operations of the Alberta Coarse Grain Pool for the current year. Pool elevators, however, will handle coarse grains delivered by pool members on a cash basis paying the current market price, as was the practice prior to the formation of the Coarse Grain Pool.

"The reason for the temporary suspension of the Alberta Coarse Grains Pool is due to the fact that prices for coarse grains are at such a low level that the pool initial payment must of necessity be restricted to a nominal amount. In view of the entire situation the directors feel that the immediate cash requirements of many members of the Coarse Grains Pool are of such importance that the suspension of operations of the Pool for a year is advisable.

"The Alberta Coarse Grains Pool contract permits the directors to suspend the operations of the organization by a public announcement prior to Sept. 1 each year.

The Market Examiner

PREPARING BULBS FOR WINTER BLOOM

(Experimental farms note)

Bulbs for winter bloom should be potted as soon as they are received in September and October. It is true that some bulbs are held in storage by commercial growers and potted for late bloom but the amateur will be well advised to plant immediately and [illegible] depend on securing a succession of bloom by choosing varieties of different seasons. Specially prepared hyacinths and early varieties of tulips and daffodils for Christmas flowering may be had in September but the main supplies are not on the market until October.

A good potting soil consists of equal parts of loam, well decayed cow manure, leaf mould, and sand.

The size and style of pot used will depend to some extent on the personal preference of the grower, but a six inch pot will hold six tulips, a five inch pot takes six crocus bulbs, a four or five inch pot is suitable for a single hyacinth bulb and a seven or eight inch pot will be required for five or six narcissus bulbs.

In potting leave the top of the bulbs level with the surface of the soil and press it firmly about them but do not have it too compact beneath them since this is likely to cause the bulbs to heave up out of the soil when the root growth begins. Some pieces of broken crockery or small stones should be placed in the bottom of the pot to ensure good drainage.

After planting, water the pots and set them in a cellar or darkened room where the temperature is from 40 to 50 degrees Fahrenheit. If the pots are plunged in sand they will require less careful watering and covering to a depth of two inches above the bulbs will help to prevent heaving. Potted bulbs are sometimes placed in a covered trench out of doors and brought in as required, but in Prairie Canada it is more convenient and safer to have them in a cellar after severe weather sets in.

After the bulbs are well rooted and there is evidence of top growth, they may be brought to the living room to bloom. To economize in window space a cellar window or any north window where the light is reasonably good may be used until the plants closely approach the blooming period. If kept too long in a dim light the plants become tall and weak stemmed. If placed in too hot a place the buds will wither; therefore windows too close to a stove should be avoided.

After the plants are in bloom, if they are kept in a cool part of the room and not exposed to bright sunshine the blossoms will usually last for twelve to fourteen days.

If early single tulips are given good growing conditions until the plants ripen off the bulbs may be stored in a dry place and bedded out the following October. While these bulbs may not give bloom equal to that from imported bulbs the following spring, they will continue to bloom for many seasons under prairie conditions. Most of the other bulbs forced should be discarded after the bloom has faded since our climate is too severe for them to live through the winter.

DON'T GET FOOLED AND SELL SHORT ON DAIRY COWS

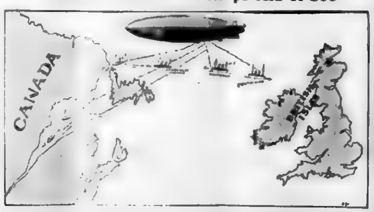
The low price of butterfat at the present time has caused a drop in the price of good milch cows, says the Okanagan Cream Collector. A good cow cannot be developed in a day, and those who contemplate staying with dairying now have a wonderful opportunity to pick up first class dairy stock.

Do not make the mistake of selling good cows which you have developed over a number of years, when the market is at its worst, and then have to buy them back again when the market is high.

When a manufacturer fails to make a profit in an off season, he does not close down his plant. He effects every economy in operation he possibly can, and keeps going until the tide turns.

Neither should the farmer jump out of dairy cows or hogs or poultry during a temporary lull. He is out of luck when the good times begin to come back on the turn of the tide. The "in and outer" seldom makes any money.

Canadian Pacific Steamships Aid R-100



On her historic voyage across the Atlantic to Montreal, the mighty British dirigible, R-100, was in continual wireless touch with ships of the Canadian Pacific trans-Atlantic [illegible] The great air liner was hardly out above the [illegible] when she was in communication with S.S. [illegible] then approaching the British Isles and some distance farther she overtook the Montcalm. S.S. "[illegible] of France" was her next call as that ship was nearing Newfoundland, while down the St. Lawrence she spoke with the "Duchess of York," the "Empress of Scotland" and the "Duchess of Bedford." Eighteen other C.P.R. vessels were lying during her flight at British or Canadian ports. Thus the great Canadian transportation company was enabled to give a waiting world the latest particulars of her flight, since all these vessels are in wireless communication with the shore and their messages were broadcast through the press and featured in all R-100 news items.

The Publisher's Harvest

RIGHT AT THE PRESENT MOMENT AS WE WRITE THERE IS SCATTERED HERE AND THERE OVER THIS DISTRICT, MANY FIELDS OF CUT GRAIN. AND AS ONE LOOKS AT THEM IN THE AUTUMN SUNSHINE AND SEE THE EVENLY CUT STUBBLE WITH ITS APPEARANCE OF NAKEDNESS, ONE IS IMPRESSED BY THE MANY STOOKS, STANDING AS IT WERE AS SENTINAL GUARDIANS OF THE FIELD ITSELF. THE BINDER MAY HAVE CONQUERED THE FIELD OF SEPARATE STRAWS, BUT NOW ONLY A THRESHING MACHINE CAN DEMOLISH THE STOOKS.

AND THE STOOKS STAND AS EVIDENCE OF WEALTH—NOT SO MUCH AS WE WOULD WISH PERHAPS—BUT WEALTH NEVERTHELESS. ONE STOOK WORTH SO MUCH, TWO TWICE THAT AMOUNT AND SO ON. HERE WE ARE, THEY SEEM TO SAY, YOU CALL US GOLDEN GRAIN, CHANGE US FOR THAT WHICH IS REALLY GOLD—GOLD THAT CLINKS AND GLITTERS.

THE REWARD OF FAITH AND LABOR!

LABOR! LABOR PERFORMED IN THE EARLY HOURS OF MORNING—THE HOT AND ARID HOURS OF MID-DAY—AMID THE COOLING HOURS OF THE SETTING SUN.

FAITH! FAITH THAT LIVED THROUGH EARLY DROUGHTS, THREATS OF HAIL, DANGER OF FROST AND THOSE THINGS OVER WHICH MAN HAS NO CONTROL.

SUCH IS HARVEST, THE TIME OF RECEIVING, THE TIME OF REJOICING.

THE PUBLISHER'S HARVEST? OH YES, HE HAS A HARVEST ALSO. STOOKS? OH YES, HE HAS STOOKS TOO. AH, BUT NOT STOOKS OF GOLDEN GRAIN. HIS STOOKS ARE PAPER SLIPS, AND ON EACH PAPER SLIP THERE IS WRITTEN A NAME AND A DATE. THERE THEY LAY, AS WE WRITE, ON OUR DESK READY FOR MAILING. HERE WE ARE THEY SEEM TO SAY, YOU CALL US AKIN TO GOLDEN GRAIN, CHANGE US FOR THAT WHICH IS REALLY GOLD—GOLD THAT CLINKS AND GLITTERS.

MOSTLY ONE YEAR, SOME TWO YEARS, THREE YEARS, A FEW FOUR YEARS, FIVE YEARS, AND ONE OR TWO OLD STAGERS THAT WILL EVENTUALLY YIELD WELL.

YOU SEE, ONE WAGON CANNOT POSSIBLY COLLECT UP ALL OUR STOOKS, THEY MUST BE DELIVERED. AND WHO CAN BETTER MAKE DELIVERY THAN THE SUBSCRIBER? DON'T YOU SEE, UNLESS WE RECEIVE THESE SUBSCRIPTION AMOUNTS OUR HARVEST IS A FAILURE. IN MANY CASES, NOT JUST ONE YEAR, BUT SEVERAL YEARS.

WE THANK YOU.

Periodic Health Examinations In The Future To Guard Against Unnecessary Illness

(By John Burke Ingram)

Should doctors be paid for healing their patients? To this seemingly foolish question a friend of mine replied: "Certainly! That's what doctors are for."

Is it?

Do you remember the old, old fable about the way the Chinese pay their physicians? Only when the patient is well is the doctor paid. Thus the interests of patient and doctor are identical. Smart people, those Chinese! Today we are trying to work out some such system in the name of "Preventive Medicine." Today the attitude of the doctor towards disease is changing.

Vaccination against smallpox started that change. Before vaccination, doctors existed mainly to cure. With the coming of vaccination they began to prevent illness.

Vaccination has been followed by similar discoveries. It is now possible to "vaccinate" (the word while inexact medically, is correct in general sense) against diphtheria, typhoid fever, scarlet fever, rabies, infantile paralysis and other diseases. Almost every year sees another one or two additions to the list of preventable diseases. And year by year the falling death-rate from tuberculosis proves that preventive medicine is effective in combating many of those ills of the flesh against which no specific has yet been discovered.

The most significant recognition that has been given to the principle of preventive medicine has been the organization of public health departments. The function of every public health official is not to cure disease, but to keep the public healthy. And more and more this is becoming the function of the practising physician, too.

What is to happen to the average doctor when and if we reach the Arcadian utopia in which there are no sick people left to heal? This state thinks Dr. Gordon Bates who writes on the question in the current issue of the Canadian Public Health Journal, will be a most happy one. For instead of having thousands of sick to heal, he will have millions of well folk to keep well! Truly a more congenial, as well as a more profitable state of affairs to both doctor and patient.

Half of all the illness in Canada is preventable he says, "and over 20 per cent of our deaths are postponable." The direct cost of illness he places from conservative estimates made by public health officials from coast to coast at $300,000,000.

He visualizes a day when a mother, instead of philosophically hoping that her offspring will have their share of children's diseases early and get them over with, will consult her family physician and arrange with him to have the children immunized against those diseases so that they won't have them at all. A much less expensive, less annoying, less dangerous procedure. He points out that though Canada has annually about 1,200 deaths from diphtheria, and 12,-000 cases of it, preventive medicine could cut the toll of this disease by 90% and that it fails to do so largely through ignorance or neglect of parents, since diphtheria is principally a disease of childhood.

"But what other phases are there to the adoption of preventive medicine by the general practitioner?" Dr. Bates asks. "One thinks immediately of the periodic health examination idea.

"Many illnesses which have resulted in death might have been prevented had the physician had the opportunity of acting in the incipient stage of the disease in question. An infected tooth or tonsil may spell disease or death, cancer, syphilis, tuberculosis may result in death because of neglect when the symptoms are slight, and these are only examples of conditions in which at present the physician too frequently has not the opportunity of exercising a preventive function. Over-eating, over-drinking, overwork, under-exercise, worry may present problems just as serious but the culprit seldom consults his medical adviser until Nemesis is upon him. The effect on sickness and death rates is obvious.

A year ago through the co-operation of the Canadian Medical Association and the Dominion Department of Health a standard form, designed for the use of the physician in the examination of the apparently well, was forwarded to every physician in Canada.

"The case for periodic health examination is so strong that unquestionably this procedure will form a most important part of the armamentarium of the general practitioner of the future to the end that unnecessary illness may be prevented.

"Important steps in the direction of making the application of periodic health examination practical have already been taken. A number of the Canadian life insurance companies have entered into a co-operative scheme with the Canadian Medical Association whereby certain policy-holders will have made available for them free medical examination by their own family doctors, or at least by doctors of their own choice, the life insurance companies paying the bill."

So the life insurance companies find periodic health examination such good business as a life-prolonger for heavy policyholders, that they are willing to pay for it!

Which makes it look as though it were a good thing for one to walk around to his family physician and say "Doctor, look me over now and on every birthday from now on. Practice preventive medicine on me. Peep at my innards with x-rays. Ask me leading questions about my way of living. I don't want to get sick, and I'll pay you handsomely to keep me well!" Clever people, those Chinese!

"Is this place healthy?"

"Rather! I couldn't walk when I came here."

"Did you have rheumatism?"

"No, I was born here." Buen Humor, Madrid.

Value Of Agricultural Fairs

Postmaster-General Believes They Teach Profitable Lessons

The Minister of Agriculture, Hon. Robert Weir, intends to assume a policy that will render justice to all parts of the country in aiding farmers, Hon. Arthur Sauve, Postmaster-General, said in an address given at the Three Rivers exhibition. Mr. Sauve discussed the value of agricultural fairs which taught sane and profitable lessons showing the possibilities of agriculture, which, he said, was the basis of national prosperity.

Reviewing the situation facing the new administration Mr. Sauve said: "Our problems are many, and it is important that national education should be carried on in such a manner as to assure that all portions of the population contribute to their solution.

"We are experiencing an alarming crisis, which everybody will admit. Everyone must help. The governing bodies must play their part properly."

Clover Seed Prospects

Production Of Alsike Clover Better In Quality Than Last Year

The Seed Branch of the Dominion Department of Agriculture estimates that the production of alsike clover seed for 1930 will be better in quality both with respect to colour and purity than last year's crop. Ontario production is not expected to exceed one-third of the 1929 crop, when 70,-000 bushels were harvested. The alsike seed market is not overly promising at the present time. Better prospects are reported for red clover seed with practically no carry-over from last year and 1930 acreage about 50 per cent. below normal. An increased acreage of alfalfa being saved for seed is reported.

Montreal Unemployed

Montreal at present has between 21,000 and 23,000 unemployed, with another 10,000 to 13,000 working but two or three days a week, according to reports from Labor unions reaching the city hall, it was announced by Ald. Alfred Mathieu, member of the executive committee. The information will be passed on to Hon. Gideon Robertson, Minister of Labor, who is compiling data on unemployment throughout the country.

Victoria Tower, London, 420 feet high, is said to be the highest spire in the world.

Cause Of Drought

Scientists Say Storm Track Has Shifted Northward

Increments of meteorological information are but poor compensation, owners of withered crops will insist, for this summer's exceptional drought, yet that information is about the only feature of the weather which can be set down on the profit side of the ledger. The last comparable condition, says the New York Herald-Tribune, seems to have been in 1874, when but few weather observatories were maintained and anything like the present world maps of weather was still a dream. This summer for the first time weather scientists have before them in drought time even a partial picture of what is happening to the oceans and air currents and other brewers of storms or droughts. Superficially, the answer to the query "Why the drought?" is straightforward. There has been persistent high air pressure over most of the United States. This has kept out the moisture-laden winds from the oceans on both coasts, for winds tend to blow outward from high pressure areas, never inward toward them.

The true problem, however, is the cause of this persistent high pressure. It is too soon to read this with assurance. The European weather maps, for example, come by mail and are ten days to two weeks late in American laboratories. Yet one fact can be discerned from the maps for this country. What is called the storm track has shifted northward. Most of the rain in North America is provided by the cyclonic storms which sweep across the continent from the Pacific to the Atlantic every few days in winter and at longer intervals in summer. These storms cause moving areas of low pressure, the low pressure draws winds both from the north and the south; these winds mix, the cold north winds precipitate the moisture from the warmer southern ones. That, in a sentence, is the cause of America's rain.

Ordinarily these recurring storms follow a path which crosses the northern third of the United States. Since July 20 not one of these storms has done so. They have not vanished, inspection of Canadian records show. They merely have been swinging farther north than usual, crossing the Hudson Bay region and providing the more ample rains which Canada has received. The wheat and corn belts of the United States have been left south of the storm track untouched by the mixture of winds which might have brought rain.

A step back of this lies another question. Why has the storm track swung farther north? Here authorities differ, but Herbert Janvrin Browne, weather forecaster of unofficial status but of substantial success, has an idea. The ultimate culprit, he believes, is the moon, which in its swings southward and northward in successive decades affects the tidal equilibrium of the oceans and thus the winds on land. The cycle of moon motions which now is occurring repeats, Mr. Browne points out, that of 1874, and 1874 was also a year of drought. As a scientific guess, this is perhaps the best now available. But much research remains to be made before a certain conclusion can be reached.

All He Knew

The patient teacher had explained some of the modern habits in common phrases and talked much of slang and war and radio and what not.

"Herbert," she demanded suddenly, "what are some of the signs of the times?"

"Kept Out, No Fishing, No Hunting, No Trespass," said Herbert.

Beef Grading Policy

Attracting Attention On the British Market, Report Shows

The beef grading policy of the Dominion livestock branch is not only providing a real service to the Canadian consumer and producer in clearly identifying the true qualities of beef, but is also attracting attention in the British markets, reports show.

The Imperial Food Journal, a recognized authority on market conditions in the Old Country, says: "The introduction of beef grading in Canada, whereby the two top grades are marked for the information and protection of the public, is doing much to strengthen the demand for the better qualities of beef. This should tend to promote the raising of better grades of cattle and the finishing of animals.

Cattle For Old Country

Shipment Made During August Was Just For Experiment

On August 21st, for the first time in over three years, a shipment of Canadian cattle left Canada for the United Kingdom. This shipment of forty head is an experiment that will be watched with interest by western, as by eastern, cattle raisers and shippers. Now that the United States border has been closed to our animals, it becomes all the more desirable to revive the lapsed business with the Mother Country. It is prophesied that, if shipping facilities can be arranged, sixty thousand head can be sent across the Atlantic this year. This is not the first time that the American Republic, by sudden fiscal departures, has forced us to look to the British family circle as an outlet for our farm products.

Co-Operative Wool Growers

Over 2,250,000 Pounds Of Wool Received At Toronto Warehouse

A recent check-up by the Canadian Co-operative Wool Growers shows that well over 2,250,000 pounds of wool have been received at the Weston warehouse or are on route to that point this season. Another 250,-000 pounds are expected, so that the objective of 3,000,000 pounds decided upon at the last annual meeting of the organization when contract handling was adopted is going to be well exceeded. Alberta furnished over 1,500,000 pounds, while Manitoba, Saskatchewan and Ontario, each contributed about half a million pounds. British Columbia made an unusually good showing with 255,000 pounds, while Quebec and the Maritimes brought along another 150,000 pounds.

In Business For 70 Years

The old village of Bath, near Kingston, Ont., where United Empire Loyalists settled more than 140 years ago, has a resident, Robert Mott, aged 81, who is still active and has been 70 years in business. He is still conducting a general store, assisted by his wife and son. From 1860 until 1900 he was in the harness-making business. Some of his forbears reached great ages, his grandmother being 101 and his grandfather 90.

Collect Data On Water Fowl

Many hundreds of voluntary observers throughout North America are collecting information concerning the numbers of water fowl observed on specified days each month. Reports for Canada are forwarded to the National Parks of Canada, Department of the Interior, Ottawa, and those for the United States, to the Biological Survey, Washington.

He—"I've just made the last payment on our house."

She—"Good; it's time we bought in a better neighborhood."

Honor Heroic Conductor

Tribute was paid recently by Colonel the Honorable Murray MacLaren, Minister of Pensions and National Health, and Colonel C. A. Hodgetts, Director-General of the St. John's Ambulance Association, to the heroic action of Clarence W. Leach, passenger conductor on the Canadian Pacific Railway between Ottawa and Montreal who, by his prompt action and presence of mind rescued Claire McDougall from drowning in the Rideau Canal last June. Mr. Leach is shown standing third from the left and alongside him are the Minister, Colonel Hodgetts and J. H. Hughes, C.P.R. superintendent of Ottawa. Presentation of the Honorary Testimonial of the Royal Canadian Humane Society was made in the Minister's office. Mr. Leach is insert.

Growing Respect and Good Will That Mark Relations Between Canada and the United States

The protracted discussions over naval strength on the part of Great Britain, France, Italy, Japan and this country only serve to emphasize the growing respect and good will that mark the relations between Canada and the United States. Nor does this statement imply any lack of friendly relations in the past. But the growing stake which each country has in the other cannot fail to bring them still closer together. Above all, we feel that the people of this country are coming to have a more and more wholesome respect for Canada as it emerges from its pioneering conditions into a great industrial nation. It is not merely her wealth of natural resources which we admire, as anyone must, but the way in which her capable, industrious and enterprising people are developing them.

During the war, Mr. McAdoo, then Secretary of the Treasury, remarked to a high Canadian official that, in his opinion, Canada was the most productive country in the world per capita. Certainly her heritage is rich and vast. It is true that in ten years the United States has invested some $3,500,000,000 in Canada. But Canada has penetrated the United States as well. One of her life-insurance companies is the largest stockholder in at least two of our great corporations and more than $1,[illegible] 000,000 of the life insurance in force here is held by Canadian companies. Canada is the largest taker of our exports, ranking ahead of any of the Great European powers, with a total value of nearly $900,000,000; while we, in turn, buy more than $500,000,-000 worth of goods from her.

After the war Canada suffered a depression much as we did, and went through several bad crop years. But these were followed by four or five years of big crops and an impressive development in mining, hydro-electric power and industry generally. Although Canada has only one-twelfth the population of the United States, she is indeed a powerful neighbor and one whose bargaining ability is extremely great, far out of proportion to her population. One need mention only her control of the raw materials for paper making. Then too, the Canadians seem to have very real genius in building up financial organizations; their banks and insurance companies attest to that.

Canada's population is sure to increase. Indeed, we are adding to it constantly. There is migration both ways, an interchanging of population on a great scale that can only make for mutual respect and good will. In the case of Canada and the United States there seems to be a mutual conquest or penetration of one by the other. In this instance, business victories carry peace instead of war or fears of war. Few countries have such opportune associations and yet one cannot but feel that the extension of these relations into other international fields is to some extent possible.—Saturday Evening Post.

A New Idea

New System Of Marketing Meat Known As the Rapid Freezing Method

Officials of the Dominion Livestock Branch are watching with interest the progress of the new system of marketing meat known as the "package meat" or "rapid freezing" method. It has already been successfully introduced in the larger retail distribution centres in the United States, and bids fair to revolutionize meat retailing methods in the British market. By the new process cuts of beef, mutton, lamb, pork and veal are dressed at the packing plant, packed in individual cellophane wrappers and subjected to rapid freezing at very low temperatures. It is found that by "snap" freezing only tiny ice crystals are formed in the flesh of the meat, preserving all its fine qualities quite unimpaired. The new system provides a serious threat to the future of that old familiar institution, the butcher shop.

Winnipeg Newspaper Union

Fashion

(By Annebelle Worthington).

Soft moulded lines are featured in a printed chiffon of cool green colouring.

It emphasizes the normal waistline through horizontal inverted pin tucks at either side of the bodice.

The bow of plain crepe placed at the left hip echoes the femininity of the mode.

The low flared circular flounce of the skirt terminates in a slender wrapped arrangement at the front.

The capelets falling softly over the arms give impression of sleeves.

Style No. 2546 can be had in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Hyacinth blue crepe silk, daffodil yellow sheer linen with soft cocoa brown faille crepe, bow coral red chiffon, printed dimity in dusty pink tones and peach pink washable flat crepe are essentially smart combinations for summer wardrobe.

Pattern price 20 cents. Be sure to fill in size of pattern. Address Pattern Department.

Manitoba Egg-Laying Contest

White Leghorns led the Manitoba egg-laying contest at the Brandon Experimental Farm at the end of the 37th week. These birds, owned by J. R. Beer of Brandon, had a total production record of 1,636.2 points and 1,634 eggs. Barred rocks owned by F. E. Foster, of Lena, Man., led for weekly production with 41.2 points and 45 eggs.

Cultivated Forage Crops

Progress Is Made In Pasture Improvements At Dominion Range Experimental Station

The Forage Crop Division of the Central Experimental Farm had a record year in 1929 as evidenced in the report of G. P. McRostie, Ph.D., Dominion Agrostologist, an illustrated booklet of 48 pages. Amongst other things it is noted that considerable progress has been made on a large number of projects pertaining to range management and pasture improvement at the Dominion Range Experiment Station near Manyberries, Alberta. Much attention has been given, also, to other range areas and to the growing of cultivated forage crops in co-operation with a number of ranchers and farmers throughout the Western Provinces.

About a half million organic compounds are now known to chemists.

"Thank you for the balloon, uncle."

"Oh, it was a very small gift."

"That is what I said, but mother said I must thank you all the same."—Buen Humor, Madrid.

4 Years without HEADACHE

How do you deal with headaches? Do you just take something to deaden the pain without getting rid of the trouble which causes pain? Thousands do, despite the repeated performance of the old "dope" habit. Why not try something different? Why not try something that corrects instead of merely deadens? Why not try something that has been used by the unsuspecting public for the past 40 years? Why not try something that has been advertised for sale in Canada at the low rate of $5.00 per box and increasing quantities have been coming into the Dominion since 1926 solely on the merits of the article itself and at the same time creating a large permanent business? Why not be guided by the unsolicited testimonials in the possession of the manufacturers which possess the highest degree of honesty and integrity? Why not try something that has stood the test of time? Why not try something that has been introduced to the public entirely by word of mouth advertising? Why not try something that has been introduced entirely by word of mouth advertising? Why not try something that has been introduced entirely by word of mouth advertising? Why not try something that has been introduced

THE WHEAT POOL'S INITIAL PAYMENT

(By J. Modeon, Wetaskiwin, Alberta)

The initial payment for No. 1 Northern at Fort William.

To say the least, the announcement are not good, and, too, there is no disappointing to [illegible] somewhat than shown. Special consideration should be taken into account when all circumstances are such that immediate warning credit on the [illegible] cash is essential of those [illegible] and [illegible] and [illegible].

There has been unreasonable delay [illegible] ...ching the initial payment and [illegible] ...mething like 5c [illegible] ...the marginal [illegible] ...ments haven't been [illegible] ...leaked out regarding [illegible] ...ments in assuming that wheat prices [illegible] ...ference between the [illegible] ...Pool [illegible] ...may account [illegible] ...was a disappointment to [illegible] ...be amongst [illegible] ...assumption.

WINTERING OF DAIRY HEIFERS

(Experimental farms note)

The usefulness of the dairy cow depends upon proper development during the growing period. In order to insure this the following factors must be considered; breeding, feeding, housing, and care and management. In order to produce the desired results on reaching maturity the heifer must be provided with a well balanced ration which will promote the normal development of all the vital organs.

At the Dominion Experimental Station, Scotsburn, Saskatchewan, different methods of housing dairy heifers are under test. The following is a statement of the ...ese methods:

1. ...ed in warm stables two years old ...ths of March and April 1920 were wintered in corrals where they were protected from the cold winds and had access to dry, comfortable sheds. They were fed a ration consisting of 4 pounds of sheaf grain hay, 15 to 20 pounds of turnips, and 3 to 4 pounds of meal. The meal mixture consisted of two parts of oat chop, 1 part bran, and 1 part barley chop. Besides this they had access to oat straw. The five heifers weighed on an average of 1010 pounds on December 15 and on April 1 they weighed an average of 730 pounds, showing an average daily gain of 1.6 pounds per animal per day. The feed which the above heifers received was home grown with the exception of the bran. The heifers wintered on these corrals were thrifty and made good growth.

2. The important factors to keep in mind in wintering of dairy heifers are shelter from the cold winds and rain, a dry, comfortable bed, fresh air and sunlight, a well balanced growing ration containing a fairly high percentage of roughage, fresh water and salt, a regular feeding time, exercise, and disinfecting regularly once a month with sulphur and [illegible] and protection as a precaution against lice and other vermin.

WORLD FAMOUS FLIETS COMING TO BIG AIR SHOW

Famous aviators of this continent will flirt with danger at Edmonton on Wednesday, September 17, when the big air show will be on.

There will be many pilots from the United States, such as Captain Frank Brancker, Lieut. Jimmy Hoddleton and others hopping and diving in sensational stunts. Added to these will be such famous Canadian pilots as Captain "Wop" May and others while [illegible] companies of the Canadian Airways will be seen in a spectacular flight formation.

A never to be forgotten sight will be the arrival of the armada of fifty aeroplanes and seaplanes from Fort Arrield at Dearborn, Michigan, a flight of 1100 miles. After this has been carried out the machines will be on display all the afternoon. At the same time, there will be stunting by visiting fliers in mystery machines and other craft, ever to be full afternoon's program.

The general committee at Edmonton has reserved parking areas and orders for these are being received at the air show headquarters, Revillon Building, 101st, Street, Edmonton. Two tenths of prices have been set by the committee, that of $1.00 for the best locations and 50c, for the others. Forms are already asking for whole blocks of those car spaces to be reserved

OPENING ANNOUNCEMENT

I wish to announce that I will open a butcher shop in the building formerly known as the "Hall Building" early this month. I will carry a full line of fresh and cured meats etc., and have had many years experience in the business. Trusting to receive a share of our patronage.

L. T. Hallet

A Momentous Time

The fate of the Wheat Pool now rests entirely with the Pool members.

The Pool will triumph over all obstacles if the membership remains steadfast and unswayed by idle rumor.

The struggle is now at the hardest part, and the loyalty of each Pool member is of urgent importance. The result of the issue lies with the membership.

The safest place for your wheat is in the Wheat Pool, and it should be delivered to Pool elevators.

An Eastern Opinion of Western Farmers

(Mail and Empire, Toronto)

"I suggest that the farmer of the west is going into wheat too heavily [illegible] ...break up the pool he created. ...suggesting that a wise farmer is a weather and a cheat. The western farmer [illegible] ...despite the variety of his occupations [illegible] ...his friend must be somewhat weakened with an ever [illegible] ...understanding to put another [illegible] ...there a picture more dark and troubled than this farmer [illegible]

Deliver Pool Wheat to Pool Elevators!

Famous Husky Wins Prizes

Arthur Beauvais, well known [illegible] ...ion Show held recently. He took [illegible] ...ing goats at the [illegible] ...Provencher, Quebec City, [illegible] ...ng him for the winning and accounts for his popularity among [illegible] ...ly was gratified to learn that he had taken three first prizes [illegible] ...visitors to the hockey [illegible] ...team and one special prize. THE SCHOOL BELL RINGS

(Red Cross Article)

Youth is on the march again—back to school. The world and his wife smile kindly at the schoolboy with his satchel and shining morning face, and note that in these happy days of to-day, they no longer "creep like snails unwillingly to school." Why indeed should they, when our schools are such delightful places, and learning is made so attractive. The day of school master Squeers is over and done with, and in his stead we have the modern teacher who has studied all the science and art of education, from the way to teach the alphabet to the latest development in [illegible] ...ness intelligence tests.

The one thing that teachers and parents are so agreement, and that is the physical condition of the pupil must receive [illegible] ...ntion before his mind can be [illegible] ...ed to be done at school. Sick and ailing children make poor scholars besides being a positive menace to the rest of the class. School instruction is of the greatest importance of the wise mother welcomes the sight of the school bell, even though it means that Johnie must have his tonsils removed when the [illegible] ...ll tweaks them and PTT by adenoids from the path of health. Many [illegible] ...ers are known of girls and boys [illegible] ...ng lessons to their homes in the [illegible] ...art of personal hygiene, for it is in [illegible] ...d that knowledge is [illegible] ...knowledge is only of value as it is [illegible] ...to be used, hence the health [illegible] ...at school imbues there is an active co-operation in home. Let every parent insist on a Junior Red Cross group in the school, thereby [illegible] ...ering a valuable education in health, citizenship and service.

Here and There

[illegible] ...ular bath line [illegible] ...t canal 7,000 feet above [illegible] ...ing Lake and Lake [illegible] ...t pool been inspected and found [illegible] ...ng Glacier and [illegible] ...Brewster. It is 27 acres [illegible] ...ately clothed in the [illegible] ...ds down on the little [illegible] ...ng Lake and [illegible] ...ining the 1,000-foot contour to [illegible] ...Lake trail leading to Moraine Lake. It commands magnificent views of the glacial country north of the Canadian Pacific Railway near as far as Bow Lake and south to Mt. Assiniboine. It is 40 miles long and will [illegible] ...ly be used for the accommodation of the [illegible] ...Trail Riders of the Canadian Rockies next year.

I do not believe that the [illegible] ...ic will ever take the place of the [illegible] ...plane. People still appear to be building [illegible] ...ny theatres and Lady Diana Manners [illegible] ...Kingsley beauty and equally famous as the [illegible] ...ess of Mirza during the New York and Boston [illegible] ...there, has arrived at the Windsor street station, Montreal, recently on her first visit to Canada.

The Quebec Festival of French-Canadian folk-lore and Handicrafts at which [illegible] ...ts born and bred on the soil of [illegible] ...ber province and well-known [illegible] ...tists from far and wide, will [illegible] ...another in recovering the spirit of Old France, and also the [illegible] ...and the age-old culture of the Gaelic race, will be held this year October 16-18, according to an announcement made by Canadian Pacific Railway, organizers of the Festival.

Travelling in two Canadian Pacific special trains, about 250 of the most noted [illegible] ...ns in the British medical world left Montreal for Winnipeg to attend the 23rd convention of the British Medical Association, which is being held there this week. They were preceded by a group of 20 members of the British Theatrical Profession who also attended a convention of interchange of sportsmanship at Winnipeg, Man., before going to Winnipeg.

"In view of the fact that this is the first time Canada has had a seat on the Council of the League of Nations, I could not resist the request made to me by the Prime Minister to represent the Dominion at Geneva," said Sir Robert Laird Borden, Canada's first delegate for Canada, as he sailed for Europe recently aboard the Empress of Scotland.

Every activity of the Canadian Pacific Railway was stressed this year at the [illegible] ...ational Exhibition at Toronto, which was opened formally by Lord Shaughnessy, chairman and president of the road. An interesting feature of the company's exhibit was the model of the new [illegible] ...Empress of Britain, greatest [illegible] ...Empress passenger vessel, launched by the Prince of Wales last June and to be in service between Quebec and Great Britain next year.

More than $100,000,000 will be spent in each of the next three years on power production now under development in Canada. At [illegible] ...there are under [illegible] ...ts in all of the [illegible] ...ers now [illegible] ...ave a total [illegible] ...ower of 1,000,000 [illegible] ...ed that [illegible] ...Canada [illegible] ...ed by the Power [illegible]

HAVE YOUR CAR OILED AND GREASED BY HIGH PRESSURE EQUIPMENT

One of the best ways to prolong the life of a car and to ensure quiet running is to have your car oiled and greased at regular intervals. The cost is reasonable and it is a splendid investment.

Tofield School Fair

The Tofield and district consolidated school fair will be held on Monday next, September 15th, in the skating rink.

With such splendid growing weather following the drought, the gardens have come on apace and there is no doubt but that the vegetable exhibit will be an excellent one and the judges will have no easy task in making the awards.

There will be a large number of other exhibits also, sands, wood samples, [illegible], flowers, sewing, knitting, fancy work, baking, confectionery, school work, etc., etc.

The school fair is well worth a visit from adults, who can see in connection from the very best evidence of the skill, industry and ingenuity of the boys and girls of the Tofield district.

Will those making entries please make their entries before 12-00 a.m. A large entry is expected and if the judges are to be through at a reasonable time, all entries MUST be in by 10-00 a.m.

SCHOOL FAIR MEETING

The Tofield School Fair Association will meet at 8:30 p.m. on Friday, September 12th, in the Town Hall, to make final preparations for the fair to be held Monday, September 15th. Cash prizes are paid out after all entry fees are paid in so please be present with the latter.

J. T. BULLOCK,
Secretary-Treasurer,
Tofield School Fair.

HOLY TRINITY CHURCH (Anglican)

Sunday School ..... 11 a. m.
Evensong and Sermon every Sunday at 7:30 p. m.
Rev. C. W. Wilson

Will the members of the ladies' golf club please note that the golf course has now been put into order for playing. The ladies' fees are one dollar for those playing during the balance of the fall. It would be much appreciated if members would pay their fees promptly as the money is urgently needed.

BARDO

The Bardo Ladies Aid met at the home of Mrs. Anderson on Wednesday afternoon. There was a good attendance.

A large number of Bardoites visited the Old Peoples' Home at Bawlf on Sunday last.

Mrs. Emma Eide and Mr. I. Haugseth, who have spent the last two months visiting at Grande Prairie returned to their home here on Thursday.

Miss Gudrun Ness left for her home at Minnetonka, Minnesota last Wednesday.

Miss Carey Berkes left on Friday for Calgary, where she will teach again this year.

Services and T. P. S. were held at Bardo on Sunday.

HOW MUCH TO THE FARMER?

(By R. J. Deachman)

A bowl is the cereal.

Bread is done. Wheat drops to price—bread remains unchanged.

Wheat is the price of bread—follow the downward trend of wheat!

How much does the farmer get out of the wheat which goes into a loaf of bread?

These and similar questions are often heard from time to time. This brief article is an attempt to answer.

Chas. W. Peterson has written a book entitled, "Wheat, the Riddle of Markets". On page 14 of a valuable and interesting story he gives the distribution of the consumers' price of a pound of bread. The statement tells us quite the money which goes into a loaf of bread.

But first a word to Chas. W. Peterson before someone asks the pertinent or impertinent question as to how he knows about it. Mr. Peterson has been and is now a wheat grower on a large scale. He is the editor of "The Farm and Ranch Review," of Calgary and a keen student of agricultural problems. He is not known facts and is fair enough to give us his information in this kind as may be considered an authority. Besides these figures are corroborated by the Federal Trade Commission of the United States. The table follows:

Distribution of the Consumers' Price of a Pound of Bread

Item	Costs Per Pound of Bread	Per Cent of Retail Price
Producer of Wheat	1.15c	15.40 per cent
Country Elevator	0.30c	3.79 per cent
Transportation and terminal agencies for wheat	0.77c	9.88 per cent
Flour Miller	0.40c	4.75 per cent
Transportation agencies for flour	0.26c	3.66 per cent
Wholesale Baker	0.11c	50.77 per cent
Retail Grocer	1.27c	14.96 per cent
TOTAL	8.5-10c	100.0 per cent

Distribution of the Consumers' Price of a Pound of Bread

The average loaf weighs 1½ pounds—it would seem therefore that the farmer out of the wheat entering into a loaf gets 1.71½c—the baker 7.65c. This however contemplates a loaf selling for 12.82c which is higher than the average at the present time. Mr. Peterson's figures cover a two year average, a period in which bread prices were slightly higher and go back to when the farmer actually received for his wheat and not the nominal market price. These however, are figures to chest at. If the bakers are not satisfied with the figures they can of course explain—the farmers have already registered their protests. It seems to be a protest which has a measure of justification.

A Cheerful Message

Predictions of forthcoming markets and events always have a degree of uncertainty. Therefore it is hoped all those who are practicing a loan period for farmers are wrong. Just the same it would be better to play safe and milk more cows. The dairy industry is the silver lining to the agricultural cloud at present hanging over us.

School reopened on Tuesday, Sept. 2nd, with Mrs. W. Audley of Vuna, Alberta, as teacher.

Mr. Russell, school inspector of Camrose visited the school on Tuesday). no doubt had a pressing invitation to do so, owing to grade nine being taken up in the school. He was willing to give it a trial.

Friends of Miss Mabel Lawson were sorry to hear that she had undergone an operation for appendicitis at the Camrose hospital on Saturday. We wish her a speedy recovery.

Mr. Ingram sr., was taken seriously ill on the home of her son Charles two weeks ago, she was able to be taken to her own home in town for the first of last week, but is still under the doctor's care.

Miss Mildred Ingram is staying with her grandmother, Mrs. M. Ingram.

Mr. Gamr Barnes was under the doctor's care last week, but is on the road to recovery at the present time.

Mrs. Audley spent the week-end at her home near Vuna.

Mrs. Wesley Ingram who has been residing the past two years at Viketota came in Saturday evening for a visit with her mother Mrs. M. Ingram and other friends and relatives.

Mr. James McDevitt of Cadomah motored down on Friday looking after the interest of his farm. Mr. Henry McDevitt has his farm rented there so is staying while in our district.

Miss Bengal Pochang of Bardo spent a few days at the C. A. Ingram home last week.

Master Neal Whillans spent a short vacation with his grandmother, Mrs. Shephard in Edmonton, returning home when school opened.

Mr. Mead of Peace River district is great booster at the Pool elevator at Bardo, Mr. Hesketed has taken over the one in Tofield.

Miss Gertrude Ingram is assisting Mrs. H. Mitchell with her home work for a month.

Mrs. Harold Smith and little daughter of Cameron spent Saturday night for a visit with home folk.

The M.A.S. which was to have been held last Wednesday was postponed one week and will be held this week at the W. A. Mitchell home.

Messrs. C. and A. Critchlow and Miss Ruth Osterhus of Monnwood, visited with their uncle Mr. Reeves, last week.

Mr. Ernest Nash of Camo B. C. is at present on Peace River. He is the grandson of Mr. M. Eide.

School commenced on Tuesday morning with a number of new pupils and others were testing the line. Nephill the main line carries a heavy pressure of approximately 125 pounds but on that day the pressure was not been boosted up to over 200 pounds, the reason being that if it carries the load satisfactorily. It would carry the push loads of winter without any breakdowns. There were very few who knew about the change and less had been and is now a wheat grower on a large scale. He is the editor of "The Farm and Ranch Review," of Calgary and a keen student of agricultural problems. He is not known facts and is fair enough to give us his information in this kind as may be considered an authority. Besides these figures are corroborated by the Federal Trade Commission of the United States. The table follows:

Distribution of the Consumers' Price of a Pound of Bread

Item	Costs Per Pound of Bread	Per Cent of Retail Price
Producer of Wheat	1.15c	15.40 per cent
Country Elevator	0.30c	3.79 per cent
Transportation and terminal agencies for wheat	0.77c	9.88 per cent
Flour Miller	0.40c	4.75 per cent
Transportation agencies for flour	0.26c	3.66 per cent
Wholesale Baker	0.11c	50.77 per cent
Retail Grocer	1.27c	14.96 per cent
TOTAL	8.5-10c	100.0 per cent

Local and Personal

Joseph Spell was taken into Edmonton by Dr. Law early Tuesday morning. He was suffering with acute appendicitis and an operation was performed very soon after arrival there. We are pleased to say the operation was successful and that Joe is on the way to recovery.

Mr. W. J. Duckbeil is in town this week. He will be remembered as having been in the butcher business here some few years ago, being located in the old Queen's hotel building.

Mrs. Penree of Edgerton, who has been visiting Mrs. Bardoe, returned home on Saturday last.

Mr. Wilson, who has been in charge of the Anglican Church work here for the past few months will return to the University of Saskatchewan on September 19th.

Mr. J. D. Hansson was in town for a few days this week.

The W.M.S. of the United Church will meet with Mrs. J. Ferguson on Friday, September 12th, at 2 p.m.

Mrs Bayne (nee Miss Marion Carlson) was visiting with Mrs. Bud Hansson for a few days this week.

Miss Edith Glover of Calgary, is staying with Mrs. Cap Lee and attending high school here. Miss Glover is a niece of Mrs. Cap Lee.

The Ladies' Aid of the United Church held a very successful tea and business meeting at the home of Mrs. Lee on Saturday last in the Institute rooms

[illegible] ...showing how his business was founded upon and expanded through the use of [illegible] ...sistent and persistent advertising backed by goods of high quality at the lowest possible price. "I feel I cannot too strongly emphasize now more than ever in such times as my present [illegible] ...ness is due entirely to advertising," he says in one place. He quotes as a glimpse of Gladstone's that made a great impression on him: 'Advertising is to business what steam is to industry—the sole selling power. Nothing stays the same and we make money by about advertising.' Again from his own experience, he says: 'All the time I was a very large user of space in the morning, evening and weekly papers. This form of publicity cannot be largely relied upon for sustained effort—news.' Every manufacturer or retailer in Canada would not only find entertainment but profit in reading Sir Thomas Lipton's own story.

[illegible] ...ng a little activity over at the [illegible] ...on the other morning. A wonderful cover, appearing as impressive as it could to inspect the plant. At that particular time Mr. Imbert and others were testing the line. Nephill the main line carries a heavy pressure of approximately 125 pounds but on that day the pressure was not been boosted up to over 200 pounds, the reason being that if it carries the load satisfactorily. It would carry the push loads of winter without any breakdowns. There were very few who knew about the change and less had been and is now a wheat grower on a large scale. TOWN GOSSIP

Boys at the music hut of the Canadian National Railways is worth something. One has an opportunity of seeing the special trains carrying this, that and the other groups of international visitors go through

Occasionally something of much greater interest passes through and stops, long enough to allow Tofield [illegible] ...serve the modern trend in modernship. Many will remember the [illegible] ...homotives which passed through last year, harnessed with [illegible] ...pulling power, equipped with [illegible] ...motor strokers and all labor saving devices, so complete that the engineer has to use one main description, and three bolts to oil, he rides admiringly to his throttle [illegible]

Last week there came through the most powerful and modern working [illegible] ...The crane was especially designed to lift the above mentioned engine and is capable of lifting two hundred tons. It was of the [illegible] ...type. It being possible to swing the boom in any direction. As the crane will generally be used when a wreck occurs, we will hope its period of activity will be few and far between.

The T-field School Fair is billed for Monday, September 15th. This event should be one of the most important local events of the year, and even if it does come in a busy season it should be well attended by the adults—even may be sure the children will be there.

Boys and girls are speaking will travel the way in which they are directed by those who are older and those who have their respected leaders. There is a belief among some of the youngsters that the school fair is staged so as to allow them to make some more money. This is not the idea. The school fair is planned to encourage the school pupils to grow things and become interested in their growing For girls the idea is to inculcate a love of home and home surroundings by having them better informed on all things pertaining to domestic science

The prizes are merely an incentive and are the reward of endeavor, but not the main issue. The spirit of healthy rivalry is to produce the best possible in to be commended, and for the school fair to achieve its maximum good, parents should do super acts with their children, explaining the benefits of the school fair to them, encouraging them to live up to the rules, win or lose

It will not be long now before another yacht race for the Americas Cup will be sailed. This is the yacht race which is the cause of hundreds of dollars are spent in preparation before the actual event, and unlike many other sporting events, it is not re-claimed by gate receipts

Except perhaps on the eastern and western coasts there is not a great deal of interest in the event in Canada, but in England twenty thousand pounds or more pounds would unit outside the newspaper offices far into the night to hear the results of a race between a Shamrock and Columbia.

Rightly or wrongly, a good many of men who frequented the water fronts in their days claimed the race in England that gave the cup to America. That was said. That the story all put and crushed it with the statement that the skipper who sailed the English yacht went to the bar and did not go back to England.

Anyway, since the cup was won by the Americas, the British designers have had to design boats to cross the Atlantic under their own sail to compete for it again. This they have done numerous fully several times.

It is a sport for the multi-millionaires and Sir Thomas Lipton has set his heart on crossing the cup. Here's hoping in the races to be held soon he succeeds

For their objective the supplying to the consumer abundant gas at an [illegible] ...pressure.

That under the operation of Messrs Imber and Hicks, they are highly efficient, we can ourselves testify, as we have seldom seen that call for very steady pressure, and it is very rarely indeed that we have to alter our control

Writing of Sir Thomas Lipton, the following taken from the Editorial columns of the Edmonton Journal should be of interest

"Sir Thomas Lipton is probably one of the world's greatest believers in advertising. In a biographic of his life now appearing in the Saturday Evening Post, he returns again and again to

ENO'S FRUIT SALT

To Feel Your Best

Take a dash of ENO'S "Fruit Salt" in a glass of water every morning. Millions of... because they know that ENO is a gentle, effective, non-habit-forming—to the dread of constipation.

In cases of... stomach, fatigue... ENO is invaluable. For more than sixty years it has been the standby in thousands of well-regulated homes.

But remember, only ENO can give ENO results.

September 1905-1930.

The first week of September was a red letter period in the history of the two prairie provinces of Alberta and Saskatchewan as it marked the silver anniversary of the creation of these latest members of the Canadian Confederation out of a portion of the vast North West Territories.

When these provinces were inaugurated twenty-five years ago it was estimated for financial and other purposes that they each contained 250,000 people, an estimate which a census taken in 1906 proved to have erred on the side of generosity to the new provinces. Today these two provinces contain over one and a half millions of people. Prior to the creation of the new provinces the people resident in the Territories were represented by ten members in the House of Commons; today Alberta and Saskatchewan have a total of 37 representatives in the Commons.

In 1905 while population was steadily increasing through immigration, settlement was sparse indeed, and large tracts were still wholly unsettled; even today the area of the two provinces is one of the least thickly settled portions not only of the Dominion but of the habitable world.

Twenty-five years ago this great western empire was served by one main line of railway and only a few branch lines; today the country is criss-crossed with lines of steel, Saskatchewan itself being the second province of Canada in point of railway mileage, being surpassed in this respect only by the older, richer and more populous province of Ontario.

This great fertile prairie area, to which twenty-five years ago many people questioned the wisdom of granting full provincial status, has in many other respects witnessed one of the most remarkable transformations, and recorded a more phenomenal growth than any other portion of the world in a like period of time. Its productive capacity has amazed other countries, and today the out-turn of the year's operations in the prairie provinces is the barometer of all business in Canada.

Coincident with the settling of the farm lands, thousands of hamlets and hundreds of villages came into existence, villages became towns, towns grew into cities. With ever-increasing railway facilities, modern telephone systems, one of the most efficient educational systems in the world, good roads and modern highways, hospitals, and all the requirements and necessities of twentieth century life, the last Great West of the pioneers of the closing years of the last century has passed into history, being replaced by two of the most progressive and up-to-date autonomous provinces of the Dominion.

As has been the case with all other lands and nations, this record of growth has not always been maintained at high peak. While there has never been any retrogression, and progress has always been recorded with each passing year, there have been times when things have "slowed up," when periods of depression have come, when the more faint-hearted were inclined to raise their voices and entertain doubts. There have been temporary periods of hard times, and during the quarter of a century under review there occurred the awful calamity and progress-destroying event of the Great War. Nevertheless steady growth, permanent growth, has been the outstanding characteristic of the first twenty-five years of provincial history of Alberta and Saskatchewan.

This year, owing to a combination of climatic and world economic conditions, Western Canada, in common with the rest of the world, is passing through another period of business depression. There is unemployment for some, loss of crops for many, greatly restricted incomes for others, and generally less prosperous times for all. As is always the case at such times, there are croakers and pessimists abroad in the land, but they are but a slim minority among the great mass of people who live on these prairies and have made them the magnificent provinces they are today.

Twenty-five years may constitute quite a portion of a man's life, but it is only a fleeting second in the life of a nation or a province. Every individual must experience some ups and downs in life; without reverses man would become a flabby thing. The same is true of nations and provinces. Out of the difficulties of today will come the basis of still greater progress, a more permanent and satisfactory era of prosperity. What has been accomplished in Alberta and Saskatchewan during the past twenty-five years is but the forerunner and a promise of what the next quarter of a century will record. Now is the time to prepare for it in order to reap the maximum benefit from that inevitable new era of expansion and prosperity.

Use For Cherry Pits

Yield Valuable Oil Which Chemists Believe May Become Popular

Chemists have recently discovered a valuable oil in cherry pits which should prove to be a high grade dressing for salad and useful for the manufacture of cosmetics and for some pharmaceutical preparations. Since a hundred million pounds of sour cherries are annually canned in Michigan, Wisconsin, and New York it is altogether likely that this new oil will become popular.

Canada's Primary Industry

Agriculture Gives Occupation To Large Percentage Of Population

Agriculture is Canada's outstanding primary industry, having a production value of nearly $2,000,000,000 annually. When considered in relation to the subsidiary industries dependent upon it, agriculture is the real leader in Canadian enterprise. As an industry it provides gainful occupations, directly and indirectly, to more than fifty per cent. of Canada's population.

Salt Production

The production of salt in Canada for 1929 was 330,364 tons, having a value of $1,570,066, as compared with the previous year's production of 290,445 tons valued at $1,466,971. Salt, either in natural brine or in beds, of rock salt, is found in every province of Canada, commercial production is confined to Ontario and Nova Scotia.

Fall Colds

Take no chances. At the first sign of fever heat Minard's and inhale the prompt relief.

MINARD'S "KING OF PAIN" LINIMENT

Rheumatism GONE

After years of rheumatism, one is perfect health, says Mr. A. Durbano. Thousands write: rheumatic pains, neuritis, ... with Fruit-a-tives. Constipation, ... Get Fruit-a-tives from druggist today.

THANK FRUIT-A-TIVES

Use Minard's Liniment for Foot Ailments.

Experiments With Rockets

Expect To Obtain Valuable Information By Penetrating Upper Regions

Experiments in shooting rockets to extreme altitudes, financed by Daniel Guggenheim, will be carried on by Professor Robert H. Goddard, of Clark University, Worcester, Mass., at Roswell, N.M. That site was selected because of favorable atmospheric conditions.

Prof. Goddard has been conducting rocket experiments since 1912 with the regard of the Smithsonian Institution, Clark University and the Carnegie Institution. Mr. Guggenheim recently made a grant to permit further work.

At Roswell, small rockets will be sent up first and finally one capable of ascending from 36 to 75 miles, will be sent up by gas propulsion and with parachutes to regulate the speed of the return to earth. The rockets will carry thermometers, barometer electrical measuring apparatus, air traps to collect samples of air at various altitudes and other ...

Pending completion of preparatory work, it cannot be announced how soon the work at Roswell will begin.

THE REASON WHY

Thin, Weak Children Need Baby's Own Tablets

Malnutrition, or inability to derive nourishment from food, is a common trouble with little children and is entirely due to stomach and bowel weakness. Another cause of loss of flesh and sleep is worms.

To correct stomach and bowel troubles and thus banish constipation and indigestion, break up colds and simple fevers, expel worms and allay the pain which accompanies the cutting of teeth is what Baby's Own Tablets were designed for. They never fail to be of aid and can be given with safety to the youngest babe.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Measure Of the Really Great

Big Men In Business Are the Easiest To Approach

Only really big men who are at the head of affairs can afford to be brusque—and the remarkable thing about it is that they are not. On their way up through the ranks these men have learned that it pays to be polite. Reporters have noted, in their news gathering, that the great figures in business and public affairs are the easiest to approach. If they have nothing for publication they say so in a kindly way. They have learned that it is not good business to be uncivil, and a great many underlings would be wise to arrive at the same conclusion.—Toronto Globe.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

Interesting Exhibit

More than three feet long, a wax model of a human ear is one of the features of the recently opened German hygiene museum in Dresden, Germany. The model shows every organ involved in the sense of hearing, making it easy to understand how sound waves reach the brain.

CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

Chas. H. Fletcher's CASTORIA

A Popular Appointment

Hon. Irene Parlby To Represent Canada At Geneva This Year

A woman, the Hon. Irene Parlby, of Alberta, represents Canada in the assembly of the League of Nations at Geneva this year. This recognition has been given by the new Conservative Prime Minister to the notable Alberta group of women whose successful fight before the Privy Council won admission for women as "persons" to the Senate, thus enabling the former Prime Minister to appoint Hon. Cairine Wilson as Canada's first woman Senator.

With Sir Robert Borden, who will take Canada's seat in the Council of the League, and Hon. Thomas Chapais, French-Canadian statesman and historian, will go this woman who was the second cabinet minister in the British Empire, and who, although an Englishwoman, has identified herself with the essence of the Canadian point of view.

Hon. Mary Irene Parlby was born at 71 Eccleston Square, London, England, in 1868, the daughter of Lieut.-Col. Ernest Lindsay Marryat, an Englishman, and Elizabeth Lynch Marryat who was Irish. She came to Canada in 1896, on a visit to friends on a ranch. "Of course, I stayed," Mrs. Parlby said once in an interview. "My visit of a few months to friends on their ranch led to a permanent occupation—the interesting vocation of wife and fellow-worker in the building of a Canadian farm home."

Her marriage to Mr. Walter Coventry Hall Parlby, who is an Oxford graduate, took place on March 14, 1897. Mrs. Parlby had been provincial president of the U.F.W.A. and a member of the board of governors of the University of Alberta before her election to the Legislature in 1921, but resigned from her university position on entering the Cabinet as minister without portfolio.

Hon. Mrs. Parlby has shown singular genius in her understanding of the new country. When she was in England a few years ago, she spoke urging English people to come to Canada, not as a sinecure but with "the old spirit of adventure and desire to help in the development of the outlying parts of the Empire that animated the old pioneers."

Recipes For This Week

(By Betty Barclay)

CARROTS AND CHEESE

Mince twelve medium-sized carrots. Add a teaspoon of sugar and steam until tender. Put into a baking dish. Sprinkle liberally with cheese and a little salt and pepper. Beat three eggs and stir into a pint of milk that has been put on the stove to heat. Let the mixture thicken, then pour over the carrots and cheese. Add more cheese for a top dressing. Put the baking dish in a pan of water and place in the oven to brown.

FIFTEEN-DOLLAR PIE

½ cup sugar
2 tablespoons flour.
1½ tablespoons melted butter.
Juice 1 lemon.
1 egg yolk.
½ cup milk.
1 egg white.
Few grains salt.

Mix sugar and flour, add melted butter, lemon juice, egg yolk slightly beaten, milk, egg white stiffly beaten, and salt. Bake in one crust, and cover with meringue or not, as desired.

The Influence Of Color

Certain colors may influence the strength of buildings according to the theory advanced by an English scientist, who has discovered that by painting steel blue the effect of the sun's rays on the steel is reduced.

There are more active volcanoes in Salvador than in any other country.

Minard's Liniment for Cuts and Abrasions.

Buy Only Empire Goods

Women Of Vancouver Have Started a Worthy Campaign

Under the instance of the Vancouver Council of Women, more than 2,000 women in Vancouver have signed pledge cards to ask with respect to every purchase, "Where from?" They are then pledged to insist upon British Columbia products made or grown in Canada, or Empire goods.

The campaign is to be continued in the 70 women's organizations affiliated with the local council of women, there are more than 10,000 members, and all of these are to be asked to sign the "Where from" pledge and to act upon it.

The cards are in two sections, with perforations to allow tearing apart. On one half the name and address of the signatory is kept by the local council. The other half is taken by the signatory and can be placed in a conspicuous place in the home as a reminder.

How Famous General Died

Came Through Many Wars and Met Death In Auto Crash

General Sir Horace Smith-Dorrien was one of the most famous British soldiers of modern times. In the course of an active army career beginning nearly fifty years ago, he had faced all kinds of savage tribesmen and civilized foes, faced all kinds of weapons of warfare, faced disease and death in many forms. He was several times mentioned for bravery so that he could not be accused of hiding in a staff billet many miles from the line of fire.

He fought in the Zulu war, the Egyptian wars, in the Soudan, in India, in South Africa, and took part in various expeditions. He commanded the second division of the "Contemptibles" in the world war.

And recently he died as the result of an automobile crash on a quiet, English road.

Conditions Improving

Fair indications that conditions are improving throughout Canada lie in the fact that "SALADA" tea sales show an increase in the past five months of over 400,000 pounds in Canada.

Ship Strawberries To Australia

The extension of the British Columbia markets for frozen strawberries to Australia was effected the other day when 160 cases were shipped off, having a dead weight of more than two tons. This follows a small experimental order sent some months ago. Good prospects are seen for future business along this line.

Always keep Douglas' Egyptian Liniment at hand, ready to bring immediate relief to burns, sores and frosts. Stops bleeding at once. Prevents blood poisoning. Splendid for sore throat and quinsy.

Had No Advantage

Two inmates of the county farm, south of town, were discussing their respective vices. "I've never smoked, chewed, cussed or taken a drink and I am 78 years old." "Well," said the other, "I smoke, chew, and have taken a drink, but I can't see that you're any better off than I am."

Establish Big Ranch

To Invest a Quarter Million In Livestock and Fur Ranch In Northern Saskatchewan

Details of the plan to invest $250,000 in a livestock and a fur ranch on a township of land 12 miles northeast of Big River, Sask., were bared at Prince Albert, coincident with receipt of information that the governments involved had sanctioned a lease on a portion of the total acreage desired by the company, bearing the name Big River Fur Company, Ltd. In a communication from Dr. A. J. Saich, of Biggar, president of the company it was stated he and his association plan to stock the seven sections now held with horses, caracul sheep, silver, cross and blue foxes, mink, marten and beaver, and attempt immediately to have the holdings extended to cover a township.

The project involves the construction of a ... road to connect through the Prince Albert National Park with the provincial highway leading into Prince Albert. Work will be commenced almost immediately, Dr. Saich states, on clearing of roads and construction of necessary buildings. According to the company's president, the project calls for the expenditure of $250,000 on roads, buildings, fences, and stock for the unique venture. Thirty-five men will be employed the year round. ... leasing of seven sections to Dr. Saich and associates.

Persian Balm is irresistibly appealing to all women who appreciate charm and elegance. Its use keeps the complexion always clear and beautiful. Tonic in effect. Stimulates the skin and makes it wonderfully soft-textured. Softens and whitens the hands. Persian Balm is equally invaluable to men as an excellent hair fixative and cooling shaving lotion. Splendid also to protect the tender skin of the child.

Inspector—Got away, has he? Did you guard all the exits?

Country Constable—Yes, but we think he must have left by one of the entrances.

"It is not so much the peaches, but the spirit in which they were sent," said the parson, as he ate the brandied peaches sent him by one of his flock.

800 DIE WHEN HURRICANE HITS SANTO DOMINGO

San Juan. — Governor Roosevelt was informed that 800 were dead in the city of Santo Domingo alone as the result of the tropical hurricane, with no part of the interior of the Dominican Republic heard from.

The governor's information came from Major Cary I. Crockett, who flew from San Juan to the Dominican capital.

Major Crockett's estimate was made after he had conferred with President Trujillo and Charles B. Curtiss, American minister.

Major Crocket radioed Governor Roosevelt that the American minister with his staff and Europeans were saved, but that the American legation was destroyed.

He said that three-quarters of the houses were practically destroyed and that the entire city was badly damaged.

The 800 deaths were estimated by President Trujillo. That many had been counted at the time of the conference and it was indicated that the number in the city might go higher, with the remainder of the country yet to be heard from.

Hundreds of others were injured, but the message did not attempt to estimate the number.

Major Crockett said there was urgent need for physicians, medical supplies, tents, pots, blankets, clothing and 50,000 to 100,000 rations. He added that funds from the Red Cross also were badly needed.

Santo Domingo, Dominican Republic. In this beautiful old city, all but wiped out by a hurricane, relief forces struggled with a task of succor that taxed their utmost efforts.

Half of the first new world settlement of the white race is in ruins. Homes, business blocks, public buildings, power facilities and the bridge spanning the Ozama River have been battered and twisted into jumbled wreckage.

No authoritative source could estimate with reasonable accuracy the millions of dollars of property that had been converted into debris in the short space of the storm's passing.

Aeroplanes circled over the scene of ruin and gave the world the first view of the catastrophe. Later plans were launched for other 'planes of maximum capacity to transport from Port Rico and elsewhere every possible form of relief, including medical supplies.

Santo Domingo city faced a water famine, imperilling its 60,000 or more inhabitants. Efforts were begun to send fresh water in from inland points by overland truck transport.

The storm that hit Santo Domingo raged for more than an hour. It cut a wide swath across the eastern end of the island. Its nature was terrible, according to frightened inhabitants who are still stunned by the immensity of the atmospheric disturbance.

Lighted Airways

There Are Already 900 Miles Of Lighted Airways In Canada

Toronto, Ont. Hope that before many years have passed Canada will have a trans-continental airway that is second to none was expressed by J. A. Wilson, controller of civil aviation, Ottawa, principal speaker at the aviation and international day luncheon of the Canadian National Exhibition.

Already there are 900 miles of lighted airways in Canada, stated Mr. Wilson, for night flying, and 300 more miles are being added this year.

Soviet Government Must Pay

Court Awards Thirteen Million Pounds Sterling To English Firm

London, England. The Russian Soviet Government will pay "The Lena Goldfields," an English firm, about thirteen million pounds sterling under the terms of a ruling of an arbitration court here. The company alleged their offices, operated under contract from the Russian Government, had been raided by secret police and that in other ways they had been prevented from living up to the terms of their agreement.

Will Fly Back To Paris

New York. The Question Mark, flown from Paris to New York by Coste and Bellonte, will be flown back from New York to Paris by Paul Cordos, French aviator, as soon as Coste and his comrade has completed flights in the 'plane to Dallas, Texas, and to Washington, it has been announced.

Charged With Murder

Constable Pirt To Be Tried At Fall Assizes At Dauphin

Dauphin, Man. On a charge of murder, Constable John W. Pirt, of the Royal Canadian Mounted Police, Yorkton, Sask., will be tried at the fall session of the Court of King's Bench, here.

The constable was committed for trial following a preliminary hearing before Magistrate Robert Hawkins in the Dauphin County Court recently. He is charged with the murder of Mrs. Sophie Light, of Ipswich, South Dakota, fatally wounded at an inter-provincial picnic 60 miles from here, Labor Day.

The evidence given at the preliminary hearing was similar to that of the inquest. Witnesses testified that, contrary to regulations, Pirt had been drinking and was "very intoxicated" at the time of the shooting.

A statement obtained from Mrs. Light shortly before she died in the local hospital was presented by the Crown prosecutor. In it, the woman said she had met the constable only two minutes before the shooting. He had drawn his gun from a holster, and she asked him not to point it at her. "Don't point at me. I don't like it, the woman had told the constable. A second later the revolver discharged, and Mrs. Light fell to the ground, a bullet wound in her abdomen.

Pirt was not called upon to testify, nor were any witnesses called for the defence.

Aviator Breaks Own Record

Squadron Leader Cowley Makes Better Time In Recrossing Rockies

Regina, Sask. Records are made to be broken. And Squadron Leader A. T. Cowley, of Ottawa, with J. A. Dickie, Fort William, secretary of the Association of Flying Clubs, unsuspectingly broke the record they themselves had established in crossing the famed Canadian Rockies by aeroplane on August 20, it was revealed on their arrival at the Regina airport on September 2.

Flying a Stearman biplane belonging to Inspector A. D. McLean, Regina, of the Department of Civil Aviation, they made the distance of over 300 miles eastward crossing in four hours and 30 minutes. A few days previously they had created a record by flying from Calgary to Vancouver in five hours and 35 minutes.

Squadron Leader Cowley is superintendent of air regulations in the Dominion and his record-breaking feat came only in the regular course of his work.

"Beothic" Reaches Pond Inlet

Lands Supplies For Northern Post After Severe Trip

Ottawa, Ont. After two weeks of battling with heavy ice in the attempt to reach Melville Island and return, eastward along Lancaster Sound and Barrow Strait, the S.S. Beothic, bearing the Department of the Interior's Arctic expedition, reached Pond Inlet in safety on September 1, but owing to a heavy northeast gale, was unable to land supplies for the post there until evening, according to radio messages received here. Pond Inlet is the most northern government post in Baffin Island and one of the most important in the archipelago.

G. C. Mackenzie, officer, in sending his wireless message to the director of the North West Territories and Yukon branch, reported all were well at the post and that there had been a large amount of patrol activity.

Raise Fund For Widow

Family Of Montreal Constable Killed While On Duty, Will Be Provided For

Montreal, Que.—Enabling the family of Constable Dollard Pelletier to live without serious privation and permitting the children to be educated, a fund opened by a local newspaper and a broadcasting station raised $16,392.

The constable was shot down on duty when he entered a store in which he suspected a burglar was working, and died in hospital shortly afterwards.

The money has been placed with a trust company, the interest to be spent on the family's behalf. The constable left a widow and six children.

Big Cheque For Mother

Toronto, Ont. Sudden wealth has not affected Marvin Nelson, 19-year-old winner of the C.N.E. marathon, and 15-mile swimming champion of the world. When he received his cheque for $7,400, his portion of the Exhibition prize, he bought a draft for the full amount and sent it to his mother in Fort Dodge, Iowa.

French Flyers Feted

Hailed By New York As Latest Giants Of Aviation

New York, N.Y.—Two little men of modest manner were hailed by all New York as the latest giants of aviation.

At a luncheon in their honor, on a ride around the harbor, in a parade through the streets, and at city hall, Dieudonne Coste and Maurice Bellonte were given tumultuous greeting that might have turned any head. But it didn't turn theirs. On they smiled, they waved, they said they were having a grand time. But quite evidently they remained, from their own viewpoint, just a couple of fellows who had tackled a tough job and had the good fortune to succeed.

"You may be especially proud," Mayor Walker told the French flyers in the aldermanic chamber at city hall, "that your great achievement is not only a wonderful accomplishment in itself but also is the final justification of the ill-fated attempt of your countrymen, Nungesser and Coli."

After the mayor had delivered his welcome and congratulated them on turning the north Atlantic from a one-way street into a two-way thoroughfare, the procession proceeded uptown to the flyers' hotel.

After the Texas flight, Coste announced recently, his famous flying Question Mark will be flown back to France by Paul Codos, who holds jointly with him several world records for distance flying.

GREAT FUTURE FOR CANADA SEEN BY SIR G. FOSTER

Ottawa, Ont.—The tremendous advance which Canada has made since Confederation, and the fact that even now those who are most intimately associated with the Development of the Dominion have hardly penetrated to a complete realization of Canada's great future, were the two outstanding elements which struck Sir George Eulas Foster, the veteran statesman and administrator, most forcibly recently. Born on September 3rd, 83 years ago, Sir George, who had just returned from a three months holiday in British Columbia, was spending his birthday at home, the recipient of many congratulatory messages. In spite of his four-score years, Sir George continues to enjoy excellent health and has lost little of the vigor which characterized him in the days when he fought many a doughty campaign and broke many a lance in the political lists.

"The great contrast noted," declared the veteran statesman, "is the fact that in Western Canada particularly, you have a country of homes. When I travelled across the Dominion many years ago, one acclaimed with joy the sight of farm shacks, some ten, fifty and even one hundred miles distant from their neighbors.

"In a sense the people who inhabited those plains were nomads. But now one sees great cities and settled farming districts."

Sir George was impressed with the work which the western farmers had put into tree-planting around their homes, contrasting as it did, with the bleak and featureless prospect which had characterized the prairie farmhouse of the early days. He mentioned the city of Brandon as a striking example where the residents had turned their streets into broad avenues whose trees were outspread in luxurious foliage.

WARNS PARENTS

Dr. Helen MacMurchy, of Toronto, who is author of booklet issued by Department of Health, which warns parents that preparedness must be watchword to successfully combat threat of infantile paralysis epidemic which has been alarming residents of Ontario.

Aviators Encounter Bad Weather

Major Burwash Delayed In Flight To Coronation Gulf

Winnipeg, Man. Checked by poor flying conditions, Major L. T. Burwash, famous northern wanderer, and the pilot of his seaplane, W. E. Gilbert, are held to the ground at Bernard Harbor, far up in Dolphin Strait. The intrepid two are waiting for the weather to clear up before leaving on their aerial journey to King William Land, or, if the weather still held the upper hand, to return to Fort Hearne before the freeze-up.

On August 25, Burwash and his companion set out from Hearne an outpost on Coronation Gulf, for King William Land. It was here that Sir John Franklin's ill-fated expedition of 129 men met death. Major Burwash hoped to make a photographic survey of the shore line for the Dominion Government.

With the most dangerous flying season just around the corner officials of Western Canada Airways here were unable to state whether or not Major Burwash will discontinue his flight. On September 10 however, he will be on his way out of the Arctic and able to radio from Coppermine. Until then, his movements will be shrouded in silence.

W. A. Buchanan, Western Canada Airways pilot, communicated with his headquarters from Hunter Bay recently, simply stating that the pair were weather-bound at Bernard Harbor, and would be unable to give their position until September 10. Buchanan is standing by in case he should be needed.

Would Trade With India

German Manufacturers Anxious To Seize Markets Closed To Britain

Leipzig, Germany.—Authorities on international trade said here that the time is ripe for German manufacturers to seize Indian markets closed to the British as an outcome of Mahatma Gandhi's boycott movement.

Spokesmen said Germany enjoys a unique advantage in the Orient because she has no colonies there and so avoids the racial friction hampering other nations. They said numerous trade inquiries furnished ample evidence that India is willing to do business with Germany in lines of merchandise hitherto monopolized by the British.

Missed Trophy by One Putt.

A six foot putt separated Dave Arnott, of Winnipeg, from the Prince of Wales Trophy, coveted prize of the recent Banff Springs Hotel Golf Course Tournament, in the last round of the finals. He was one up on the day's play. Both he and his opponent, W. J. "Bill" Thompson, of Toronto, made good tee drives and their seconds landed them on the green, Arnott, six and Thompson five feet from the flag. Arnott's ball hovered on the lip of the cup, but Thompson sank his putt. This evened the match, but another hole was played, Thompson winning easily and taking one of the most sought-after prizes in Canadian golfdom. Photo shows Thompson (left), and Arnott (runner-up).

Well-Known Pilot Killed At Toronto

Captain Charles Sutton Crashed Into Lake From Low Altitude

Toronto, Ont.—Captain Charles Sutton, well-known Toronto pilot and Canadian war veteran, was killed when the Fokker seaplane he was flying in the Efficiency Challenge Trophy race at the Canadian National Exhibition crashed into Lake Ontario from a low altitude.

The accident occurred in full view of thousands of spectators.

Rescuers found the 'plane floating bottom side up and the youthful mechanic, Claude Mills, clinging to a shattered wing in a semi-conscious condition. Sutton could not be found and it is presumed he was buried unconscious from the cockpit and drowned.

Sutton was one of the best known fliers in Canada, particularly in the north, where he had flown nearly 100,000 miles. He was formerly chief pilot of Dominion Explorers and had superintended the placing of gas and provision caches along the route of the flight made by Col. C. D. H. McAlpine and his party which later became marooned.

Return From Poultry Show

Two Canadian Wild Geese Make Round Trip From Brandon To London, England

Brandon, Man. Two wild Canadian geese members of the Exhibition Park pond here, have just completed the longest trip any birds of their species have made, while in captivity. The two birds were sent over to London, England, as part of the exhibit from Canada at the poultry congress. There was rather a mild suggestion attached to the exhibit that a pair of swans might be acceptable in return. But apparently the exchange was not effected, and the geese have now arrived back at their little pond quite happy to be among home surroundings.

WHEAT POOL MEMBERS FAVOR 100 P. C. PLAN

Regina, Sask. — Saskatchewan Wheat Pool members voting in the recent ballot on the matter of 100 per cent pooling by legislation, are overwhelmingly in favor of such legislation, according to the result of the ballot announced from the office of the Wheat Pool here recently. The vote compiled by George Beach, city clerk for Regina, who acted as returning officer for the Pool, shows a total of 46,545 ballots cast, of which 32,653 were for the proposal, and 12,901 against. The official statement from the head office of the Wheat Pool reads as follows:

"Of approximately 83,000 ballots sent out there were 46,545 ballots returned, of which only 79 were spoiled.

"The result of the ballot shows 32,653 votes for the proposal as compared with 12,901 ballots opposed. In addition there were 1,968 unsigned ballots against the proposal. Counting these unsigned ballots as well as those returned correctly in all respects, the vote would stand 34,621 votes for the legislation as against 13,843 opposed, or 71.3 per cent of those voting in favor of the proposal and 28.7 per cent of those voting opposed to the proposal.

At the June meeting delegates, by substantial majority, decided as a body in favor of the proposed 100 per cent pooling legislation for Saskatchewan, and further, authorized the taking of a ballot among the Pool membership on the understanding that a majority vote of those voting in favor of the proposed legislation would be accepted as a mandate by the organization, on the basis of which the government would be approached formally with a request that such legislation be enacted. This matter will, therefore, be considered by the board of directors of the Wheat Pool at its next regular meeting.

The proposed legislation will, it is understood, provide that a legislative pool arising out of it would be grower-controlled, and that this control would be equally divided among all growers in the province, whether at present pool or non-pool. It is further specifically understood that the legislation even when enacted should not become effective until a referendum among grain growers in the province should decide in favor of it by a two-thirds majority. Further, the pooling legislation covered by the present ballot is no way directly related to the emergency proposal recently submitted to the Saskatchewan Government by the board of directors of the Saskatchewan Wheat Pool.

ST. LAWRENCE WATERWAY PLAN TO BE STRESSED

Ottawa, Ont.—The St. Lawrence-Great Lakes waterways proposal and its relation to Canadian economic development will be the subject of a most comprehensive itinerary to be launched by the Association of Canadian Clubs next month. Announcement of the itinerary was made by the national office of the association recently. Approximately 120 Canadian clubs in every section of Canada will be embraced in the itinerary.

Three other itineraries on the same plan are being organized it was further announced for the late fall, early winter and spring seasons. The subjects of these itineraries will be The British North America Act, and the relations of federal and provincial powers, the relations between French and English-speaking sections of Canada, and British administration in India.

These national itineraries will be supplemented by regional itineraries, covering sections of Canada only, on the mechanization of western agriculture, Canadian export trade, relations between Canada and the United States, European politics and the work of the international labor office of the League of Nations.

Organizations of the nation-wide speaking tour on the public question of the St. Lawrence-Great Lakes waterways has been carried out by the national office on a new plan. All the addresses to be delivered by a group of 20 speakers, including barristers, economists and members of university staffs, who have made a study of the question, will be based it was stated, on an Imperial memorandum prepared by the national office. The memorandum will deal with the existing waterway, the proposed improvements, the relation of the economic structure of Canada and the treaty position existing today between Canada and the United States.

Preparation of the document has been made by the secretary of the association, Graham Spry, and has been checked by different branches of the government. It has been prepared, it was stated, so that speakers in the different sections of the Dominion may show the relation of the waterway to the industries of their section. In addition to the memorandum, each speaker will have the use of slides illustrating the details of the waterway, maps and charts and the essential public documents.

The group of 20 speakers will leave their respective cities and cover the neighboring Canadian clubs. Among the speakers are George Sedgewick, K.C., Prof. George Brown, Toronto; F. I. Kerr, Hamilton; R. K. Finlayson, Winnipeg; D. J. Thom, K.C., Regina; J. E. MacKenzie, K.C., Saskatoon; H. G. Nolan, Calgary; Alan Harvey, Edmonton; Dean R. W. Brock, and Prof. W. A. Carrothers, University of British Columbia, and other economists, barristers and editors throughout the country. In one month every Canadian club in the Dominion will be offered a speaker on the waterway problem, including clubs as far north as Grand Prairie and Peace River.

The number of Canadian Club meetings under the announced plans will total more than 600. In addition, local clubs will broadcast the principal addresses and motion pictures and lantern slides will be available for lectures in schools and new-Canadian settlements.

Government Feeder Policy

British Columbia To Take Advantage Of Feeder Purchase Plan

Ottawa, Ont. — Benefits of the "feeder purchase" policy for livestock, authorized by the Hon. Robert Weir, Dominion Minister of Agriculture, have been extended to include British Columbia. Under this policy, the one-way travelling expenses of any farmer or the authorized agent of a farmer from any point in British Columbia to (a) Kamloops, (b) the shipping point nearest a bona fide ranch in British Columbia, at which feeder steers or lambs are purchased, or (c) to the Moose Jaw feeder sale October 16 to 18, or other western stockyard at which a minimum shipment is purchased, will be paid by the Dominion Government through its livestock branch.

Shows Big Increase

Ottawa, Ont.—Production of wine in Canada for the calendar year 1929 increased 1,876,839 gallons over the previous year, it was shown in a report issued by the Dominion Bureau of Statistics. There were nine more wineries in operation and the capital investment increased by $2,389,000.

TORONTO'S FINE SKYLINE.

This... waterfront gives a vivid idea of the... growth of the city's downtown area since early in 1920. Centre of the picture is the Royal York Hotel, largest hotel in the British Empire, left is the Star office; and right the fine structure of the Bank of Commerce.

Wheat Pool Members!

Why Menace Your Own Elevator System

By Delivering Your Wheat To Non-Pool Elevators

No other elevator system can give the same fair treatment to one and all as can the Alberta Pool elevators.

Your own money to the extent of millions of dollars is invested in Alberta Pool elevators. By patronizing these elevators to the fullest extent you will safeguard this large investment.

Your loyal support and patronage of the Alberta Pool elevator system NOW means everything to your organization.

Deliver Your Wheat To Pool Elevators!

The Publisher's Harvest

RIGHT AT THE PRESENT MOMENT AS WE WRITE THERE IS SCATTERED HERE AND THERE OVER THIS DISTRICT, MANY FIELDS OF CUT GRAIN. AND AS ONE LOOKS AT THEM IN THE AUTUMN SUNSHINE AND SEE THE EVENLY CUT STUBBLE WITH ITS APPEARANCE OF NAKEDNESS, ONE IS IMPRESSED BY THE MANY STOOKS, STANDING AS IT WERE AS SENTINAL GUARDIANS OF THE FIELD ITSELF. THE BINDER MAY HAVE CONQUERED THE FIELD OF SEPARATE STRAWS, BUT NOW ONLY A THRESHING MACHINE CAN DEMOLISH THE STOOKS.

AND THE STOOKS STAND AS EVIDENCE OF WEALTH—NOT SO MUCH AS WE WOULD WISH PERHAPS—BUT WEALTH NEVERTHELESS. ONE STOOK WORTH SO MUCH, TWO TWICE THAT AMOUNT AND SO ON. HERE WE ARE, THEY SEEM TO SAY, YOU CALL US GOLDEN GRAIN, CHANGE US FOR THAT WHICH IS REALLY GOLD—GOLD THAT CLINKS AND GLITTERS.

THE REWARD OF FAITH AND LABOR!

LABOR! LABOR PERFORMED IN THE EARLY HOURS OF MORNING—THE HOT AND ARID HOURS OF MID-DAY—AMID THE COOLING HOURS OF THE SETTING SUN.

FAITH! FAITH THAT LIVED THROUGH EARLY DROUGHTS, THREATS OF HAIL, DANGER OF FROST AND THOSE THINGS OVER WHICH MAN HAS NO CONTROL.

SUCH IS HARVEST, THE TIME OF RECEIVING, THE TIME OF REJOICING.

THE PUBLISHER'S HARVEST? OH YES, HE HAS A HARVEST ALSO. STOOKS? OH YES, HE HAS STOOKS TOO. AH, BUT NOT STOOKS OF GOLDEN GRAIN. HIS STOOKS ARE PAPER SLIPS, AND ON EACH PAPER SLIP THERE IS WRITTEN A NAME AND A DATE. THERE THEY LAY, AS WE WRITE, ON OUR DESK READY FOR MAILING. HERE WE ARE THEY SEEM TO SAY, YOU CALL US AKIN TO GOLDEN GRAIN, CHANGE US FOR THAT WHICH IS REALLY GOLD—GOLD THAT CLINKS AND GLITTERS.

MOSTLY ONE YEAR, SOME TWO YEARS, THREE YEARS, A FEW FOUR YEARS, FIVE YEARS, AND ONE OR TWO OLD STAGERS THAT WILL EVENTUALLY YIELD WELL.

YOU SEE, ONE WAGON CANNOT POSSIBLY COLLECT UP ALL OUR STOOKS, THEY MUST BE DELIVERED. AND WHO CAN BETTER MAKE DELIVERY THAN THE SUBSCRIBER? DON'T YOU SEE, UNLESS WE RECEIVE THESE SUBSCRIPTION AMOUNTS OUR HARVEST IS A FAILURE. IN MANY CASES, NOT JUST ONE YEAR, BUT SEVERAL YEARS.

WE THANK YOU.

The Tofield Mercury

Co-Operative Plan To Build Up Livestock Industry And Find Market For Western Grain

A plan to build up the livestock industry of Eastern Canada and at the same time provide a market for a part of the grain surplus of Western Canada, has been devised by the interested parties.

Western wheat pools, Eastern livestock interests and packers have conferred with the Ontario Department of Agriculture, the Ontario Agricultural College and the Dominion Department of Agriculture, resulting in the appointment of J. H. Newsome, the Wheat Pool's Toronto representative, and S. E. Todd, secretary of the Industrial and Development Council of the Canadian Meat Packers' Association, to work with the governments in furthering the plan.

Hon. George Weir, Minister of Agriculture, has authorized the Dominion livestock branch to put into operation for a period of five months ending January 1, 1931, a feeder purchase policy which will enable the Eastern Canada livestock raiser to amplify his stock from western herds.

Under this policy the Dominion branch will pay one-way railway fare, berth and living expenses en route of any applicant in Eastern Canada who agrees to purchase one or more carloads of steers or feeder lambs in the west, to be brought east for finishing on the standard priced coarse grain feeds which the Wheat Pool guarantee to supply.

"Did you see a hat fly by?" Yes, but it didn't fit me so I let it fly on."—Lustige Kolner Zeitung, Cologne.

WORLD HAPPENINGS BRIEFLY TOLD

Ruth Alexander, San Diego aviatrix, holds credit for being the first woman to fly from Canada to Mexico without a stop.

His Royal Highness the Prince of Wales now has three new titles—vice admiral, lieutenant general, and air marshal—through promotions in three British fighting services.

[illegible]

Caught by a wind as they banked around a marker on the course, Capt. Charles Sutton, Toronto, was killed, and his mechanic, Claude Mills, also of Toronto, was injured when their Fokker 'plane crashed into Lake Ontario.

The interior finish for five new Canadian National dining cars was obtained from the famous Morton Walnut tree, which grew for centuries at Oxford. When the butt and roots of the ancient tree were trimmed ready for conversion into beautiful veneer they weighed 13 tons and yielded 75,000 feet.

Twenty persons were injured when the night train from Glasgow crashed into the buffer stops at Euston Station. The first of two locomotives drawing the train smashed into the buffers and damaged the second engine, while several coaches telescoped, the third coach penetrating six feet into the second.

The Indian Problem

Sir John A. Simon Explains Difficulties To Audience In Washington

Sir John A. Simon, head of Great Britain's Indian statutory commission, expressed hope, in a speech at Washington, for "some way of advance" on the India problem.

Stressing difficulties of the past, the British statesman asked for United States sympathy "in keeping with the United States sense of fair play."

This third visit to the United States, Sir John said, has impressed him once more with this country's "abounding vitality."

"I cannot see that this has been affected by economic conditions," he added.

The tall, blue-eyed visitor, one of England's leading Liberals, in Washington as one of a party of guests of the American Bar Association, discussed "the enormous task" in India.

"There is no division of opinion in England on our policy in India," he said. "It is, as stated in the law of 1919, the gradual development of self-governing institutions with a view to the progressive realization of responsible government in India."

The two great difficulties, Sir John said, are that the vast mass of Indians are villagers, living their lives with customs entirely different from those of "the educated, political minority," and that India is composed of "so many mixed elements that America's mixture is the palest reflection."

Ultimate solution of the problem, Sir John believes, "will not be a mere imitation of the representative government British and Americans have worked out for themselves."

He declared an effort to transport such a government to India would be "planting a seed in soil that does not grow the tree."

Little Mary wants to know what her brothers are talking about so she raps on the door and shouts "Open the door at once! It's not me. It's mummy." — Sondagsnisse - Strix, Stockholm.

GOVERNMENT GRAIN SAMPLING

System Of Sampling As Carried Out By The Government Inspection Department

The following describes the thoroughness of the system of sampling as carried on by the Government Inspection Department. We are indebted for this article to the Searle Grain Co., Ltd., Winnipeg:

Upon arrival of a trainload of grain at an inspection point a Government yard clerk lists the cars from the waybills which follow each car, listing car numbers, kind of grain, point of origin, destination, name of shipper and consignee. These details are necessary for the issuing of Inspection Certificates. Sampling crews with foremen then proceed to the train. The car opener breaks the seals and a record is taken of them. With a pinch bar the door is pushed open. A sampler then mounts a ladder, levels the grain just inside the door and spreads out a sheet of canvas two and one-half by six feet. Then comes the extremely heavy work of pushing the brass probe to the bottom of the car in a number of places. This probe is [illegible] long and has a [illegible] which, when the handle is turned, opens or closes [illegible]. The probe is emptied on the canvas and is examined by the sampler to see if the sample is uniform in quality.

Men Equipped With Ladders, Probes and Canvases Ready To Sample a Train

Sampler Pouring Grain Into Sample Bag, After Having Marked Ticket

In case the grain in one part of the car proves to be poorer than the rest of the car, three samples are taken instead of one, one being of the inferior grain; another of the better grain, and another of the average of the whole car.

The sampler writes the car number on a cardboard ticket, date, load lines, showing depth of grain, and initials ticket, thus making a complete record of the sampling of each car; the grain and the cardboard ticket are put into a four-pound canvas bag and the string is drawn tight. The car door is closed and a new seal attached.

Cars are also examined as to their condition; a careful examination being made for signs of leaks and a record is made of the seals and the condition of each car, also leaks, if any. This work is done by separate crews of the Government Weighing Department.

When the entire train has been sampled, the samples are collected and are brought into the Government grain yard office, where the car numbers and the kind of grain are checked from the train list to detect any possible errors. Inspection sheets are also written up in the yard office from the train lists. After the samples have been checked the strings are drawn tight and the samples are put into boxes holding two dozen samples, and inspection sheets are despatched by truck to the Central Inspection Office for grading.

In many cases, it is impossible to get a good sample on account of cars being loaded too full. A good sample means seven good probes (e.g., to the bottom of the car) as follows: One in each corner, and three down the car lengthwise. When less than seven good probes have been taken only a provisional inspection is made, final inspection to be made at unloading, and in some cases, cars are loaded so full that it is impossible to get more than one good probe, and sometimes none. Cars like these will not be inspected until at unloading.

Doors Are Sealed After Sample Is Taken; Note Sample For Each Car Is Tied To Door Until Collected

Probing the Car To Secure a Uniform Sample

Trains arrive at all hours, day and night. During the fall rush, trains of grain leave the Winnipeg yards every twenty minutes bound for the Head of the Lakes, and for a long period during the fall rush of 1928, upwards of three thousand cars were sampled in the Winnipeg yards every twenty-four hours.

The samplers and foremen are in line for promotion to Deputy Grain Inspectors, providing they are able to pass a very stiff practical examination set by the Chief Inspector and the Civil Service Commission.

The sampling is carefully done and the system is recognized as being most thorough; wherever possible there is a double check on the work.

SUNDAY SCHOOL LESSON

SEPTEMBER 14

JEREMIAH — A PROPHET OF INDIVIDUAL RELIGION

Golden Text: "Each one of us shall give an account of himself to God."—Romans 14.12.

Lesson: Jeremiah 1.1-10; 14.7-22; 31.27-34.

Devotional Reading: Psalm 119. 33-40.

Explanations and Comments

Jeremiah's Call, 1.4-10.—In the thirteenth year of Josiah's reign (the reformer of our last lesson), Jeremiah, the son of a priest in the little town of Anathoth, near Jerusalem, became conscious of the Divine call to the prophetic office. He was very reluctant to take upon himself the duties of a prophet, and the struggle which took place in his mind when something different from his ordinary consciousness made him certain that he was destined to be God's prophet of woe, he has told in the form of a dialogue between God and himself.

God speaks first and tells Jeremiah he had been chosen and [illegible] before his birth, and that he is now appointed a prophet, not to the Jews only, but to all nations. "Jeremiah's mission sprang out of his personal awareness of God. He awoke to the fact that Jehovah was not merely acquainted with him, but [illegible] him because He knew him. He realized that God had set him apart for a special task. He did not become a prophet because he wanted to, but because One whose authority was absolute had assigned him a mission and a duty." John Gardner.

Jeremiah shrinks from the call, and hesitates "Ah, Lord Jehovah!" he exclaims, "Behold I know not how to speak, for I am a child." The same Hebrew word here translated "child" is translated "young men" in Genesis 14.24. He was not a child in years, but he lacked experience, he was unprepared for so great a task.

"Then Jehovah put forth His hand," says Jeremiah, "and touched my mouth; and Jehovah said unto me, Behold I have put My words in thy mouth." Jeremiah does not say that he saw a vision, but that the unseen hand of power touched his mouth and at the same time he was assured that the words he should speak would be the words God would have him speak. In accordance with oriental habit, the prophet is here describing in figurative language what could not otherwise be described, the communion of his human spirit with the Divine Spirit.

Change In Marriage Law

British Columbia Passes New Law To Check Hasty Marriages

If impulsive couples "marry in haste and repent at leisure" in future, they will have to go outside British Columbia to do it.

Under legislation which came into effect on the first of September, eight days must elapse between the time license is issued and the time the ceremony is performed.

In cases where an immediate marriage is desirable, however, special permission may be obtained.

Clergymen must be registered with the provincial authorities in order to officiate.

Cement's Ingredients

The chief raw materials used in the manufacture of cement are limestone and clay.

Chain stores are invading Brazil.

Great Expense To Country

Number Of Mentally Deficient People In Canada Increasing

The number of insane and mentally deficient people in Canadian mental institutions, exclusive of private hospitals, shows an increase of 1,894 persons over last year, according to this month's bulletin of the Canadian National Committee of Mental Hygiene. The total number of insane and mentally deficient people who are filling these institutions is at present 29,579.

Their cost to the country, the bulletin points out, is greater than that of war pensions and totals $16,820,748 a year. This, however, is simply the cost of upkeep of institutions and does not take into account the money spent by private individuals on insane people who are in private hospitals. Nor does it include the loss to the country which results from having a large group of people unproductive.

The tendency of social service workers and mental hygiene specialists at the present time is to pay more attention to signs of mental deficiency in its very early stages. Special education is in many instances being given to children who show signs of it and more care is taken to prevent diseases of which it is frequently the outcome. Several of the provinces of Canada receive financial help from their governments toward this end.

Battle With Snake In Mid-Air

Kansas Aviator Has Encounter With Rattlesnake While Flying Through the Clouds

An unprecedented battle in the air between a horrified pilot and a rattlesnake was verified when H. "Happy" Wiggins, aviator, obtained snakebite treatment at a Scott City, Kansas, hospital.

Wiggins said he was pounding his 'plane through the clouds almost a mile above the ground when the snake reared its head over the cockpit.

"I jumped back," said Wiggins, still violently ill from effects of the snake's poison, "but the snake jumped after me.

"I tried to grasp it and pitch it from the 'plane, but it coiled and struck me twice before I finally was able to fling it away."

While Wiggins was engaged in his unique battle with the rattler, which apparently had crawled into the 'plane while it was in a hangar, the ship hurtled down out of control.

Wiggins finally pushed the snake overboard, righted the ship, and landed so hastily in a pasture that he almost wrecked the 'plane.

A rancher hurried out and dragged Wiggins, almost unconscious from fright and poison, from his seat. The rancher rushed him to Scott City, where hospital attaches said he would recover.

Galileo, the famous Italian astronomer, was the first man to look at the heavens through a telescope in 1610.

All-Canadian Highway

Only One Stretch Of Road In Northern Ontario Remaining To Be Linked Up

An all-Canadian route from coast to coast is practically completed, only one stretch in Western Ontario remaining to be linked up, according to officials of the Canadian Automobile Association.

No one now needs to hesitate to travel from Manitoba, clear across, over the Rockies to British Columbia. The old-time "gumbo" roads which spelt disaster to motorists are now replaced with first-class gravel stretches and all dangerous curves and turns of less than 100 feet radius have been eliminated.

The one stretch of road which remains unfinished is that in northwestern Ontario, passing around the northern shore of Lake Superior. With this exception the condition of the roads all through from the coast is excellent and all Provincial Governments are co-operating in the project of an all-Canadian highway.

Some Curious Trees

Among the curious trees which have been found on the banks of the River Amazon, in South America, is one which has a sweet edible resin and with consistency of real sugar in the bark, and another which exudes an oily substance with the appearance, taste, and other qualities of lard.

Canada's Coal Production

Coal produced in Canada in 1929, totalled 17,496,557 tons from the mines in Nova Scotia, New Brunswick, Saskatchewan, Alberta and British Columbia. Imports of coal last year amounted to 18,619,960 tons of which 14,469,831 tons came from the United States.

Man (at restaurant)—"I wonder how this chicken could live with so little meat on it."

Sid—"It didn't—that's why it's here."

New and Appetizing

Recipe For Bacon Muffins Should Be Good

If you want to try something new and specially appetizing, follow this recipe for

Bacon Muffins

- ¼ pound bacon.
- 2 tablespoons bacon fat.
- 1 egg, slightly beaten.
- 2 cups flour.
- ½ cup corn meal.
- 1 tablespoon sugar.
- 4 teaspoons baking powder.
- ¼ teaspoon salt.
- ½ cup Borden's St. Charles Milk.
- ½ cup water.

Cut bacon in bits, fry crisp and drain off fat. Sift together the dry ingredients. Add the egg, bacon fat, and milk diluted with water. Fold in the bacon. Fill greased muffin pans two-thirds full. Bake in a moderate oven about twenty-five minutes.

Canada and World Trade

Stands Fifth As Regards Imports, Exports and Aggregate Trade

In a "Condensed Preliminary Report" for the fiscal year ended March 31st, 1930, issued by the External Trade Branch of the Bureau of Statistics, Canada is still shown in fifth place as a world trader, being fifth as regards imports, exports and aggregate trade. Imports amounted to $1,248,274,000 and exports to $1,144,938,000, making a total of $2,393,212,000.

Plenty Of Advice

The Smithsonian Institution at Washington, is urging that farmers set aside something every year for the crop failure, which, it says, comes every seven years. At the same time the Department of Agriculture is urging reduction in acreage because supply exceeds the demand. Meantime, probably, the farmers are going ahead doing the best they can as they see things.—Toronto Globe.

Saskatchewan Flour Mills

The flour and grist mills of Saskatchewan now have an output of $15,781,000 annually, which is only $3,000,000 less than Manitoba's output.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES, LAYING PENS, DAIRY BARNS, SUNROOMS, ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

ACHES

There's scarcely an ache or pain that Aspirin will not relieve *promptly*. It can't remove the cause, but it *will* relieve the pain! Headaches. Backaches. Neuritis and neuralgia. Yes, and even rheumatism. Read proven directions for many important uses. Genuine Aspirin can't depress the heart. Look for the Bayer cross:

BAYER

Flin Flon Mine Is Operating

Thirty Million Dollar Project In Prairie Provinces Swings Into Action

The big concentrator at the Flin Flon mine is now operating, bringing to life a dream of the West for many years—a mine in the northwest of the prairie provinces. The mill is not running on full time at present as the smelter isn't ready to receive the concentrates, but the output is 300 tons a day, and the tonnage is being gradually stepped up.

It is expected that smelter construction will be finished in time for the entire project to swing into operation shortly after the first of the new year. Recent company plans were for a daily mill tonnage of 3,000 tons ore when all units are working, and as far as is known the plans still stand.

The mill is running smoothly, reports from the mine state, and officials are well pleased with the efficiency of operations. In fact, a feeling of well-being pervades the entire Flin Flon district. Years of prospecting and development; years of ore experiments and construction are over. The thirty million dollar undertaking of the Whitney interests has been realized.

Most of the ore now being milled is being taken from the open pit, and only a small portion is coming from underground. Nothing official has been given out on the grade of ore in the open pit, but mining men declare that it is high—and quite above expectations.

The concentrates are being stored to await the opening of the smelter. In reality, the mill act today is an important dress rehearsal for the big winter show when the entire mine will leap into being.

One question in regard to Flin Flon is engaging the earnest attention of mine officials, government heads and observers. Part of the property is in Manitoba and part is in Saskatchewan. How are the provinces going to divide the taxes? There has been no announcement of a settlement.

It is a puzzling question. One-third of the concentrator buildings, the power house and converter plant, one-half of the zinc leaching plant, and part of the ore body are in Saskatchewan territory. The remainder of the property lies in Manitoba. About 80 feet of the north end of the known ore body is in Saskatchewan; so is 350 feet of the south end of the known ore body. An announcement may be made this fall.

An important phase in connection with Flin Flon operations is the report that Mandy is planning to build a concentrator of its own, and have the Flin Flon smelter handle the ore. Mandy, near the Flin Flon, is the copper mine which achieved "glory hole" fame in war years. A diligent search for additional high grade has been unsuccessful, but at the Mandy is a lot of ore of lower grade waiting to be milled. Various reports have placed the value of the ore anywhere between $250,000 and a million dollars. The figure is likely to be well under a million.

Smaller properties as well are being groomed for ore shipments to Flin Flon. The great smelter will have busy years ahead of it, once it gets under way.

Many a man who declares his opinion has none.

PUTNAM'S Corn Extractor is Efficient - Painless

W. N. U. 1854

Receives High Honor

[illegible] Physician Becomes Chief Of Cree Indian Tribe

While a medicine man chanted of departed glories, and tom-toms solemnly throbbed, Lord Dawson, of Penn, physician to His Majesty King George, received the highest honor in the power of the Cree Indian nation, and was formally admitted to chieftainship of the Crees. "Big medicine man to the big chief" runs the translation of the distinguished physician's Indian title — the title by which he will be known to all Canadian Indians. In the Cree, the title is Kitche-okemow-o-maski-kie-okemow. At the same time, Lord Dawson was presented with a beaded blanket, wampum pouch and pipe, and a magnificent feathered headdress was placed upon his head.

The ceremony was one of the features of the British Medical Association Convention held in Winnipeg. Another feature was the presentation of a huge buffalo head to the association by Hon. R. B. Bennett, Prime Minister, on behalf of the Dominion of Canada.

In beautiful weather, Tuxedo Park, scene of the presentation, presented a colorful spectacle. In the background were gaily painted rows of teepees, in which the Indians, from Touchwood, File Hills, Fort Qu'Appelle and Crooked Lake reserves, were camped.

Lord Dawson took his seat on a blanketed dais, while Red Dog addressed the gathering in his native tongue. The speech was translated for the benefit of the thousands of spectators.

"In the days of long ago, my father and grandfather were chiefs," Red Dog said, "so it is only fitting that I, the chief, should welcome you, our new chief, into my tribe. Last winter, I learned that the Great White Chief lay on his deathbed. Beside him was a great man, and through this man's effort the Great White Chief lives today. Because of that one reason, I am going to name you 'Big Medicine Man to the Big Chief.'"

Lord Dawson was then blanketed, presented with the wampum pouch and pipe, and the feathered headdress placed on his head.

In reply, the noted physician expressed his appreciation for the honor conferred on him, and said that he would always treasure the gifts as a reminder of his fellow-tribesmen of the Cree Nation.

Mr. Bennett then presented the huge buffalo head to Prof. Willoughby, Eastbourne, England, president-elect of the association. "The buffalo represents the spirit of the west," he said.

In reply, Prof. Willoughby stated that the head would be mounted in the headquarters of the association at London, England, where it would be seen by thousands of visitors.

Claim Depression Nearing End

Gradual Pick-Up Of Business Predicted This Fall

According to a survey which has been completed by International Nickel Company, of Canada, through its sales department, there is a growing feeling among the leading industrialists of the United States and Canada that the worst of the prevailing period of receding business is past and commencing this fall a gradual pick-up may be expected.

Seventeen out of 20 authorities in lines of industry where nickel finds a market, expressed the opinion that while the return to normality might be slow, a definite revival of confidence and vigor, so lacking during the past nine or ten months, is expected.

In recent years, owing to its expansion and the growing diversity of its uses, the market for nickel has joined the list of the more important barometers of trade, and when expectations in those lines of business affecting nickel are that 1931 will be a good year, it means that the nickel industry, in common with steel, automobiles, railroads, etc., is likely to share in the general prosperity.

Lost Umbrellas

More than 33,000 umbrellas were taken to the Paris police lost property office during April, the month of showers. Requests for the recovery of a "lost" umbrella within the same period totaled 39,000. Only 22,000 were returned, the others having failed to afford a detailed description of the "lost" umbrella. The [illegible] police headquarters at Boston, is given [illegible].

Canada's First Newspaper

Commercial printing had its beginning in Canada in 1752, when the first edition of the "Halifax Gazette" was struck off in the printing office in Grafton street, conducted by John Bushell.

DIZZINESS

Caused by blood pressure

Doctor ordered Kruschen

"Five years ago this month I had a serious attack of blood pressure, and my medical man ordered me to take Kruschen Salts daily. Evidently I am a stubborn subject, because I use every morning a small teaspoonful and a half in a glass of hot water, and this acts splendidly and keeps my head right. If I don't have the action mentioned, I feel cold, stupid and liable to fall from dizziness. Therefore I can't do without my Kruschen on any account. Some time ago I tried some other salts which were cheaper, but they pained me so much that I had to stop them. There is no pain with Kruschen. I have told hundreds of my little wonder-working bottle."—(E. C. Fergusson.)

Dizziness is a symptom of a deeper-seated disorder. It is one of Nature's danger signals—her urgent warning of an impure blood-stream which, if not attended to in time, may wreck the entire [illegible] with some dangerous, indeed lifelong, disease. The six salts in Kruschen keep the blood-stream pure and vigorous by ensuring the complete elimination of poisonous waste matter from the system every day.

Latest Invention For Films

Figures Stand Out In More Detail With British Device

A British invention, presented recently at the Regal Theatre, Marble Arch, London, England, is a process for showing stereoscopic films in which the figures stand out with a definite suggestion of space between themselves and their background. It gives the distance far more "life" than upon an ordinary film, so that one can get the full effect of a race either going away or "coming out of the picture." Also architectural detail stands out better.

The thing is done by an arrangement of lenses invented by Edwin Clarke, a Welshman, which can be fitted to a film and projector of standard width. Among the short films shown recently were both landscape films and "close-ups." In both the claim of the invention, which is called "Widescope," to supply the nearest approach the cinema has yet known to a "third dimension," was certainly justified.

The process can be adapted to the sound-film, and it is clear that talk coming from a character who stands out stereoscopically is far more convincing than that which merely accompanies flat movement.

Vancouver Building Permits

Ranks Third In Value Of Construction Among Pacific Coast Cities

Among Pacific coast cities, Vancouver ranked third in the value of its building permits issued in July according to the Daily Journal of Commerce, of Portland. Los Angeles led the list with $5,841,636, followed by Seattle with $1,315,530; Vancouver with $1,156,702; San Francisco with $1,066,836, and Spokane with $600,250.

Usually Worthless

Henry Ford is quoted as saying that experience is the only thing we can take away with us when we die. It is a curious notion, especially in view of the fact that it is about the most useless thing we could take. However, it seems equally worthless to others, most people being influenced by no experience but their own, and not always by that.

New Generating Unit For Moose Jaw

The National Light and Power Company, of Moose Jaw, has ordered a new 10,000 k.w. generating unit from the C. A. Parsons Company, of England, delivery to be made early in 1931. Improvements and extensions to the plant amounting to $440,000 will begin in the near future according to the local manager.

YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario—"When I first took Lydia E. Pinkham's Vegetable Compound I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl chum told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little baby boy."—Mrs. J. B. Stalker, Bancroft, Ontario.

National Air Tour

Two Trophies To Be Won In the 1930 Tour

Two trophies are at stake in the National Air Tour of 1930, and for each one of them a determined contest is forecast by Captain Ray Collins, manager of the tour.

The major trophy, offered first, six years ago, by Edsel B. Ford, to the 'plane displaying the greatest commercial reliability in the tour, might pass this year into the permanent possession of the Waco Aircraft Company which has already won it twice in succession.

An additional trophy, posted for this year's tour by the Great Lakes Aircraft Corporation, of Cleveland, Ohio, will be awarded to the 'plane powered with an engine of 510 cubic inch displacement or less, which makes the highest score under the system of scoring by the tour formula.

The major trophy carries with it a first prize of $2,500, with $9,500 divided among the succeeding nine that finish. No monetary prize is offered with the smaller trophy.

The Edsel B. Ford trophy is a magnificent example of the trophy-designer's art, and it represents the highest victory attainable by the commercial 'plane in America. It may be competed for only by commercial 'planes entered by bona fide manufacturers, and if it be won by the same manufacturer three years in succession, it becomes his permanent possession. The holder may determine then whether it shall be competed for again in a similar contest.

Three successive winnings of the Great Lakes trophy also give permanent possession. It is possible of course for the same manufacturer to win both trophies, but the second trophy has been offered as a special award to the smaller, sport type 'planes, similar to that manufactured by its donors in Cleveland.

The fact that Waco can win the major trophy permanently this year, and the additional element of contest introduced among pilots of sport 'planes powered with 510 cubic inch engines, is likely to make this the most hotly contested tour yet staged. Some important changes in the formula by which the contestants will be scored, are also designed to put more of the aspect of competition on the tour.

Externally or Internally, It Is Good. —When applied externally by brisk rubbing, Dr. Thomas' Eclectric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be [illegible].

Advice Of King's Physician

Rest Often and Never Eat When Cold Says Lord Dawson, Of Penn

Never sit down to a meal if your hands or feet are cold. This is the admonition of Lord Dawson, of Penn, physician to King George, offered to a distinguished gathering at the sectional session on medicine in connection with the British Medical Association Convention, held in Winnipeg. Unpleasant, sometimes serious results may ensue, he mentioned.

"If a man comes home after a hard day's work, cold and tired and sits down and eats a good, square meal, he is going to have trouble," warned Lord Dawson. "Before eating he should toast his feet in front of the fire and warm his hands in a basin of water."

Eating when the extremities are cold, he said, often causes indigestion and nearly always induces constipation the following day.

Business men would be well advised, he said, to take a day or a half-day in bed once a week—reading, perhaps, keeping warm; eating lightly. The man who guided England's King from the shadow of threatened death discountenanced the talk of week-end exercise in a big way. Folks who play a round of golf Saturday and two on Sunday "to get in their exercise," would be better off to go to bed Saturday afternoon for a good nap, forgetting the worries of the week, and possibly playing a game of golf, Sunday.

Billions In Forests

In the latest official estimate of Canada's national wealth a value of over $1,866,000,000 is placed upon the forests of the Dominion, including the accessible raw materials, pulpwood and capital invested in woods' operations. Large as the sum is, it covers only a part—possibly not more than half—of the total economic stake which the Canadian people have tied up in one way or another in forest resources, industry and trade.

To avoid collision, nations should always keep to the right.

Inhale Minard's Liniment For Asthma.

Too Much ACID

Many people, two hours after eating suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

A Peaceful Army Of Invasion

German Tourists Are Now Flocking To French Capital

No sooner had the French evacuated the Rhine land than an army of Germans invaded Paris, with this decided difference—the French were soldiers; the Germans were tourists. Germans were excluded from Paris, first by the war, then by the enmity between the two nations which continued after the war. Withdrawal of the French from the Rhine removed the last trace of war, and a host of Germans went on a peaceful mission to the French capital. They are made welcome and the French government has offices in Berlin and other cities where all needed information is given. Germans travel through France in a very different spirit from those who began the journey 16 years ago and whose war lord made an appointment to eat dinner in Paris on a certain day—an appointment which he did not keep. They come as friends and are received as friends. France is exploiting her reputation as the show country of Europe, and is as ready to show it to Germans who come unarmed as to other people. But what commentary on human folly is the fact that 16 years have been needed to overcome the estrangement of two neighboring nations.—Portland Oregonian.

Wild Ducks Not Decreasing

Number Is Quite Up To Average This Year

Wild ducks and geese appear to be quite up to the average numbers this year, according to the game branch of the Department of Labor, Railways and Industries. On the deeper bodies of water these birds are more numerous this year than ordinarily owing to the fact that most of the smaller sloughs have dried up.

In some quarters farmers reported damage to their crops from the feeding activities of wild ducks. A number of requests were received to permit shooting to prevent further damage. It is pointed out by the game branch that, although it is permissible to shoot to frighten the birds, the only source from which permission to kill game out of season can be obtained is from the Minister of the Interior at Ottawa. There is no case on record of this permission having been granted.

The open season for ducks and geese opens September 15 every year. There is no open season for prairie chickens and ruffed grouse this year. Hungarian partridges may be shot during the month of October. Badgers and foxes come this year under the list of game protected for the greater part of the year.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Boss—"So you want this afternoon off, eh? Grandmother dead, I suppose?"

Office Boy—"No, indeed. She has two tickets for the game."

London's public debt now is approximately $729,000,000.

Little Helps For This Week

"For we walk by faith, not by sight." 2 Corinthians v. 7.

Thy God hath said 'tis good for thee
To walk by faith, and not by sight.
Take it on trust a little while
Soon shalt thou read the mystery right
In the full sunshine of His smile.
—John Keble.

As the arm grows strong only by work, as the memory increases only when made to carry weights, as the eye can see only in light, so faith has a chance to develop only in darkness and trial. There is no room for faith in the daylight; anybody can trust then. Do not even the [illegible] so? But he who on the darkness of the tempest-tossed waters can trust Him who stilleth the storm—he, and he only, can claim to walk by faith.
—M. J. Savage.

Interesting Statistics

Some Facts That People Are Not Generally Aware Of

Do you know that the world's annual income is $167,500,000? This astonishing fact is revealed by the report of a German bank, which has been studying world statistics for six years. Other interesting points from this report are: The world is drinking more milk and more tea, more coffee but less cocoa. We eat less bread, and fruit and vegetables are taking its place. We are smoking less tobacco, in spite of the large increase in women smokers. In England there are thirty-five people to every motor-car. In America one person in five is the proud possessor of a car. One hundred and seventy-three thousand tons of artificial silk are used annually for the manufacture of ladies' stockings. If the wealth of Great Britain were distributed equally amongst the population, every person would receive £500.

Like a Grip At the Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

Chinese Asking For Entry Of Families

Residents Of Canada Will Ask Premier To Grant Request

In an effort to secure modification of Dominion immigration regulations to permit entry of Chinese women and children into this country, 36,000 Chinese residents of Canada will shortly petition Premier R. B. Bennett to consider this request.

Dr. Tshy Hsieh, managing director of the Chinese Trade Bureau, of Canada and United States, will voice the request, it was learned. He arrived in Ottawa after conferring at Toronto with members of the National League and other Chinese bodies.

Minard's Liniment is a household friend.

Peat Mull From Manitoba

A Minneapolis firm is experimenting on the use of Manitoba peat mull in the manufacture of insulation. About 242,000 acres of this material have been surveyed in Manitoba.

Four Doses Relieved Bad Attack of Cholera

Mr. W. J. Cooper, Maughan, Alta., writes:—"A year ago last spring I arrived in Canada with my family, and one of my boys, aged six, was suffering very much with cholera. When we arrived I had a few hours to wait, and told one of the attendants at the station about it, and he asked me if I had ever tried Dr. Fowler's Extract of Wild Strawberry. I had never heard of it in England, so he told me I could get it in Winnipeg. I am pleased to say I had only to give the child four doses and he got well and was quite cheerful by the next morning."

FALL WEATHER

IS AROUND THE CORNER AND SWEATERS WILL BE NEEDED TO PROTECT THE BODY FROM CHILLY AIR

Here Are Some Splendid Values!

SWEATERS

BOYS' PULL OVER SWEATERS—
Boys' pull over sweaters, different colors, neck styles and sizes. Just the thing for school at ..... $1.00 to $2.50

'Fresh from the gardens'

Economic Unity Of The Empire

Within a few days the Imperial Economic Conference will be convened in London, England, and representatives of the British Government will sit down at the conference table with representatives of the self-governing Dominions and discuss matters of mutual concern to all members of the British Commonwealth of Nations.

It will be a momentous, an epoch-marking event in the history of the Empire. There have been Imperial Conferences in the past, but they have had to do with constitutional and political aspects of our Empire relationships. For the first time serious consideration is to be given to the economics, the trade and commerce of the Empire as a unit, and to the future lines of policy to be followed by each British nation in its trade relations with the Motherland and the other Dominions on the one hand, and with the rest of the world on the other hand.

The Conference, therefore, will make history and exert a pro[illegible] influence [illegible] future of each of the self-governing Dominions, the British Isles, the widely [illegible] British colonies, in a word the whole Empire, while at the same time its decisions will inevitably create a reaction in, and affect the policies of, all other nations. A nation can no longer live unto itself alone. The adoption of any given policy by one of the major nations of the world in the present advanced state of our world civilization affects all other nations. They must take cognizance of it and govern themselves accordingly. And if this is true of the action of any one nation, it is immeasurably more true of a great union of nations comprising one-quarter of the earth's surface and more than one-quarter of the world's population.

The forthcoming Imperial Economic Conference is fraught, therefore, with great [illegible] the Empire. Today while politically and sentimentally [illegible] economically each individual self-governing unit [is] treating each other in matters of trade much the same as they do foreign countries and each [illegible] singly with great economic problems which through joint action they might be able to solve.

The first question for the approaching Conference to consider and decide is: Shall this condition continue? Can it continue with safety to the future of the Empire? The Empire was created by conquest and built up by trade. The day has passed when Great Britain can dominate the trade of the world. Since the post world conditions have developed, particularly during and since the Great War. As a result Britain has lost much of her world trade and economic and financial predominance. The whole world has become industrial and single handed Britain cannot hope to regain her lost leadership in trade and commerce, but cannot she do so in co-operation with the Dominions? Will political and sentimental ties hold the Empire together if its component parts are bitter rivals in trade, giving advantages to foreign countries, regardless of the welfare of sister British nations, solely because it seems beneficial to the individual units to so act?

These are matters for the consideration not only of Britain but for all of the Dominions as well. They transcend party politics everywhere. It is the future of the Empire that is at stake.

Assuming the decision of the Imperial Economic Conference to be that such a condition cannot continue, that they must unite upon economic lines as well as upon political lines, the next step is to find common ground of action. Admittedly it is in connection with the working out of details of policy that definite, concrete problems of opposing and conflicting interests will arise. They cannot all be solved at once, but a very real start can be made along lines of least resistance, leaving the future, in the light of actual experience, to further extend and develop the agreed upon policy as circumstances may dictate to be of mutual advantage.

A recent newspaper despatch from Ottawa intimated that the West was not greatly interested in the outcome of the Imperial Economic Conference. No greater misconception could possibly exist. The West is vitally [interested]. To a greater extent, perhaps, than any other part of Canada, its future is wrapped up in a successful outcome to the approaching deliberations in London. In no part of the Empire will the people evince a greater interest, possibly even anxiety, than on the prairies of this Dominion.

Making Sure Of Good Seed

The Ontario Department of Agriculture is taking time by the fore[lock] as far as making prepara[tions] for the World's Grain Exhibition and Conference at Regina in 1932 is concerned. Farmers are being urged by the department to keep this year's seed in the event of their [illegible] next year not being up to the high standard of former years.

Despite the cold and long [illegible] periods in the Arctic Zone about 2,000 specimens of plant life have been discovered there among them willows, junipers, ferns, mosses and numerous flowering plants.

Inhale Minard's Liniment for Asthma.

Caravans of camels passing through Afghanistan sometimes number 120,000 laden beasts.

What's In a Name

Winnie Chicken and Bert Bird, of London, England, have announced their engagement which brings back memories of another London affair a little while ago when Archie Rook was married to Carrie Swan, with Rev. James Crowe officiating as clergyman. The couple were driven to their home which they called "The Nest," by Robert Starling.

Douglas' Egyptian Liniment is an excellent leg wash for stock. Also removes corns in horses and quickly relieves bruises, sprains, swellings and joint stiffness.

Commercial fruit production last year in Canada had a value of $19,591,210, of which Ontario accounted for $8,456,067, British Columbia, $4,786,550, Nova Scotia, $2,830,066, Quebec, $1,143,846, and New Brunswick, $192,650.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The quickest remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Self-Cracking Nuts

British Scientist Makes Important Announcement

Here's comfort for the people who have a hard time in extracting the meat from the proverbial stubborn nut.

Dr. A. W. Hill, of the botanical research station at Kew, England, told the British Association for the Advancement of Science, that it was at last possible to produce self-cracking nuts.

"This is a valuable achievement in a commercial sense," Dr. Hill remarked. "For instance in California pistachio nuts have been commercially valueless owing to the cost of cracking them."

The botanical expert also recorded research achievement in the case of limes which had a useful habit of shedding the fruit when it was ripe thus enabling the collection of limes on the ground. Botanists, he said, were now striving to produce bananas immune from disease and curving inwards on a bunch. This new curve, if brought about, would enable the fruit to be handled more easily and to take up less room on board ship.

Do You Value Your Health?

If your health is poor, if you are pale, nervous and easily tired, if you suffer from headaches and backaches, if your digestion is bad you may depend upon it that these symptoms come from an impoverished state of the blood. That unless this condition is remedied a complete breakdown may follow. Dr. Williams' Pink Pills are a perfect medicine for any one in this condition. They enrich and purify the blood and thus promote health and strength.

Mrs. G. M. Andrews, Halifax, N.S. writes: "I always keep Dr. Williams' Pink Pills in the house. When I was a young, anaemic girl they completely restored my health. After marriage my health broke down and once more these pills brought me back to health. My friends all tell me how well I look and for this Dr. Williams' Pink Pills deserve all credit."

You can get these pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Useful To Motorist

Recent Invention Shows Driver When Headlight Not Burning

It is often difficult and sometimes impossible to tell from the driver's seat whether both headlamps are lighted. Dr. W. Kennedy Fenton, Toronto, has invented a simple yet effective and attractive little gadget that is readily attachable to headlights and constantly reveals to the driver whether the lamps are lit or not. They are small reflectors in various designs which fasten to the headlight rims, they are luminous at night and visible from the driver's seat.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvellous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Predicts Speedy "Flying Subs"

Will Cruise Eight Miles Above Earth Says Edward Warner

"Flying submarines," to cruise at 250 miles an hour eight miles above the earth, were predicted by Edward B. Warner, president of the Society of Automotive Engineers.

Cruising speeds of 100 to 250 miles an hour were sufficient for present needs, he declared, except in certain parts of the west and north, where travellers wish to fly 1,500 miles between dawn and sunset. When more speed is demanded the "submarine" and the "rocket 'plane," long a dream of Glen Curtiss, would be developed, Warner said.

Africa Interested In Grain Show

Evidence that competitive exhibits from far off Transvaal, South Africa, will be received for entry in the World's Grain Exhibition and Conference at Regina, 1932, is found in a request to the office of the exhibition for a number of tags for attaching to exhibits. The Hartebeestpoort Experiment Station at Brits, Transvaal, is also anxious to receive special information regarding the exhibition of corn.

The greatest mistake we can make in life, is continually to be fearing that we shall make one. Never explain. Your friends do not need it, and your enemies will not believe you.

Piracy On High Seas

Pirates Cause Plenty Of Trouble Along Coast Of China

Gunners for duty on the high seas as a precaution against piracy are in great demand in Far Eastern ports due to the recent announcement of the British Government that all soldier guards were to be withdrawn from ships sailing the South China waters. "White" Russians with military experience are being recruited in Singapore, Hong Kong and Shanghai, to take the places of the soldiers. The anti-pirate brigades will be under command of non-commissioned officers of the British army.

British soldiers were placed on British vessels about three years ago at a time when the pirates were specializing in sea-going vessels. In one raid alone several Britishers were killed and the pirates made off with a score or more of hostages and $40,000 in specie. For centuries piracy has been rife along the south coast of China. It is still in this region that the pirates have their headquarters. Their lair is in the notorious Bias Bay, 50 miles northeast of Hong Kong, where there are rugged mainland hills in the background to which the robbers withdraw when sought by armed forces from the waterfront.

Master minds work out details of the robbery of the larger ships. In some instances three to four months have been devoted by the pirate chiefs to arranging details of a single haul, which when successful, pays most handsomely. To cope with this situation, the British shipping interests have been compelled to spend much money and at the same time perfect a system designed to reduce the chances of piracy to a minimum.

Specialists have been engaged and a new form of gunmen has gradually developed in this part of the world. He must not only be handy with a revolver but with a rifle as well, and all officers of ships plying these waters must be well versed in the handling of fire arms.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Latest Electrical Appliances

Light Can Now Be Blown Out Like a Match

Old jokes about lazy folks who work merely by drawing their breath has become the latest reality of scientific developments to reduce man's physical toil.

An electric light which can be blown out with the same small puff that extinguishes a match was placed on exhibition at the Westinghouse Lighting Institute, New York.

Its secret is a new kind of electric switch, the "breath relay," for which is promised many useful applications. It can be set to turn [illegible]

Persian Balm is a sheer delight to use. Cools and relieves irritations caused by weather conditions. Imparts a rare charm and beauty to the complexion. Fragrant and velvety smooth. Never leaves a vestige of stickiness. Swiftly absorbed by the tissues and stimulates the skin. Persian Balm is the peerless toilet requisite. Every woman will appreciate the subtly distinctive charm achieved by the use of this magical lotion.

A musical slot machine has been invented in England which vends cocktails properly iced and scientifically blended.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Eclectric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Patron—Let's have some ginger ale.

Waiter—Pale?

Patron—No, just a glass will do.

Hay Fever

and catarrh are offensive ailments. Heat and inhale Minard's a few times daily, as for colds. It stimulates and relieves the membrane.

MINARD'S KING OF PAIN LINIMENT

Rural School Supervision

New Plan Of Rural School Improvement Inaugurated In Saskatchewan

Announcement was made recently by Premier J. T. M. Anderson, Minister of Education, of the appointment of the first rural school supervisor for Saskatchewan, under the new plan of rural school improvement being put into effect by the Department of Education.

Miss Mary Isabella Grant, of Cabri, Sask., is the first supervisor to be appointed by the Public Service Commission and will assume her duties immediately in the new experimental supervisory school area in the neighborhood of Kindersley and Glidden, Sask.

The appointment of rural supervisors, according to the premier, is being made in accordance with numerous requests from school trustees and ratepayers throughout the province who wish to co-operate with the Department of Education in a plan to provide closer supervision of rural school education.

The Minister of Education believes that the experiment will do much towards solving the many problems of Saskatchewan's rural school education.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Honeymooners Take To Air

Journey By Train Or Ship Is Considered Old-Fashioned

Honeymoons by anything so common-place as a train or ship are now "frightfully old-fashioned" says the London Daily Mail. A journey to Paris by air is the only fitting beginning of a modern wedding tour. A Croydon official says that honeymoon couples are departing and arriving almost daily. Brides are arriving from church still in their wedding gowns and veils, blushing as they are pelted with confetti while boarding a 'plane which is usually decorated with flowers, but nobody has yet attempted to tie a lucky shoe to the tailskid.

Farms In New York City

As unbelievable as it sounds, there are 320 farms within the confines of New York City. This metropolis devoted to industry and money making boasts 250 farms in Queensborough, 66 in Staten Island and four in Brooklyn. They are all truck farms.

Perfect dyeing so easily done!

DIAMOND DYES contain the highest quality anilines money can buy! That's why they give such true, bright, new colors to dresses, drapes, lingerie.

The anilines in Diamond Dyes make them so easy to use. No spotting or streaking. Just clean, even colors, that hold through wear and washing.

Diamond Dyes never give [illegible] that re-dyed look. They are [illegible] 15c at all drug stores. When [illegible] fect dyeing costs no more—is so easy—why experiment with [illegible]

Highest Quality for 50 Years

Detect Sounds In Water

Ultra-Sonic Beams Permit Secret Communication Between Ships

Secret communication between ships by means of ultra-sonic beams projected through water was suggested as a future development of radiation by Dr. R. W. Boyle, of the national research laboratory at Ottawa, who addressed the fifth annual convention of the Institute of Radio Engineers in the physics building of the University of Toronto.

Ultra-sonics, or sounds that have too short a wave-length to reach the human ear, have been used with success in the detection of submerged objects, Dr. Boyle explained, and he believed that future development of [illegible] open up a new means [of] communication.

[illegible] of ships provided with projectors of these beams, fixed to their hulls below the water line, he suggested that beams might be interchanged between ships and their radiations utilized by means of code to send and receive messages.

Icebergs may be detected in deep water more successfully by these beams than is usually recognized, he said.

Steel hulls, or submarines could be detected with accuracy when at a distance of four miles, he said, and land could be detected when six miles away.

Investigating Markets

A study of the English and Scottish markets with regard to Saskatchewan farm produce is being made by Capt. W. Waldron, O.B.E., provincial markets commissioner, who represented the Saskatchewan government at the Fourth World's Poultry Congress at Crystal Palace. Capt. Waldron has visited a number of importers in the British Isles recently.

Her Three Children Troubled With Diarrhoea

Mrs. Leo Lapointe, Laurier, Man., writes:—"My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

CONTRACTS LET FOR ELEVATOR AT PORT CHURCHILL

Ottawa, Ont.—Important contracts in connection with the power equipment for the 2,500,000-bushel elevator the [illegible] of Railways and Canals is constructing at Churchill have been announced. The announcement came from Hon. R. J. Manion, minister of that department.

The boiler-house equipment will be supplied and installed by Babcock, Wilcox & Goldie McCulloch, Limited, of Galt, Ont., and the generator room equipment by the C. A. Parsons Company, Limited, of Toronto, Ont., and Newcastle-on-Tyne, England. The expenditure represented by these contracts will amount to about $500,000.

Good progress is being made with the work of developing a port at Churchill, and the construction program laid down in the winter of 1927-28 has not only been maintained but, in certain respects, exceeded.

The program contemplated sufficient work and facilities to permit of testing out of the route [illegible] the fall season of 1931. It provided for the completion of 600 feet of deep water dock by the end of the present season, the tidal use of the harbor during the entire [illegible] 1932, and complete use of the port by the end of that season. Extra effort is, however, being made, and it is expected that at least 900 feet of dock will be completed before the closing down of the work this fall, and the entire 1,800 feet of dock is expected to be available by September, 1931.

The recent summer has been the hottest in the history of Hudson Bay Railway construction. This had its effect upon the railway, and has made a good deal of additional ballasting necessary. That work also is receiving attention, and there are at the present time more than 2,000 men engaged upon either the railway or port facilities.

New Zealand Butter

Cargoes Being Rushed To Canada Before Duty Comes Into Effect

Vancouver, B.C.—Two Pacific liners are rushing towards Vancouver with shipments of New Zealand butter, the last which will come in before the Federal Government's duty of around four cents a pound on this article, comes into effect.

The R.M.S. Aorangi has 8,277 boxes to be landed here and 1,900 boxes for Victoria.

On October 16 the R.M.S. Niagara will bring another consignment, the amount of which is not yet known. In this latter case heavy demand on the butter market is expected during the days between the arrival of the butter and the imposition of the tariff.

Bootlegging Of Grain

Manitoba Pool Takes Steps To Stop Practice

Winnipeg, Man.—A determined attempt to prevent the "bootlegging" of grain by wheat pool members was started recently when eleven interim injunctions against farmers were sought by the Manitoba Wheat Pool before Mr. Justice Donovan in chambers.

Sale of grain by pool members to non-pool purchasers is a breach of the organization's five-year contract, and constitutes what the trade calls "bootlegging."

Sixty Bushels To the Acre

Prince Albert.—Threshing halted by rains, reports pouring into this city indicate that for bushel per acre yield of wheat standing records have been shattered this year in many districts. R. J. Burke, White Star, and A. Chambul, of Foxford, claim to have threshed fields of Garnet which yielded 60 bushels to the acre, while Joe Guedo, of this district, reports a 55 per acre yield of Garnet.

Graf Zeppelin Visits Russia

Moscow, Russia.—The Graf Zeppelin paid her first official visit to the Soviet capital, and was greeted when she landed at October field with red flags flying and bands playing proletarian airs. After a brief visit she returned to Germany again. Dr. Hugo Eckener was greeted by high Russian air officials.

May Give Up Flying

London, England.—The Daily Herald says that Wing Commander Charles Kingsford-Smith, Australian aviator who recently flew from Europe to the United States, has abandoned his plan for a homeward flight to Australia, and has quit flying entirely, on physician's order.

Wheat Crop Estimate

Federal Government Forecast Of Wheat Crop Is 384,790,000 Bushels

Ottawa, Ont.—Canada's wheat crop is estimated at 384,790,000 [bushels] of which 362,000,000 [bushels will] be garnered in the three prairie provinces. This is the forecast made public recently by the Dominion Bureau of Statistics based on reports filed in on or about August 31.

Of the above total for all Canada 384,481,000 bushels is spring wheat. Last year's spring wheat crop totalled 284,810,000 bushels and the entire wheat crop was 304,520,000 bushels. "The western wheat crop," the report states, "is very spotty and thus difficult to estimate because of a series of depreciating weather effects from seeding until harvest.

"The crop has been favored by relative freedom from frost damage and by almost ideal weather for harvesting," the report declared. "The short straw and the extended use of combines have also aided the dry season to establish a new high record for earliness and volume of grain marketed in the month of August. Inspections to date show the quality to be even above that of last year."

Fast Automobile Journey

From Toronto To Vancouver In 96 Hours and 15 Minutes

Vancouver, B.C.—From Toronto to Vancouver by automobile in 96 hours and 15 minutes is the record achieved by two youths of Oakville, Ont. The fastest train scheduled takes 95 hours to do the same journey.

Dick Henry and Vernon Dymes left Toronto Thursday, at 11 p.m., and arrived here, Monday night, at 6.30 o'clock. They proceeded from Toronto to Sault Ste. Marie, thence across United States territory to Emerson, Man., from there they followed the main prairie roads to Crow's Nest Pass, through the Rockies to Vancouver.

May Return To Public Life

Rumor That Hon. C. A. Dunning Will Continue In Politics

Ottawa, Ont.—The return to public life of Hon. C. A. Dunning, former Minister of Finance, who was defeated in Regina, is still regarded as very much of a possibility.

It is suggested that Rt. Hon. W. L. Mackenzie King, opposition leader, had Mr. Dunning in mind when he made his reference to familiar figures who were absent from the Commons, during his speech on the address from the throne.

Mr. Dunning was one of the most prominent debaters in the Liberal ranks during the last parliament.

Steamship Breaks Record

"Empress Of Japan" Makes Fast Crossing Victoria To Honolulu

Honolulu.—Breaking all records from Victoria, B.C., to Honolulu, the [illegible] Pacific steamship "Empress of Japan," arrived here in four days fifteen hours and fifty minutes for the 2,329 miles.

On her maiden voyage, the liner lowered the record between Yokohama, Japan, and Victoria to eight days, six hours and twenty-seven minutes, August 22. This trans-Pacific record had stood for seven years.

Totem Pole For President Hoover

Baltimore.—Another gift is on its way for President Hoover's collection. It is a totem pole about a foot high, carved from a walrus tusk to be presented to him when he arrives to review the parade of the Veterans of Foreign Wars. The totem pole is the gift of Denali Post, Anchorage, Alaska.

Nurses Have Eight Hour Day

Ottawa, Ont.—As a measure towards relief of unemployment the board of trustees of Ottawa Civic hospital have decided to provide an eight-hour working day for nurses on the staff. Three shifts of nurses will now be employed daily in place of the present double shift of 12 hours each.

Ogopogo Still Lives

Hamilton, Ont.—Prompt action by Vernon, B.C., in broadcasting denials that Ogopogo had died a violent death, met with reward recently when the Union of Canadian Municipalities voted to meet next year at the sea serpent city. Vernon delegates promised a sight of Ogopogo, and the vote was unanimous.

Sixty Bushels To Acre

Lancer, Sask.—The biggest crop in this district was threshed on Mrs. F. E. Spence's farm three miles northwest of town, the average for the field being 60 bushels of wheat to the acre.

Wheat From Russia

Cargo Of Russian Wheat Is Received In Scotland

London, England.—The first example of Russia's wheat export campaign is the arrival of [illegible] quarters (a quarter equals eight bushels) of Russian wheat at Leith, in Scotland, for the Scottish Co-Operative Wholesale Society.

This is said to be the first Russian consignment to Scotland since the war, and it was made in spite of the reported stringent food shortage in Russia.

Cut-Off May Be Included

Appropriation For Winnipeg's Short Route To Bay Railway Expected

Ottawa, Ont.—Provision towards the construction of the proposed Mafeking cut-off in Manitoba to the Hudson Bay Railway will probably be included in the $20,000,000 expenditure proposed by the government on national undertakings.

It is understood that work on the short route from Winnipeg to the Hudson Bay Railway will start this fall.

UNITED STATES MOVES TO HALT IMMIGRATION

Washington, D.C.—The state department has announced that in carrying out President Hoover's wishes for more strict application of the immigration laws to aid unemployment, conferences will be held at Winnipeg and Vancouver, in addition to three consular conferences overseas.

The Canadian conferences are set for this week and another date early in October. Foreign Service Inspector Mennett B. Davis has been designated to attend the conferences in the Dominion.

A conference at London, England, September 22 and 23 will draw the consular officers in England, Ireland and nearby points on the continent. Officers from France, Germany, Switzerland, Austria, Sweden, Italy, Czecho-Slovakia and Jugo-Slovia, will meet at Stuttgart, Germany, September 26 and 27.

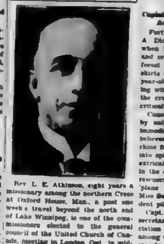
A third conference for the consular officers in Poland, Finland and [La]tvia, completing the plans for all large immigration centres in Europe will be held October 1 and 2, at Warsaw.

Under the president's plan, immigrants to the United States must show they will not become public charges. At present, aliens entering the country with position previously contracted for, are denied entry under the alien contract labor law.

Ottawa, Ont.—Announcement from Washington that more stringent measures are in contemplation in regard to emigration to the United States was received here recently without any great degree of surprise. Unemployment in the country to the south has frequently been stated to be considerably worse than in Canada, and it was expected that steps might be taken to curtail the movement in that country.

It is generally accepted, however, that the present emigration from Canada across the border is not great enough to cause apprehension in Washington.

MISSIONARY FROM NORTH



Rev. L. E. Atkinson, eight years a missionary among the northern Crees at Oxford House, Man., a post one week's travel beyond the north end of Lake Winnipeg, is one of the commissioners elected to the general council of the United Church of Canada, meeting in London, Ont., in mid-September. He was born near Stouffville, Ont., and attended Victoria College, Toronto.

Colleges For Firemen

Future Fire Fighters Will Be Specially Trained In Profession

Winnipeg, Man.—Firemen of the future will be graduates of fire colleges where they will receive highly-specialized training in all phases of their profession, Chief Ralph J. Scott, president of the International Association of Fire Chiefs, declared before the first business session of the Fire Chiefs' convention here.

He said that during the past year he had devoted every effort to furthering the idea of the fire college endorsed by the international convention when it met last year at Birmingham, Ala. Officers of the Los Angeles, Cal., Fire College—first of its kind to be organized—explained methods of instruction at the school.

Girl Swims English Channel

Nineteen-Year-Old Maid From Africa Performs Difficult Feat

Dover, England.—Nineteen-year-old Peggy Duncan, South African girl swimmer, ranked among the few mermaids who have made the difficult swim across the English Channel, although she was balked in her purpose of beating Gertrude Ederle's time in accomplishing the feat.

Miss Duncan, who weighs 200 pounds, landed at South Foreland, England, after swimming from Cape Gris Nez, France, in 16 hours and 13 minutes. Miss Ederle's record is 14 hours and 25 minutes.

Timber Cutting Stopped

Ottawa, Ont.—On the request of the Premier of Saskatchewan, Hon. Thomas G. Murphy, Dominion Minister of Interior, has ordered no more licenses or permits to cut railway ties, pulpwood and other timber be granted in the province of Saskatchewan, prior to October 1, next. It is on that date that the province takes over administration of its natural resources.

Increased Population

Toronto, Ont.—The population of Toronto has increased 13,228 within the last year according to the assessment commissioners report. The total population of Toronto is 621,596.

"Miracle" Heroine Here.

Lady Diana Manners, famous English society beauty and equally famous heroine of "The Miracle," during its New York and Boston productions, photographed with her husband, Captain Alfred Duff Cooper, D.S.O. (left), Viscount Ednam and his son William Ward, at Windsor Street Station, Montreal, on her first visit to Canada. The party are on an extended trip through Canada, as far as Vancouver, with a long stay at the Nipigon Bungalow Camp. Lady Diana thought the talkies would not oust the legitimate stage and observed "people still appear to be building ordinary theatres."

Canadian Ace Killed

Captain Dickie Meets Death In Accident Near Fort William

Fort William, Ont.—Captain James A. Dickie, Canadian war flier, died when his 'plane swooped earthward and crumpled its nose in the rough forest land ten miles from the outskirts of Fort William. Eighteen year-old Marion Swain, who was flying with Capt. Dickie at the time of the crash, lies in hospital here in a critical condition.

Cause of the accident, witnessed by only a few persons, could not immediately be determined. It is believed that the Gypsy Moth, a machine familiar to the war ace, swung into spin from which it could not be extricated. Position of the passengers in the debris did not indicate to rescuers which one was piloting the 'plane when the accident occurred. Miss Swain recently obtained her student pilot's license.

Capt. Dickie, only recently named secretary of the Flying Clubs Association of Canada, was well-known among Canadian airmen. He had previously been instructor of the Fort William Flying Club. Formerly a resident of Winnipeg he came to the lake head six years ago and operated a drug store in Fort William. Only a few months ago he was married to Miss J. Burnett, of Fort William.

A Golf Marvel

Consecutive Hole-In-One Title Is Received By Married Couple

Saskatoon, Sask.—Up at the little town of Waldron in northeast Saskatchewan, R. L. Penny and his wife lay claim to the consecutive hole-in-one title for married couples.

Mr. Penny slapped a drive from the fifth tee on the Stella course and gasped as he saw the golf ball roll into the cup. His chest was still expanding as his wife brushed him aside and teed up her ball. A swing, a smack, and the white sphere bounded toward the pin, rolled about the rim of the cup—and dropped in beside its mate.

Mr. Penny says imitation is flattery's sincerest form. Mrs. Penny claims the female of the species is as deadly—on the drive—as the male.

FEDERAL PLAN TO PROVIDE WORK FOR UNEMPLOYED

Ottawa.—"Work, not charity"—this is the basis upon which the government is proceeding in its effort to deal with the unemployment problem. Thus declared Hon. R. B. Bennett, Prime Minister, in the House of Commons.

Before the House in committee, the Premier explained the government's proposals for spending [the] $20,000,000 which he is asking parliament to vote. These include building of public works, such as wharves, bridges, etc., which are national undertakings but which would not of necessity have been started immediately except to relieve the present situation.

It is proposed to assist the provinces in connecting up the unfinished portions of the trans-Canada highway, and in this connection the prime minister suggested that assistance might also be given out of the Federal treasury for the maintenance of highways connecting provinces.

The railway companies have been asked to inform the government what works they can undertake, Mr. Bennett stated, and assistance would be decided upon in relation to the cost of such undertakings. The question of the Peace River outlet will be left over, he said, until the next session of parliament, which would be called soon after the new year.

The Dominion government will deal directly with the provinces in its assistance to public works of a provincial or municipal nature, and also in granting one-third of the amount expended in cases where municipalities have to provide relief other than that of giving employment.

The amendments to the customs act respecting dumping are expected to relieve considerably the unemployment situation by giving employment in a few weeks, Mr. Bennett hoped, to some 25,000 men now out of work.

Information received from the various provinces of Canada indicates that there are now 117,000 people out of work in the Dominion. There is a prospect that this number may be increased to 177,000 during the coming winter.

Mr. Bennett gave the above figures indicative of the scope of the unemployment problem in the Dominion.

BRIAND MAKES STRONG PLEA FOR A UNITED EUROPE

Geneva, Switzerland.—Aristide Briand, French foreign minister, turned his idea for a federation of European states to the assembly of the League of Nations in an atmosphere of warm admiration for himself and friendly sympathy for the principle of European collaboration.

In his address he attempted no pleading or directing, but left it to the nations themselves to establish its definite form. He contented himself with arguing the necessity of some sort of federal bond between the states of the old continent and in asserting emphatically that neither the League of Nations, the United States nor any other legitimate regional or international grouping would find it inimical.

It was regarded as likely the plan as outlined in M. Briand's memorandum of May 17 to the various nations and the responses of the powers will be submitted to a committee for study and action.

M. Briand recalled that when he first laid the idea before the world he had insisted his proposed federation must be within the framework of the League of Nations. He repeated today that it must rest there.

"We have the unhappiness to inhabit a continent that has suffered [illegible]," he said. "Is there something that can be done for peace? Can these people organize to prevent war?"

He said that he knew and realized it would be difficult always to found a union among people so different, but that real good-will would [illegible].

He denied flatly that the union would run counter to or be in any way inimical to the United States. Statesmen had told him on the other hand, he declared, that relations between Europe and America could more easily be strengthened by existence of an European organization.

"Twenty-seven nations have studied this question," he concluded. "Twenty-seven nations have said 'Yes it can be done.' There it is before you. Go. March on. Accomplish peace."

Would Use Domestic Coal

Efforts To Be Made To Utilize Canadian Coal For Home Market

Ottawa, Ont.—Efforts to ensure Canadian coal will be utilized to supply Canadian wants, are being made by the government in the House of Commons. Premier R. B. Bennett stated that the government hoped to make some arrangement that would ensure the utilization of Nova Scotia, Alberta and British Columbia coal in Canada.

The prime minister stated that subventions given in connection with the transportation of Canadian coal had lapsed. Negotiations, however, were under way for the purpose of ensuring the utilization of Canadian coal.

Grain Exports From Vancouver Higher

August Shipments Reported To Be Higher Than Any Recorded

Vancouver, B.C.—Grain exported from Vancouver during the month of August totalled 7,933,519 bushels, almost 600,000 bushels more than was exported in August, 1928, when grain shipments reached a peak of 93,000,000 bushels from this port.

Last month export to the Orient totalled 350,732 bushels, compared with 480,221 bushels in August two years ago.

Starving Boys Steal Biscuits

Montreal, Que.—Unable to buy food, three boys took three boxes of soda biscuits from a local grocery store. They were arrested and turned over to the juvenile court. The youths told police they had not had a proper meal for a month and were starving. A visit to their homes showed squalor and starvation.

Rumanian Heads League

Geneva, Switzerland.—The 11th assembly of the League of Nations elected Nicholas Titulescu as its president. M. Titulescu has been Rumanian minister at St. James. The vote was 46 for M. Titulescu out of 50 valid votes. Names and votes of other candidates were not announced.

To Meet In Boston

Houston, Tex.—The 1931 convention of the International Typographical Union will be held at Boston, it was decided at the 57th annual convention here.

THE TELESCOPE AND THE BLIND EYE

(Canadian National Railways Magazine)

A DISTINGUISHED Admiral-of-the-Fleet of Old England, so the story runs, at a critical moment in a famous battle when the signal to retreat was given, put a telescope to his blind eye and said he could not see the signal. The battle went on and one of the most famous sea fights of history was won. Whether or no the story has any foundation in fact it is difficult to say.

Perhaps, it's historical foundation is as shaky as that of the story of William Tell and the famous apple; in any event, both tales have had currency and value. [illegible] every schoolboy knows of the intrepid spirit [illegible] Nelson, and the Tell legend has made the Swiss [illegible] beat faster and put iron into the Swiss blood.

But the results of refusing to see things or to see things [illegible] is not always good, nor desirable. It may be that the man who sees only what he wishes to see, the man of one set purpose, is sometimes needed to cleave a passage through this close grained world; but consequences unpleasant, and frequently [illegible] and cruel, have resulted from the habit of partial, or distorted, vision. If we see merely what we want to see, not only is our world sure to be a very restricted one, but ourselves are liable to a fatal constriction of feeling and sympathy. It must be evident that most of the wrong conditions with which we are too familiar are intensified, if not caused by failure to have an adequate vision.

It may be difficult to rise above a consuming self interest, yet it is the duty of every honest man to do so; for self-interest is the prolific mother of many an evil. The earth has run red with blood and has been made hollowy with the grave of the slain, because self-interest so dictated and demanded. This tap root has produced a multitude of Evils.

Someone once made a list of seven deadly sins, but two more might have been added—those of prejudice and its twin intolerance. There are no greater desocializing influences in the world than these.

The very word society, which at root means friendship, tells us how far short we are of being socialized, because we are individualistic; that is, we are almost entirely concerned with our own interests, and individualism is fatal to fraternity.

There is scarcely an "ism" or an "ist" that has not a blind eye and a telescope ready to hand. We have this condition—albeit in mild form—in the man with the [illegible], who is known through the press as "pro bono publico", or "constant reader", and who belabors a suffering public with crude crass and half-formed ideas with the utmost dogmatism and the most triumphant decision. The employer with mind fixed on profits and the employee with mind equally fixed on wages are very apt to this misuse of the telescope and to see only in part, hence suspicion and mutual distrust.

The [illegible] enthusiast with a telescope and a blind eye, the [illegible] is the same. We suspect the demagogue of [illegible] things with his tongue in his cheek, and one cannot resist the ungenerous impression that a partisan is often guilty of the same offence, because it is hardly possible that all who hold one particular [illegible] or support one particular policy, can have appropriated all the truth and that all who are opposed are devoid of honest thought or sound judgement.

There are some classes who are singularly prone to put the telescope to the blind eye. It may be that the increment of controversy is responsible for a one sided [illegible]. The moralist is possibly more liable to partial vision than any other; he sees what he considers an evil to be remedied, it looms so large and seems to him so evident that he cannot wait for development, or natural processes, and he often defeats his own object [illegible] an ill considered enthusiasm, alienating reasonable men whose interest in worthy causes is as great as his own. This use (or abuse) of the telescope may also arise from a defective sense of right, or from over-sensitiveness of an uneducated conscience. There is nothing more abhorrent or more dangerous than a sense of right when it is divorced from tolerance and "sweet reasonableness." The man with [illegible] trained, or unbalanced, conscience is often a greater menace than the one who is indifferent to [illegible]. This hypertrophy has produced many a page of terrible reading in the past, for history is grimly, and appallingly eloquent on this; hence, it is as imperative to enquire what kind of conscience I have as to enquire whether I have a conscience at all. There was once in India a class, or society, called Thugs, who considered it their bounden duty to murder every white man they could find; they were [illegible], fanatically conscientious, yet the British Government considered that it was its bounden duty to hang every Thug it could lay its hands on. Moreover, why should any man assume that his neighbor's viewpoint must coincide with his in matters on which intelligent men differ.

If the employer and the employee, the professional man and the artisan, the theologian and the social reformer would but recognize that the blind eye is a common malady we should have a better and a happier order.

TARIFF SCHEDULE WILL BE AMENDED BY PARLIAMENT

OTTAWA, Sept. 15th—Canadian key industries and minor branches of trade and manufacture will be afforded more protection in tariff changes to be announced in parliament this week, according to well informed circles here.

The boot and shoe, cotton, automobile and woollen industries are likely to be included in the long list of duty changes, which will number around two hundred. Many of the other textile tariff items will be affected in the upward revision.

Announcement of the expected changes will be made today or Tuesday, in all likelihood. When the official statement is made, and it is understood it has yet to be finally drafted, it will come from Premier R. B. Bennett, as minister of finance.

Have Made Survey

The original plan for a horizontal increase in the tariff with a long list of exceptions stipulated, is learned to have been laid aside after consideration. Each industry affected will be dealt with on the merits of the particular case. In certain instances an increase of five per cent, in many ten per cent, and in certain cases fifteen per cent increase in tariff may be announced.

All the changes will be made, it is learned, as a result of careful survey into the individual industry. With the assistance of certain government officials the whole situation has been under careful survey.

A "Canada First" attitude is said to be the governing factor in the tariff alterations and is in line with the election campaign of the new administration. No exploitation of the consumer or any one else behind the Canadian tariff wall will, it is learned, be permitted, and emphatic declaration of the government's [illegible] and intention to utilize proper safeguards in this respect will undoubtedly be made when the matter is under discussion in the commons.

The manufacture of such goods as can and should be made in Canada, equal opportunity and fair competition for Canadians with a view of increasing employment among the workmen of the country is stated as to the arguments which the government will advance in support of tariff changes.

The week the house is now entering upon will doubtless be strenuous. The first order will be the continuation of the resolution to amend the Customs act with respect to dumping. If that makes sufficiently speedy progress, the prime minister will announce his tariff changes today. If not, the announcement will be put over until Tuesday.

The bill to provide $20,000,000 for dealing with unemployment is through the house in committee, with the exception of one amendment, on which both Right Hon. Mackenzie King, leader of the liberals, and Mr. Bennett are agreed. It is a fifth clause which will prevent any appropriations from the fund after March 31st, next. Accordingly, no extended delay is anticipated in completing the course of this bill through the house.

Opposition Doubtful

What attitude the opposition will take with regard to the dumping clause proposals is not known. Hon. E. B. Ryckman, minister of national revenue had only time Friday night to give a brief review of what changes he would ask the house to pass, but said they were designed to put an end to dumping foreign goods on to the Canadian markets. The minister will go into further details when the house opens today.

The big debate of the week will doubtless be on the tariff changes and the government has given notice of its intention of extending the sittings to facilitate the progress of the discussion. It is understood the government takes the view that one way to deal with unemployment is to raise the tariff wall, in some cases to a very considerable extent.

The liberals will probably hold a caucus and decide on their attitude after the proposals have been announced. So will the other groups sitting on the left of Mr. Speaker. Many members of these groups particularly representatives from low tariff constituencies of the prairies, are already giving this much thought and may attack the increases very vigorously.

The government had a substantial majority. So far the members on the Conservative side have not done much talking, evidently taking the view that it is a session for action more than words. Should government members remain out of the debate as far as possible, with night meetings until 11 o'clock every night and Saturday sittings, strong hope continues that the session will be concluded by the end of this week and the prime minister will be able to catch his ship, sailing for England on September 23. This would bring him to London in time for the opening of the Imperial Conference.

The Hum Of The Binder—
The Song Of The Thresher—
The Roar Of The Tractor—

EACH YEAR AS THE DAYLIGHT HOURS NOTICEABLY BECOME SHORTER, AND WE REALIZE ANOTHER SUMMER IS ON THE WANE—A CHORUS IS HEARD THROUGH OUT THE LAND. NOT MUSICAL AS WE UNDERSTAND THE MUSIC OF MEN, NOT EVEN NATURE'S MUSIC OF WIND, TREES, AND WATER, BUT A CHORUS OF FRENZIED ACTIVITY.

RIPENED GRAIN HAS BEEN CUT AND STOOKED, AND MEN TO PROCURE THE GOLDEN KERNELS, HAVE COME WITH HUGE MACHINES THAT DO NOT PERMIT DEFEAT.

WITH A ROAR THAT IS WELCOMED BY THOSE WHO KNOW IT BEST, THE TRACTOR DRIVING THE SEPARATOR STARTS UP A SONG FROM WITHIN THE SEPARATORS VITALS—A BATTLE SONG WHICH SHRIEKS OF VICTORY. THRESH, THRESH, THRESH FROM EARLY MORNING UNTIL EVENING. THRESH, THRESH, THRESH AND THE GOLDEN GRAIN COMES DOWN THE SPOUT ADDING ITS PARTICULAR NOTE TO THE CRESCENDO OF NOISES. THE TIME OF HUSTLE, AND HARD WORK, BUT WITHAL A PLEASANT TIME—THE TIME OF REWARD.

THERE IS ANOTHER NOISE WITH WHICH WE ARE FAMILIAR, WE, HERE IN THE MERCURY OFFICE HEAR IT FREQUENTLY. NOT ONCE EACH YEAR BUT ONCE EACH WEEK—THE NOISE OF THE PRINTING PRESS.

NOT THE ROAR OF THE CITY DAILY PRESS OF COURSE, BUT IF YOU FEEL SO INCLINED TO CALL IT SO THE PLEASANT SONG OF A COUNTRY PRINT SHOP. A SONG THAT SINGS OF EVENTS, LOCAL EVENTS, PERSONAL EVENTS. SINGING BARDS OF CENTURIES AGO WERE NEVER SO PROLIFIC OF THOUGHT; THE SONGS OF MARCHING ARMIES WERE NEVER SO NUMEROUS AS THE ITEMS PUBLISHED.

TWO DOLLARS A YEAR, THE OLD PRESS SINGS. RENEW PROMPTLY — RENEW PROMPTLY — RENEW PROMPTLY.

YES! SEPTEMBER BRINGS A WESTERN CHORUS. A CHORUS OF NOISES ON THE FARM, WHILE EACH WEDNESDAY BRINGS ITS OWN PARTICULAR NOISE TO THE MERCURY OFFICE. CAN WE, DARE WE, HOPE THAT BOTH NOISES WILL BE HARMONIOUSLY BLENDED, WHICH SIMPLY EXPRESSED MEANS THAT EACH AND EVERY MERCURY SUBSCRIBER WILL PAY HIS OR HER SUBSCRIPTION THIS FALL.

WE THANK YOU.

Responsibility For World Peace That Rests Upon Those Who Speak the English Tongue

Dr. Nicholas Murray Butler, president of Columbia University, addressing the Pilgrims Society in London, England, recently had a telling word to say of the responsibility for world peace of the English-speaking world. Dr. Butler said:

Everyone within the sound of my voice has read those opening chapters of the first volume of Mr. Winston Churchill's book, "The World Crisis." These chapters trace with a hand of fate from Fashoda to Sarajevo what Mr. Churchill calls the milestones of Armageddon. You can actually see men in the hands of Fate marching to their doom accompanied by an irresistible [illegible] of lure and ambition. Perhaps many of you have read what seems to me to be an exceptionally interesting bit of journalistic work done by Herr Emil Ludwig in his recently published volume called "July, 1914." He has assembled there what recent research enables him to do, and has placed in logical and chronological order every document which tells the story of that fateful month and of the first few days of the month that followed.

If you will read these documents you will see that perhaps twenty or twenty-five men, alone and unaided, carried ten million human beings to their death and destroyed the wealth of generations. What I mean, Mr. Chairman, is, imputing blame to none, least of all finding fault with an individual, what I would point out is that all that represents the bankruptcy of a mode of thinking upon which we must turn our backs. We must rise from the old-fashioned, selfish, competitive, quarrelsome nationalism to a new and loftier patriotism which finds a nation's highest purpose in its highest service. And when, Mr. Chairman, we state that fact, we indicate in a word the responsibility that rests upon those who speak the English tongue.

It makes no difference whether they live in this old homeland island or whether they have gone out overseas to build a dominion of the British Commonwealth of Nations, or found a government of their own. Their responsibility is one and single and undivided because of the trust they bear, and that trust is the trust of those institutions of civil, religious, political and economic liberty which we have been building for more than a thousand years. These institutions it is that we offer to our fellow-men, and the time has come to do this by effective example of our part, by persuasion and by leadership, through those who speak our views and frame our policy. We dare not, Mr. Chairman, sit still and let matters drift and take their course.

Rust Not Poisonous

Scientists Do Not Consider Harvesting Of Rusted Wheat a Cause Of Septic Poisoning

Scientists at the University of Saskatchewan engaged in rust research do not consider that the harvesting of rusted wheat involves special dangers of septic poisoning as is suggested in a news despatch from Avonhurst, Sask., where a man is stated to have died of septic poisoning contracted while harvesting rusted wheat.

Dr. P. M. Simmonds, of the Dominion plant pathology department, considers that such danger is unlikely. The cause of death, he thought, would probably be due to getting dirt in a wound, a danger which might equally occur in the absence of rust.

The truth hurts, and so would you, if you were stretched as much.

"Is there still so much fighting here in the village as there used to be?"

"Oh, no! The people don't agree at all, now" — Nagels Lustige Welt, Berlin.

National Television On A Nation Wide Network Is A Dream Of The Future

Water and Salt

Live Stock and Especially Young Animals Are Often Neglected

How about the water and salt? As a rule, dairymen are careful that the cows always have plenty of good water. If the water is lacking or stale the cows soon tell about it in the pail. Shorter milk cheques keep up interest to discover the cause. Observation reveals that the growing stock suffer more from lack of water through the hot months than do the milk cows. They are pastured away by themselves and not seen so often. If the water has to be pumped to them, it is often neglected. If they have a stream or spring and it goes dry, it may be days or weeks before the trouble is discovered. In too many cases the young stock drink swamp water and take it only as a matter of necessity. Under such conditions they cannot do well, no matter how good the grass may be. Another frequent cause of lack of thrift is shortage of salt. The salt box should be a regular part of pasture equipment. To build up a good store of minerals in the system a mixture of three parts bone meal and one part salt is advised. The same mixture should be used in the pasture for the milking herd.

Weed Seeds Are Hard To Destroy

Germination After Fifty Years Shown In Recent Tests

No wonder the farmer has trouble trying to eradicate weeds, for Dr. W. J. Beal, of the Michigan experimental station has just shown how long lived some of the seeds are. Fifty years ago he buried a lot of several different kinds of weed seeds. Every ten years some of these seeds are dug up and the attempt made to germinate them.

National television on a par with with sound broadcasting is a considerable distance in the future. When such a development will materialize, engineers hesitate to say. Dr. Alfred Goldsmith, vice-president and general engineer of RCA, and long identified with broadcast engineering, thinks it will not be possible until three years have elapsed, and it may be longer.

"It seems likely that national television service of proven value within a year would be a miracle," he said. "Within two years it would be an amazing feat, within three years it would represent a fine achievement of hard work, and within five years it would be a development proceeding at a good and normal pace.

"If television is developed as a service of real entertainment and instructional value to the public it will take its place beside radio broadcasting as one of the greatest agencies of human progress and enjoyment, but it is not to be expected that the day of television is as yet at hand.

"Laboratories are doing excellent work in the development of television and will probably ultimately bring the equipment to a satisfactory stage for public use. It is dangerous to make any definite prediction as to how long this will take."

Dr. Goldsmith pointed out that the term television means so many different things to various people that a clarification is important. "Some think it means small, dim, blurry and shifting images. Others think it means perfect, large brilliant pictures like the finest movies.

"Television is a radio service of pictures in motion of sufficient detail and quality to have continuing entertainment value to the public, month after month and year after year. It is believed that it is necessary to be able to show clearly the head and shoulders of several people in a closeup and also action of a group at a greater distance with a reasonable amount of background detail.

"It is necessary that receivers supplied the public be simple, compact, quiet, and fairly automatic and reliable in operation and reasonable in cost. Pictures must be brilliant enough to be seen in an ordinary dimly lighted room, of good color, of adequate detail, of real pictorial value, without annoying flicker and visible to persons seated in various parts of the room.

"In order that the people of the United States and Canada shall enjoy such a service it must be carried out on a national scale. This means erection of numerous television transmitters. They must be located at proper points all over the country, and on occasion be interconnected by wire, radio or through shipment of film subjects so that programmes of interest may be brought to the public [illegible].

Establishment of transmitting station and creation of programs for the entire continent is a lengthy and expensive job. To be of value to the public, programmes must be arranged so that they will co-ordinate sight and sound properly. Correct wave-lengths for television for city, suburban and rural service must be determined. Incorrect choice of wavelengths means ruined or unreliable transmissions."

Rose Growing Business

Rose growing as a business is rapidly developing throughout Canada into a trade of considerable magnitude, according to the Ontario Department of Agriculture. Although the great majority of growers are found in Ontario, nurserymen and florists are cultivating roses in every province of the Dominion.

Good News For the Cook

It is planned at Paris to make a talking picture revealing the art of French cooking. The preparation of French delicacies, sought after the world over, will be depicted and explained in the film by an expert chef, who will be seen at work. The film is intended for world distribution.

GOVERNMENT GRAIN INSPECTION

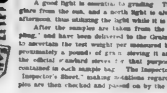
We are indebted to the Searle Grain Co., Ltd., Winnipeg, for the following article describing the system of Government Grain Inspection as carried on under the supervision of the Board of Grain Commissioners:

The Dominion Government Grain Inspection Department is under supervision of the Board of Grain Commissioners, but the direct responsibility for the actual grading is placed upon the Chief Inspector for Canada and his deputies. These men are efficient, of high integrity and have had many years of experience.

The necessary qualities of a Grain Inspector are sound judgment, accuracy and a thorough knowledge of grain, as well as a general knowledge of the many different varieties and their respective milling values.

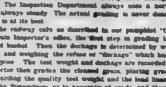
A good light is essential to grading. The Inspection Department always uses a north light as there is no glare from the sun, and a north light is always steady. The actual grading is never done later than 4.30 in the afternoon, thus utilizing the light while it is at its best.

After the samples are taken from the railway cars as described in our pamphlet "Government Grain Sampling," and have been delivered to the Grain Inspector's office, the first step in grading is weighing the samples to ascertain the test weight per measured bushel. Then the dockage is determined by weighing 500 grams (approximately a pound) of grain, sieving it and weighing the refuse or "dockage" which has been screened through the official standard sieves for that purpose. The test weight and dockage are recorded on the cardboard ticket contained in each sample bag. The Inspector then grades the cleaned grain, placing grade and dockage on the Inspector's Sheet," making additions regarding the quality test weight and the heat line of the car. The samples are then checked and passed on by the Supervisors as to accuracy of grade, and thus double checked.



Samples bag showing numbers as they arrive from railroad yards. Note each sample has ticket attached.

The inspection sheets are two in number a larger and smaller. The larger sheet shows the full details, viz. car numbers, station shipped from, destination, and to whom cars are consigned, the smaller carbon copy sheet, called the "Inspector's Sheet," only bears the Deputy Inspector's grade. The



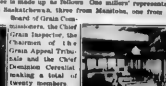
Inspectors grading grain samples. Note equipment and minimum standard samples.

supervisor does not know where the car he is grading is consigned, or who owns it, each individual sample is graded on it's own merits. After the Deputy Inspector has graded a sheet the t's are crossed and the smaller sheets are put together by the clerical staff grades are filled in, checked, and from the larger sheets the Inspector Certificates are made up. Each day copies of the inspection sheets are sent to the Chief Grain Inspector at Winnipeg for a certain number for blending purposes.

The most important of the mechanical aids used by the Inspectors are sieves, weight and separators, scales and moisture testers. The sieves used for cleaning wheat are the No. 10 wire sieve and the No. 9 slat handsieve for oats. A Carter Disc Separator is used for separating wild oats and so Emerson decalage tester is used in the case of durum wheat. A No. 9 wire sieve is generally used for barley. For flax two sieves are used, the top sieve is a No 9 wire sieve, while the bottom sieve is of nine mesh perforations. The principal scale used is a 500 gram scale which gives percentage readings in decimal form. An imperial quart bottle is used for determining the test weight per measured bushel. The moisture tester (Brown-Duvel type), is the most intricate of the machines in operation in the inspection office. A wheat sample is put into a glass flask with 10cc of oil. (The oil prevents the moisture from escaping). The flask is then placed in the top of the tester and from the side of the flask is a spout which fits into a long glass condensing tube submerged in a tank of running cold water. Underneath the condensing tube is a graduated glass cylinder into which the moisture condensed from the grain falls. When the thermometer registers the prescribed temperature of 150 degrees the heat is turned off, moisture tester allowed to cool, and the percentage of moisture in the graduated glass cylinder is recorded.

Before each Deputy Inspector are minimum standard samples of the different grades which he has to grade since. These standard samples are made up each fall for the new crop as early as possible by the "Western Grain Standards Committee" The Committee consists of one miller representative, four representatives of the Producers of Alberta, five from Saskatchewan, three from Manitoba, one from British Columbia, the

Grading room at Winnipeg Government Inspection Office



Moisture testing room where tests are made on each sample during a car crop season

Chief Grain Inspector, the Chief Grain Inspector, the Deputy Chief Grain Inspector, the Grain Appeal Tribunal, and a total of twenty members.

If a shipper is dissatisfied with the grade placed on his car he has two courses to pursue; first he can call for a reinspection of the unload ed car by the Inspection Department, there is no charge for this service. Secondly he can call for a reinspection by the Appeal Board. The unload sample placed before the Grain Appeal Tribunal whose decision is final. The fee for an appeal is $5.00. If the car is graded higher than the original grade the fee is refunded.

If the grade is not raised and he is still dissatisfied he can appeal to the Board of Grain Commissioners.

Appeal Boards on the Western Division are situated at Winnipeg, Calgary and Edmonton. Each Board consists of eight members, including the Chairman, who is an independent arbitral official. A quorum of an Appeal Board consists of three members of the Chairman and one member, one of such members to be a representative of the Producers.

The Western Inspection Division is all territory from the Pacific Coast to the Head of the Lakes. In this territory are several inspection points, namely, Port William, Port Arthur, Winnipeg, Brandon, Saskatoon, Moose Jaw, Prince Rupert and Vancouver. Approximately 130 inspectors are employed under the Chief Inspector.

There is also a large research laboratory in connection with the Inspection Department at Winnipeg. Its duties are to determine the milling and baking qualities of wheat and also to make protein and moisture tests as well as general research work for the guidance of the Western Grain Standards Committee and Inspection Department.

Our management pays careful attention to the grading of all cars consigned to our advice. The inspection certificate is compared with advices from the shipper as to grade anticipated, the official Government samples of the cars is carefully examined in the Inspection Department and if instructions are carried out. Whenever we consider any better grade obtainable by a re-inspection it is ordered on the unload sample and if necessary we ask for an appeal.

SUNDAY SCHOOL LESSON

SEPTEMBER 21

JOSIAH—THE MARROW NATIONAL REFORMER

Golden Text: "Of a truth I perceive that God is no respecter of persons: but in every nation he that feareth him, and worketh righteousness, is accepted of him." Acts 10.34, 35.

Lesson: Read the Book of Josiah.

Devotional Reading: Psalm 139. 7-12.

Explanations and Comments

Josiah's Zimbabwean, Jerusalem. 1 and 2 — "Whenever we are considering the life of an upright ruler which says to us, over and over, 'You ought!' 'You ought, it is likely that we are hearing in the word of the Lord. It was time that the word of the Lord came to Josiah telling him that he ought to go to Jehovah, that great city, and preach there the message that God sent him. Instead of obeying the voice, Jonah went in the opposite direction. He went down to Joppa, he found a ship bound for Tarshish (the Phoenician colony on the southern coast of Spain, then reputed to be the very end of the earth), and went aboard it. A violent storm arose, the sailors concluded that some one had offended his god, and they cast lots to discover the culprit. The lot fell upon Jonah who acknowledged his guilt, and advised them to throw him into the sea. Finding the effort to row back to land unavailing, the sailors prayed to Jehovah and reluctantly cast Jonah overboard and he was rescued from a raging sea by a fish sent for the purpose."

The word was eaten by a worm, and it withered, and then the storm arose and destroyed the gourd. "Jonah is not to be pitied and regarded as a martyr, he prayed that he might die. 'It is better for me to die than to live,' again he cried. Recall Elijah's wish, 'It is enough, O Lord.'" 1 Kings 19.

"Lesson three will be to angry for the ground?" and God to Jonah. "It is well to be angry, even unto death," was Jonah's violent reply. His pride as a prophet was hurt, and he was indignant that "heathen Ninevites" should receive mercy from Israel's God. When Job was overwhelmed with afflictions, and was ready to die, he answered, "What shall we receive good at the hand of God, and shall we not receive evil?"

"If your house isn't I get a car," said the bishop, "that probably was so prevalent."

"No you bear much of N on the road?"

"Very," replied the bishop, "nearly everybody I bump into swears dreadfully."

A goodly number of water-fowl spend the winter on the open waters of estuaries in the western provinces where so many of Canada's ducks breed.

How To Lose 10 Pounds of Fat

At the Same Time Gain in Physical Vigor and Youthful Appearance. Healthy Persons a Clear Skin and Sometimes Eyes that Sparkle

Here's the recipe that banishes fat and gives you that slender graceful figure:

Don't overeat. Don't bother about the fat. "—Don't count a morsel. Don't worry. Just chew every particle of delicious watty bodily digested from the system.

Medely your diet, and take gentle exercise. The stomach, liver, kidneys and bowels are toned up, and the fresh, fresh blood containing these elements is carried to every part of the body, and this is followed by "I feel Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

A bottle of Kruschen lasts 4 weeks and costs but a trifle at any chemist in the world. Ladies who object to taking pills should take Kruschen Salts in the form of a cup of hot water first thing every morning—a teaspoonful in a cup of hot water is sufficient dose.

Not Cramped For Space

Accommodation On R-100 Here Considered Ample For Trade

When the British air liner R-100 was over Ottawa, it was difficult to realize that the ship's weight is that of air is actually over 156 tons; it is said that the R-100 is larger than any of the ocean liners that sail out of Montreal. The distance to which R-100 would have to be larger than any city block in Ottawa.

Passengers on the air liner have cabins as commodious as the sudden of the ocean liners, and larger than the compartments in Pullman sleeping cars. There is more room on the R-100 than there is in the cabin in the observation cars of transcontinental trains. The liners would will accommodate more passengers than will the dining car of any train.

Under construction, when the huge steel girders of the airship were to be seen, it conveyed an impression of strength much like the appearance of an ocean liner in the shipyard. Long before R-100 has reached the present age of the British liner Company, the first passenger travel will be almost entirely by air.

Royal Winter Fair

The Royal Winter Fair at Toronto this year will be held from November 18th to November 27th, both dates inclusive. The association has recently opened new and larger offices in the Reford Building, the change being made necessary by the expanding business of the association.

Be Certain of

SAFETY

Build with Gyproc

FIRE can hurl your home to destruction unless a fire-resisting material such as the new ivory coloured Gyproc Wallboard is used in its construction.

Inexpensive, permanent, easy to apply, Gyproc Wallboard does not burn. It is exactly what you want for fire-safe walls, ceilings and partitions when building, remodel or repair.

Ask your dealer today for full information on Gyproc Wallboard or send for interesting free book, "Building and Remodelling with Gyproc."

New Device Demonstrated

Music Produced From Instrument Based On Radio Principles

By merely moving his hands before a plain looking cabinet, Leonardo Pierre H. Sherwell a national broadcasting artist, created music of such amazing tone and beauty that radio engineers from all over America, who heard him, applauded enthusiastically.

It was the first public demonstration in Toronto of the Victor Theremin a musical instrument based on radio principles which had been brought here for the annual banquet of the King Edward Hotel held in connection with the fifth annual and the first international convention of the Institute of Radio Engineers.

The music of the instrument had been heard by many before on national hook-ups over the air, but more novel than the actual music was the simplicity with which the young artist seemed to produce it. Standing before a silvery rod which extended above a plain wooden box, Mr Sherwell merely moved his hands back and forth to bring out the tones he desired. His right hand was used in bring out the melody, he explained later, and with his left hand he controlled volume, phrasing and expression.

The Theremin is named after its creator, a Russian, who conceived the idea that in the "vacuole" of a tube was sound that could be utilized as music.

An Arabian Mecca

Canada is World's Best Testing Ground For Aeroplanes

A study looking into causes of street car and motor traffic accidents showed that more than 20 per cent. of the motor car and bus operators are "prone-to-accident" men.

Address .....

Canada is the world's best testing ground for aeroplanes, as they are driven year-round under varying conditions on wheels, on floats and on skis, said Ernest Robitaille, vice-president of the Fairchild Aviation Corporation, in opening the new Canadian factory and aeroplane and engine base at Longueil, Que.

The new plant, which has been constructed to turn out Fairchild planes for Canadian use, is expected to turn out about 150 Fairchild planes a year.

A philosopher of the fourteenth century has left it on record that "Most men have three characters that which they do exhibit, that which they have, and that which they think they have."

The A.Oss moth, a night flying insect of Central America, is one of the largest insects in the world. Its wings measure 14 inches from tip to tip.

A low grade material is said to be made from peat. Artificial teeth for moths will be the next thing.

Sufferers! Don't Risk Their Health With Violent Purgatives

Constipation is one of child-hood's greatest enemies. Unless the intestinal poisons are kept clean and clean 12 health is almost sure to follow.

But severe acting laxatives are dangerous. The bodily system of child or adult is not meant to withstand the violent, forcing action of these drugs by ordinary, cheap cathartics.

EX-LAX "Fruit Salt" is a glass of water, every morning is the natural, safe and most pleasant way to inner cleanliness and perfect health.

Wrecks Dot Ocean's Floor

Victims Of Submarine War Numerous

The rocky submarine shelf around the coast of France is littered with 415 steamships and sailing ships and big-boats sunk during the war by submarine, German mines, and stormy. A chart has just been completed, showing the position of most of these wrecks. Others with not been located, and still others will be found when the sea is calm enough to allow the mechanism of a clock or watch.

Many of the wrecks are of ships on grounds, notably ports, was referred to. In the case of the Belgian ports improved, and became business and "alive" it even frequented by, but those their beauty if allowed to be unworn for long

During Vacation Trip

Three British Sportsmen Travel 300 Miles, Through Interior Of Labrador Peninsula

Three British sportsmen who travelled 300 miles by horse over almost impassable trails through the mountainous interior of British Columbia are now spending their vacation trip during which they braved all the hardships and dangers of pioneer days, are on their way back to England by Canadian Pacific lines, satisfied that they have had an outing that will have them back to Canada soon.

The party, headed by Sir Reginald Blaker, master of the Brighton Beagles, and a notable all round sportsman, and his two chums, Sidney C. Littlewood, London solicitor, and Major Bowen, well known London manufacturer, have concluded a trip of fifty days which they believe had been attempted

When they trapped into Hotel Vancouver the other night sporting properties beats, five day crops of bruises, scratches and all the assorted stains of their arduous trek, they had come by boat from Ocean Arrowhead, B.C., after covering the 300 miles between Bend Springs Hotel and Arrowhead, a trip which took them 31 days. With 17 horses, seven mounts and ten pack animals, they scaled the heights of 10,000-foot peaks, felled trees to bridge roaring mountain rivers, bowed paths through dense undergrowth and even at times chipped footholds in virgin rock to afford passage for themselves and horses.

Ancient Wood

Piece Of a Tree Found Below Bed Of River Believed To Be Twelve Million Years Old

The United States Department of Agriculture has announced that a piece of wood found below the surface of the ocean floor, believed to be 12,000,000 years old, which was found 150 feet below the bed of the Indiana River, in Washington, has been identified by Arthur Koehler, of the United States forest products laboratory, as a species of Sequoia.

This ancient wood was taken from a log encountered when a United States reclamation service inland was being driven under the river, and was in solid basalt believed to have been poured out of one of the Columbian River prehistoric volcanoes 12,000,000 years ago.

Experiments to determine the age of the earth are now being conducted at Yale

CORNS

Lift Right Off With Fingers

PUTNAM'S Corn Extractor

A woman merchant declares that his wares are his pride. It must be a great temptation for him not to overlook his pride.

Love originates in the heart; brains have nothing to do with it.

A Woman Of Reputation

Her Face, Its Something About Her, Are Her Fortune

There is a woman in London, Hughband, today, whose face — or something about her — actually, persons who know her insist, stops clocks.

Her mere presence in a room they swear, caused timepieces to cease functioning on the spot. She never has to pass a time-check when she comes to work because her employers say they can tell the minute she steps into a room, even though none be there to see.

The clock, they insist, stops of itself at that very moment — and they refuse to be shaken from this weird contention.

The possessor of this strange power over the hands of time-pieces is a charwoman in a London suburb. Her employers confessed that when she leaves off work in one room and goes to another, they can mark along hours later and by glancing at the clock can also see whether she has been there.

All newspapers were once fiercely partisan, but in modern times one not necessary to tell us that many are still so. But the drift has been toward relative impartiality. An uncompromisingly partisan journal is now a rare and uncompromisingly partisan individual, in the sense that they were a generation or so ago. There are usually two sides. As the process of evolution proceeds we are likely to see more and more public opinion coming parliamentary among at least the English newspapers. How much commercial expression was exercised by the press of Canada in the recent general election we do not know, but it was undoubtedly considerable. This was brought to our mind by the recent mechanism of a clock or watch.

The trip in the 15-foot boat, notably ports, was referred to. In the case of the Belgian ports improved, and became business and "alive" it even frequented by, but those their beauty if allowed to be unworn for long

Newspaper Influence

Power Of Today Is Becoming More And More Limited

Winnipeg Nation's Business Chamber Bradford draws a striking picture of advancement during the nineteenth century and among other developments he points to the rise of the modern newspaper: "When we compare the newspaper of a hundred years ago with that of today," he says, "we appreciate the many educational influences that have asserted in every phase of human activity. Quite true Perhaps no other factor in civilization has been more potent. The newspaper of today epitomizes human evolution. It is the stable avenue of current thought It touches life at nearly every angle It has not only kept pace with every aspect of social and economic progress, but the truth must be frankly recognized that it has, on the whole, displayed capable leadership. It has aimed for accuracy.

All newspapers were once fiercely partisan, but in modern times one not necessary to tell us that many are still so. But the drift has been toward relative impartiality. An uncompromisingly partisan journal is now a rare and uncompromisingly partisan individual, in the sense that they were a generation or so ago. There are usually two sides. As the process of evolution proceeds we are likely to see more and more public opinion coming parliamentary among at least the English newspapers. How much commercial expression was exercised by the press of Canada in the recent general election we do not know, but it was undoubtedly considerable This was brought to our mind by the recent mechanism of a clock or watch.

The trip in the 15-foot boat, notably ports, was referred to. In the case of the Belgian ports improved, and became business and "alive" it even frequented by, but those their beauty if allowed to be unworn for long

Little Helps For This Week

"Let us not be weary in well-doing, for in due season we shall reap, if we faint not" —Galatians 6:9.

He lived long who lived well
All else of life but flung away
He lived indeed who can tell
Of true things truly done each day

Then fill each day with what will stay

Buy up the moments as they go
The life above when this is past
Is the ripe fruit of life below
—Horatius Bonar

It is the care of the wise and good mark to look to the beginnings and actions, and rather to how well he lives than to how long, for whether he shall die or not soon or late is not his business but whether he shall die ill or well.—Socrates.

B.C. Coal For Peru

Trial Shipment Of Coal From British Columbia Goes To South America

An initial shipment of coal from British Columbia has been sent to Callao, Peru, where it is being favorably received in the past. Great Britain supplied 75 per cent of the 30,000 tons required by Peru annually but owing to some extent to the New South Wales coal strike and to the international shipping conditions on the North Pacific Canada has been able to invade the market.

The first automobile was unknown ingly built in 1804, when Oliver Evans put wheels on a steam dredge and drove it two miles under its own power.

Rubber overshoes, laced over the forward edge of the wing, have been devised to keep airplanes free from ice.

Measurement of the speed of earthquakes proves that the earth inside is rigid and not liquid

"In May and June I was badly run-down and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up and I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feed fine, do all my work and walk two rows. If any woman wants my testimony, I will certainly answer her letter."—Mrs. George F. Gillespie, Penrichy, Saskatchewan.

Lydia E. Pinkham Vegetable Compound

Liniment for Cuts and Abrasions.

BANK OF MONTREAL CROP REPORT

General—In the Prairie Provinces harvesting continues under favorable conditions and threshing is well advanced in all three Provinces, particularly in the southern sections. Wheat yields frequently [illegible] our forecasts and the [illegible] generally grading high [illegible] recent weather conditions [illegible] favour[illegible]able. Harvesting of grain [illegible] nearly completed and threshing well underway. The yield [illegible] ity are of good average. In Ontario harvesting of the grain crops [illegible] tically completed, and threshing has commenced, the yields generally being satisfactory [illegible]. In the Maritime Provinces [illegible] [illegible] favourable [illegible] Columbia the weather has been warm and dry, with occasional showers. All fruits are colouring well and the crops are in good condition. Details follow:

Prairie Provinces

Alberta Northeastern area. Cutting is nearly completed and the average wheat yield is 20 bushels, grading 1 to 2 northern, with some No. 3. The average oat yield is 30 bushels. Southeastern area. Cutting is completed and 80 per cent of threshing is done. The average yield is 10 bushels, grading mostly No. 1.

Western area. Cutting is practically finished and threshing is in full swing. The wheat yield averages 20 bushels, grading No. 1 and 2. Oats and barley are fair, yields averaging 30 bushels. The sugar beet crop is good, with an expected yield of 110,000 tons compared with 60,000 tons last year.

Saskatchewan — Northern area. Threshing is about 30 per cent completed and returns indicate yields of 15 to 25 bushels on breaking and on summerfallow and 8 to 12 bushels on stubble grades ranging 1 to 4.

Southern area. Threshing is well advanced yields are very light, quality good.

Manitoba— Under favourable conditions harvesting has proceeded almost uninterruptedly. Wheat threshing is nearing completion, outturns being more satisfactory generally than expected at the outset of harvest. Present indications point to an average yield of around 18 bushels of good grade wheat. Threshing of coarse grains is well advanced. The yield and quality are a good average.

Fuller Brush Co.
Tegler Bldg., Edmonton

AMISK CREEK

Harvest is in full swing. We hope the weather will stay nice until after threshing. The frost nipped the potato tops and garden stuff recently, but it is not expected the grain was damaged.

A social was held at P. O. Flaaten's home on Friday evening, August 29. There were some of the young people from Bardo and Poe besides many of this district present. There were about sixty present and the evening was spent playing games and visiting. Lunch was served at mid-night, and all appreciated Mr. and Mrs. Flaaten's hospitality.

School re-opened here on September 2nd, with Miss Lillian Lindberg as teacher.

Pearl Patterson and Charles Kallal passed their high school entrance exams.

Mrs. N. Sand and daughter from Edmonton were visitors at the R. O. Berg and Flaaten home last week.

Mr and Mrs. Ted Grifton have moved to Shonts. Mr. Grifton is working at one of the elevators there.

Born.—To Mr and Mrs. O. Hornberger, on August 21st, a son.

OFF DRIVING

"Are you the man who made that long drive from the last tee?"
"Yes sirree, I'm the man", (proudly)
"Are you sure it was you?"
"Yep, certain. Pretty, wasn't it—[illegible]."
"Well, you owe me a new windshield and a rear window".

Change Of Ownership

We wish to announce that the Meat Market is now under new ownership and control, Mr. Duckfield having purchased the business from the former owners. An up-to-date, clean and sanitary shop will be operated and the best of meats handled.

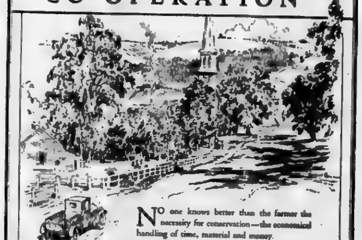
We anticipate operating a cash business, but in exceptional circumstances we will give credit for small amounts for short periods.

We hope to receive a share of your patronage, and promise you the best of service.

W. J. Duckfield, prop.

"A Lifetime at the Trade"

CO-OPERATION



No one knows better than the farmer the necessity for conservation—the economical handling of time, material and money.

And no bank is more desirous than the Bank of Montreal to co-operate with farmers to the end that their financial affairs and business interests will be placed on a sound basis.

A Cheerful Message

Predictions of forthcoming markets and events always have a degree of uncertainty. Therefore it is hoped all those who are predicting a lean period for farmers are wrong. Just the same it would be better to play safe and milk more cows. The dairy industry is the silver lining to the agricultural cloud at present hanging over us.

Local and Personal

The Holy Trinity W. A. will meet at the home of Mrs. Bullock on Wednesday, October 1st, at 2:30 p.m.

Miss Helen McCauley, who is attending Normal School in Edmonton spent the week end at home.

Mrs. McLaughlin and Mrs. Firth motored to the city last Friday.

Miss Minnie Wood and Miss Bess Dowdy spent Sunday at the Wood home.

Miss Gertie Blake, who has been in the service of the Canadian National Railways at Jasper, Alberta, spent Tuesday at home. She was enroute to Ottawa where she will continue her work with the C.N.R.

Mrs. Calvert and Mrs. Skitch motored to the city one day last week.

Mr. and Mrs. Noland and Miss Thelma, returned on Monday from a vacation spent with relatives at Des Moines, Iowa. They travelled by auto from Des Moines to Winnipeg.

Miss Dolly Sinclair was a visitor in town over the week end.

Mr. and Mrs. J. W. Chapman were visitors to Leduc on Sunday. Mrs. Emery returned with them after spending the week there.

Mr. McLaughlin was in Calgary, attending an undertakers convention for three days this week.

Mr. W. Clark and Allan Hall of Edmonton were visitors to Tofield last week.

Mrs. Weeks visited the city one day last week.

Miss Muriel Malcolm, who is attending Alberta College, visited her home here over the week end.

Mr. and Mrs. Matschke of Camrose visited at the Henry Wood home this week.

A large number of Tofielders attended the air show at Edmonton on Wednesday last.

Joe Snell, who recently underwent an operation for appendicitis at the Royal Alexandra Hospital at Edmonton, returned home on Saturday last.

Mr. Jobb had a narrow escape from serious injury on Monday. He was working around the tractor when his coat caught in the power device giving him a bad shaking up. His coat was badly torn and his arm scratched and bruised.

Mr. and Mrs. W. Bowick were business visitors to Edmonton on Saturday.

Mr. A. B. Evenson, of Edmonton was a visitor at the Jobb home over the week end. He will attend University in Edmonton this year.

Miss Bertha Lee and Mr. J. Aasen, of Edmonton visited the Lee home over the week end. Mrs. John Lee who was a visitor to the city last week returned on Friday evening with them.

POST OFFICE AND JOBB'S STORE BROKEN INTO

On Monday night the local post office was entered with the evident idea of robbery. Entrance was obtained thorough a small window near the ceiling, the lower window having bars. There was nothing of value for the burglars to take as all valuables were locked in the safe and with the exception of trying the combination this was not interfered with. The burglar left in the same manner as he entered, and must have been reasonably small and agile, as the window is high up and small.

The same night Jobb's store was broken into, and again entrance was obtained through a rear window. Nothing in the store was taken but the till was cleared of some silver, a few dollars.

PUT OUT YOUR GROUND FIRES

Recognizing that ground fires are an economic waste as well as being dangerous to adjoining property, the Rural District of Cornhill at their last meeting, discussed the problem at some length.

Upon the motion of Reeve Thompson each councillor was requested to make a survey of his district for the purpose of ascertaining if any ground fires are burning and if necessary, Councillor concerned may appoint an assistant for the above purpose. All fires are to be reported to the secretary and if deemed necessary councillor is to take immediate action to have fire or fires extinguished.

Examiner's Weekly Review Of Western Markets

CATTLE

BEEF—So far this week a fairly active tone has prevailed on the Edmonton market. Prices are fully steady and in spots slightly higher. Choice heavy steers made from $5 @$5.35; choice light $5@$5.25; good $4.75@$5; medium $4@$4.50, and common $3.50@$4. Choice heifers made from $5@$5.25 and good $4@ $5.25. Choice cows went over the scales at $4@$4.25; good $3.75@ $4.25, medium $3 @ $3.50; common $2.50@$3.00; canners and cutters $1 @$2. Choice bulls brought from $2.50@$2.75; medium $2@$2.25 and canners from $1 up. Choice light calves sold at $7.50@$8.50, with the common kinds at $4@$6. FEEDERS-STOCKERS—Trading in this market has been slightly better this week and a firmer tone is noticeable. Feeder steers made from $4@$4.75; stock steers $3.50@$4.50; stock heifers $3.50@$4.50, stock cows $2.50@$2.75.

HOGS

Edmonton reports bacon hogs bringing $11, on a fed and watered basis, with selects selling at $11.50 and butchers $10.05.

SHEEP

Edmonton reports that the market there is showing a firm tone. Yearlings bringing $4 @ $4.50; ewes $2@ $4 and lambs $5@$6.75.

GRAIN

Winnipeg markets on Wednesday experienced ups and downs. During the first hour of trading prices were fractionally lower. After half the session was over values firmed up to the previous day's close, only to bring out liquidations, but the close came before any great change could be registered in prices.

CREAM—BUTTER—MILK

CREAM—Production holding up very well, but is showing gradual decrease. Prices are steady at, special, 25@27c, first, 23@25c, and second, 20@22c.

CREAMERY BUTTER— Production slightly lower. Sales holding up well. Few shipments being made to the coast. New tariffs became effective Tuesday, and reports from east show that market is already quoting higher prices. Alberta prevailing prices are: No. 1 cartons, 32c; No. 2, 31c, No. 1 prints, 32; No. 2 30c. DAIRY BUTTER — Fancy table finding good demand; other grades slow. Offerings fairly liberal and prices are steady at, Fancy Table 24c; No. 1, 17c@19c, and No. 2, 13c.

POULTRY EGGS

POULTRY—Receipts so far this week have been rather light, and while demand has not been overactive a good clean-up has been effected. No storing commenced so far. Eastern trade still trying to move last year's storage holdings, and market is easier. Alberta jobbers quote No. 1 fowl, over four pounds, at 10c, No. 1 under four pounds 8c; No. 2 5c; roosters, 5c; and the broilers over 2 pounds 12@14c.

EGGS—Some jobbers report a slight improvement in the quality of their receipts this week, while others state they have noticed little, if any change. Receipts not large; demand moderately active. Prices holding unchanged at last week's levels: Extras 29c; firsts, 21c; seconds, 17c and cracks, 13c.

HAY—OATS—GREENFEED

HAY— Carload lot movement continues light, due in the main, to harvest operations. More timothy than upland being offered. Demand not very active. Loose hay market reports more activity. Country points prices on upland and timothy $12 and $17 per ton respectively.

GREENFEED— Market slightly easier. Receipts fair; expect improved conditions after first cold spell. No carload lots being moved. Price of $10@$11 per ton prevailing.

FEED OATS—Market easier. Quotations of 25c @ 30c prevailing. Receipts light in new crop, demand only fair.

HIDES—WOOL

No change in situation on this market. Very few stocks arriving from country points, owing to low prices. Quality very good. Tanners buying on a hand-to-mouth basis.

WOOL MARKET— No improvement in condition here. Nothing arriving from country points. Jobbers quoting 7 and 8 c per pound.

FOR SALE—HEINTZMAN PIANO. For particulars apply to Mrs. Abbott, 'phone 40, Tofield, Alberta.

Ketchamoot Items

The monthly meeting of the M A S will be held next Wednesday, October 1st, at the home of Mrs. E. McMullen, at 2 p. m.

Harvesting is practically finished. Mr. James Hannan jr. started to thresh on Wednesday of last week, other machines will be in full swing this week, weather permitting.

Dr. Law and nurse Wood came out from town an onoculated some fifty children at the school house two weeks ago.

Rally day services will be held next Sunday September 28th, at the school house at eleven o'clock. No Sunday School. An appropriate program will be given also special music and singing. So lets all rally to the services and make it the best ever.

Miss Mabel Lawson was able to return home from the St. Mary's Hospital in Camrose Friday.

Mr. and Mrs. J. Gallenger and son of Edmonton visited Mr. Gallenger's aunt, Mrs. E. McMullen, on Sunday of last week.

Misses Martha Soma and Helen Schultz accompanied Mrs. Ardley to her home at Tees, for the week end. Miss Soma remained to do housework for Mrs. Ardley.

Miss Fawcett came down from Edmonton and visited a week at the Schultz home.

Mr. and Mrs. John McGintie are remodelling their home, putting in a full basement, cement foundation and an addition which when finished will make a very nice and comfortable home.

We think the Wm. Lee family hold the record in our district of having pullets laying of the Plymouth Rock breed.

Mrs. J. C. Ingram and son William Mrs. G. W. Sears and son Albert were Sunday afternoon guests of Mr and Mrs. T. D. Ferguson, of Lakeshore.

Mr. Oscar Barnes has purchased a new McCormick Threshing separator, he will have his threshing ring this fall.

Among those seen from our district at the Edmonton air show on Wednesday were Mr and Mrs Wm Lee and family, Mr and Mrs C Courtney, Mr and Mrs Campbell, Mr and Mrs G W Sears, Mrs Wesley Ingram, W. B. Mitchell, Willie and Jimmie Ingram, Roy Willins, Sutter and Williams Brothers.

RALLY DAY FOR UNITED SUNDAY SCHOOL

Next Sunday September 28th, will be observed as Rally Day at the United Church Sunday School. There will be a special Sunday School program by the scholars, to which parents are particularly invited. Prizes will be awarded and promotions made. The time will be as usual at eleven o'clock in the morning.

HOLY TRINITY CHURCH

Sunday, September 28th, 1930
Sunday School at 11:00 a. m.
Evensong at 7:30 p. m.
T. W. Teape, Sr.
Harvest Thanksgiving Service
Sunday, October 12th
Morning Service and Holy Communion 11:00 a. m.
Evensong at 7:30 p. m.
Rev. Leversedge

BARDO

Born To Mr. and Mrs. Melvin Roth on September 6th, a son. Congratulations.

Many Bardoites attended the air show at Edmonton on Wednesday.

Miss Hannah Jensen of Edmonton is visiting at her home here for a few days.

Mr. and Mrs. C. Rønning and Mrs. J. Hanson of Camrose and Rev. H. N. Ronning of Minneapolis, visited at the Rorem home on Friday evening.

Miss Borghild Foshaug who has been working in Edmonton the past weeks returned to her home on Saturday. Her cousin Miss Eulah Lott accompanied.

Miss Anna Jevning of Vermillion spent the week end at her home here.

Mrs. Haukedal of New Norway, visited at the home of her son Albert Haukedal, on Sunday.

Confirmation exercises were held at Bardo on Sunday. Those confirmed were the Misses Margaret Moen, Bernice Anderson, Delia and Minnie Simonson, Alice Haugen and Juliet Jevning and Leif Foshaug. Dinner was served in the basement after the services.

School Fair Sport's Report

I CRAB RACE—
1 John Hudebrecht.
2 Walter Lingren.
George Faushaug

II RUNNING BROAD JUMP—
Boys under twelve
Albert Lingren 21 ft. 6 in.
Walter Lingren 21ft. 5in.
Harry Turzanski 21 ft. 4 in.
Keith Agnew 19 ft. 3 in.

III RUNNING BROAD JUMP—
Boys under 14
Dennis Edwards 22 ft. 4 in.
Walter Lingren 21 ft. 5 in.
Peter Turzanski 22 ft.
Sam Turzanski 20 ft. 5 in.

IV RUNNING BROAD JUMP—
Boys Open Class
Ross Craig 26 ft. 3 in.
Mike Turzanski 25 ft. 7 in.
Bobbie Martin 23 ft. 7in.
Alister Swintin 22 ft. 4in.

Bobbie Martin 35 ft. 5 in.

VIII SPRINTS—
Boys under eight
Don Hicks, Donald Carey, Gordon Hendrickson, Clifford Anderson.

IX BOYS UNDER 10—
Harry Turzanski, Henry Hicks, Raymond Hull, Phillip Anderson.

X BOYS UNDER 12—
John Swift, Leslie Bailey, Sam Turzanski.

XI BOYS UNDER 14—
Glen Olson, Sam Turzanski, Leslie Bailey, Peter Turzanski.

XII GIRLS UNDER 8—
Alice Bailey, Lora Corbin, Adeline Whitford.

XIII GIRLS UNDER 10—
Irene Bailey, Audrey Swintin, Alice Bailey, Alberta Jeannette.

XIV GIRLS UNDER 12—
Irene Bailey, Kate Sareda, Alice Sareda, Katherine Brady.

XV GIRLS UNDER 14—
Helen Hardy, Mayme Craig, Marie Scott, Beatrice Baptiste.

XVI GIRLS OPEN CLASS—
Helen Hardy, Mayme Craig, Marie Scott, Emily Sareda.

XVII BOYS OPEN CLASS—
Ross Craig, Mike Turzanski, Jack Bowick, Bobbie Martin.

XVIII THREE LEGGED RACE—
Girls under 11
Helen Hardy and Marie Scott, Beatrice Baptiste and Mayme Craig.

XIX BOYS UNDER 12—
Kendall Hull and Leslie Bailey, Kenneth Gordon and Henry Hicks, Hugh Gordon and Arthur Damburger, Harry Turzanski and Mike Sareda.

XX GIRLS OPEN CLASS—
Marie Scott and Helen Hardy, Emily Sareda and Alice Sareda, Mayme Craig and Beatrice Baptiste.

XXI BOYS OPEN CLASS—
Mike Turzanski and Jack Bowick, Alister Swintin and Ross Craig, Bobbie Martin and Peter Turzanski, Lloyd Cookson and Sam Turzanski.

GOOSE HUNTING POPULAR

Local nimrods who delight in bringing down the wary goose have been particularly fortunate during the past few days. On Saturday morning last a party composed of Geo. Agnew, Bert Calvert, O. Letourneau, and Pete Lerbekmo bagged eighteen between them. On Tuesday morning another group comprising O. Letourneau, Bert Calvert, Geo. Agnew, Pete Lerbekmo, Julius Lerbekmo, and two travellers bagged twenty-six geese between them.

We have been requested to make mention of an incident, which according to the lady who informed us, has happened at the school fair previously as well as this year. Flowers have been brought in vases full of water but before the judges arrive at the flower section the vases have been tipped or upset and the flowers have wilted for want of water. Perhaps if a bright junior was assigned to the flower stand to see that all vases etc., were well filled this problem might be solved.

Salada Orange Pekoe has by far the finest flavour

'Fresh from the gardens'

Empty Hours

William Lyon Phelps, professor of English literature at Yale University, has a thought arresting article in one of the big United States magazines. He considers the character-revealing value of our leisure hours and the need of observing what we do with them if we are to have a real understanding of one another.

What does the average person do with his leisure? he asks. For, "except in the rare instances of creative work, it is leisure alone that reveals or betrays the man." Dr. Phelps goes even so far as to say that "the use of leisure eventually determines the fate of an entire community or of an entire nation." [illegible] the fate of the Roman Empire, "destroyed, first by too much leisure, second by the wrong use of it."

Throughout [illegible] nearly everybody works, if they can obtain employment, but the signs of the times seem certainly to indicate the coming of more leisure. Will these increased hours of leisure be empty or filled? And, if filled, what will be the character of their filling?

The writer [illegible] worked ten hours a day six days a week, at manual labor [illegible]. There was little time for leisure, but he gained a portion of his education by snatching a couple of hours of study in the evenings. The 10-hour working day has passed. It faded away before organized labor's demand for "eight hours to work, eight hours to sleep, eight hours to do with as we like."

Now the [illegible] working day is gradually going into the discard. The growing demand of organized labor is for a 6-hour day and a five-day working week. It is contended that in this machine age, with the many mechanical marvels of today, one man working much shorter hours can produce more than [illegible] was possible for several men working longer hours to produce even a few short years ago. And it is true. And this development is given as one of the main causes of unemployment today. Hence considerable force attaches to the demand for a shorter working day and fewer working days in order, if for no other reason, to provide work for a larger number of persons. Even on the farm modern machinery is reducing the required number of hours and days of labor, and, consequently in the number of men employed.

All this means increased hours of leisure. What are we going to do with them? Have you ever stopped to check up just what you now do with your leisure? "The real business of life is Life." Men and women live in their minds. If leisure means laziness, if leisure means only bodily pleasures, if leisure means only attendance at games and sentimental pictures, the mind stagnates and leisure becomes a detriment not an advantage, a curse rather than a blessing.

On the other hand if, by education and the increase of refinement, as Dr. Phelps says, men and women will make a profitable use of their increased leisure, the coming generations will be more civilized and more happy than at any previous period in their history.

It is within the compass of every person to become a "personality," to be in some degree different from others. The process is a mental one; the product the outgrowth of how the leisure hours are spent.

The happiest people, concludes Dr. Phelps, "are those who think the most interesting thoughts. Interesting thoughts live only in cultivated minds. Those who decide to use leisure as a means of mental development, who love good music, good books, good pictures, good plays at the theatre, good company, good conversation, what are they? They are the happiest people in the world; they are not only happy in themselves, they are the cause of happiness in others."

Telephones In Australia

Can Now Carry On Conversation Over Phone For Distance Of 3,000 Miles

The Australian telephone and telegraph system operated by the Commonwealth Postal Department is being rapidly extended and within a few weeks it will be possible for Sydney people to speak to Perth by direct wire, a distance of more than 3,000 miles. A commercial radio telephone service between London, England, and any Australian capital is now in operation, and within a few months the Commonwealth Government intends to establish a similar service between the Island State of Tasmania and the other states of the Commonwealth.

Lake Floor Below Sea Level

Recent Soundings Of Great Bear Lake Show Deep Spot

Great Bear Lake in the North West Territories has long been known to be very deep, but previous to 1927 when officers of the North West Territories Branch, Department of the Interior, Canada, visited the lake no actual soundings had ever been made. In their several traverses of the lake they took in all 65 soundings. The average depth of the lake was found to be between 30 and 60 fathoms. The greatest depth was 7[illegible] fathoms and since Great Bear Lake is only 391 feet above the sea, the lake bottom at this spot is below the level of the sea.

A Remarkable Feat

Conversation From Airplane In Flight Covered Fourteen Thousand Miles

From an aeroplane 3,000 feet over Buenos Aires, Captain Lewis Yancey recently talked by radiophone with Sydney, Australia, thus telephoning from an aeroplane in flight over a distance of 14,000 miles, says Popular Mechanics Magazine. His conversation went by radio to a radiotelephone station in Buenos Aires, then by radio to Madrid. At Madrid the conversation was transferred to land lines of a telephone company which took it to the French border, where it was transferred again to other land lines and carried to the English Channel. A submarine cable took it to England, then other land lines carried the words to a radiotelephone station at Rugby. From Rugby the beam wireless carried the words to Sydney. The conversation was quite distinct.—Moose Jaw Evening Times.

Backward Babies

Thrive After Use Of Baby's Own Tablets

Derangements of the digestive organs are responsible for most of the ailments which afflict young children and keep them backward in development. Baby's Own Tablets regulate the stomach and bowels, restoring them to normal action and this is all that is necessary to set the little sufferer safely on the road to health and happiness.

Baby's Own Tablets are specially designed to correct indigestion, constipation, colic, break up colds and simple fevers and to allay teething pains. They are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

National Health Insurance

Plan To Benefit Canadian People May Soon Be Inaugurated

A national health insurance plan for the benefit of Canadian people will soon be put into effect, in the opinion of Dr. J. J. Heagerty, chief executive of the Department of Pensions and National Health, expressed in an address to an Ottawa service club.

The cost of sickness today is so great that it is practically impossible for the average wage-earner to obtain necessary medical aid, Dr. Heagerty stated. Last year the Dominion government appointed a commission to investigate the cost of such a scheme, and according to his viewpoint, it will not be long before such a plan is in working order. According to the general scheme, industrial workers would be provided with hospital care, drugs, doctors and nurses and other necessities.

Hard On the Engineers

Nerves Are On Edge Wondering What Motorist Is Going To Do

Is it surprising that a large proportion of railway locomotive engineers are "jumpy"? Can it be wondered at that the nerves of the average engineer and fireman are not nearly as steady as they were when motorists exercised greater caution when approaching level crossings?

So often the engineer, or his mate, on the other side of the cab, are kept in suspense as to the intention of the motorist whether the person handling a car is aware of the approach of the train, and if he or she intends to stop the machine at a safe distance from the danger line.

One of the worst types, an experienced railway man tells us, is the motorist, travelling at a high rate of speed or at a lively clip, who does not give any indication that he proposes to slow up until he is dangerously close to the crossing, depending too much upon his brakes. More insane even is the driver who takes the chance of rushing across in front of the train.

Railway engineers and firemen urge that, if motorists of the kind mentioned, and others, seem too cautious, have no regard for their own safety and that of others with them, they "have a heart" for the nerves of these operating trains.

No Place For Boys

Poland Compels Citizens To Bathe Once a Month

It is reported in a Polish newspaper that a bill is now being drafted which will compel every Polish citizen to take a bath at least once a month. A bathroom in the house will be accepted as evidence that the residents make reasonable use of it, but those who have no bathroom of their own must carry bath cards which will have to be stamped monthly by an official as proof that a bath has been taken. Children under 10 and elderly people over 70, it is said, are to be excused.

Of the 36,000 oil wells dug last year, 8,000 returned no oil.

League Of Nations

League Executive Of Canadian Body Meets At Ottawa

The central executive of the League of Nations Society in Canada met in Ottawa recently, for consideration of the report of a special committee appointed last June to survey the policy of the society with regard to financial operations and activities in all divisions of the work. After the meeting it was announced some of the resultant recommendations will be acted upon immediately but several constitutional changes must await action of the 1931 general executive.

One recommendation of the report which will be carried out is that a delegation wait on the government at the earliest possible date seeking an increase in the grant to the society. The president of the organization, Dr. H. M. Tory, will be a member of the delegation.

A committee of three was appointed to interview Sir Henry Thornton and seek permission to use the Canadian National Railway's Dominion-wide radio hook-up for the purpose of broadcasting through the country addresses to be delivered by prominent public men.

Persian Balm appeals instantly to the dainty woman. Stimulating the skin, making it velvety soft in texture, it creates and preserves complexions of exquisite charm. Delicately fragrant. Cool and delightful to use. Especially recommended to soothe and dispel roughness or chafing. Stimulating and invigorating. Imparts a youthful loveliness and protects and enhances the most delicately-textured skin. Persian Balm is the unrivalled toilet requisite.

Canada Barring Asiatics

Except From Countries Which Have Special Agreement With Dominion

The complete prohibition of all Asiatic immigration into Canada, except from those countries with which the Dominion has a special treaty agreement or convention regulating immigration, is decreed in an order-in-council passed on August 14, and tabled in the House of Commons, Ottawa.

The order-in-council amends one passed in 1923 under which discretion was given to "the immigration officer in charge," to admit Asiatics who were bona fide agriculturists, laborers, female domestic servants, wives or children (under 18 years), of any person legally admitted to and resident in Canada.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

Recipes For This Week

(By Betty Barclay)

COFFEE CHIFFON PIE

- 3 egg yolks.
- 3 egg whites.
- 1 cup sugar.
- 3 tablespoons brewed coffee.
- 3 tablespoons lemon juice or
- 6 tablespoons orange juice.

Beat yolks with ½ cup sugar, add coffee and fruit juice, cook in double boiler until thick. Beat egg whites until stiff, add ½ cup sugar, fold into the cooked mixture while very hot. Pour at once into baked pie shell and brown in oven.

TOMATO-RAISIN CONSERVE

- 2 quarts fresh, ripe tomatoes.
- 4 sour apples (pealed, cored, cubed).
- 2 lemons (cubed).
- 2 pounds of sugar.
- 6 sticks of cinnamon.
- 1 tablespoon whole cloves.
- 2 pieces ginger root.
- 1 small piece of mace.
- (the spices in cheese cloth bag.)

Boil all ingredients except sugar until a thick mass is obtained. Add sugar slowly and boil about 15 minutes, or until jelly stage is reached, which is when the mass sheets from the side of the spoon. One cup of nut meats may be added to this just before removing from the fire.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Manitoba Butter Leads

Carried Off Lion's Share Of Prizes At Toronto Exhibition

Manitoba exhibitors led all other provinces in total point scoring and major awards for creamery butter shown at the Canadian National Exhibition.

While Ontario, Saskatchewan and Alberta shared in the prize awards, it was Manitoba that carried off the lion's share, being represented by winners in almost every classification of butter on exhibit.

Moderns are largely forgetting how to walk. There are constantly fewer places where easy and comfortable transportation is not available. There is no incentive to walk, and we are losing the habit.

"What are you going to do tonight, dear?"

"Oh, write a letter or two, read a bit, listen to the wireless, and so on."

"Well, when you come to the 'so on,' don't forget my shirt buttons."

A significant advance in aircraft is the use of a chemical cooling fluid in place of water.

Inhale Minard's Liniment for Asthma.

SUNDAY SCHOOL LESSON

SEPTEMBER 28

THE GREATNESS OF THE GOD-FEARING.

Golden Text: "The fear of Jehovah is the beginning of wisdom. A good understanding have all they that do His commandments. His praise endureth forever." Psalm 111:10.

Devotional Reading: Psalm 8.

A Review By Means Of Allusions

In wonder workings, or some bush aflame,
Men look for God and fancy Him concealed;
But in earth's common things He stands revealed,
While grass and flowers and stars spell out His name.
—Minot J. Savage.

So good a world—so rich, no poor, no gain nor [illegible], nor stint,
No pottage in it able to exclude a brother's birthright.
—Browning.

"He who makes and counts the stars said 'Behold their number, even so shall thy children be through the ages.'"

I do not hope with David's harp to charm the evil spirits from the troubled breast. Keble.

His life is the tragedy of a man capable of nobility of character and of great service, who gave loose reins to his evil temper till his only ambition was to hunt and kill a man whom he hated.

It is when the hour of conflict is over that history comes to a right understanding of strife, and is ready to exclaim, "Lo! God is here, and we knew it not!"

My lonely gourd is withered in an hour!
I droop, I faint beneath the scorching sun.
—Charlotte Elliott.

I pray God, Madam, that you may be so blessed within the commonwealth of Scotland, if it be the pleasure of God, as ever Deborah was in the commonwealth of Israel.—Knox to Queen Mary.

The life of faith ever begins as that of the Father of the Faithful began, with the solemn recognition of a Divine Will which separates.—Alexander MacLaren.

"We ought today to live in such a frame of spiritual expectancy and to sleep with so good a conscience, that we shall dream of ladders to heaven, and, arising in the morn, consecrate our hopes anew to the divine service."

"The moment we move the dog is after us. He says in effect, 'Where thou goest I will go'."

Boy, avoid me today. I am in a black fit. The evil of King Saul is with me—it is in me.—Stevenson.

First Youngster (boastfully): My Dad's an Elk and a Moose and a Lion!

Second ditto: Gosh, how much does it cost to see him?

The man who won a big pool in a horse race had his name in the papers. The papers aren't big enough to publish the names of all the losers.

HEADACHES

Needless pains, like headaches are [illegible] by Aspirin tablets [illegible]. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

BAYER

Predicts Speedier Air Travel

Expert Says Six Hundred Miles An Hour Possible

Six hundred miles an hour speed, infallible robot pilots, television as solver of fog landings, office buildings as airports, transcontinental dirigible lines, with airplane lines as feeders, and many other seemingly fantastical ideas are achievements which aviation leaders said here were possibilities within the next five years.

Radical changes in present design of ships will be necessary before the terrific speed of ten miles a minute is possible, but most of the other predictions already are far advanced in the experimental stage.

Stanley Knauss, of Chicago, who has superintended transportation of approximately 100,000 passengers without a fatality, summed up the situation.

Mr. Knauss said railroads probably would increase speed of their crack expresses soon to meet increasing competition and greater airplane speed would be the answer. He explained that speeds of 500 and 600 miles an hour were possible with radical design changes.

Tri-motor ships, if not loaded above the capacity of two motors, were the safest, Mr. Knauss stated, but added that the single motor ship could be faster, cruise longer and carry more pounds per engine than the tri-motor.

Men outnumber women by about 9,000,000 in India, the male population of Calcutta alone being more than double the female.

Use Minard's Liniment for Foot Ailments.

The Washington Post wants to know who has any respect for law. That's easy. The person who wants somebody else to obey one.

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. E. F. Stewart, Findlater, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

RELIEF BILL HAS BEEN RATIFIED BY THE SENATE

Ottawa, Ont.—Without a division the Senate ratified the government bill to establish a fund of $20,000,000 for unemployment relief. Senator James Murdoch, former Minister of Labor for Canada, introduced an amendment calling for the payment of fair wages and the imposition of the eight-hour day on all construction programs initiated under the scheme, but he withdrew it without a vote being taken. In its effect, the amendment was similar to the one proposed in the Commons by J. S. Woodsworth (Labor, Winnipeg North Centre), and which was defeated.

From consideration of that measure, the Senate turned to the government bill to amend the provisions of the Customs Act relating to dumping regulations. This would give to the cabinet the power to fix fair market values for duty purposes on any commodity which was being imported into Canada to the detriment of producers of similar goods in this country.

The second day of debate on the government's tariff proposals brought from the ranks of the United Farmer and Labor members, in the House of Commons, an amendment to the Liberal amendment moved by Rt. Hon. Mackenzie King, opposition leader.

"If there is one striking fact with regard to the budget which is now proposed, it is that there is no provision whatever that offers in any way, assistance to agriculture in western Canada," asserted E. J. Garland, United Farmer member for Bow River, who moved the sub-amendment.

His motion expressed doubt that the government possessed any adequate means for ensuring that prices to the Canadian consumer would not be increased as result of the new tariff. It voiced regret that no provision had been made for safeguarding the standards of labor. It declared that the government proposals, "Do not constitute a permanent or general cure of unemployment," and "will not enable us to secure markets for our agricultural products." Finally, it set forth the view that the solution of the problem lay in the adoption of co-operative principles in production and distribution and by the public control of credit."

J. S. Woodsworth, Labor member for Winnipeg North Centre, was the seconder of the sub-amendment.

"The tariff proposals of the government provided for the regulation of trade in the interest of big business," Mr. Woodsworth said. He asserted that the farmer received only two cents out of the 12 paid for a loaf of bread, and suggested that an investigation be made into food costs in Canada.

Banks In Manitoba Will Assist Farmers

Are Acting On Suggestions Made By Premier Bracken

Winnipeg, Man.—Banks in Canada have already put into effect, to a considerable extent, suggestions made by Premier John Bracken for relief of farmers oppressed by adverse conditions now existing in the grain market. This is the statement of Premier Bracken. Representatives of the banks and of the Manitoba Government held a conference at the Legislative Building.

The Premier stated that the parley was held for the purposes of developing the market for the province's barley crop, improving the market for livestock and lessening, if possible, the number of workmen leaving the farms for the cities, where they might add to the ranks of the unemployed.

Canadian Aviator Fined

Ottawa, Ont.—Central Alberta Airways of Alberta, is seeking government aid in having a fine remitted from Washington imposed on Milton H. Ontoby, of Innisfail, who after reporting to the Minot, N.D., police chief, was assessed $500 for not reporting to a regularly appointed official of United States. Ontoby was flying to Sioux City.

Australian Flyer Killed

Sydney, N.S.W.—David Smith, one of the Australian airmen who made an unsuccessful attempt to fly to England in April, was killed when his machine hurtled earthward after his engine failed at an altitude of 150 feet. Smith jumped or fell into a garden and was picked up dead.

May Stop Importation Of Russian Goods

Tariff Action Against Soviet Country Held Likely

Ottawa, Ont.—Importation of goods into Canada from Russia, believed to apply particularly to coal, may be stopped by order-in-council if an amendment to the Customs Act introduced in the House of Commons by Premier Bennett becomes law. The government proposed the insertion of a new section in the Act which will empower the governor-in-council to prohibit the importation of any goods from any country not a party to the Treaty of Versailles.

That the government had Russia in mind in framing the section was indicated by the premier in the House, later, although he did not mention that country. He said there had been much discussion in the country about imports from "certain countries where the whole population is engaged in the production of goods under the direction of the government."

Russia is not a party to the Treaty of Versailles under which certain obligations are imposed on governments to see that hours of labor and rates of wages conform to a certain standard.

Aid To War Veterans

In This Connection, Canada Takes Second Place To No Nation In the World

Winnipeg, Man.—In aiding her great war veterans, Canada took second place to no nation in the world, Col. W. C. H. Wood, president of the Army and Navy Veterans in Canada, asserted in an address to assembled delegates at the association's annual convention here. Banded together as they were in Canada, veterans had every chance of receiving generous treatment from the Dominion Government. Trend of legislation, Col. Wood added, seemed favorable to the returned man.

Referring to the world-wide movement for peace, Lieut.-Col. G. A. Wells, of Winnipeg, speaking at memorial services this afternoon, expressed the hope that the memory of those who sacrificed their lives in the war would not fade. Dead heroes of the conflict might be forgotten, he thought, in the driving endeavor to remove all traces of war.

Heavy Grain Shipments

1,771,000 Bushels Of Grain Loaded In One Day On C.P.R. Lines

Winnipeg, Man.—From farm granaries east, west, north and south, over the net work of Canadian Pacific western lines on Tuesday, September 16, there poured into freight cars 1,771,000 bushels of grain for transit, an increase of nearly 300,000 bushels over the previous day, Manitoba district showing the greatest advance for that period. The report from J. G. Sutherland, superintendent of transportation, shows 1,079 cars inspected and 891 cars loaded.

Fine weather has facilitated the movement of grain with a consequent increase in storage in country elevators, at the head of the lakes and at the Pacific Coast.

Totals for the day indicate that marketing took 404,000 bushels from Manitoba; 609,000 from Saskatchewan, and 756,000 from Alberta.

Bootlegging Of Grain

Manitoba Wheat Pool Takes Measures To Stop Practice

Winnipeg, Man.—Active campaign against the "bootlegging" of grain by members of the Manitoba Wheat Pool continues, and now nearly four score actions are pending in the courts.
